	Table of Contents	XV
	Introduction	
	M. Majewski and V. Snieckus	863
8.2	Product Class 2: Sodium Compounds	
	A. Mordini and M. Valacchi	879
8.2.1	Product Subclass 1: Sodium Metal and Sodium–Potassium Alloy	
	P. Venturello and M. Barbero	881
8.2.2	Product Subclass 2: Sodium Hydride	
	P. Venturello and M. Barbero	895
8.2.3	Product Subclass 3: Sodium Halides and Sodium Cyanide	
	A. Paul Krapcho	925
8.2.4	Product Subclass 4: Sodium–Oxygen Compounds	
	A. Jończyk and A. Kowalkowska	1011
8.2.5	Product Subclass 5: Sodium–Nitrogen Compounds	
	A. Jończyk and A. Kowalkowska	1141
8.2.6	Product Subclass 6: Alkylsodium Compounds	
	A. Mordini and M. Valacchi	1197
8.2.7	Product Subclass 7: Alkenylsodium Compounds	
	A. Mordini and M. Valacchi	1205
8.2.8	Product Subclass 8: Sodium Acetylides	
	A. Mordini and M. Valacchi	1209
8.2.9	Product Subclass 9: Allylsodium Compounds	
	A. Mordini and M. Valacchi	1215
8.2.10	Product Subclass 10: Arylsodium Compounds and Sodium Cyclopentadienide	
	A. Mordini and M. Valacchi	1221
8.2.11	Product Subclass 11: Benzylsodium Compounds	
	A. Mordini and M. Valacchi	1227

8.2.12	Product Subclass 12: 1,1-Disubstituted Organosodium Compounds R. Łażny	1231
8.2.13	Product Subclass 13: 1-Monosubstituted Organosodium Compounds R. Łażny	1241
8.2.14	Product Subclass 14: α-Sodiocarboxylic Acids and Related Sodium Compounds E. Juaristi, O. Muñoz-Muñiz, and R. Melgar-Fernández	1259
8.2.15	Product Subclass 15: α-Sodio Aldehydes, α-Sodio Ketones, and Related Compounds E. Juaristi and R. Melgar-Fernández	1285
8.3	Product Class 3: Potassium Compounds M. J. White	1297
8.3.1	Product Subclass 1: Potassium Metal P. Venturello and M. Barbero	1299
8.3.2	Product Subclass 2: Potassium Hydride P. Venturello and M. Barbero	1315
8.3.3	Product Subclass 3: Potassium Halides, Potassium Cyanide, and Potassium Carbonate J. V. Comasseto, R. L. O. R. Cunha, and C. C. Silveira	1345
8.3.4	Product Subclass 4: Potassium Hydroxide and Potassium Alkoxides P. Venturello and M. Barbero	1361
8.3.5	Product Subclass 5: Potassium–Sulfur, –Selenium, and –Tellurium Compounds J. V. Comasseto, R. L. O. R. Cunha, and C. C. Silveira	1387
8.3.6	Product Subclass 6: Potassium Amides and Phosphides P. Venturello and M. Barbero	1399
8.3.7	Product Subclass 7: Organometallic Compounds of Potassium A. Mordini and M. Valacchi	1437
8.4	Product Class 4: Rubidium and Cesium Compounds A. Streitwieser	1475
8.4.1	Product Subclass 1: Rubidium and Cesium Metals A. Streitwieser and F. Hasanayn	1477
8.4.2	Product Subclass 2: Rubidium and Cesium Halides R. M. Kellogg	1485

8.4.3	Product Subclass 3: Rubidium and Cesium Carbonates	
	R. M. Kellogg	1497
8.4.4	Product Subclass 4: Organometallic Compounds of Rubidium and Cesium	
	A. Streitwieser and L. Xie	1517
	Keyword Index	1529
	Author Index	1567
	Abbreviations	1611

Table of Contents

Introduction

M. Majewski and V. Snieckus

Introduction	863
---------------------------	-----

8.2 Product Class 2: Sodium Compounds

A. Mordini and M. Valacchi

8.2 Product Class 2: Sodium Compounds	879
--	-----

8.2.1 Product Subclass 1: Sodium Metal and Sodium–Potassium Alloy

P. Venturello and M. Barbero

8.2.1 Product Subclass 1: Sodium Metal and Sodium–Potassium Alloy	881
--	-----

Applications of Product Subclass 1 in Organic Synthesis	881
---	-----

8.2.1.1 Method 1: Reduction of Carbon–Heteroatom Multiple Bonds	881
8.2.1.1.1 Variation 1: Ketone Reduction in Protic Conditions	882
8.2.1.1.2 Variation 2: Ketone Reduction in Liquid Ammonia	883
8.2.1.1.3 Variation 3: Bimolecular Reduction of Carbonyl Groups (Pinacol Coupling)	883
8.2.1.1.4 Variation 4: Reduction of Esters	884
8.2.1.1.5 Variation 5: Reduction of Amides	885
8.2.1.1.6 Variation 6: Reduction of Enones	886
8.2.1.1.7 Variation 7: Reduction of Nitriles	887
8.2.1.1.8 Variation 8: Reduction of 1,3-Diimines	887
8.2.1.2 Method 2: Reduction of C–C Multiple Bonds	887
8.2.1.2.1 Variation 1: Hydrogenation of C=C Bonds	887
8.2.1.2.2 Variation 2: Hydrogenation of Alkynes	889
8.2.1.3 Method 3: Reduction of Carbon–Heteroatom Single Bonds	889
8.2.1.3.1 Variation 1: Dehalogenation of Alkyl Halides	889
8.2.1.3.2 Variation 2: Cleavage of Esters and Ethers	890
8.2.1.3.3 Variation 3: Cleavage of C–S Bonds	891
8.2.1.4 Method 4: Reduction of C–C Single Bonds	892
8.2.1.4.1 Variation 1: Decyanation	892

8.2.2 Product Subclass 2: Sodium Hydride

P. Venturello and M. Barbero

8.2.2 Product Subclass 2: Sodium Hydride	895
---	-----

Synthesis of Product Subclass 2	895
---------------------------------------	-----

8.2.2.1 Method 1: Preparation of Sodium Hydride	895
Applications of Product Subclass 2 in Organic Synthesis	896
8.2.2.2 Method 2: Metalation of the Hydroxy Group	896

8.2.2.2.1	Variation 1:	Etherification in the Presence of 15-Crown-5	896
8.2.2.2.2	Variation 2:	Etherification with Superactive Sodium Hydride	897
8.2.2.2.3	Variation 3:	Etherification on Solid Support	897
8.2.2.2.4	Variation 4:	Base-Promoted Cyclization of Hydroxy Propargylic Sulfones	898
8.2.2.2.5	Variation 5:	Formation of Highly Substituted Diphenyl Carbonates	899
8.2.2.3	Method 3:	Alkylation of Amines and Amides	900
8.2.2.3.1	Variation 1:	Transformation of Dihydroimidazoles into 2,4,6-Trisubstituted Pyrimidines	901
8.2.2.4	Method 4:	Metalation of C—H Groups	902
8.2.2.4.1	Variation 1:	Trapping of α -Lactams by Weak Nucleophiles	902
8.2.2.4.2	Variation 2:	Synthesis of Ylides	903
8.2.2.4.3	Variation 3:	Base-Promoted Cyclization of Alkynones	905
8.2.2.4.4	Variation 4:	Dieckmann Condensation	905
8.2.2.4.5	Variation 5:	The Darzens Reaction	906
8.2.2.4.6	Variation 6:	Synthesis of γ -Oxo Acids	906
8.2.2.4.7	Variation 7:	Synthesis of 1,3-Diketones	907
8.2.2.4.8	Variation 8:	Tandem Michael–Dieckmann Synthesis of Carbocycles	908
8.2.2.4.9	Variation 9:	Double Annulation Leading to Fused Bicyclic Compounds	908
8.2.2.4.10	Variation 10:	α -Alkylation of Sulfones	909
8.2.2.4.11	Variation 11:	Regiocontrolled Synthetic Approach to Unsymmetrical Ketones	910
8.2.2.4.12	Variation 12:	Allylation of Alkenyldenemalonate	911
8.2.2.4.13	Variation 13:	Base-Induced Cycloaddition	912
8.2.2.4.14	Variation 14:	Asymmetric Addition of Malonate Nucleophiles	912
8.2.2.4.15	Variation 15:	Cyclization of Phenylacetoneitriles	913
8.2.2.5	Method 5:	Reduction of Carbon–Heteroatom Multiple Bonds	914
8.2.2.5.1	Variation 1:	Reduction of Tosylhydrazones	914
8.2.2.5.2	Variation 2:	Reduction Using Metal-Containing Complex Reducing Agents	914
8.2.2.6	Method 6:	Reduction of C—C Multiple Bonds	917
8.2.2.7	Method 7:	Reduction of Silyl Derivatives	918
8.2.2.8	Method 8:	Reduction of Carbon–Heteroatom Single Bonds	919
8.2.2.9	Method 9:	Elimination Reactions	920
8.2.2.9.1	Variation 1:	Dehydrohalogenation	920
8.2.2.9.2	Variation 2:	Dehydrobromination and Debromination	921
8.2.2.9.3	Variation 3:	Dehydrosilylation of β -Hydroxysilanes	921

