

Bäumer/Maiwald (Eds): THIEMEs Onkologische Pflege

Thieme's Cancer Care

Apr. 2008, 400 pp., 300 four-colored ill., including DVD with 49 videos, € 44.95, TN 143871, AUS

Acquiring knowledge by multimedia

- Written by **leading experts:**
 - Care topics by renowned experts
 - Medical topics by physicians with long-term experience as instructors of care personnel
- Integration of up-to-date care standards and care-related scientific insights

More fun in learning

- Friendly, four-colored layout and illustrations
- Modern concept of presentation
- Colored quickfinder for rapid orientation
- Additionally: DVD with 49 videos on care techniques, care situations, diagnosis and therapy, patient interviews, counseling, oncological rehabilitation

From the contents:

Part 1 Care and oncology

- Job description: Care of cancer patients
- Scientific aspects in the health care of cancer patients
- The science of care
- Ethics in the care of cancer patients / medical ethics

Part 2 Medical fundamentals

- Biology and pathology
- Epidemiology, risk factors, diagnostic procedures
- Fundamentals of cancer therapy

Part 3 Care of cancer patients

- Selected problems in the care of cancer patients
- Pain management
- Complementary care services
- Care of selected types of cancer

Part 4 Psychosocial field in oncology

- Coping with cancer and the quality of life
- Counseling and communication
- Death and dying

Part 5 Quality management

- Fundamentals and instruments of quality assurance

Appendix

- Questionnaire for ascertaining the level of pain
- Patient brochure on complaints in or about the oral cavity

User groups: Care personnel and physician assistants working in cancer clinics, medical practices or outpatient clinics for cancer patients, care personnel specializing in the care of cancer patients

CARE

Communicating with Turkish patients

Cerci: Wörterbuch für Gesundheitsberufe

Deutsch / Türkisch – Türkisch / Deutsch

Dictionaries for Health Professionals: German/ Turkish – Turkish / German
May 2008, 320 pp., 30 ill., including audio CD, € 34.95, TN 148361, AUS

Communicating and handling routine situations with Turkish patients

- Extensive vocabulary of health care with 12,500 specific entries each (Turkish, resp. German)
- Comprises expressions from psychology, social medicine, religion, and daily care.
- **Information inserts** on major care issues, with exemplary phrases
- Explanation of sensitive cultural topics such as religion, nutrition, etc.
- Bi-lingual, colored anatomy tables

Plus: Audio CD

- The 240 most frequent phrases in MP3 format, spoken by native speakers.
- Grouped by major topics.
- Detailed table of contents of all phrases in the audio guide
- Easy transfer of audio files, for example to iPod or MP3 player

User groups: Care personnel, physicians in clinic or practice, medical students, students of care professions

CARE

Highlight: A classic in its 15th edition!

Faller/Schünke: Der Körper des Menschen

The Human Body – Introduction to Construction and Function

15th revised ed. Apr. 2008, 830 pp., 450 ill., several detachable, poster-size, colored fold-out tables, € 27.95, TN 329715, AUS

How does the human body work? Let us show you!

Fundamentals of anatomy and physiology of the human body:

For the general public

- in a comprehensible language
- with clear correlation of images and texts by a sophisticated layout of graphics and typology
- including definitions for a better understanding
- condensed information for anyone interested in biology and medicine

For students

- Fulfilling the curricula of the medical professions
- Summaries support revision

For easy learning

- Detailed summaries and glossary
- Detachable, poster-size, colored fold-out tables of the skeleton, the vascular, and the nervous system as well as on surfaces, and palpable bone points.

New features:

- Updated and revised.
- Beautiful, new double pages as introduction to each chapter
- Colored fold-out tables in poster size that can be detached.

From the contents:

- Biology of the cell
- Genetics and evolution
- Tissues
- Musculoskeletal system
- Heart and vascular system
- Blood, immune system, and lymphatic organs
- Endocrine system
- Respiratory system
- Alimentary system
- Kidneys and lower urinary tract
- Genitalia
- Reproduction, development, and birth
- Central and peripheral nervous system
- Autonomous nervous system
- Sensory organs
- Skin and skin appendages
- Appendix with abbreviations, measures and dimensions, glossary, subject index

User groups: Care professionals in training or practice, medical students, physiotherapists

CARE

Anatomic illustrations

Faller/Schünke: Der Körper des Menschen

The Human Body – Illustrations for Lessons or Lectures

From the 15th ed. Apr. 2008, graphic CD with 450 ill., € 69.95, TN 149281, AUS

- All 450 illustrations presented in the book as JPEG-files for instruction purposes.
- Can easily be inserted into any popular text or presentation software.
- May be used in various media (worksheets, transparencies, presentations)
- Brilliant color printouts and pin sharp photocopies directly from the computer – can be projected onto a screen by beamer

User groups: Teachers of care professions, lecturers of anatomy and physiology

MEDICAL SCIENCE STUDIES / NEONATOLOGY

Checklists

Roos/Genzel-Boroviczény/Proquitté: Checkliste Neonatologie

Neonatology Checklist

3rd completely revised ed. Apr. 2008, 472 pp., 109 ill., € 34.95, TN 125053, AUS

The ABC of neonatology – everything needed for daily routine

The reliable companion

- All work techniques
- Practical tips and hints for beginners
- Specific details for advanced neonatologists

- Quick and specific information on diagnosis and therapy – for ward or ambulance
- Care recommendations

New features

- Up-to-date
- Important chapters completely rewritten.

From the contents:

- Gray part: All important work and examination techniques. Advice on guiding parents and answers to frequent questions.
- Blue part: Diagnostics and therapy of neonatological clinical pictures. Care of neonates in the delivery room and in the intensive care unit. Nutrition.
- Red part: Reanimation and emergencies situations in the delivery room. Detailed list of medications; drugs in cases of liver or kidney insufficiency, medication for neonates being breast-feed.
- Appendix: Percentile curves and forms, laboratory normal values, and important laboratory addresses

User groups: Practical course physicians and residents in specialist training for pediatrics or gynecology, students in their practical year

PHYSIOTHERAPIY

Neurology, physiotherapy, and the McKenzie concept

Brötz/Weller: physiofachbuch: Diagnostik und Therapie bei Bandscheibenschäden

Physiotherapeutic Handbook: Diagnosis and Therapy of Discopathies

3rd updated ed. May 2008, 250 pp., 180 ill., € 49.95, TN 132103, AUS

Patients with discopathies are part of the daily routine of physiotherapists. Careful examinations exceeding the evaluation of structures and functions according to clinical reasoning and evidence-based therapy are quality characteristics of modern physiotherapy. Thus great importance is attached to the therapy based on the McKenzie concept.

The positive effect of the McKenzie concept

- Everything on pathology of discopathy – pain and functional impairment
- Manual therapeutic concept – based on the concept of McKenzie
- Fundamentals on the respective anatomy, physiology, and epidemiology
- Survey of selected studies on the efficacy of physiotherapy for discopathies

New features:

- Chapter on stabilization
- Supplementation of pharmaceutical therapy
- Revision of medical diagnostics and physiotherapeutical rehabilitation
- Integration of the latest insights from recent studies

User groups: Physiotherapists working in the areas of neurology or orthopedics
