

Preview 2/2009

Dear colleagues and publishers,

Please note that the minimum advance payment upon signature of contract in 2009 is **€ 2,600.00**. Please do not order titles for subjects which would in your language not allow for a print run or a retail price high enough to cope with this amount.

Here are the contents of our current preview:

	<i>Page</i>
1. Chemistry: Thieme´s German Language Titles	2
2. Medical Doctors: Thieme´s German Language Titles	
Anesthesiology / Intensive Therapy	3
Dermatology	3
ENT	4
Hygiene	4
Imaging Procedures/Radiology	5
Internal Medicine	6
Surgery	8
2. Students, Physiotherapists et al.: Thieme´s German Language Titles	
Care	10
Medical Science Studies	11
Logopedics	12
Physiotherapy	13
3. Medical Doctors and Students: Thieme´s English Language Titles	
Complementary Medicine	14
Orthopedics	14
Otolaryngology	15
Radiology	15

If you are interested in any of the titles, please do not hesitate to send me an email, mentioning author, original title and title number (TN).

With best regards, cordiali saluti, saludos cordiales et mes salutations les meilleures,

1. Chemistry: Thieme's GERMAN Language Titles

CHEMISTRY

Fundamentals, classes of compounds, reactions, concepts, molecular structures, natural materials

Breitmaier/Jung: Organische Chemie

Organic Chemistry

6th revised ed. Apr. 2009, 1,066 pp., numerous ill. and tables, € 49.95, TN 541506, CHEMIE

Comprehensible

- Consistently clear systematics
- Easy to read, sophisticated didactics, concise

Clear

- Clear structure in an attractive, reader-friendly layout
- Numerous illustrations and tables

Interactive

- All illustrations, tables, molecular models, table of contents, and more than 400 examination questions are available online.

New features

- Organosilicium compounds and steroids
- Protein structures and enzyme-substrate interactions (peptides and proteins)
- Extended treatment of organometallic compounds
- **List of reactions with condensed version of reaction equations**
- **Bibliography includes internet sources.**

User groups: Students and lecturers of chemistry (both beginner and advanced students), biochemistry, food chemistry, pharmaceuticals or biology

All rights available.

2. Medical Doctors: Thieme's GERMAN Language Titles

ANESTHESIOLOGY / INTENSIVE THERAPY

Memorix

Müller/Thöns: MEMORIX Kindernotfälle

MEMORIX Pediatric Emergency Cases

Jun. 2009, 240 pp., 210 ill., € 24.95, TN 149251, K&P

Initial care of children in emergency situations usually is not carried out by pediatricians but rather by physicians or casualty physicians, who only rarely encounter the peculiarities of pediatric cases in their daily routine. **Little children – big challenges:**

- **Absolutely useful in practice:** Clear presentation of the most frequent emergency situations involving infants or children.
- **From practice for practice:** Specific instructions and recommendations for daily routine
- **Everything at a glance:** Short, concise texts, expressive illustrations and therapeutic recommendations that can be grasped quickly.
- **Extensive subject matter:** Clearly structured
- **Quick referencing when pressed for time:** Easy orientation and consistently structured chapters as well as numerous orientation guide lines
- **Always at hand:** Handy format, ideal to fit the paramedic's or physician's coat pocket.

User groups: Physicians working with casualties or emergencies – anesthetists or residents specializing in anesthesiology or intensive medicine

All rights available.

DERMATOLOGY

Coproduction

Röcken et al.: Taschenatlas Dermatologie

Pocket Atlas Dermatology – Fundamentals, Diagnostics, Clinic

May 2009, 420 pp., 190 plates, € 49.95, TN 142521, K&P

In daily routine, physicians require a concise book that allows quick referencing in cases of common diseases. Extensive illustration is a 'must' especially in dermatology as this is a highly descriptive and observational subject.

Dermatology at a glance

- **Handy, short reference** with diagnostics and therapy of the most important dermatological clinical pictures – short and concise
- **Comprehensible presentation of complex correlations** and therapeutic principles in pertinent charts and precise texts
- Numerous illustrations and plates for **visual comprehension**
- Visualization of complex correlations and techniques including actual findings
- Proven pocket atlas concept with side-by-side presentation of texts and illustrated pages

User groups: Specialists or physicians specializing in dermatology or venereal diseases, medical students

Translation rights sold for the following languages in coproduction: French, Portuguese, Spanish.

