Chapter 1	Protecting Groups: An Overview	1
1.1	Death, Taxes, and Protecting Groups	2
1.2	Deprotection: The Concept of Orthogonal Sets	3
1.2.1	Protecting Groups Cleaved by Basic Solvolysis	3
1.2.2	Protecting Groups Cleaved by Acid	4
1.2.3	Protecting Groups Cleaved by Heavy Metals	6
1.2.4	Protecting Groups Cleaved by Fluoride Ions	7
1.2.5	Protecting Groups Cleaved by Reductive Elimination	8
1.2.6	Protecting Groups Cleaved by β -Elimination Reactions	9
1.2.7	Protecting Groups Cleaved by Hydrogenolysis	9
1.2.8	Protecting Groups Cleaved by Oxidation	11
1.2.9	Protecting Groups Cleaved by Dissolving Metal Reduction	11
1.2.10	Protecting Groups Cleaved by Nucleophilic Substitution	11
1.2.11	Protecting Groups Cleaved by Transition Metal Catalysis	12
1.2.12	Protecting Groups Cleaved by Light	13
1.2.13	Protecting Groups Cleaved by Enzymes	16
1.3	Relay Deprotection	19
1.4	Transprotection	22
1.5	Mutual Protection	23
1.6	Temporary Protection	24
1.7	Protecting Groups As Not-So-Innocent Bystanders	26
1.7.1	Neighbouring Group Participation	26
1.7.2	Conformational and Electronic Effects	29
1.7.3	Co-ordination Effects	32
1.8	Protecting Groups and Solid-Phase Synthesis	37
1.9	Reviews	41
1.9.1	General Reviews on Protecting Groups	41
1.9.2	Reviews on Enzyme-Labile Protecting Groups	41
1.9.3	Reviews on Photo-Labile Protecting Groups	41
1.9.4	Reviews on Linkers in Solid-Phase Synthesis	42
1.9.5	Reviews on the Synthesis of Complex Targets Including Discussion of Protecting Group Problems and Strategies	42
	References	46

Chapter 2	Carbonyl Protecting Groups	49
2.1	Introduction	50
2.2	<i>O,O</i>-Acetals	50
2.2.1	Cyclic Acetals	51
2.2.2	<i>O,O</i> -Acetals in Asymmetric Synthesis	66
2.2.3	Acyclic <i>O,O</i> -Acetals	71
2.3	<i>S,S</i>-Acetals	77
2.4	<i>O,S</i>-Acetals	93
2.5	<i>N,O</i>-Acetals	96
2.6	Cyanohydrins	99
2.7	Orthoester Derivatives	100
2.7.1	<i>O,O,O</i> -Orthoesters	101
2.7.2	<i>O,S,S</i> -Orthoesters	104
2.7.3	<i>S,S,S</i> -Orthoesters	106
2.8	Oxazolines	107
2.9	Reviews	110
2.9.1	Reviews Concerning the Preparation of <i>O,O</i> -Acetals and Their Use as Protecting Groups	110
2.9.2	Reviews Concerning the Mechanism for Hydrolysis of Acetals	111
2.9.3	Reviews Concerning <i>O,O</i> -Acetals as Reactive Functionality	111
2.9.4	Reviews Concerning the Preparation, Chemistry, and Hydrolysis of <i>O,S</i> - and <i>S,S</i> -Acetals	112
2.9.5	Reviews Concerning the Synthesis and Reactions of <i>N,O</i> -Acetals and Their Use in Asymmetric Synthesis	112
2.9.6	Reviews Concerning the Chemistry of Orthoesters and Oxazolines	113
	References	113
Chapter 3	Diol Protecting Groups	119
3.1	Introduction	120
3.2	<i>O,O</i>-Acetals	120
3.2.1	Isopropylidene Acetals	120
3.2.2	Cyclopentylidene and Cyclohexylidene Acetals	133
3.2.3	The Arylmethylene Acetal Family	137
3.2.4	Methylene Acetals	155
3.2.5	Diphenylmethylene Acetals	158
3.3	1,2-Diacetals	161
3.3.1	Dispoke Derivatives	161
3.3.2	Cyclohexane-1,2-diacetals	163
3.3.3	Butane-2,3-diacetals	165