8.2.3 Product Subclass 3: Sodium Halides and Sodium Cyanide

A. Paul Krapcho

8.2.3	Product Subclass 3: Sodium Halides and Sodium Cyanide	925
	Applications of Product Subclass 3 in Organic Synthesis	925
8.2.3.1	Sodium Fluoride	925
8.2.3.1.1	Method 1: Synthesis of Fluoro Compounds by Substitution	925
8.2.3.1.1.1	Variation 1: Alkyl and Cycloalkyl Fluorides by Formal Displacement of a Hydroxy Group	925
8.2.3.1.1.2	Variation 2: Fluoromethyl Ethers from Chloromethyl Ethers	926
8.2.3.1.1.3	Variation 3: Perfluoro Esters by Direct Fluorination	926

8.2.3.1.1.4	Variation 4:	Acyl Fluorides from Acyl Chlorides	926
8.2.3.1.1.5	Variation 5:	Hetaryl Fluorides from Hetaryl Chlorides	927
8.2.3.1.1.6	Variation 6:	Phosphonic Fluorides from Phosphonic Dichloride	927
8.2.3.1.1.7	Variation 7:	Difluorophosphines from Dichlorophosphines	927
8.2.3.1.1.8	Variation 8:	Sulfonimidoyl Fluorides from Sulfonimidoyl Chlorides	927
8.2.3.1.1.9	Variation 9:	N-Fluorination of 1,2-Benzisothiazole 1,1-Dioxides	927
8.2.3.1.2	Method 2:	Rate-Accelerated Condensations	928
8.2.3.1.3	Method 3:	Synthesis of Fluorinated 4-Quinoline-3-carboxylates from Fluorinated 3-Amino-2-benzoylpropenoates	928
8.2.3.1.4	Method 4:	Cleavage of C—Si Bonds	928
8.2.3.1.4.1	Variation 1:	Ene-diyne by the Cleavage of Bis(trimethylsilyl)dialkynes	928
8.2.3.1.4.2	Variation 2:	α,β -Unsaturated Carboxylic Acids by the Cleavage of O-Trimethylsilyl Ethers	929
8.2.3.1.4.3	Variation 3:	4-Oxocyclohexa-2,5-dienyl Benzoates by the Cleavage of O-Trimethylsilyl Ethers	929
8.2.3.1.4.4	Variation 4:	1,1-Difluorocyclopropanes by the Generation of Difluorocarbene and Its Addition to Alkenes	930
8.2.3.1.5	Method 5:	Addition/Substitution Reactions	930
8.2.3.1.6	Method 6:	Synthesis of Cyclic Polyamines and Imines	931
8.2.3.1.6.1	Variation 1:	Cyclic Polyamines from Bisamidines and Related Compounds	931
8.2.3.1.6.2	Variation 2:	Cyclic Imines from Halo Nitriles	931
8.2.3.1.6.3	Variation 3:	Amines from Amides	931
8.2.3.1.7	Method 7:	Synthesis of Benzyl Alcohols from Aldehydes	932
8.2.3.2		Sodium Chloride	932
8.2.3.2.1	Method 1:	Synthesis of Chloro Compounds by Substitution	932
8.2.3.2.1.1	Variation 1:	Alkyl Chlorides by Displacement Reactions	932
8.2.3.2.1.2	Variation 2:	Alkyl Chlorides from Alkyl Bromides by Phase-Transfer Catalysis	932
8.2.3.2.1.3	Variation 3:	Alkyl Chlorides from Alcohols	933
8.2.3.2.1.4	Variation 4:	Nucleophilic <i>ipso</i> -Chlorination	934
8.2.3.2.1.5	Variation 5:	Chlorohydrins by Epoxide Ring Opening	934
8.2.3.2.2	Method 2:	Sodium Chloride as a Chlorine Source for Addition Reactions	935
8.2.3.2.2.1	Variation 1:	α -Chloro- α,β -enones from Cyclic Enones	935
8.2.3.2.2.2	Variation 2:	1,2-Dichloroalkanes or 1,2-Dichlorocycloalkanes from Alkenes or Cycloalkenes	936
8.2.3.2.2.3	Variation 3:	Geminal Nitro Chloro Compounds from Oximes	936
8.2.3.2.2.4	Variation 4:	N-Chlorination of Amides, Lactams, and Carbamates	936
8.2.3.2.3	Method 3:	Electrophilic Aromatic Substitutions	937
8.2.3.2.3.1	Variation 1:	Synthesis of Aryl Chlorides	937
8.2.3.2.3.2	Variation 2:	Synthesis of Chloro- and Dichloroacetanilides	937
8.2.3.2.3.3	Variation 3:	Chlorination of Arenes in the Presence of Selectfluor	937
8.2.3.2.4	Method 4:	Reductive Dehalogenation of α -Halo Ketones	938
8.2.3.2.5	Method 5:	Dealkoxycarbonylation of Activated Esters	938
8.2.3.2.5.1	Variation 1:	Esters by the Dealkoxycarbonylation of Geminal Diesters	938
8.2.3.2.5.2	Variation 2:	Methyl Cinnamates from Dimethyl Benzyldenemalonates	940
8.2.3.2.5.3	Variation 3:	Ketones by the Dealkoxycarbonylation of β -Oxo Esters	940
8.2.3.2.5.4	Variation 4:	Double Deethoxycarbonylation of Geminal Diethyl Esters	941

8.2.3.2.5.5	Variation 5:	Nitriles from α -Cyano Esters	941
8.2.3.2.5.6	Variation 6:	Cinnamonitriles from Ethyl α -Cyanocinnamates	942
8.2.3.2.5.7	Variation 7:	Nitro Compounds from α -Nitro Esters	942
8.2.3.2.6	Method 6:	Synthesis of β -Chlorostyrenes from Aryl α,β -Unsaturated Acids	943
8.2.3.3	Sodium Bromide		943
8.2.3.3.1	Method 1:	Synthesis of Bromo Compounds and/or other Halo Compounds by Substitution	943
8.2.3.3.1.1	Variation 1:	Bromo Compounds by the Displacement of Chloride, Methanesulfonate, or Arenesulfonate Ions	943
8.2.3.3.1.2	Variation 2:	4-Vinylbenzyl Bromide from 4-Chloromethylstyrene	944
8.2.3.3.1.3	Variation 3:	Benzyl Fluorides from Benzyl Chlorides or Bromides	945
8.2.3.3.1.4	Variation 4:	Bromohydrins from the Ring Opening of Epoxides	945
8.2.3.3.1.5	Variation 5:	Brominated Amines from the Ring Opening of Aziridines	947
8.2.3.3.1.6	Variation 6:	Benzyl Bromides from Benzyl Alcohols	947
8.2.3.3.1.7	Variation 7:	Alkyl Bromides from Alcohols	947
8.2.3.3.1.8	Variation 8:	Allyl Bromides from Allyl Alcohols	948
8.2.3.3.2	Method 2:	Displacement by Cleavage of a Si—Cl Bond	948
8.2.3.3.3	Method 3:	Synthesis of α -Bromo- α,β -enones from Cyclic and Acyclic Enones	948
8.2.3.3.4	Method 4:	Synthesis of <i>N</i> -Bromo Amides or Imides	948
8.2.3.3.4.1	Variation 1:	<i>N</i> -Bromo Amides from <i>N</i> -Chloro Amides	948
8.2.3.3.4.2	Variation 2:	<i>N</i> -Bromo Amides or Imides from Amides or Imides	949
8.2.3.3.5	Method 5:	Synthesis of Carbonyl Compounds from Alcohols	949
8.2.3.3.5.1	Variation 1:	Carbonyl Compounds from Benzylic and Secondary Alcohols	949
8.2.3.3.5.2	Variation 2:	Aldehydes from Benzyl Alcohols	950
8.2.3.3.6	Method 6:	Synthesis of Esters and Lactones from Alcohols	950
8.2.3.3.7	Method 7:	Nuclear Bromination of Aromatic Ethers	950
8.2.3.3.7.1	Variation 1:	4-Bromophenolic Ethers from Alkyl Phenyl Ethers	950
8.2.3.3.7.2	Variation 2:	Bromination of Arenes in the Presence of Selectfluor	951
8.2.3.3.8	Method 8:	Bromodecarboxylation and Decarbonylation of Carbonyl Compounds	952
8.2.3.3.8.1	Variation 1:	1-Bromoalkenes from α,β -Unsaturated Acids	952
8.2.3.3.8.2	Variation 2:	1-Bromoalkynes from Arylpropynoic Acids	952
8.2.3.3.8.3	Variation 3:	Aryl Bromides from Benzaldehydes or Benzoic Acids	952
8.2.3.3.9	Method 9:	Synthesis of Methyl 4-Chloropyridine-2-carboxylate from Picolinic Acid	953
8.2.3.3.10	Method 10:	Synthesis of Nitriles from Substituted Amides	953
8.2.3.3.11	Method 11:	Addition of Molecular Bromine to Unsaturated Compounds	954
8.2.3.3.11.1	Variation 1:	Vicinal Dibromides from Alkenes and Cycloalkenes	954
8.2.3.3.11.2	Variation 2:	<i>E</i> -1,2-Dibromoalkenes from Alkynes	954
8.2.3.3.12	Method 12:	Diesters by the Deethoxycarbonylation of Triesters	955
8.2.3.3.13	Method 13:	Sulfides by the Deoxygenation of Sulfoxides	955
8.2.3.3.14	Method 14:	Oxidation of Benzylic Methyl and Methylene Groups	955
8.2.3.3.14.1	Variation 1:	Aldehydes from Substituted Toluenes	955
8.2.3.3.14.2	Variation 2:	Ketones from Diarylmethanes	956
8.2.3.3.15	Method 15:	C—C Coupling Methods	956