ENT / OTORHINOLARYNGOLOGY

Marek: Psychosomatik in der HNO-Heilkunde

Psychosomatics in Otorhinolaryngology

May 2009, 210 pp., 40 ill., € 69.95, TN 149711, K&P

The field of otorhinolaryngology deals with organ structures devoted to perception, motion and sensation. Thus, the likelihood that they serve as the origin of psychosomatic disorders is higher than for many other medical areas.

With emphasis on ENT

- Directly linked by exemplary cases from clinical otorhinolaryngology
- **Cardinal symptoms** are clearly identified.
- No incomprehensible nomenclature, much rather adapted to the needs of ENT specialists.
- The clear delineation between psychogenic disorder and organic disease indicates the correct therapeutic path.
- **Client-centered techniques and interventional methods help save time.**

User groups: ENT specialists in clinic or practice, ENT residents

All rights available.

HYGIENE

Prevention, laboratory diagnostics, antimicrobial therapy

Kappstein: Nosokomiale Infektionen

Nosocomial Infections

4th completely revised ed. May 2009, 440 pp., 60 ill., € 69.95, TN 148474, K&P

The number of nosocomial infections (i.e. acquired in hospitals) is steadily rising and thus represents a large challenge to all physicians. The difficulty is that these pathogens develop resistance towards antibiotics that usually are effective, but which therefore can no longer be used. Infections that initially appear harmless can quickly lead to sepsis and death.

Effective guide on options for clinical prevention and therapy

- **Detailed information** on genesis, prevention, diagnostics, and antibiotic therapy of infections
- Specific evidence-based medical measures
- **Important fundamentals** on principle transmission paths of pathogens and the genesis of infections
- Recommendations on basic laboratory diagnostics

From the contents:

- Staff and organizational structures to ensure hospital hygiene.
- Genesis of infections
- Prevention of nosocomial infections
- Monitoring of nosocomial infections and multiresistant pathogens
- Laboratory diagnostics if indications for infections are found.
- Antibiotics and antimycotics for therapy and prevention

User groups: All physicians in clinic or training, microbiologists, public health physicians

All rights available.

IMAGING PROCEDURES / RADIOLOGY

Forsting et al.: MRT der Wirbelsäule und des Spinalkanals

MRI of the Spine and the Spinal Canal

2nd completely revised and extended ed. May. 2009, 400 pp., 1,140 ill. and tables, € 149.95, TN 117122, K&P

Image by image more safety – the standard in MRI of the spine and spinal canal

- **Signpost to highly qualified MRI diagnostics**
- Applications and possibilities that make sense.
- **Systematic tabular surveys on indications, diagnoses**, etc. offer an outline and quick decision-making ability.
- For quick referencing and **image comparison directly at the workplace**
- **Easily comprehensible access to MR physics**: Finally understanding the technique.
- Optimized examination technique, suitable measuring sequences with tabular protocols, avoiding artifacts.
- **Condensed summaries** at the end of chapters for qualified outlines

New features

- Completely updated and structured
- More than 1,100 superlative images, two-thirds of which are new.
- Important facts highlighted by mnemonics or structured tables.
- Recent results from literature for routine knowledge
- Practical instructions on examination strategies

User groups: Radiologists in training, clinic or practice, orthopedists, trauma surgeons, neuroradiologists, neurologists, neurosurgeons

All rights available.

Reiter/Reiter: MR-Herzbildgebung interaktiv

Interactive MR Imaging of the Heart

May 2009, 500-700 MB USB stick, € 249.95, TN 148551, K&P

The classic explanation of MR physics uses mathematical formulas, which often require time-consuming study. This instruction program illustrates the complex technical background of MRI by animations and videos. With the help of interactive “to-do” sheets the effects of changed sequence parameters on the produced image can be simulated. The interactive approach allows beginners to produce images of optimal quality – step by step.

