

Preview 1/2010

Thieme Publishers New York

Dear colleagues and publishers,

We are presenting you here-attached the titles published by our New York colleagues.

Please note that the minimum advance payment upon signature of contract in 2010 is € 2,610.00. Please do not order titles for subjects which would in your language not allow for a print run or a retail price high enough to cope with this amount.

These are the subjects of our current preview:

	Page
Neurosurgery	2
Orthopaedics	3
Radiology	4
Medical Studies	5

If you are interested in any of the titles, please do not hesitate to send me an email, mentioning author, original title and title number (TN).

With best regards, cordiali saluti, saludos cordiales et mes salutations les meilleures,

Barbara Pfeifer, International Rights Manager

NEUROSURGERY

Binder: Cranial Nerves: Anatomy, Pathology, Imaging

Feb. 2010, 300 pp., 400 ill., € 79.95, TN 890402, TPN

- Beautifully illustrated book combining detailed exposition of the anatomy and function of cranial nerves.
- Practical coverage of clinical concepts for the assessment and differential diagnosis
- Concise descriptions in a bulleted outline format enable rapid reading and review

User group: Physicians and trainees in neurosurgery, neurology, neuroradiology

All rights available.

Preoperative Assessment and Surgical Treatment

Cataltepe/Jallo: Pediatric Epilepsy Surgery

Jan. 2010, 400 pp., 150 ill., € 199.95, TN 891254, TPN

- Essential information about preoperative assessment and surgical approaches to the treatment
- Written by internationally recognized authorities in the field
- Complete coverage of the selection of surgical candidates, including young patients with congenital or early lesions
- Detailed discussion of the latest surgical techniques

User group: Pediatric neurosurgeons, clinicians, residents, and fellows in neurology

All rights available.

Yamada: Tethered Cord Syndrome in Children and Adults

2nd ed., Feb. 2010, 290 pp., 210 ill., € 119.95, TN 891241, TPN

The only reference dedicated to optimizing the management of the TCS. **Latest standards from the specialists of the TCS.**

- Comprehensive text on the essentials of clinical management for this complex disorder
- Written by renowned specialists
- The three categories of "cord tethering" aid effective management
- Expanded coverage of the treatment of adults with severe back and leg pain
- Management of late teenage patients whose care between childhood and adulthood has been frequently interrupted
- More than 200 high-quality clinical photographs, radiographic images, and diagrams to illustrate key concepts

New: The latest standards in neurologic examinations and imaging procedures

Content: The book opens with chapters on embryology and pathophysiology to provide clinicians with a solid understanding of the basic science of tethered cord syndrome (TCS). Discussion of the functional diagnosis of TCS. The authors provide insightful discussion of how to distinguish the disorder from others with similar symptoms and imaging findings. The final chapter summarizes current medical and surgical treatments of TCS, describing methods for preventing progressive and permanent deficits.

User group: Residents and clinicians in neurosurgery, neurology, and pediatric neurosurgery

All rights available.

ORTHOPAEDICS

Evidence-Based Management

Vaccaro et al.: Spine and Spinal Cord Trauma

Mar. 2010, 590 pop., 520 ill., € 179.95, TN 891221, TPN

Spine surgeons are being asked to follow, adopt, or develop well researched clinical guidelines or best evidence medicine in the care they provide to their patients. Without proof of effectiveness, it is difficult to know what the optimal treatment option is for the patient with an injury of the spine or spinal cord.

Invaluable reference improving the quality of care to spine trauma patients.

- The latest clinical evidence combines with consensus opinions of experts
- Spine trauma masters from around the world
- Previously unavailable material and very valuable practice recommendations in a distilled format
- New classification system for spine trauma developed by the Spine Trauma Study Group (about 50 top international spine surgeons)

Content

- The chapters reflect the latest iterations of evidence-based medicine including the recently announced "five levels of evidence"
- Condensed and panoramic list of spine topics including all the types of spinal and spinal cord traumatic conditions at all levels of the spine
- Subjects ranging from intensive care to rehabilitation
- Handy evidentiary table with each chapter

User group: Orthopaedic surgeons, spine surgeons, neurosurgeons

RADIOLOGY

Series: RadCases

Restrepo/Bardo: Cardiac Imaging

Feb. 2010, 220 pp., 300 ill., € 44.95, TN 891185, TPN

One of 12 books, in a series on the subject of oral board preparation in radiology. Each book will consist of 100 cases. An additional 150 cases are available online.

The consistent user-friendly organization is ideal for self-assessment. Every case begins with the clinical presentation on the right hand page. On the next page there are imaging findings, differential diagnoses, essential facts, other imaging findings, pearls and pitfalls, and tips for further reading.

- Cogent descriptions of all images and clearly annotated radiographs make sure to see the findings and help absorb them at a glance
- Strategically chosen cases that representative of those presented on board exams
- Extensive online database of cases that can be searched according to specifications
- High resolution color radiographs demonstrating key cardiac cases
- A variety of common and uncommon presentations covering everything from myocardial infarction to aortic stenosis

The series

The twelve books in the RadCases review series take the guesswork out of board exam preparation. Each book contains:

- 100 must-know cases
- throughout coverage of a different radiology subspecialty
- easy-to-read bullet points
- a scratch-off code giving access to an additional 150 hand-picked cases that will sharpen diagnostic skills and build confidence

User group: Residents in radiology and cardiology

All rights available.

Series: RadCases

Ferral/Lorenz: Interventional Radiology

Apr. 2010, 220 pp., 490 ill., € 44.95, TN 891177, TPN

One of 12 books, in a series on the subject of oral board preparation in radiology. Each book will consist of 100 cases. An additional 150 cases are available online.

- Numerous high-resolution 3-D radiographs demonstrating the mechanics of the vascular system
- Common and uncommon presentation covering everything from acute lower gastrointestinal bleeding to superficial femoral artery stenosis

User group: Residents in radiology and vascular surgery

All rights available.

Series: RadCases**Garcia: Musculoskeletal Radiology**

Mar. 2010, 220 pp., 380 ill., € 44.95, TN 891179, TPN

One of 12 books, in a series on the subject of oral board preparation in radiology. Each book will consist of 100 cases. An additional 150 cases are available online.

- A variety of common and uncommon presentations covering everything from rheumatoid arthritis to developmental hip dysplasia
- Almost 380 high-resolution radiography demonstrating key musculoskeletal disorders

User group: Residents in radiology and orthopaedics

All rights available.

Yoo: Chest Radiographic Interpretation in Pediatric Cardiac Patients

Mar. 2010, 310 pp., 420 ill., € 89.95, TN 891036, TPN

This comprehensive text explains how to interpret chest radiographs and how to report that information in day-to-day practice.

- Multiple perspectives on the pathology of congenital heart disease
- Numerous practical case examples
- Outstanding image quality with more than 400 high-quality radiographs, drawings and specimen photographs
- Written by the world experts on the topic

User group: Residents and fellows in radiology and pediatric cardiology

All rights available.

MEDICAL STUDIES**Michael: Fundamentals of Medical Physiology**

Mar. 2010, 760 pp., 790 ill., € 69.95, TN 891274, TPN

Core physiology text for medical students.

- Clinical cases developed and interwoven with additional case insights and questions
- Case analysis with detailed explanation to the initial case questions
- 20-25 style multiple choice questions for each section
- Brief bulleted summary highlighting the essence of the chapter
- The only medical physiology text available beginning with an entire section devoted to "Core Principles of Physiology"

User group: Medical students

All rights available.