8.2.3.3.15.1	Variation 1:	Intramolecular Annulations via Heck Reactions	956
8.2.3.3.15.2	Variation 2:	Cyclopropylbenzenes from Aryl Trifluoromethanesulfonates and Cyclopropylboronic Acids	957
8.2.3.3.15.3	Variation 3:	Styrenes from Ethenes and Arenecarboxylic Anhydrides	957
8.2.3.3.16	Method 16:	Synthesis of 2-Bromoallyl Sulfones from the Hydrobromination of Allenic Sulfones	957
8.2.3.4		Sodium Iodide	958
8.2.3.4.1	Method 1:	Synthesis of Iodo Compounds by Substitution	958
8.2.3.4.1.1	Variation 1:	Alkyl Iodides from Primary Chlorides, Methanesulfonates, or Toluenesulfonates	958
8.2.3.4.1.2	Variation 2:	Benzyl Iodides from Benzyl Alcohols	959
8.2.3.4.1.3	Variation 3:	Iodides from Alcohols with Sodium Iodide/Cerium(III) Chloride	960
8.2.3.4.1.4	Variation 4:	Iodides from Alcohols and Hydrogen Iodide	960
8.2.3.4.1.5	Variation 5:	Alkyl Iodides from Alcohols and Amberlyst 15	961
8.2.3.4.1.6	Variation 6:	Iodohydrins from the Ring Opening of Epoxides	961
8.2.3.4.1.7	Variation 7:	Iodohydrin Carboxylic Acids from α,β -Epoxy-carboxylic Acids	961
8.2.3.4.1.8	Variation 8:	Iodo Esters from Epoxy Esters	962
8.2.3.4.1.9	Variation 9:	Optically Active Allylic Alcohols from Oxiran-2-ylmethyl 4-Toluenesulfonates	962
8.2.3.4.1.10	Variation 10:	β -Amino Alcohols by the Ring Opening of Epoxides	962
8.2.3.4.1.11	Variation 11:	Ethyl β -Amino- α -iodopentanoates by the Ring Opening of Aziridines	963
8.2.3.4.1.12	Variation 12:	Azides from Alcohols	963
8.2.3.4.1.13	Variation 13:	2,5-Dimethylphenacyl Esters from 2-Chloro-1-(2,5-dimethylphenyl)ethanone	964
8.2.3.4.1.14	Variation 14:	Iodo Esters by the Cleavage of Cyclic Ethers	964
8.2.3.4.1.15	Variation 15:	Alkyl Iodides from Tetrahydropyranyl Ethers	965
8.2.3.4.1.16	Variation 16:	Alcohols or Phenols by the Cleavage of Alkyl or Aryl Ethers	965
8.2.3.4.2	Method 2:	Synthesis of Vinyl and Aryl Iodides and Acyl Iodides by Halogen Exchange	966
8.2.3.4.2.1	Variation 1:	Aryl Iodides from Aryl Bromides by Finkelstein-Type Reactions	966
8.2.3.4.2.2	Variation 2:	Vinyl Iodides from Vinyl Chlorides	966
8.2.3.4.2.3	Variation 3:	Hetaryl Iodides by the S_NAr Displacement of Hetaryl Chlorides or Bromides	967
8.2.3.4.2.4	Variation 4:	Acyl Iodides from Acyl Chlorides	967
8.2.3.4.2.5	Variation 5:	Aldehydes by the Reduction of Acyl Iodides Formed In Situ from Acyl Chlorides	968
8.2.3.4.3	Method 3:	Aryl Iodides by the Direct Iodination of Aromatic Substrates	968
8.2.3.4.4	Method 4:	Synthesis of Aryl Iodides from Arylamines	970
8.2.3.4.5	Method 5:	C—C Bond Formation	970
8.2.3.4.5.1	Variation 1:	β -Aryl- α -iodo Esters or Nitriles from Arenediazonium Salts	970
8.2.3.4.5.2	Variation 2:	Z- α,β -Unsaturated Esters from Aldehydes and Ethyl (Diphenoxyphosphoryl)acetate	970
8.2.3.4.5.3	Variation 3:	Alkynic Alcohols from Carbonyl Compounds	971
8.2.3.4.5.4	Variation 4:	α -Hydroxy Ketones from 1,2-Diones and Allyl Bromide	971

8.2.3.4.5.5	Variation 5:	2-Chloroalk-1-en-4-ols from 2,3-Dichloroprop-1-ene and Alkanals	972
8.2.3.4.5.6	Variation 6:	Homoallylic Alcohols from Aldehydes and Allyl Alcohol	972
8.2.3.4.5.7	Variation 7:	Cerium(III) Chloride Mediated Michael Reactions	972
8.2.3.4.5.8	Variation 8:	β -Diketones by the C-Acylation of Enoxysilanes	973
8.2.3.4.6	Method 6:	Synthesis of β -Amino Ketones and Esters from α,β -Unsaturated Carbonyl Compounds	974
8.2.3.4.7	Method 7:	Additions to Alkenes or Alkynes	974
8.2.3.4.7.1	Variation 1:	(<i>E</i>)- or (<i>Z</i>)-1,2-Diiodoethenes from Alkynes	974
8.2.3.4.7.2	Variation 2:	Ethyl (<i>Z</i>)-3-Iodopropenoate from Ethyl Propynoate	974
8.2.3.4.7.3	Variation 3:	β -Iodides by the Hydroiodination of Allenes	975
8.2.3.4.7.4	Variation 4:	Iodo Lactones and Iodo Ethers from β,γ -Unsaturated Acids or Alcohols	975
8.2.3.4.8	Method 8:	Functional Group Deprotection	975
8.2.3.4.8.1	Variation 1:	Carbonyl Compounds by the Cleavage of Thioacetals or Thioketals	975
8.2.3.4.8.2	Variation 2:	Ketones from Dimethyl Ketals	976
8.2.3.4.8.3	Variation 3:	Ketones from 1,3-Dioxolanes	976
8.2.3.4.8.4	Variation 4:	Alcohols or Phenols by O-Desosylation or O-Desilylation	977
8.2.3.4.8.5	Variation 5:	Alcohols by the Cleavage of Trityl, Allyl, and 4-Methoxybenzyl Ethers	977
8.2.3.4.8.6	Variation 6:	Selective Cleavage of a <i>tert</i> -Butoxycarbonyl Group and the Scission of <i>tert</i> -Butyl Esters	978
8.2.3.4.9	Method 9:	Synthesis of α,β -Unsaturated Ketones from β -Hydroxy Ketones	979
8.2.3.4.10	Method 10:	Synthesis of α,β -Unsaturated Ketones from α,β -Epoxy Ketones	979
8.2.3.4.11	Method 11:	Debromination of 1,2-Dibromo-1,2-bis(aryloxy)ethanes	980
8.2.3.4.12	Method 12:	Synthesis of Amides or Lactones from Carbamates or Azido Ketals	981
8.2.3.4.12.1	Variation 1:	Amides from Carbamates	981
8.2.3.4.12.2	Variation 2:	Lactams and Amides from Azido Ketals	981
8.2.3.4.12.3	Variation 3:	<i>N</i> -Methyl Lactams from Acetals	982
8.2.3.4.13	Method 13:	Dehalogenation of α -Halo Ketones	983
8.2.3.4.14	Method 14:	Diene Synthesis by the 1,4-Elimination of Two Methanesulfonate Groups	983
8.2.3.4.15	Method 15:	Generation of <i>ortho</i> -Quinodimethanes and Their Subsequent Trapping Reactions	984
8.2.3.4.16	Method 16:	Synthesis of Polycyclic Ketones from Bis(α -bromoalkyl) Ketones	985
8.2.3.4.17	Method 17:	Synthesis of Symmetrical Disulfides from Thiols	985
8.2.3.5	Sodium Cyanide		986
8.2.3.5.1	Method 1:	Synthesis of Nitriles by Substitution	986
8.2.3.5.1.1	Variation 1:	Displacement of Halides and Sulfonate Groups	986
8.2.3.5.1.2	Variation 2:	Acetonitriles by the Displacement of a Benzotriazol-1-yl Group	988
8.2.3.5.1.3	Variation 3:	Demethylation of Methoxylated Arenes	988

