Synthetic Organic Chemistry Journals

Impact Factor
2.260

SYNTHESIS

Backfiles available starting from: 1969

SYNTHESIS is an international journal devoted to the advancement of the science of synthetic chemistry. It covers all fields of organic chemistry, such as photochemistry, organometallic, medicinal and biological chemistry, as well as related disciplines.

SYNTHESIS presents dependable research results with detailed and reliable experimental procedures, including full characterization of all important new products.

Special features

- Timely Reviews are critically evaluated overviews on recent developments in a specific area of interest
- Feature Articles are papers of exceptional high quality and significance
- Practical Synthetic Procedures (PSP) present in a compact form useful and reliable procedures of interest for both academic and industrial chemists
- Special Issues and Special Topics are thematic collections of articles on relevant new research in existing areas related to organic chemistry
- Publication of Primary Chemical Data

SYNLETT

Backfiles available starting from: 1989

SYNLETT is an international journal reporting research results and trends in synthetic organic chemistry in short personalized reviews and preliminary communications.

SYNLETT covers all fields of scientific endeavor that involve organic synthesis.

Special features

- Accounts are personalized reviews about important recent work of individual research groups
- Clusters are collections of Letters on rapidly evolving topics in designated areas of research
- Synpacts are short personalized articles featuring contributions of research groups in 'hot' areas within the general context of the field
- Spotlights highlight the characteristics of a reagent and its importance in current research, chosen by predoctoral students
- Special Issues are thematic collections of articles on relevant new research in existing areas related to organic chemistry
- Publication of Primary Chemical Data

Impact Factor
2.447

SYNFACTS

Backfiles available starting from: 2005

SYNFACTS provides a selected overview of the most interesting trends in synthetic chemistry. **SYNFACTS** keeps you at the forefront of all important developments in the field on a monthly basis, covering more than 30 journals that publish original research.

Categories

SYNFACTS summarizes current trends in the fields of:

- Synthesis of Natural Products and Potential Drugs
- Synthesis of Heterocycles
- Synthesis of Materials and Unnatural Products
- Metal-Catalyzed Asymmetric Synthesis and Stereoselective Reactions
- Metal-Mediated Synthesis
- Organo- and Biocatalysis
- Polymer-Supported Synthesis

Pharmaceutical and Biochemistry Journals

Planta Medica

Backfiles available starting from: 1953

Planta Medica is one of the leading international journals in the field of medicinal plants and natural products with original research papers, letters, rapid communications, reviews, minireviews and perspectives from researchers worldwide.

The following areas of medicinal plants and natural products research are covered:

- Biological and Pharmacological Activity
- Pharmacokinetic and Clinical Studies
- Natural Product Chemistry
- Analytical Studies

Impact Factor
2.369

Pharmacopsychiatry

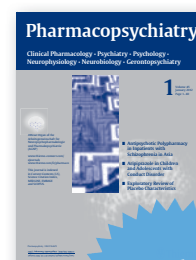

Backfiles available starting from: 1968

Covering all new advances in psychotropic drugs, **Pharmacopsychiatry** provides psychiatrists and pharmacologists with key clinical insights and information about new avenues of research and treatment. The pharmacological, neurophysiological, and psychological basis of psychiatric disorders are explored using models and model theory as applied to clinical and experimental studies.

Pharmacopsychiatry publishes information about controlled clinical trials, case reports, and meeting proceedings, and serves as a state-of-the-art tool for advancing the field and setting European standards.

Includes sections on:

- Psychiatry/Gerontopsychiatry
- Pharmacology/Clinical Pharmacology
- Neuro and Psychophysiology
- Psychology and Neurobiology

Impact Factor
2.203

Arzneimittelforschung – Drug Research

Backfiles available starting from: 1999

Arzneimittelforschung – Drug Research is an international peer-reviewed journal presenting the very latest research results related to novel and established drug molecules and the evaluation of new drug development. A key focus of the publication is translational medicine and the application of biological discoveries in the development of drugs for use in the clinical environment. Articles and experimental data from across the field of drug research address not only the issue of drug formulation, but also the mathematical and statistical methods for evaluating results from industrial investigations and clinical trials.

Arzneimittelforschung – Drug Research includes original research articles as well as reviews, commentaries and short communications in the following areas:

- Analytics
- Bioavailability
- Chemistry and biochemistry
- Bioequivalence
- Clinical and experimental pharmacology
- Drug interactions
- Efficacy testing
- Pharmacodynamics
- Pharmacokinetics
- Teratology
- Toxicology

Impact Factor
0.632

Thieme Chemistry and Pharmaceutical E-Journals

Thieme's Chemistry and Pharmaceutical E-Journals are critical for the research and information needs of universities and research facilities. Our E-Journals interface, www.thieme-connect.com, is a sophisticated web service presenting graphical tables of contents, abstracts, and full text in html or pdf formats. Abstracts are also available for smart phones and tablets. Your patrons will be kept abreast of cutting-edge developments with fast and efficient online delivery and powerful search tools. Users may register to benefit from a multitude of services including:

- Customized interface
- eFirst and table of contents alerting services
- SDI (Selective Dissemination of Information) – alerting you to important results in your field of interest
- RSS feeds

Backfiles

Thieme E-Journal Backfiles allow you to expand your access back in time with many journals available online back to Volume 1, Issue 1 ensuring your institution's collection is comprehensive and complete.

The Thieme E-Journal Backfiles are available to purchase on the one-time fee licensing model and provide access to the following content in perpetuity:

Journal Title	Years in Archive	Number of Years	Earliest Volume in Archive
Pharmacopsychiatry	1968–1999	32	1
Planta Medica	1953–1999	47	1
Synlett	1989 onwards	11	1
Synthesis	1969 onwards	31	1

Archiving in PORTICO and preservation in CLOCKSS ensures long-term availability of the Thieme E-Journal Backfile and current content.

eFirst is our service for the advanced online publication of articles ahead of print. Peer-reviewed and accepted papers appear on average four weeks before they are published in the printed journal providing expedited access to the most recent results.

Compatibility

Web of Science®

License

- Available to institutions through the internet
- COUNTER compliant usage statistics
- Unlimited campus or site-wide access
- Archived in PORTICO
- Custom branding with a library or institution logo
- Preserved in CLOCKSS

System Requirements

- PC or Mac with an Internet connection
- Mozilla or Firefox, Microsoft Internet Explorer version 6.0 or higher, or any JavaScript capable browser
- Adobe Acrobat Reader version 8.0 or higher (required for full texts in PDF only; software can be downloaded free of charge from the Adobe website www.adobe.com)
- Online capable smartphone or tablet
