Thieme Publishing Group – More than 120 years of scientific publishing

Georg Thieme was just 26 years old when, in 1886, he founded what would become one of the world's premier medical and scientific publishers. Today the Thieme Publishing Group is still privately-held and family-owned with more than 900 employees and offices in seven cities, including New York, Beijing, Delhi, Stuttgart and three other locations in Germany.

Thieme promotes the latest developments and research in clinical practice through the systematic coverage of the entire scope of medical specialties, including complementary and alternative methods. In addition to advancing medical education, Thieme produces a wide range of outstanding publications covering chemistry and biology.

A leading STM publisher, Thieme produces superior products in every conceivable format, from professional journals, textbooks, atlases, monographs and reference books to online and offline electronic media and direct information forums such as congresses and seminars.

With the Hauff family currently at the helm, the Thieme Publishing Group remains dedicated to a standard of excellence that sets it apart from its competitors and continues to honor Georg Thieme's dedication to quality, reliability, accuracy and above all, the relevance of the content for the reader.

Thieme Literature – A Global Concern

Today, the Thieme Publishing Group has become an appreciated business partner with more than 2,500 institutional customers in over 50 countries. In addition to more than 100 peer-reviewed journals and dozens of online products, Thieme publishes 500 book titles every year – that's more than 125,000 printed pages. Our online products have more than 10 million sessions per year.

Because Thieme recruits authors from all over the world, its publications have widespread appeal and a truly global perspective. Today the Thieme authors' community consists of over 15,000 members.

Thieme works to keep pace with the tremendous strides made by modern science. It is more than ready to meet the growing challenges it faces because of the internationalization of teaching and research and the increasingly focused specialization of reader and user requirements.

Inspired by the past and committed to an independent future, the Thieme Publishing Group continues to grow through the further development of its print and electronic offerings.

What we stand for

At the Thieme Publishing Group we strive for customer satisfaction, quality, creative innovation, competence, fairness and success.