8.2.3.5.1.4	Variation 4:	β -Aminonitriles from Aziridines	988
8.2.3.5.1.5	Variation 5:	β -Hydroxynitriles by the Ring Opening of Epoxides	989
8.2.3.5.2	Method 2:	Heteroatom Substitution	989
8.2.3.5.3	Method 3:	Synthesis of Aroyl Cyanides from Aroyl Chlorides	990
8.2.3.5.4	Method 4:	Coupling Reactions	990
8.2.3.5.4.1	Variation 1:	Vinylic Nitriles or Hetarenecarbonitriles from Vinyl or Hetaryl Bromides	990
8.2.3.5.4.2	Variation 2:	Arene- or Hetarenecarbonitriles from Halides or Trifluoromethanesulfonates	991
8.2.3.5.5	Method 5:	Synthesis of β -Amino Ketones from α,β -Enones	992
8.2.3.5.5.1	Variation 1:	α -Iminonitriles from Imines	993
8.2.3.5.6	Method 6:	Synthesis of Trimethylsilyl Cyanide from Chlorotrimethylsilane	993
8.2.3.5.7	Method 7:	Synthesis of α -Aminonitriles and Cyanohydrins from Aldehydes and Ketones	993
8.2.3.5.7.1	Variation 1:	α -Aminonitriles from Aldehydes	993
8.2.3.5.7.2	Variation 2:	Cyanohydrins by Sodium Cyanide Catalyzed Transcyanation	994
8.2.3.5.8	Method 8:	Addition of Acyl Anion Equivalents to Aryl Aldehydes	995
8.2.3.5.8.1	Variation 1:	α -Hydroxy Ketones from Aryl Aldehydes	995
8.2.3.5.9	Method 9:	Michael-Type Additions to Enoates and Enones	995
8.2.3.5.10	Method 10:	Synthesis of α -Cyano Ketones from <i>N</i> -Acylohydrazones by Addition/Elimination	996
8.2.3.5.11	Method 11:	Dealkoxycarbonylation of Geminal Diesters and β -Oxo Esters	996
8.2.3.5.12	Method 12:	Synthesis of Esters from Aldehydes	998
8.2.3.5.13	Method 13:	Synthesis of Esters or Amides from Alcohols	999
8.2.3.5.14	Method 14:	Synthesis of Amides from Esters	1000
8.2.3.5.15	Method 15:	4-Tosyl-4,5-dihydrooxazoles by Cycloaddition	1000
8.2.3.5.16	Method 16:	Cyclopentenyl Sulfones by Cycloaddition/Elimination	1001

8.2.4 Product Subclass 4: Sodium–Oxygen Compounds

A. Jończyk and A. Kowalkowska

8.2.4	Product Subclass 4: Sodium–Oxygen Compounds	1011
	Applications of Product Subclass 4 in Organic Synthesis	1011
8.2.4.1	Sodium Hydroxide	1011
8.2.4.1.1	Method 1: Generation and Reactions of Carbanions	1014
8.2.4.1.1.1	Variation 1: Reactions of Carbanions with Alkylating Agents	1014
8.2.4.1.1.2	Variation 2: Reactions of Carbanions with Aromatic Nitro Compounds	1021
8.2.4.1.1.3	Variation 3: Reactions of Carbanions with Heteroelectrophiles	1022
8.2.4.1.1.4	Variation 4: Reactions of Carbanions with Carbonyl Compounds, Nitroso Compounds, and Imines	1025
8.2.4.1.1.5	Variation 5: Alkenation by the Horner–Wadsworth–Emmons Reaction	1028
8.2.4.1.1.6	Variation 6: Reactions of Carbanions with Electrophilic Alkenes	1029
8.2.4.1.1.7	Variation 7: Reactions of Carbanions with Alkynes	1031
8.2.4.1.1.8	Variation 8: Isomerization and Isotopic Exchange	1033
8.2.4.1.2	Method 2: Generation and Reactions of Heteroanions	1033

8.2.4.1.2.1	Variation 1:	Reactions of O-Anions	1033
8.2.4.1.2.2	Variation 2:	Reactions of S-Anions	1036
8.2.4.1.2.3	Variation 3:	Reactions of N-Anions	1037
8.2.4.1.2.4	Variation 4:	Reactions of P-Anions	1039
8.2.4.1.3	Method 3:	Reactions of Sodium Hydroxide as a Nucleophile	1040
8.2.4.1.4	Method 4:	Generation and Reactions of Ylides	1040
8.2.4.1.4.1	Variation 1:	Reactions of Sulfur Ylides	1040
8.2.4.1.4.2	Variation 2:	Reactions of Nitrogen Ylides	1042
8.2.4.1.4.3	Variation 3:	Phosphorus Ylides; Alkenation by the Wittig Reaction	1043
8.2.4.1.5	Method 5:	Elimination Reactions	1044
8.2.4.1.5.1	Variation 1:	α -Elimination (Generation and Reactions of Carbenes, Nitrenes, and Their Precursors)	1044
8.2.4.1.5.2	Variation 2:	β -Elimination	1050
8.2.4.1.6	Method 6:	Ramberg–Bäcklund Reaction	1052
8.2.4.1.7	Method 7:	Cannizzaro Reaction	1052
8.2.4.1.8	Method 8:	Bamford–Stevens Reaction	1053
8.2.4.1.9	Method 9:	Hydrolysis Reactions	1053
8.2.4.2		Sodium Methoxide	1055
8.2.4.2.1	Method 1:	Generation and Reactions of Carbanions	1055
8.2.4.2.1.1	Variation 1:	Reactions of Carbanions with Alkylating Agents	1055
8.2.4.2.1.2	Variation 2:	Reactions of Carbanions with Carbonyl Compounds and Imines	1056
8.2.4.2.1.3	Variation 3:	Reactions of Carbanions with Electrophilic Alkenes	1058
8.2.4.2.2	Method 2:	Generation and Reactions of Heteroanions	1060
8.2.4.2.2.1	Variation 1:	Reactions of O-Anions	1060
8.2.4.2.2.2	Variation 2:	Reactions of S-Anions	1061
8.2.4.2.2.3	Variation 3:	Reactions of N-Anions	1061
8.2.4.2.2.4	Variation 4:	Reactions of P-Anions	1064
8.2.4.2.3	Method 3:	Reactions of Sodium Methoxide as a Nucleophile	1064
8.2.4.2.3.1	Variation 1:	Aliphatic Nucleophilic Substitution	1064
8.2.4.2.3.2	Variation 2:	Vinylic Nucleophilic Substitution and Related Processes	1066
8.2.4.2.3.3	Variation 3:	Aromatic Nucleophilic Substitution	1069
8.2.4.2.3.4	Variation 4:	Reactions with Esters and Carbonyl, Thiocarbonyl, and Related Compounds	1072
8.2.4.2.3.5	Variation 5:	Reactions with Imines, Isothiocyanates, and Carbodiimides	1076
8.2.4.2.3.6	Variation 6:	Reactions with Nitriles	1078
8.2.4.2.3.7	Variation 7:	Reactions with Alkenes	1079
8.2.4.2.3.8	Variation 8:	Reactions with Alkynes	1081
8.2.4.2.4	Method 4:	Cleavage of Cyclic Compounds	1082
8.2.4.2.4.1	Variation 1:	Cleavage of Cyclopropanes	1082
8.2.4.2.4.2	Variation 2:	Cleavage of Methyleneedioxy Derivatives	1083
8.2.4.2.4.3	Variation 3:	Cleavage of Three-Membered Heterocycles	1083
8.2.4.2.5	Method 5:	Elimination Reactions	1084
8.2.4.2.6	Method 6:	Rearrangements	1085
8.2.4.2.6.1	Variation 1:	Favorskii and Related Rearrangements	1085
8.2.4.2.6.2	Variation 2:	Neber Rearrangement	1087
8.2.4.2.6.3	Variation 3:	Other Rearrangements	1088
8.2.4.2.7	Methods 7:	Other Methods	1089