Training MR sequence optimization and post-processing technique

- Interactive instruction program for **MR imaging technique of the heart**
 - **Animated textbook part:** Visualizing “dry” MR physics with the help of illustrative animations.
 - **Including anatomy atlas:** Scrolling through relevant structures level by level.
 - **Interactive “to-do” sheets:** How to carry out specific measurements (theory, planning, training by exemplary cases, effects of changed parameters, post-processing).
 - Dynamic heart images: Presented by videos.
 - **Understanding the technique:** How to obtain better images.

User groups: Radiologists and cardiologists in clinic or practice

All rights available. Bulk sale to Siemens expected.

Schaefer-Prokop et al.: Radiolog. Diagnostik in der Intensivmedizin

Radiological Diagnostics in Intensive Therapy

May 2009, 290 pp., 590 ill., € 119.95, TN 111761, K&P

(Reference Series Radiological Diagnostics)

On the intensive care unit, radiologists need to keep cool and guarantee competent diagnostics. Due to being pressed for time and the limited cooperation capability of these patients, radiological diagnostics often cannot be carried out as extensively as in normal, non-acute situations.

Being optimally prepared for the intensive care unit – managing emergency situations, making assured decisions

- Concise presentation of up-to-date standard of knowledge of **radiological techniques of ICU**
- **At last reliable diagnoses algorithms for acute situations:** Carrying out the correct diagnostic measures quickly and competently.
- Important facts highlighted by mnemonics or structured tables, recommendations for image interpretation.
- **Problem-oriented approach:** Diagnostic solution strategies based on intensive therapeutic findings.
- **For an optimized communication** between radiologists and intensive therapists
- **Advice on interpretation of findings in case of sub-optimal imaging:** How limited diagnostics can still lead to acceptable results.
- With topical focus on **pediatric intensive care patients**
- **Interdisciplinary team of authors:** Experts both from radiology and intensive therapy

User groups: Radiologists in training, clinic, or practice, pediatric radiologists, intensive therapists

All rights available.

INTERNAL MEDICINE / CARDIOLOGY

Goss et al.: Prakt. Telemedizin in Kardiologie und Hypertensiologie

Practical Telemedicine in Cardiology and Hypertension

Apr. 2009, 220 pp., 130 ill., € 89.95, TN 149931, K&P

Telecardiology finds its role in the care and aftercare of patients with cardiac problems. For this, important cardiovascular data is transmitted to the physician via mobile network, internet or telephone. As soon as the implant registers a significant arrhythmia of the heart or a technical malfunction, the physician is notified immediately. **Advantages of telecardiology:** Continued monitoring of cardiovascular data; Less frequent follow-up care consultations; More reliability in cases of complications or technical problems; Improved quality of life for patients; Saving of time for physicians.

General aspects

- Technical fundamentals: Infrastructure of electronic data transmission, sensor technology for telemedical applications
- Data integrity, legal and economic aspects

Practice-oriented structure of individual chapters

- Important information has been condensed for rapid survey.
- Precise instructions on telemetry procedure
- Illustrative exemplary cases and original computer printouts
- Consistent contribution structure

User groups: Cardiologists, internists with focus on cardiology

All rights available.

INTERNAL MEDICINE / GASTROENTEROLOGY

Everything for ward or practice

Koop (Ed.): Gastroenterologie compact

Condensed Gastroenterology

2nd completely revised, updated and extended ed. Jun. 2009, 370 pp., 40 ill., € 79.95, TN 126312, K&P

The *compact concept* is highly suitable as data collection, respectively short reference textbook for daily routine in clinic as well as for cramming. The distinctive characteristic is a maximized density of contents together with focus on contents useful in daily medical routine (nosology, diagnostics, therapy). **Handbook as well as reference manual: Rapid access – rapid help.**

Covering everything!

- **Systematic and sound presentation** of more than 400 clinical pictures
- **Special gastroenterological diagnostics**, patient counseling

Explaining everything!

- **Differential diagnosis** by cardinal symptoms
- **Strictly oriented on diagnosis and therapy** with specific procedural guidelines.

