

# SYNTHESIS • SYNLETT • SYNFACTS

Journals for Chemical Synthesis

Be part of the family of synthetic chemists.

Where synthetic chemists publish.

## SYNTHESIS

Reviews and Full Papers in Chemical Synthesis

SYNTHESIS is an international full-paper journal devoted to the advancement of the science of synthetic chemistry. It covers all fields of organic chemistry involving synthesis, including catalysis, organometallic, medicinal, biological, and photochemistry, and related disciplines. SYNTHESIS provides dependable research results with detailed and reliable experimental procedures and full characterization of all important new products as well as scientific primary data.

## SYNLETT

Accounts and Rapid Communications in Chemical Synthesis

SYNLETT is an international journal reporting research results and current trends in chemical synthesis in short personalized reviews and preliminary communications. It covers all fields of scientific endeavor that involve organic synthesis, including catalysis, organometallic, medicinal, biological, and photochemistry, as well as related disciplines and offers the possibility to publish scientific primary data.

Where synthetic chemists get inspired.

## SYNFACTS

Highlights in Chemical Synthesis

In SYNFACTS, current research results in chemical synthesis from the primary literature are summarized. The journal helps synthetic chemists to know, learn, and think more about their own field as well as neighboring disciplines. It stimulates the reader's research and supports teaching and lecturing activities as well as examination preparation.

The following categories are covered in SYNFACTS:

- Synthesis of Natural Products and Potential Drugs
- Synthesis of Heterocycles
- Synthesis of Materials and Unnatural Products
- Metal-Catalyzed Asymmetric Synthesis and Stereoselective Reactions
- Metal-Mediated Synthesis
- Organo- and Biocatalysis
- Polymer-Supported Synthesis

Synfacts of the month can be downloaded for free!

Where synthetic chemists find news.

## SYNFORM

People, Trends and Views in Chemical Synthesis

SYNFORM is available for free on [www.thieme-chemistry.com](http://www.thieme-chemistry.com) and complements the information provided by the Thieme Chemistry E-Journals. It presents in a thought-provoking manner:

- new scientific advances in organic chemistry and related fields
- facts and people from the world of chemical sciences
- highlights from international chemistry conferences
- insights into chemical institutions and laboratories

SYNFORM articles are offered online and can also be downloaded in PDF format.

## How you benefit from publishing with us.

- We specialize in publications on chemical synthesis and related areas.
- We offer the leading independent journals for international scientists working in these fields.
- We are dedicated to providing excellent editorial service with a personal touch.
- We are like a family – the family of synthetic chemists.

When you publish in SYNTHESIS and SYNLETT, you deal with real people who care about your science. The Thieme editors and editorial team ensure with high personal commitment that you get the best service and high visibility in the chemical synthesis community. Learn more about the unique publishing experience from the video interviews with Benjamin List and Paul Knochel, our Editors-in-Chief: [www.youtube.com/thiemechemistry](http://www.youtube.com/thiemechemistry)

## Where to read the Thieme Journals.

All content of SYNTHESIS, SYNLETT and SYNFACTS is easily accessible through Thieme E-Journals at [www.thieme-connect.com/ejournals](http://www.thieme-connect.com/ejournals)

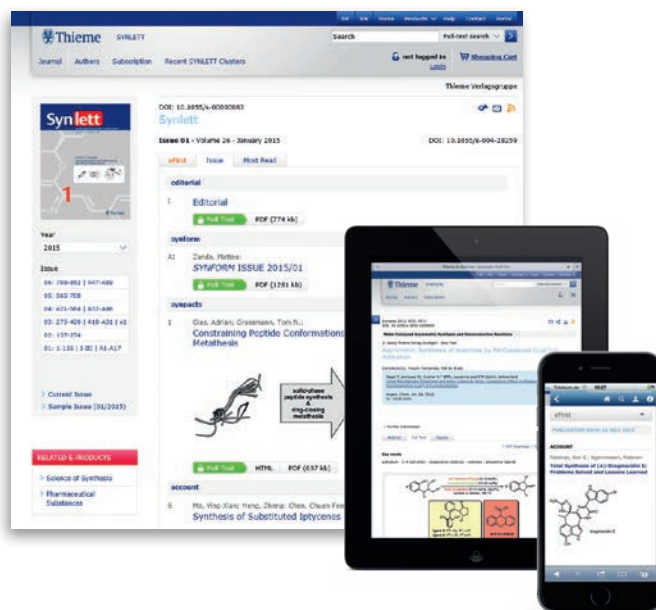

### Free access and services:

- Tables of contents
- Graphical abstracts
- Abstracts of each paper
- Table of contents alert
- eFirst alert

### For licensed customers:

- Full text of articles
- Backfile access

The Thieme Chemistry journal backfiles include more than 30,000 articles dating back to 1969 for SYNTHESIS and 1989 for SYNLETT. They can be purchased by institutions on individual basis or as a package, paying a one-time fee.

## How to submit your papers.

Please submit your manuscripts to SYNTHESIS and SYNLETT through our online submission system:

<https://mc.manuscriptcentral.com/synthesis>  
<https://mc.manuscriptcentral.com/synlett>

Information about article types, author guidelines and tools, primary data publication as well as our open access policies are available at [www.thieme-chemistry.com](http://www.thieme-chemistry.com).

**Publish in the Thieme Chemistry Journals now!**

## Synthesis Reviews

Synthesis Reviews is a free database with bibliographic information of currently 30,550 English review articles (from journals and books). The database is compiled and updated annually by P. J. Kociński, University of Leeds, UK and K. Jarowicki, USA.

Download at [www.thieme-chemistry.com](http://www.thieme-chemistry.com).