8.2.4.3	Sodium Ethoxide	1089
8.2.4.3.1	Method 1: Generation and Reactions of Carbanions	1089
8.2.4.3.1.1	Variation 1: Reactions of Carbanions with Alkylating Agents	1089
8.2.4.3.1.2	Variation 2: Reactions of Carbanions with Carbonyl Compounds	1091
8.2.4.3.1.3	Variation 3: Reactions of Carbanions with Electrophilic Alkenes	1093
8.2.4.3.1.4	Variation 4: Reactions of Carbanions with Other Electrophiles	1095
8.2.4.3.2	Method 2: Generation and Reactions of Heteroanions	1096
8.2.4.3.2.1	Variation 1: Reactions of O-Anions	1096
8.2.4.3.2.2	Variation 2: Reactions of S-Anions	1097
8.2.4.3.2.3	Variation 3: Reactions of N-Anions	1097
8.2.4.3.3	Method 3: Reactions of Sodium Ethoxide as a Nucleophile	1099
8.2.4.3.3.1	Variation 1: Aliphatic Nucleophilic Substitution	1099
8.2.4.3.3.2	Variation 2: Vinylic and Related Nucleophilic Substitutions	1100
8.2.4.3.3.3	Variation 3: Aromatic Nucleophilic Substitution	1101
8.2.4.3.3.4	Variation 4: Reactions with Esters and Carbonyl and Thiocarbonyl Compounds	1102
8.2.4.3.3.5	Variation 5: Reactions with Imines	1104
8.2.4.3.3.6	Variation 6: Reactions with Nitriles	1105
8.2.4.3.3.7	Variation 7: Reactions with Alkenes	1105
8.2.4.3.3.8	Variation 8: Reactions with Alkynes	1106
8.2.4.3.4	Method 4: Cleavage of Ring Compounds	1107
8.2.4.3.4.1	Variation 1: Cleavage of Cyclopropanes	1107
8.2.4.3.4.2	Variation 2: Cleavage of Three-Membered Heterocycles	1107
8.2.4.3.5	Method 5: Elimination Reactions	1107
8.2.4.3.6	Method 6: Rearrangements	1108
8.2.4.3.6.1	Variation 1: Favorskii and Related Rearrangements	1108
8.2.4.3.6.2	Variation 2: Other Rearrangements	1108
8.2.4.3.7	Methods 7: Other Methods	1109
8.2.4.4	Sodium Acetate	1110
8.2.4.4.1	Method 1: Generation and Reactions of Carbanions	1110
8.2.4.4.2	Method 2: Reactions of Sodium Acetate as a Nucleophile	1111
8.2.4.4.2.1	Variation 1: Nucleophilic Substitution	1111
8.2.4.4.2.2	Variation 2: Reactions with Carbonyl Compounds and Diazonium and Ammonium Salts	1113
8.2.4.4.2.3	Variation 3: Reactions with Alkenes	1113
8.2.4.4.2.4	Variation 4: Reactions with Alkynes	1114
8.2.4.4.3	Method 3: Cleavage of Ring Compounds	1114
8.2.4.4.4	Method 4: Elimination Reactions	1115
8.2.4.4.5	Method 5: Rearrangements	1115
8.2.4.4.6	Methods 6: Other Methods	1116
8.2.5	Product Subclass 5: Sodium–Nitrogen Compounds A. Jończyk and A. Kowalkowska	
8.2.5	Product Subclass 5: Sodium–Nitrogen Compounds	1141
	Synthesis of Product Subclass 5	1141

8.2.5.1	Sodium Hexamethyldisilazanide	1141
8.2.5.1.1	Method 1: Synthesis of Sodium Hexamethyldisilazanide from Sodium Amide	1141
	Applications of Product Subclass 5 in Organic Synthesis	1142
8.2.5.2	Sodium Amide	1142
8.2.5.2.1	Method 1: Generation of Anions and Their Reactions with Electrophiles	1142
8.2.5.2.1.1	Variation 1: Monoanions	1142
8.2.5.2.1.2	Variation 2: Dianions and Polyanions	1145
8.2.5.2.1.3	Variation 3: Reactions Involving Mixtures of Sodium Amide with Sodium Alkoxides (Complex Bases)	1146
8.2.5.2.2	Method 2: The Chichibabin Reaction and Related Processes	1147
8.2.5.2.3	Method 3: The Haller–Bauer Reaction	1148
8.2.5.2.4	Method 4: Generation and Reactions of Arynes	1149
8.2.5.2.4.1	Variation 1: Reactions with Heteronucleophiles	1149
8.2.5.2.4.2	Variation 2: Reactions with Carbanions	1150
8.2.5.2.5	Method 5: Elimination Reactions	1152
8.2.5.2.5.1	Variation 1: Elimination from Aliphatic Compounds	1152
8.2.5.2.5.2	Variation 2: Elimination from Alicyclic Compounds	1153
8.2.5.2.6	Method 6: Generation and Reactions of Ylides	1154
8.2.5.2.6.1	Variation 1: Rearrangements of Ammonium Ylides	1154
8.2.5.2.6.2	Variation 2: The Wittig Reaction	1155
8.2.5.3	Sodium Hexamethyldisilazanide	1156
8.2.5.3.1	Method 1: Generation and Reactions of Carbanions	1156
8.2.5.3.1.1	Variation 1: Reactions with Alkylating Agents	1157
8.2.5.3.1.2	Variation 2: Intramolecular Reactions of Carbanions	1158
8.2.5.3.1.3	Variation 3: Reactions of Carbanions with Heteroelectrophiles	1158
8.2.5.3.2	Method 2: Generation and Reactions of Heteroanions	1159
8.2.5.3.3	Method 3: Reactions of Sodium Hexamethyldisilazanide as a Nucleophile	1160
8.2.5.3.4	Method 4: Generation and Reactions of Ylides	1161
8.2.5.3.4.1	Variation 1: Alkenation Reactions with Phosphorus Ylides	1161
8.2.5.3.4.2	Variation 2: Heteroatom-Substituted Ylides in the Wittig Reaction	1163
8.2.5.3.4.3	Variation 3: Horner–Wadsworth–Emmons Alkenation	1163
8.2.5.3.4.4	Variation 4: Titanium-Modified Phosphorus Ylides	1164
8.2.5.3.5	Method 5: Generation and Reactions of Carbenoids	1164
8.2.5.3.6	Methods 6: Miscellaneous Reactions	1165
8.2.5.4	Monosodium Cyanamide	1166
8.2.5.4.1	Method 1: Substitution Reactions	1166
8.2.5.4.2	Method 2: Generation and Reactions of Cyanonitrene	1167
8.2.5.4.3	Method 3: Synthesis of 4,5-Dihydrooxazol-2-amines	1167
8.2.5.5	Disodium Cyanamide	1167
8.2.5.5.1	Method 1: Reactions with Organophosphoryl Chlorides	1167
8.2.5.6	Sodium Hydrazide	1168
8.2.5.6.1	Method 1: Synthesis of Aromatic Hydrazines	1168

8.2.5.6.2	Method 2:	Reactions with Azaheterenes	1168
8.2.5.6.3	Method 3:	Hydrazidolysis of Peptides	1168
8.2.5.6.4	Method 4:	Reactions with Aromatic Compounds, Alkenes, Alkynes, or Nitriles	1169
8.2.5.7	Sodium Azide		1169
8.2.5.7.1	Method 1:	Organic Azides by Substitution of a Heteroatom	1170
8.2.5.7.1.1	Variation 1:	Under Conventional Conditions	1170
8.2.5.7.1.2	Variation 2:	Palladium(0)-Catalyzed Azidation	1175
8.2.5.7.1.3	Variation 3:	Under Phase-Transfer Catalyzed Conditions	1175
8.2.5.7.1.4	Variation 4:	Under Sonication	1176
8.2.5.7.1.5	Variation 5:	Azides from Alcohols	1177
8.2.5.7.1.6	Variation 6:	Aryl Azides from Arylamines via Diazonium Salts	1177
8.2.5.7.2	Method 2:	Azidolysis of Oxiranes	1178
8.2.5.7.2.1	Variation 1:	Of (Hydroxymethyl)oxiranes	1179
8.2.5.7.2.2	Variation 2:	Of Functionalized Oxiranes	1179
8.2.5.7.3	Method 3:	β -Amino Azides from Aziridines	1180
8.2.5.7.4	Method 4:	Azides from Alkenes	1180
8.2.5.7.5	Method 5:	1,3-Dipolar Cycloaddition	1181
8.2.5.7.5.1	Variation 1:	To Alkenes	1181
8.2.5.7.5.2	Variation 2:	To Alkynes	1182
8.2.5.7.5.3	Variation 3:	To C=N or C \equiv N Bonds	1183
8.2.6	Product Subclass 6: Alkylsodium Compounds		
	A. Mordini and M. Valacchi		
8.2.6	Product Subclass 6: Alkylsodium Compounds		
	Synthesis of Product Subclass 6		
8.2.6.1	Method 1:	Reductive Metal Insertion	1197
8.2.6.2	Method 2:	Metalation of Angle-Strain-Activated Hydrocarbons with Superbasic Reagents	1199
8.2.6.3	Method 3:	Sodium–Metal Exchange	1199
	Applications of Product Subclass 6 in Organic Synthesis		
8.2.6.4	Method 4:	Alkylation with Alkyl Halides	1200
8.2.6.5	Method 5:	Reactions with Metal Salts	1201
8.2.6.5.1	Variation 1:	Preparation of Alkylstannanes	1201
8.2.6.5.2	Variation 2:	Preparation of Alkylcuprates	1202
8.2.7	Product Subclass 7: Alkenylsodium Compounds		
	A. Mordini and M. Valacchi		
8.2.7	Product Subclass 7: Alkenylsodium Compounds		
	Synthesis of Product Subclass 7		
8.2.7.1	Method 1:	Metalation of Alkenes	1205
8.2.7.2	Method 2:	Reductive Metal Insertion into Carbon–Halogen Bonds	1206