3.4	Silylene Derivatives	168
3.5	1,1,3,3-Tetraisopropylidisiloxanylidene Derivatives	171
3.6	<i>N,O</i>-Acetals for the Protection of 1,2- and 1,3-Amino Alcohols	173
3.7	Reviews	179
3.7.1	Reviews Concerning the Protection of 1,2- and 1,3-Diols	179
3.7.2	Reviews Concerning Acetal Derivatives of Carbohydrates	179
3.7.3	Reviews Concerning 1,2-Diacetals	180
3.7.4	Reviews Concerning <i>N,O</i> -Acetals	180
	References	180
Chapter 4	Hydroxyl Protecting Groups	187
4.1	Introduction	188
4.2	Silyl Ethers	188
4.2.1	Trimethylsilyl (TMS) Ethers	190
4.2.2	Triethylsilyl (TES) Ethers	195
4.2.3	<i>tert</i> -Butyldimethylsilyl (TBS) Ethers	199
4.2.4	<i>tert</i> -Butyldiphenylsilyl (TBDPS) Ethers	216
4.2.5	Triisopropylsilyl (TIPS) Ethers	220
4.2.6	Diethylisopropylsilyl (DEIPS) Ethers	223
4.2.7	Thexyldimethylsilyl (TDS) Ethers	226
4.2.8	Triphenylsilyl (TPS) Ethers	227
4.2.9	Di- <i>tert</i> -butylmethylsilyl (DTBMS) Ethers	229
4.3	Alkyl Ethers	230
4.3.1	Methyl Ethers	230
4.3.2	<i>tert</i> -Butyl Ethers	237
4.3.3	Benzyl Ethers (Bn)	241
4.3.4	<i>p</i> -Methoxybenzyl (PMB) and 3,4-Di-methoxybenzyl (DMB) Ethers	257
4.3.5	Trityl (Tr) Ethers	269
4.3.6	Allyl Ethers and Allyloxycarbonyl Derivatives	275
4.4	Alkoxyethyl Ethers	285
4.4.1	Methoxymethyl (MOM) Ethers	286
4.4.2	2-Methoxyethoxymethyl (MEM) Ethers	295
4.4.3	Benzyloxymethyl (BOM) and Related Ethers	301
4.4.4	<i>p</i> -Methoxybenzyloxymethyl (PMBM) Ethers	305
4.4.5	2-(Trimethylsilyl)ethoxymethyl (SER) Ethers	308
4.5	Tetrahydropyranyl (THP) and Related Ethers	315
4.6	Methylthiomethyl (MTM) Ethers	320
4.7	Esters	323
4.7.1	Acetate Esters (Ac)	325
4.7.2	Benzoate Esters (Bz)	330
4.7.3	Pivalate Esters (R)	331

XIV	Contents	
4.7.4	Methoxyacetate Esters	333
4.7.5	Chloroacetate Esters	335
4.7.6	Levulinate Esters (Lev)	338
4.8	Carbonates	339
4.8.1	Benzyl Carbonates (RO–CBz)	339
4.8.2	<i>p</i> -Nitrobenzyl Carbonates (RO–CO ₂ PNB)	340
4.8.3	<i>tert</i> -Butyl Carbonates (RO–Boc)	341
4.8.4	2,2,2-Trichloroethyl Carbonates (RO–Troc)	343
4.8.5	2-(Trimethylsilyl)ethyl Carbonates (RO–Teoc)	344
4.8.6	Allyl Carbonates (RO–Aloc)	345
4.9	Reviews	348
4.9.1	General Reviews Concerning the Protection of Hydroxyls	348
4.9.2	Reviews Concerning Enzyme-Mediated Esterification and Hydrolysis of Esters	348
4.9.3	Reviews Concerning Organosilicon and Organotin Chemistry Relevant to Hydroxyl Protection	349
	References	350
Chapter 5	Thiol Protecting Groups	365
5.1	Introduction	366
5.2	Thioether Derivatives	366
5.2.1	<i>tert</i> -Butyl Thioethers	366
5.2.2	Benzyl and Substituted Benzyl Thioethers	368
5.2.3	Trityl (Tr) Thioethers	371
5.2.4	2-(Trimethylsilyl)ethyl (TMSE) Thioethers	374
5.2.5	2-Cyanoethyl Thioethers	375
5.2.6	9-Fluorenylmethyl (Fm) Thioethers	376
5.3	Thiocarbonate Derivatives	378
5.4	Disulfides as Protecting Groups and Targets	380
5.5	Reviews	388
5.5.1	Reviews Concerning the Protection of Thiols	388
5.5.2	Reviews Concerning the Chemistry of Thiols and Disulfides	389
	References	389
Chapter 6	Carboxyl Protecting Groups	393
6.1	Introduction	394
6.2	General Comments on the Esterification of Carboxylic Acids	394
6.3	Methyl Esters and Derivatives	395
6.3.1	Methyl Esters	395
6.3.2	<i>tert</i> -Butyl Esters	403

