

## Preview 3-4/2009

### Thieme Medical Publishers, New York

*Dear colleagues and publishers,*

*We are presenting you here-attached the titles published by our New York colleagues.*

***Please note that the minimum advance payment upon signature of contract in 2009 is***

***€ 2,600.00.***

***Please do not order titles for subjects which would in your language not allow for a print run or a retail price high enough to cope with this amount.***

*Here are the contents of our current preview:*

	<i>Page</i>
<i>Neurosurgery</i>	<i>2</i>
<i>Oncology</i>	<i>4</i>
<i>Ophthalmology</i>	<i>4</i>
<i>Orthopedics</i>	<i>5</i>
<i>Otolaryngology</i>	<i>5</i>
<i>Radiology</i>	<i>6</i>

*If you are interested in any of the titles, please do not hesitate to send me an email, mentioning author, original title and title number (TN).*

*With best regards, cordiali saluti, saludos cordiales et mes salutations les meilleures,*

*Barbara Pfeifer, International Rights Manager*

## NEUROSURGERY

### **Citow et al.: Comprehensive Neurosurgery Board Review**

2nd revised and updated ed., Sept. 2009, 560 pp., 430 ill., € 109.95, TN 891031, TPN

- Current knowledge and essential information
- Up-to-date coverage of classic symptoms and signs of common neurosurgical diseases

#### **New**

- Updated information on molecular and genetic changes in neurosurgical conditions
- Descriptions of new diseases
- New images, removed repetition between chapters

**User group:** Residents and practitioners in neurosurgery

*All rights available.*

---

### *A co-publication of Thieme and the AANS*

### **Lawton: A Microsurgical Guide to Clipping Common Aneurysms**

Aug. 2009, 250 pp., 250 ill., € 139.95, TN 891054, TPN

- Detailed description of techniques for clipping the seven the most common aneurysms
- Each chapter presents relevant surgical anatomy, technical pearls for effective dissection, and endovascular perspectives
- Case example offer invaluable insight in decision-making and practical issues
- Internationally renowned authors

**User group:** Clinicians, residents, and fellows in neurosurgery

*All rights available.*

---

### **Lunsford/Sheehan: Intracranial Stereotactic Radiosurgery**

July 2009, 200 pp., 120 ill., € 149.95, TN 891200, TPN

- Comprehensive reference of all currently available treatment systems for radiosurgery of the brain
- Coverage of single and multisession radiosurgery with descriptions of indications and benefits of each approach
- More than 100 high-quality illustrations
- Perspectives from international experts in the field

**User group:** Clinicians and residents in neurosurgery, radiation oncology, neuroradiology

*All rights available.*

---

## **Kranzler: The Greenberg Rapid Review. A Companion to the 6<sup>th</sup> and 7<sup>th</sup> ed.**

Dec. 2009, 640 pp., 18 ill., € 79.95, TN 891195, TPN

### **The ideal addition for all publishers who have licensed the 6<sup>th</sup> or 7<sup>th</sup> ed. of Greenberg's "Handbook of Neurosurgery"!**

- The book is intended for neurosurgery residents, fellows, and neurosurgeons who are preparing for board and recertification exams or who wish to review the content of the neurosurgery "bible".
- The book requires the student to answer questions in a sequential fashion though a full discussion of a neurosurgical topic. Other question and answer books skip from subject to subject and do not fully explore each topic in question format.
- This book requires the student to really know the information, not merely guess or be reminded by/from a list of possible answers. The student must actually generate or fill in the correct words from his fund of knowledge.
- The book utilizes the most acclaimed reference text that students have shown they respect through its six editions. The answers are not placed in other parts of the book and re-written as a new text, but referred to as precisely as possible by millimeters from the top of the page to direct the student to expanded context and perspective in the reference text.

### **Sales Arguments:**

- The study guide contains nearly 2,000 questions and answers.
- Questions are in true/false and short answer format to facilitate rapid review
- Answers are on the same page as the questions to facilitate fast study.
- Content organization mirrors Greenberg AND questions are referenced to specific pages of Greenberg
- Much of the content was developed in conjunction with the Chicago Review Course in Neurological Surgery, of which the author is a coordinator
- The format not only breaks complex subjects into digestible bits, but the progressive withdrawal of cues forces the user to recall more and more details.
- Emphasizes repetition and alternate arrangements of the material for comprehension

**User group:** Neurosurgery residents, fellows, and neurosurgeons who are preparing for board and recertification exams

**All rights available.**

---

## **Questions and Answers**

### **Nader/Sabbagh: Neurosurgery Case Review**

Dec. 2009, 440 pp., 200 ill., € 109.95, TN 891052, TPN

- Ideal resource for board exam preparation with thorough and concise case presentations
- The essentials of neurosurgery in a user-friendly question and answer format
- Contributions from internationally recognized authorities
- Succinct bullet-point format and consistent presentation in each chapter for rapid review of essential concepts
- More than 200 high-quality images demonstrate important concepts