8.2.8	Product Subclass 8: Sodium Acetylides A. Mordini and M. Valacchi	
<hr/>		
8.2.8	Product Subclass 8: Sodium Acetylides	1209
	Synthesis of Product Subclass 8	1209
8.2.8.1	Method 1: Reductive Metal Insertion into C—H Bonds	1209
8.2.8.2	Method 2: Metalation of Alkynes with Sodium Bases	1210
8.2.8.2.1	Variation 1: Metalation with Sodium Amides	1210
8.2.8.2.2	Variation 2: Metalation with Other Bases	1211
8.2.8.3	Method 3: Elimination of Halogens and Halohydrins	1211
	Applications of Product Subclass 8 in Organic Synthesis	1212
8.2.8.4	Method 4: Coupling Reactions with Electrophiles	1212
8.2.8.4.1	Variation 1: Reactions with Carbon Electrophiles	1212
8.2.8.4.2	Variation 2: Reactions with Other Electrophiles	1213
8.2.9	Product Subclass 9: Allylsodium Compounds A. Mordini and M. Valacchi	
<hr/>		
8.2.9	Product Subclass 9: Allylsodium Compounds	1215
	Synthesis of Product Subclass 9	1215
8.2.9.1	Method 1: Metalation of Alkenes	1215
8.2.9.1.1	Variation 1: Metalation of Alkenes with Alkylsodium Reagents	1215
8.2.9.1.2	Variation 2: Metalation of Allylarenes with Alkylsodium Reagents	1216
8.2.9.1.3	Variation 3: Metalation with Superbases	1216
8.2.9.2	Method 2: Reductive C—O Bond Cleavage	1217
8.2.9.3	Method 3: Metal–Sodium Exchange	1217
8.2.10	Product Subclass 10: Arylsodium Compounds and Sodium Cyclopentadienide A. Mordini and M. Valacchi	
<hr/>		
8.2.10	Product Subclass 10: Arylsodium Compounds and Sodium Cyclopentadienide	1221
	Synthesis of Product Subclass 10	1221
8.2.10.1	Method 1: Reductive Metalation of Aryl Halides	1221
8.2.10.2	Method 2: Metalation with Organosodium Reagents	1222
8.2.10.2.1	Variation 1: Metalation of Arenes	1222
8.2.10.2.2	Variation 2: Metalation of Heterosubstituted Arenes	1222
8.2.10.3	Method 3: Reductive Metalation of Aryl Ethers	1223
8.2.10.4	Method 4: Preparation of Sodium Cyclopentadienide	1223
8.2.10.4.1	Variation 1: Reductive Metalation of Cyclopentadienes	1223
8.2.10.4.2	Variation 2: Deprotonation	1224

8.2.11	Product Subclass 11: Benzylsodium Compounds A. Mordini and M. Valacchi	
<hr/>		
8.2.11	Product Subclass 11: Benzylsodium Compounds	1227
	Synthesis of Product Subclass 11	1227
8.2.11.1	Method 1: Metalation of Alkylarenes with Organosodium Reagents ...	1227
8.2.11.1.1	Variation 1: Monometalation of Alkylarenes	1227
8.2.11.1.2	Variation 2: Dimetalation of Dialkylarenes	1228
8.2.11.2	Method 2: Metal–Sodium Exchange	1228
8.2.12	Product Subclass 12: 1,1-Disubstituted Organosodium Compounds R. Łażny	
<hr/>		
8.2.12	Product Subclass 12: 1,1-Disubstituted Organosodium Compounds	1231
	Synthesis of Product Subclass 12	1231
8.2.12.1	Method 1: Preparation of Sodium Derivatives of Disulfones, α -Nitro Sulfones, and Dinitro Compounds	1231
	Applications of Product Subclass 12 in Organic Synthesis	1233
8.2.12.2	Method 2: Alkylation and Acylation of Methyl (Methylsulfanyl)methyl Sulfoxide and Thioacetals	1233
8.2.12.2.1	Variation 1: Synthesis of Ketones via Alkylation of Methyl (Methylsulfanyl)methyl Sulfoxide	1233
8.2.12.2.2	Variation 2: Alkylation and Acylation of Thioacetals	1234
8.2.12.3	Method 3: Alkylation of α -Nitro Sulfones	1234
8.2.12.4	Method 4: Preparation of α,β -Unsaturated Sulfones, Sulfonamides, Sulfoxides, and Sulfides via the Horner and Horner–Wadsworth–Emmons Syntheses	1236
8.2.12.4.1	Variation 1: Synthesis of α,β -Unsaturated Sulfones	1236
8.2.12.4.2	Variation 2: One-Pot Synthesis of α,β -Unsaturated Sulfoxides	1237
8.2.12.4.3	Variation 3: Synthesis of α,β -Unsaturated Sulfides	1237
8.2.12.5	Methods 5: Other Applications	1238
8.2.13	Product Subclass 13: 1-Monosubstituted Organosodium Compounds R. Łażny	
<hr/>		
8.2.13	Product Subclass 13: 1-Monosubstituted Organosodium Compounds	1241
	Synthesis of Product Subclass 13	1242
8.2.13.1	Method 1: Preparation of Sodium Salts of Sulfones and Sulfoximides	1242
8.2.13.2	Method 2: Preparation of Dimsylsodium	1242
8.2.13.3	Method 3: Preparation of Sodium Nitronates	1243
	Applications of Product Subclass 13 in Organic Synthesis	1244
8.2.13.4	Method 4: Application of Sodium Derivatives of Sulfones and Sulfonates	1244
8.2.13.5	Method 5: Applications of Sodium Derivatives of Sulfoximides	1245
8.2.13.6	Method 6: Applications of Dimsylsodium	1246

8.2.13.6.1	Variation 1:	Reaction of Dimethylsodium with Carbonyl Compounds	1246
8.2.13.6.2	Variation 2:	Nucleophilic Substitution with Dimethylsodium Followed by Elimination of Methanesulfenic Acid	1247
8.2.13.6.3	Variation 3:	Methylation and Other Reactions with Dimethylsodium	1248
8.2.13.6.4	Variation 4:	Use of Dimethylsodium as Base	1249
8.2.13.7	Method 7:	Application of Sodium Nitronates	1250
8.2.13.7.1	Variation 1:	Use of Sodium Nitronates in Nitro-Aldol Reactions	1251
8.2.13.7.2	Variation 2:	Acylation and Alkoxyacylation of Sodium Nitronates	1252
8.2.13.7.3	Variation 3:	C-Alkylation and Other Substitutions with Sodium Nitronates	1253
8.2.13.8	Method 8:	Applications of α -Sodio Phosphonates	1255
8.2.14	Product Subclass 14: α-Sodiocarboxylic Acids and Related Sodium Compounds		
	E. Juaristi, O. Muñoz-Muñiz, and R. Melgar-Fernández		
8.2.14	Product Subclass 14: α-Sodiocarboxylic Acids and Related Sodium Compounds		
	Synthesis of Product Subclass 14		
8.2.14.1	Method 1:	Direct α -Sodium Enolate Formation from Carboxylic Acid Derivatives with Strong Bases	1260
8.2.14.1.1	Variation 1:	With Sodium Alkoxides	1260
8.2.14.1.2	Variation 2:	With Sodium Hydride	1261
8.2.14.1.3	Variation 3:	With Sodium Hexamethyldisilazide	1261
8.2.14.2	Method 2:	Direct α -Sodium Enolate Formation from Esters and Amides with Strong Bases	1262
8.2.14.3	Method 3:	Direct Alkylation of Sodium Enolates	1264
8.2.14.3.1	Variation 1:	Alkylation of Carboxylic Acid Dianions	1264
8.2.14.4	Method 4:	Aldol Addition Reactions of Sodium Ester Enolates	1266
8.2.14.4.1	Variation 1:	The Claisen Condensation	1266
8.2.14.4.2	Variation 2:	The Dieckmann Condensation	1267
8.2.14.4.3	Variation 3:	α -Sodio Nitriles	1269
8.2.14.4.4	Variation 4:	The Darzens Condensation Reaction	1269
8.2.14.5	Method 5:	Alkylation of 1,3-Dicarbonyl Compounds via Their Sodium Enolates	1270
8.2.14.5.1	Variation 1:	By the Malonate Method	1270
8.2.14.5.2	Variation 2:	By the Acetoacetate Method	1271
8.2.14.5.3	Variation 3:	By Michael Addition and Related Reactions	1272
8.2.14.6	Method 6:	Chiral Sodium Enolates in Asymmetric Synthesis	1273
8.2.14.6.1	Variation 1:	Meyers' Dihydrooxazoles	1274
8.2.14.6.2	Variation 2:	Evans' Dihydrooxazolones	1275
8.2.14.6.3	Variation 3:	Other Chiral Dihydrooxazolone Derivatives	1277
8.2.14.6.4	Variation 4:	Oppolzer's Chiral Sultams	1280