New features

- 15 completely new chapters, among others: Collagen diseases, GIST (gastrointestinal stromal tumors), side effects of chemotherapy in the GI tract, mastocytosis, autoimmune pancreatitis, esophageal pressure measurements, and gastric emptying measurements
- EBM and guidelines have been taken into consideration.
- Increased emphasis on practice-orientation by flowcharts
- Didactic guidance further improved by colored layout.

User groups: Physicians in specialist training for internal medicine, gastroenterologists, internists, general practitioners

All rights available.

INTERNAL MEDICINE / ONCOLOGY

Genesis, progression, clinical aspects

Wagener/Müller: Molekulare Onkologie

Molecular Oncology

3rd completely revised, updated and extended ed. May 2009, 450 pp., 380 ill., € 99.95, TN 103513, K&P

Molecular oncology deals with the path from damage to the cell to cancer to metastasis as well as possibilities for diagnostics and therapy on the molecular level. The molecular level is extremely complicated and as yet still not well understood. Many work groups contribute almost daily to the increase in knowledge. The molecular pathfinder: Essential paths in tumor genesis – compiled and evaluated. Easily comprehensible presentation of complex contents (cascades, receptors, gene regulation). Complex contexts illustrated by numerous diagrams. Didactically refined, four-colored layout. Additional animations of cascade chains on the homepage.

New features: Completely revised, updated and extended by new chapters: Paths of oncogenesis; Integration of new models using mice. Examples of practical applications and clinical context. Link to "oncoview" with many instructive films (animated diagrams).

User groups: Internists, physicians specializing in internal medicine or oncology, students and graduate students of life sciences

All rights available.

INTERNAL MEDICINE / PNEUMOLOGY

Technique and medical findings made comprehensible

Kroidl/Schwarz/Lehnigk: Kursbuch Spiroergometrie

Practical Spiroergometry

2nd updated and extended ed. Jul. 2009, 300 pp., 300 ill., € 99.95, TN 143442, K&P

Spiroergometry is applied both by respiratory physicians as well as cardiologists. This method for the objective evaluation of fitness is used to answer such questions as how much stress a patient can tolerate or whether the patient is able to work. The technique and interpretation of these measurements is quite difficult to explain and understand.

A book that has proved its worth in courses – ideal for learning, applying and interpreting this method

Learning and applying spiroergometry

- Information meeting all demands.
- Indications and influencing factors
- All common types of endurance tests and examination methods

Interpreting spiroergometric findings correctly

- Complex fundamentals presented in an easily appreciable manner.
- Comprehensible interpretation of measurement values
- Detailed explanation of the Wassermann-9-graph representation
- Supplying numerous exemplary cases from the practice.

New features

Completely revised, updated and extended by new chapters:

- Plausibility and quality of measurements
- Functional laboratory: Pitfalls and how to avoid them.
- Blood gases
- Breathing strategies
- Counseling in health and fitness sports as well as popular sports

User groups: Respiratory physicians, cardiologists, sports physicians

All rights available.

SURGERY

Schumpelick: Operationsatlas Chirurgie

Surgical Atlas

3rd corrected ed. Apr. 2009, 620 pp., 1,200 ill., € 129.95, TN 140633, K&P

Understanding, mastering, and knowing what is what in surgery

- The proven reference manual covering the procedure of the most common and most important operations in surgical practice.
- Excellent basis for assisting or instructions on how to carry out surgery oneself.
- Concise knowledge at a favorable price
- Excellent orientation throughout the entire book:
 - Clearly structured with introductory texts for every operation.
 - Atlas section with drawings illustrating step by step practical procedure and colored layout.

User groups: Residents specializing in general or visceral surgery

All rights available.

Schwarz/Reutter (Eds): Allgemein- und Viszeralchirurgie

General and Visceral Surgery

6th completely revised ed. May 2009, 440 pp., 170 ill., € 79.95, TN 126346, K&P

This work concisely imparts the latest specialist knowledge of general and visceral surgery.

- Optimally structured and with easily accessible and clearly presented information
- Study-friendly, consistent structure with highlighted key terms and mnemonics in an extra column
- Comprises all important topics and up-to-date surgical techniques from general and visceral surgery.
- Incorporates fundamentals on anatomy, etiology, and classification as well as concise presentations of symptomatology, diagnostics, and therapy, including instructive descriptions of surgical techniques as well as follow-up care.