6.3.3	Benzyl Esters	409
6.3.4	Allyl Esters	417
6.3.5	Phenacyl Esters	424
6.4	Alkoxyalkyl Esters	426
6.5	Esters Cleaved by β-Elimination Reactions	430
6.5.1	2,2,2-Trichloroethyl Esters	430
6.5.2	2-(Trimethylsilyl)ethyl (TMSE) Esters	433
6.5.3	2-Tosylethyl Esters and Related Base-Labile Groups	437
6.6	Silyl Esters	440
6.7	Reviews	444
6.7.1	Reviews Concerning the Specific Use of Esters as Protecting Groups	444
6.7.2	Reviews Concerning the Preparation of Esters	444
6.7.3	Reviews Concerning Techniques for Facilitating Esterification	445
6.7.4	Reviews Concerning the Use of Allyl Esters in Carboxyl Protection	445
6.7.5	Reviews Concerning the Nucleophilic Cleavage of Esters	445
	References	446
Chapter 7	Phosphate Protecting Groups	451
7.1	Introduction	452
7.2	The Reaction of Phosphate Esters with Nucleophiles	454
7.3	Alkyl Esters	457
7.3.1	Methyl and Isopropyl Esters	457
7.3.2	<i>tert</i> -Butyl Esters	461
7.3.3	Benzyl Esters	462
7.3.4	Allyl Esters	467
7.3.5	3',5'-Dimethoxybenzoin Esters	471
7.3.6	<i>p</i> -Hydroxyphenacyl Esters	472
7.4	Esters Cleaved by β-Elimination Reactions	473
7.4.1	2-Cyanoethyl Esters	473
7.4.2	9-Fluorenylmethyl Esters	474
7.4.3	2-(Trimethylsilyl)ethyl Esters	476
7.4.4	2-(Methylsulfonyl)ethyl Esters and Related Base-Labile Groups	480
7.4.5	2,2,2-Trichloroethyl Esters	481
7.5	Reviews	483
7.5.1	Reviews Concerning Protection for the Phosphate Group	483
7.5.2	Reviews Concerning the Mechanism of Nucleophilic Substitution in Phosphate Esters	483
	References	483

Chapter 8	Amino Protecting Groups	487
8.1	Introduction	488
8.2	Imides and Amides	488
8.2.1	Phthaloyl (Phth) and Tetrachlorophthaloyl (TCP)	488
8.2.2	Dithiasuccinyl (Dts)	495
8.2.3	Trifluoroacetyl	498
8.2.4	Relay Deprotection of <i>N</i> -Acyl Derivatives	501
8.3	Carbamates	502
8.3.1	Methoxy- and Ethoxycarbonyl	503
8.3.2	<i>tert</i> -Butoxycarbonyl (Boc)	505
8.3.3	Benzyloxycarbonyl (Z or Cbz)	512
8.3.4	Allyloxycarbonyl (Aloc)	524
8.3.5	9-Fluorenylmethoxycarbonyl (Fmoc)	528
8.3.6	2-(Trimethylsilyl)ethoxycarbonyl (Teoc)	534
8.3.7	2,2,2-Trichloroethoxycarbonyl (Troc)	540
8.4	Sulfonyl Derivatives	542
8.4.1	Arylsulfonyl Derivatives	543
8.4.2	2-(Trimethylsilyl)ethylsulfonyl (SES) Derivatives	554
8.5	<i>N</i>-Sulfenyl Derivatives	559
8.6	<i>N</i>-Alkyl Derivatives	561
8.6.1	<i>N,O</i> -Acetals	561
8.6.2	Triazinanones	568
8.6.3	Benzyl (Bn) and Diphenylmethyl (Dpm)	570
8.6.4	Trityl (Tr) and 9-Phenylfluorenyl (PhFl)	585
8.6.5	Allyl	591
8.7	<i>N</i>-Silyl Derivatives	595
8.8	Imine and Enamine Derivatives	599
8.8.1	<i>N</i> -Bis(methylthio)methylene	599
8.8.2	<i>N</i> -Diphenylmethylene	600
8.9	Special Cases	602
8.9.1	Orthogonal Protecting Groups for the Synthesis of Polyamines	602
8.9.2	Protecting Groups for Guanidines	610
8.9.3	Protecting Groups for Indoles, Pyrroles, and Imidazoles	621
8.10	Reviews	630
8.10.1	General Reviews on Amino Protecting Groups	630
8.10.2	Reviews Concerning <i>N</i> -Protection in the Synthesis of α -Amino Aldehydes and Ketones	630
8.10.3	Reviews Concerning <i>N</i> -Protection in the Synthesis of β -Lactams	631
8.10.4	Reviews Concerning <i>N</i> -Functional Groups Pertinent to Their Role as Protecting Groups	631
8.10.5	Reviews Concerning the Synthesis of Natural Guanidine Derivatives	631
8.10.6	Reviews Concerning the Synthesis of Natural Polyamines	631
	References	632
	Epilogue	644
	Index	657