8.2.15	Product Subclass 15: α-Sodio Aldehydes, α-Sodio Ketones, and Related Compounds E. Juaristi and R. Melgar-Fernández	
<hr/>		
8.2.15	Product Subclass 15: α-Sodio Aldehydes, α-Sodio Ketones, and Related Compounds	1285
	Synthesis of Product Subclass 15	1286
8.2.15.1	Method 1: Synthesis by Deprotonation with Strong Bases	1286
8.2.15.2	Method 2: Synthesis by Deprotonation with Weak Bases	1287
	Applications of Product Subclass 15 in Organic Synthesis	1288
8.2.15.3	Method 3: Direct Alkylation of Sodium Enolates	1288
8.2.15.3.1	Variation 1: Alkylation of Sodium Enolates Derived from Ketones	1288
8.2.15.3.2	Variation 2: Alkylation of Sodium Enolates Derived from 1,3-Dicarbonyl Compounds	1289
8.2.15.3.3	Variation 3: Alkylation of Sodium Dienolates Derived from 1,3-Dicarbonyl Compounds	1290
8.2.15.4	Method 4: Aldol Reactions of Sodium Enolates	1291
8.2.15.4.1	Variation 1: Tandem Aldol–Michael Reactions of Sodium Enolates	1293
8.2.15.5	Method 5: Diastereoselective Michael Reaction of Chiral Sodium Enolates	1293
8.2.15.6	Method 6: Sulfonylation of 4- <i>tert</i> -Butylcyclohexanone Sodium Enolate	1294
8.3	Product Class 3: Potassium Compounds M. J. White	
<hr/>		
8.3	Product Class 3: Potassium Compounds	1297
8.3.1	Product Subclass 1: Potassium Metal P. Venturello and M. Barbero	
<hr/>		
8.3.1	Product Subclass 1: Potassium Metal	1299
	Applications of Product Subclass 1 in Organic Synthesis	1299
8.3.1.1	Method 1: Reduction of C=O Bonds	1299
8.3.1.1.1	Variation 1: Reduction of Aldehydes and Ketones	1299
8.3.1.1.2	Variation 2: Bromobenzene-Catalyzed Reductive Coupling of Ketones	1301
8.3.1.2	Method 2: Reduction and Isomerization of C–C Multiple Bonds	1302
8.3.1.2.1	Variation 1: Reduction of Aromatic Rings	1302
8.3.1.2.2	Variation 2: Reduction and Isomerization of Alkenes and Alkynes	1302
8.3.1.2.3	Variation 3: Reduction of Activated C=C and C=N Bonds	1304
8.3.1.3	Method 3: Reduction of Carbon–Heteroatom Single Bonds	1305
8.3.1.3.1	Variation 1: Reductive Cleavage of Isocyano Groups	1305
8.3.1.3.2	Variation 2: Reduction of Alkyl Halides	1306
8.3.1.3.3	Variation 3: Reduction of Ethers	1306
8.3.1.3.4	Variation 4: Reductive Cleavage of Oxazolidines	1309
8.3.1.3.5	Variation 5: Reductive Cleavage of C–S Bonds	1310

8.3.1.4	Method 4:	Reductive Cleavage of C—C Bonds	1311
8.3.1.4.1	Variation 1:	Decyanation of Alkanenitriles	1311
8.3.2	Product Subclass 2: Potassium Hydride		
	P. Venturello and M. Barbero		
8.3.2	Product Subclass 2: Potassium Hydride		
	Applications of Product Subclass 2 in Organic Synthesis		
8.3.2.1	Method 1:	Deprotonation of the Hydroxy Group	1315
8.3.2.1.1	Variation 1:	Fragmentation of Homoallylic Alkoxides	1315
8.3.2.1.2	Variation 2:	Michael Addition to Nitroalkenes	1316
8.3.2.1.3	Variation 3:	Michael Addition to α,β -Unsaturated Sulfoxides	1317
8.3.2.1.4	Variation 4:	Ring Expansion by Two Carbon Atoms	1317
8.3.2.1.5	Variation 5:	Silyl Ether Synthesis	1318
8.3.2.1.6	Variation 6:	Desilylation Reactions	1319
8.3.2.2	Method 2:	Deprotonation of the Thiol Group	1321
8.3.2.3	Method 3:	N-Deprotonation	1321
8.3.2.3.1	Variation 1:	N-Alkylation of Trifluoroacetamides	1322
8.3.2.3.2	Variation 2:	N-Alkylation of Secondary Amines	1322
8.3.2.3.3	Variation 3:	Indole Synthesis from Anilines	1323
8.3.2.3.4	Variation 4:	Transfer N-Fluorination	1325
8.3.2.3.5	Variation 5:	N-Tosylation of Indoles	1325
8.3.2.3.6	Variation 6:	Smiles Rearrangement	1326
8.3.2.4	Method 4:	Generation of Potassium Enolates	1326
8.3.2.4.1	Variation 1:	Synthesis of Enol Acetates and Trimethylsilyl Enol Ethers from Aldehydes	1327
8.3.2.4.2	Variation 2:	Synthesis of Silyl Enol Ethers from Ketones	1328
8.3.2.4.3	Variation 3:	Alkylation of Aldehydes	1329
8.3.2.4.4	Variation 4:	Alkylation of Ketones	1329
8.3.2.4.5	Variation 5:	Homologation of Esters	1330
8.3.2.4.6	Variation 6:	Dithiolate Synthesis	1331
8.3.2.5	Method 5:	Anionic Oxy-Cope Rearrangement	1332
8.3.2.5.1	Variation 1:	Tandem [2,3]-Wittig–Anionic Oxy-Cope Rearrangement	1333
8.3.2.6	Method 6:	Ring Expansion	1333
8.3.2.6.1	Variation 1:	Ring Expansion in the Presence of 18-Crown-6	1334
8.3.2.7	Method 7:	Synthesis of Phosphonium Ylides	1335
8.3.2.7.1	Variation 1:	Acylation of a Vinyl Group	1336
8.3.2.8	Method 8:	Fluorination of Carbanions, Phenols, and Sulfonamides	1337
8.3.2.9	Method 9:	Reduction of C—X Bonds	1338
8.3.2.9.1	Variation 1:	Reduction of C—X Multiple Bonds	1338
8.3.2.9.2	Variation 2:	Reduction of C—X Single Bonds	1339
8.3.2.10	Method 10:	The Nef Reaction	1340
8.3.2.11	Method 11:	Oxidative Cleavage of Ketones	1340
8.3.2.12	Method 12:	Ring Opening of Strained Rings	1341

8.3.3	Product Subclass 3: Potassium Halides, Potassium Cyanide, and Potassium Carbonate	
	J. V. Comasseto, R. L. O. R. Cunha, and C. C. Silveira	
<hr/>		
8.3.3	Product Subclass 3: Potassium Halides, Potassium Cyanide, and Potassium Carbonate	1345
	Synthesis of Product Subclass 3	1345
	Applications of Product Subclass 3 in Organic Synthesis	1345
8.3.3.1	Method 1: Use as Halogenating Agents	1345
8.3.3.1.1	Variation 1: Preparation of Aromatic Halides	1345
8.3.3.1.2	Variation 2: Preparation of Alkyl Halides	1346
8.3.3.1.3	Variation 3: Preparation of Acyl and Sulfonyl Fluorides	1347
8.3.3.1.4	Variation 4: Activation of Silicon Reagents	1347
8.3.3.2	Method 2: Use for Deprotection	1348
8.3.3.2.1	Variation 1: Cleavage of Silyl Ethers	1348
8.3.3.2.2	Variation 2: Desilylation of Silylalkynes	1349
8.3.3.3	Method 3: Use as a Base	1349
8.3.3.3.1	Variation 1: Alkylation of Phenols, Thiols, and Carboxylic Acids	1350
8.3.3.3.2	Variation 2: N-Alkylation of Amines, Amides, and Nitrogen Heterocycles	1350
8.3.3.3.3	Variation 3: Alkylation of Active Methylene Groups	1351
8.3.3.3.4	Variation 4: Michael Additions and Aldol and Knoevenagel Condensations	1351
8.3.3.3.5	Variation 5: Wittig Reaction	1352
8.3.3.3.6	Variation 6: Benzoin Condensation and Similar Reactions	1353
8.3.3.3.7	Variation 7: Transition-Metal-Catalyzed Cross-Coupling Reactions	1354
8.3.3.3.8	Variation 8: Transesterification Reactions	1355
8.3.3.4	Method 4: Use as a Source of Cyanide Anion	1355
8.3.3.4.1	Variation 1: Preparation of Alkane- and Alkenenitriles from Alcohols and Alkyl Halides	1355
8.3.3.4.2	Variation 2: Synthesis of α -Aminonitriles from Aldehydes	1356
8.3.3.4.3	Variation 3: Synthesis of Cyanohydrin Derivatives from Carbonyl Compounds	1357
8.3.4	Product Subclass 4: Potassium Hydroxide and Potassium Alkoxides	
	P. Venturello and M. Barbero	
<hr/>		
8.3.4	Product Subclass 4: Potassium Hydroxide and Potassium Alkoxides	1361
	Applications of Product Subclass 4 in Organic Synthesis	1361
8.3.4.1	Method 1: Metalation at Heteroatoms	1361
8.3.4.1.1	Variation 1: Ester Synthesis	1361
8.3.4.1.2	Variation 2: Alkylation of Heteroatoms	1363
8.3.4.1.3	Variation 3: Ether Synthesis	1364
8.3.4.1.4	Variation 4: Synthesis of Phenols	1365
8.3.4.1.5	Variation 5: Synthesis of Oxime Ethers	1366
8.3.4.1.6	Variation 6: Epoxidation of Enones	1367
8.3.4.1.7	Variation 7: Alcohols from 4-Toluenesulfonates	1367