New features

- Focus on general and visceral surgery
- All chapters have been rewritten, taking into consideration modern procedures such as minimally invasive or fast-track surgery

User groups: Physicians specializing in surgery (general and/or visceral surgery)

All rights available.

3. Students, Nurses, Physiotherapists, Logopedists: Thieme's GERMAN Language Titles

CARE

Deutsch et al.: Pädiatrie und Kinderchirurgie für Pflegeberufe

Pediatrics and Pediatric Surgery for Care Professionals

Jun. 2009, 550 pp., 350 ill., € 49.95, TN 142811, AUS

This book combines the knowledge from pediatrics and pediatric surgery in a unique manner. Together, a pediatrician and a pediatric surgeon describe the clinical pictures. Depending on the respective focus, one specialist describes the fundamentals and the other provides supplements. Pediatrics and pediatric surgery combined – this is an absolutely new approach! Textbook and reference manual combined. The concept and structure of this book is that students learn to combine knowledge from two disciplines. Covering all pathological contents.

From the contents:

- Part I Fundamentals of pediatrics and pediatric surgery
- Part II Diagnostics
- Part III General diseases
- Part IV Organ-specific diseases

User groups: Students of health care, pediatric care, or nursing, lecturers and teachers

All rights available.

Profession evaluation and successful treatment of wounds

Voggenreiter/Dold: Wundtherapie

Wound Therapy

2nd revised ed. Apr. 2009, 180 pp., 140 ill., partly in color, € 34.95, TN 136142, AUS

Including DVD with 15 films

Correct decisions in cases of difficult wounds: **Up-to-date and practically relevant**

- Knowledge of modern wound care from the medical and caretaking point of view
- Excellent theoretical and practical information in the book and DVD films
- Precise answers to all questions of modern wound therapy in a comprehensible presentation
- Specific evaluation, selection, indication, and application of therapeutic agents and wound dressings both in illustration and text
- Four-colored photographs of the courses of wound healing that are true to detail illustrate the path of healing.

Practice made easy

- Exemplary films on DVD that are true to detail: How to change dressings on different parts of the body, surgical and hygienic hand disinfection

New features

- In-depth treatment of bedsores
- New chapters: Multiresistant pathogens, Vac therapy, positioning, tree diagram for the selection of suitable therapeutic products, vascular emergencies

User groups: Licensed care professionals working in outpatient care, nursing homes, or hospitals

All rights available.

MEDICAL SCIENCE STUDIES

Anatomy – function – clinic

Bähr/Frotscher, Neurologisch-topische Diagnostik

Neurological Topical Diagnostics

9th revised ed. Apr. 2009, 540 pp., 400 ill. and four-colored drawings, € 29.95, TN 535809, AUS

Neurological topical diagnostics is the fundamental skill of practicing physicians in neurology: The location of the lesion within the nervous system is inferred from the clinical findings.

- **Unique concept:** Integrated presentation of anatomy and function of the nervous system as well as neurological syndromes
- **Suitable both for students and physicians:** For students the clinical relevance of the subject matter is always at hand, physicians review neuroanatomical fundamentals
- **The very latest** in the age of interdisciplinary teaching methods, the cross-disciplinary presentation of this book is more relevant than ever before.
- **Numerous case histories** impart clinical relevance.
- **High-quality production** – four-colored, didactic anatomical drawings as well as numerous CT and MR images

New feature

Corrected and updated.

User groups: Medical students in pre-clinical or clinic semesters, neurologists, anatomists

Translation rights sold for the following languages: Greek, Indonesian, Portuguese, and Russian

Series: Condensed Textbooks

Behrbohm et al.: Kurzlehrbuch Hals-Nasen-Ohren-Heilkunde

Condensed Textbook Otorhinolaryngology

May 2009, 300 pp., 250 four-colored ill., € 24.95, TN 147871, AUS

Concise survey of the entire knowledge of otorhinolaryngology. Relevant for examinations.