**User group:** Residents and fellows in neurosurgery

**All rights available.**

---

## Shaya et al.: Neurosurgery Rounds: Questions and Answers

Sept. 2009, 300 pp., 20 ill., € 29.95, TN 890499, TPN

- Ideal review text and study guide enabling readers to tackle neurosurgery in a convenient Q&A-format
- Key clinical questions are immediately followed by a concise, paragraph-length answer supplemented with tables, outlines, lists, and cases
- Excellent radiographic and pathologic images, as well as anatomy diagrams

**User group:** Clinicians in neurosurgery

*All rights available.*

---

## ONCOLOGY

### Donald: The Difficult Case in Head and Neck Cancer Surgery

July 2009, 600 pp., 1,000 ill., € 179.95, TN 127491, TPN

- All information needed to successfully treat difficult and complex cases in head and neck cancer
- Endoscopic procedures, skull base surgery, laryngeal surgery, and reconstructive surgery
- High-quality illustrations showing precisely how to do the complex operative procedures
- Nowhere else can a surgeon find the details of complex surgical procedures to fix problems

**User group:** Clinicians in otolaryngology, head and neck surgery, oncology

*All rights available.*

---

## OPHTHALMOLOGY

*The Quick-Reference Manual for Diagnosis and Treatment*

### Agarwal/Jacob: Color Atlas of Ophthalmology

2nd ed., Sept. 2009, 580 pp., 610 ill., € 59.95, TN 891211, TPN

- Coverage of current medical management and surgical treatments including discussion of the latest refractive surgery techniques and treatment for cataracts

**New**

- Updated content and more detailed information
- New photos and illustrations

**User group:** Clinicians and residents in ophthalmology, optometry, primary care, emergency medicine

*The first edition was published under Pahlavi/Mandava, The Meeth Pocket Atlas.*

*For the previous edition, rights were sold for the following languages: French (Flammarion), Chinese (Liaoning).*

---

## ORTHOPEDICS

### Phillips/Laurysen: The Lumbar Intervertebral Disc

Sept. 2009, 330 pp., 240 ill., € 139.95, TN 891048, TPN

Degenerative disorders of the lumbar spine and diseases of the intervertebral disc are a major focus of contemporary spinal care.

- Comprehensive, state-of-the-art source of the understanding of, and treatment approaches directed at, diseases of the lumbar intervertebral disc
- Evidence-based knowledge and care guidelines by noted experts in the field

**User group:** Clinicians in orthopedics, neurosurgery, trauma management

*All rights available.*

---

## OTOLARYNGOLOGY

### Blitzer et al.: Neurologic Disorders of the Larynx

2nd fully revised ed., July 2009, 290 pp., 100 ill., € 99.95, TN 890498, TPN

- The must-have guide to neurologic disorders of the larynx.

#### **New**

- New chapters on swallowing physiology, functional endoscopic evaluation of swallowing and sensory testing, Parkinson's Disease, neurologic disorders of swallowing and the larynx in children, and a special chapter on "New Horizons"
- Advances made in neurolaryngology

**User group:** Clinicians in otolaryngology and neurology

*All rights available.*

---

### *A Subunit Approach to Cutaneous Repair*

### Sherris/Larrabee: Principles of Facial Reconstruction

2<sup>nd</sup> ed., Nov. 2009, 320 pp., 340 ill., € 134.95, TN 890512, TPN

Returning in a second edition, this book is a beautifully illustrated guide to facial soft-tissue reconstruction, written by leading clinicians who share insights into the most effective techniques for managing a range of problems in this area of surgery.

- "Reconstruction of small- to medium-sized cutaneous facial defects made EASY!" Drs. Larrabee and Sherris share their expert guidance - it's like having these two noted authorities at one's side
- The unique algorithmic organization, in a concise, step-by-step "cookbook" fashion, helps the reader decide which reconstruction to consider for a particular defect
- Outstanding color drawings by artist Kate Sweeney illustrate all procedures and flap design

#### **New**

- Algorithms that guide the clinician through treatment options and to the selection of the appropriate flap or graft for each situation
- More than 300 high-quality illustrations, full-color clinical photographs, and diagrams precisely depicting key surgical concepts
- Up-to-date coverage of the newest flaps in facial reconstructive surgery

**User group:** Clinicians and residents in otolaryngology, head and neck surgery, facial plastic surgery

*All rights available.*

---

## RADIOLOGY

### Dogra/Saad: Ultrasound-Guided Procedures

Dec. 2009, 350 pp., 620 ill., € 84.95, TN 891170, TPN

The first single source that teaches a radiology resident how to perform basic procedures.

- Practical reference for the full range of common and complex ultrasound-guided procedures frequently performed
- In-depth guidelines from renowned specialists
- More than 600 high-quality images and illustrations that clarify complex concepts
- Step-by-step instructions for each procedure

**User group:** Radiology residents and fellows, sonographers, clinicians in obstetrics and gynecology

*All rights available.*

---

### A Case Review

### O'Brien: Top 3 Differentials in Radiology

Oct. 2009, 730 pp., 710 ill., € 89.95, TN 891226, TPN

- Single volume book that covers everything tested on the oral boards
- Practical case-based reference that will enable radiologists and radiology residents to hone their skills in developing differential diagnoses for common imaging findings
- 325 cases presented as unknowns to facilitate exam preparation
- Valuable high-yield review of all disease entities on the list of differential diagnoses for each case

**User group:** Residents in radiology

*All rights available.*