- Agreeable reading, easily manageable within a short time
- **Modern, up-to-date, and practically relevant** with numerous practical tips, exemplary clinical cases and interesting discursions
- Four-colored throughout with numerous memorable illustrations and tables

The successful condensed textbook concept

- Introductory cases and key points at the beginning of each chapter
- Numerous practical hints and inserted mnemonics.
- Discursions offering in-depth knowledge, historical events, and much more.
- Clear layout

User groups: Medical students in clinical semesters

All rights available.

Series: Condensed Textbooks**Frahm et al.: Kurzlehrbuch Pathologie***Condensed Textbook Pathology*

May 2009, 640 pp., 250 four-colored ill., € 34.95, TN 143251, AUS

Learning *the* central basic course in medicine within a manageable time span: This textbook induces an understanding for pathological reactions of all organs and organ systems and thus represents a valuable framework for passing the exam.

Modern and practice-oriented path to acquiring pathology

- **The entire knowledge relevant for pathology exams:** General fundamentals of pathology as well as special pathology of individual organs and organ systems. Also focusing on histopathology.
- **Numerous clinical contexts** illustrate the importance of pathology for medical practice.
- **Exemplary cases** from the pathologist's point of view as well as **clinical-pathological conferences** offer realistic insight into the daily routine of pathologists.
- **Richly illustrated**, particularly numerous four-colored photographs of histopathological specimen
- **Glossary** of fundamental pathological terms

The successful condensed textbook concept

- **Easy orientation:** Clear structure, concise and comprehensible presentation of the subject matter
- **Outstanding didactics:** Key points at the beginning of each chapter section highlight the quintessence, numerous mnemonics and practical hints, exemplary cases

User groups: Medical students in clinical semesters

All rights available.

LOGOPEDICS*Logopedics forum***Weigl et al.: HOT – ein handlungsorientierter Therapieansatz***Activity-oriented Therapeutic Approach*

2nd completely revised ed. Jun. 2009, 180 pp., 70 ill., € 39.95, TN 124112, AUS

Speech develops in close contact to non-verbal cognitive processes occurring on the motoric level. The activity-oriented therapeutic approach combines perception, motoricity, motivation, creativity and emotionality of a child with its activity and speech and thus promotes linguistic competence as a whole. Effective therapeutic method for children with speech development disorders: Presentation of the model of "interactive intervention strategies" on which the activity-oriented therapeutic approach is based. Sensible routine actions that are put into words accordingly. The motivation, creativity, emotionality and individuality of children are taken into consideration. Also suited for children with ADD (attention deficiency disorder). Exemplary cases illustrate therapeutic procedures. Therapeutic materials stimulate one's own therapeutic planning and simplify practical application.

New features

- New exemplary cases
- Therapy of mentally handicapped children and Down's syndrome
- Group therapy
- Theoretical fundamentals of the activity-oriented therapeutic approach have been completely revised.

User groups: Logopedists, speech therapists

Spanish translation rights sold for the previous edition.

PHYSIOTHERAPY

Therapeutic concepts in physiotherapy

Beyerlein (Ed.): Mulligan

The Mulligan Concept

May 2009, 100 pp., 50 ill., € 29.95, TN 149741, AUS

The Mulligan concept offers the possibility to integrate active movement within classic manual therapy in a manner that is gentle on structures and joints. As supplement to manual therapy the Mulligan concept comprises examination and therapeutic techniques for the spine and the extremities. This is the first book on the Mulligan concept in German language. **The Mulligan concept – including latest developments:**

- Ideal for becoming acquainted with the examination and treatment principle.
- Usefulness in prevention, therapy, and rehabilitation
- Scientific verification of effectiveness and need of further research
- International team of approved Mulligan instructors

From the contents

- History of the Mulligan concept
- The Mulligan concept today
- Practical realization: Application of the concept
- Significance of the concept from the scientific health perspective
- Research on the concept
- Looking abroad

User groups: Physiotherapists manual therapists, orthopedists

All rights available.

Physio-book

Wiesner: Übungen in der Physiotherapie

Exercises in Physiotherapy

Jun. 2009, 170 pp., 200 ill., € 29.95, TN 149761, AUS

Including CD

Every physiotherapist needs a large repertory of exercises: On the one hand they are indispensable for therapy, on the other hand it is important to be able to set "homework" for patients. Compiling evidence-based exercises individually: Exercises for daily routine: By an experienced authoress. Homework for patients: All exercises may be printed or copied. Explanation of the step-by-step intensification of many exercises: Exercises adapted to the individual patient. Something for everyone: Each exercise comprises a page for the therapist and one for the patient. The correct motion sequence: Illustrated by excellent illustrations.

From the contents:

- Part on fundamentals
- 50 exercises: Cervical spine, thoracic spine, shoulder girdle, shoulder joint, elbows, lumbar spine, hips, and others
- Exemplary cases demonstrate the exercises on, respectively by the patient.
- Including CD with ready-to-print texts

User groups: Students of physiotherapy, young professionals, physiotherapists working in orthopedics

All rights available.

4. Medical Doctors and Students: Thieme's ENGLISH Language Titles

COMPLIMENTARY MEDICINE

The Comprehensive Guide for Practitioners

Zuther: Lymphedema Management

2nd ed., June 2009, 280 pp., 230 ill., € 59.95, TN 139482, TPS eigen

- Comprehensive and exceptionally organized reference practical for daily use
- Clearly outlines anatomy, physiology, and pathology for easy mastery of the complex lymphatic system

New:

- A thorough update of the first edition
- Informations on the axillary web syndrome in lymphedema

User group: Practitioners in the field of complementary medicine

All rights available.

ORTHOPEDICS

AO Manual of Fracture Management

Jupiter: Elbow and Forearm (AO-title)

May 2009, 550 pp., 1,540 ill., € 269.95, TN 149271, TPS eigen

A successor to Dr. Jupiter's Hand and Wrist fracture manual, this book provides a comprehensive guide to managing the full range of fracture of the elbow and forearm.

- The first part of the book provides a thorough review of general principles, covering anatomy, classification, and surgical techniques.
- Each chapter in the 2nd part addresses a specific fracture type.
- Using a consistent format that enhances ease of use, these chapters lead the clinician through indications, equipment, operative techniques, pearls and pitfalls.

User groups: Orthopaedists, hand surgeons

All rights available.

OTOLARYNGOLOGY

Bull: Color Atlas of ENT Diagnosis

5th ed. Aug. 2009, 300 pp., 660 ill., € 34.95, TN 129395, TPS eigen

- Essential overview of ENT conditions
- Concisely written and brilliantly illustrated with a wealth of high-quality color photographs and drawings

New:

- Thoroughly revised and updated edition to cover the latest developments
- New texts and images have been added throughout, with a stronger emphasis on pediatric otolaryngology and the head and neck

The text is divided into 5 main sections: ENT examination, the ear, the nose, the pharynx and larynx, and the head and neck. The focus is on the examination and diagnosis of both common and atypical disorders, with brief details of medical and surgical treatment where appropriate.

User groups: Students, residents in otolaryngology, otology, rhinology, primary care

For the previous edition, rights for the following languages have been sold: Greek, Japanese, Portuguese, Russian, Turkish.

Gersdorff/Gérard: Atlas of Middle Ear Surgery

Oct. 2009, 152 pp., 240 color ill., € 109.95, TN 145041, TPS eigen

This practical surgical atlas illustrates the modern surgical management of tympanic membrane abnormalities, chronic otitis media and cholesteatoma, as well as ossicular chain dysfunction.

- Systematic step-by-step descriptions of the surgical techniques used in the different specific pathologic situations
- Combination of exceptionally beautiful, full-color drawings with concise explanatory texts and comments
- The drawings offer a balanced view between precise anatomical and schematic views

User groups: Residents and clinicians in otolaryngology and otology

All rights available.

RADIOLOGY

Van Rijn/Blickman: Differential Diagnosis in Pediatric Imaging

Aug. 2009, 700 pp., 1,300 ill., € 179.95, TN 143711, TPS eigen

- Along with the differential diagnoses, helpful clinical hints for further evaluation or for narrowing the diagnosis are provided
- Comprehensive differential diagnostic tables
- Excellent illustrations from all radiologic modalities
- Provided by 20 top international specialists in the field

User groups: Radiologists, pediatricians

All rights available.