8.3.4.2	Method 2:	Metalation at Carbon	1368
8.3.4.2.1	Variation 1:	Addition Reactions	1368
8.3.4.3	Method 3:	Ring Closure to Heterocycles	1370
8.3.4.3.1	Variation 1:	Ring Closure through Hydrogen Abstraction	1370
8.3.4.3.2	Variation 2:	Ring Closure by Enolization	1373
8.3.4.3.3	Variation 3:	Ring Closure of Ylides	1374
8.3.4.4	Method 4:	Preparation of Ylides	1375
8.3.4.4.1	Variation 1:	1-Bromoalkynes	1376
8.3.4.4.2	Variation 2:	1-Bromoalkenes	1376
8.3.4.4.3	Variation 3:	Methylenation of Ketones	1377
8.3.4.4.4	Variation 4:	Allyl Vinyl Ethers	1378
8.3.4.5	Method 5:	Formation of C—C Multiple Bonds	1378
8.3.4.6	Method 6:	Cross-Coupling Reactions	1380
8.3.4.7	Method 7:	Cleavage of Silyl Enol Ethers	1382
8.3.4.8	Method 8:	Substitution Reactions of Polyhalo Aromatic Compounds	1383
8.3.4.9	Method 9:	Conversion of Amines into Alcohols	1384
8.3.5	Product Subclass 5: Potassium–Sulfur, –Selenium, and –Tellurium Compounds		
	J. V. Comasseto, R. L. O. R. Cunha, and C. C. Silveira		
8.3.5	Product Subclass 5: Potassium–Sulfur, –Selenium, and –Tellurium Compounds		
	Synthesis of Product Subclass 5		
8.3.5.1	Method 1:	Formation of Potassium Sulfide, Selenide, Telluride, and Hydrosulfide	1387
8.3.5.2	Method 2:	Formation of Potassium Thiocyanate, Selenocyanate, and Tellurocyanate	1388
	Applications of Product Subclass 5 in Organic Synthesis		
8.3.5.3	Method 3:	Reaction of Potassium Sulfide, Selenide, Telluride, and Hydrosulfide with Electrophiles	1388
8.3.5.3.1	Variation 1:	Reaction with Alkylating Agents	1388
8.3.5.3.2	Variation 2:	Reaction with Acyl Chlorides	1389
8.3.5.4	Method 4:	Reaction of Potassium Thiocyanate, Selenocyanate, and Tellurocyanate with Electrophiles	1390
8.3.5.4.1	Variation 1:	Reaction with Alkylating Agents	1390
8.3.5.4.2	Variation 2:	Reaction with Acyl Chlorides	1392
8.3.5.4.3	Variation 3:	Reaction with Activated Vinyl Halides, or Imidoyl or Hydrizonoyl Halides	1393
8.3.5.4.4	Variation 4:	Reaction with Diazonium Salts	1393
8.3.5.4.5	Variation 5:	Ring-Opening Reactions	1394
8.3.5.4.6	Variation 6:	Electrophilic Reaction with Alkenes	1394

8.3.6 Product Subclass 6: Potassium Amides and Phosphides

P. Venturello and M. Barbero

8.3.6	Product Subclass 6: Potassium Amides and Phosphides	1399
	Applications of Product Subclass 6 in Organic Synthesis	1399
8.3.6.1	Method 1: Deprotonation of Acidic C—H Groups	1399
8.3.6.1.1	Variation 1: Aromatic Nucleophilic Substitution	1399
8.3.6.1.2	Variation 2: Heteroaromatic Nucleophilic Substitution	1400
8.3.6.1.3	Variation 3: Alkylation of (Phenylselenyl)alkenes	1401
8.3.6.1.4	Variation 4: α -Deprotonation of <i>O</i> -Methyloximes and Dimethylhydrazones	1402
8.3.6.1.5	Variation 5: Synthesis of 3-Phenylalkanals	1403
8.3.6.1.6	Variation 6: Synthesis of α,β -Unsaturated Amides	1404
8.3.6.1.7	Variation 7: Deprotonation of Isoprene	1405
8.3.6.1.8	Variation 8: Synthesis of Imidazole Derivatives	1406
8.3.6.1.9	Variation 9: Deprotonation of 2-Isopropylpyridine	1406
8.3.6.1.10	Variation 10: Synthesis of Arylglycine Derivatives	1407
8.3.6.1.11	Variation 11: Asymmetric Synthesis of α -Hydroxy Esters	1408
8.3.6.1.12	Variation 12: Isomerization of Enynes	1409
8.3.6.1.13	Variation 13: Oxidative Amination of Azaheterenes	1410
8.3.6.1.14	Variation 14: α -Deprotonation–Hydroxylation of Sulfones	1411
8.3.6.2	Method 2: Amination and Heterocyclic Rearrangement	1412
8.3.6.3	Method 3: Cleavage of C—C Bonds	1413
8.3.6.4	Method 4: Catalytic Hydroamination of Alkenes	1413
8.3.6.5	Method 5: Isomerization Reactions	1414
8.3.6.5.1	Variation 1: Isomerization of Alkenes and Alkynes	1414
8.3.6.5.2	Variation 2: Isomerization and Aromatization of Cyclohexadienes	1416
8.3.6.5.3	Variation 3: Isomerization of Propargylic Alcohols and Amines to Terminal Alkynes	1417
8.3.6.6	Method 6: Synthesis of Primary Amines Using Potassium 1,1,3,3-Tetramethyldisilazanide	1417
8.3.6.7	Method 7: Synthesis of Hindered Alkyl Aryl Ethers	1418
8.3.6.8	Method 8: α -Arylation Reactions of Enolates	1419
8.3.6.9	Method 9: Alkylation Reactions of Carboxylic Acid Derivatives	1420
8.3.6.9.1	Variation 1: Dialkylation of Dihydroisindigo	1422
8.3.6.9.2	Variation 2: Synthesis of α,α' -Disubstituted Cyclohexanones via Potassium Enoxyborates	1423
8.3.6.9.3	Variation 3: Synthesis of Substituted Cyclopropanes	1423
8.3.6.10	Method 10: Michael Reactions	1424
8.3.6.10.1	Variation 1: Michael Reaction of an Ester Enolate	1424
8.3.6.10.2	Variation 2: Synthesis of Bicyclo[6.4.0]dodeca-2,11-dien-10-ones	1424
8.3.6.11	Method 11: Synthesis of (α -Monofluoroalkyl)phosphonates	1425
8.3.6.12	Method 12: Phosphorus Ylide Mediated Reactions	1426
8.3.6.13	Method 13: Sulfur Ylide Mediated Reactions	1428
8.3.6.14	Method 14: Preparation of Dienyl Methyl Carbonates	1429
8.3.6.15	Method 15: Ring Contraction	1430
8.3.6.16	Method 16: The Ireland–Claisen Rearrangement	1431

8.3.6.17	Method 17:	Cyclization of Dibromoalkanes to Cyclopentenes	1431
8.3.6.18	Method 18:	Synthetic Uses of Potassium Diphenylphosphide	1432
8.3.6.18.1	Variation 1:	Reductive Phosphorylation of Dichloropropanes	1432
8.3.6.18.2	Variation 2:	Reaction of 6-Halo-5,5-dimethylhex-1-enes with Potassium Diphenylphosphide	1433
8.3.6.18.3	Variation 3:	Reaction of 4-Halotoluenes with Potassium Diphenylphosphide	1433
8.3.6.18.4	Variation 4:	Nucleophilic Aromatic Substitution Reactions of (Fluorophenyl)dihydroimidazoles with Phosphides	1434
8.3.7	Product Subclass 7: Organometallic Compounds of Potassium		
	A. Mordini and M. Valacchi		
8.3.7	Product Subclass 7: Organometallic Compounds of Potassium		
	Synthesis of Product Subclass 7		
8.3.7.1	Method 1:	Reductive Metalation of Carbon—Halogen Bonds	1438
8.3.7.1.1	Variation 1:	Reductive Metalation of sp^3 Carbon—Halogen Bonds	1439
8.3.7.1.2	Variation 2:	Reductive Metalation of sp^2 Carbon—Halogen Bonds	1439
8.3.7.2	Method 2:	Reductive Metalation of Carbon—Chalcogen Bonds	1440
8.3.7.2.1	Variation 1:	Reductive Metalation of Cyclic Ethers	1440
8.3.7.2.2	Variation 2:	Reductive Metalation of Aryl Ethers	1441
8.3.7.2.3	Variation 3:	Reductive Metalation of Benzyl and Allyl Ethers	1441
8.3.7.3	Method 3:	Reductive Metalation with Alkylpotassium Reagents	1442
8.3.7.4	Method 4:	Metalation of Cycloalkanes with Superbases	1443
8.3.7.5	Method 5:	Metalation of Allylic Positions of Alkenes and Dienes Using Superbases	1444
8.3.7.5.1	Variation 1:	Metalation of Unsubstituted Alkenes	1444
8.3.7.5.2	Variation 2:	Metalation of Heterosubstituted Alkenes	1446
8.3.7.5.3	Variation 3:	Metalation of Dienes	1448
8.3.7.6	Method 6:	Metalation at the Vinylic Positions of Alkenes Using Superbases	1451
8.3.7.7	Method 7:	Metalation of Arenes with Superbases	1453
8.3.7.7.1	Variation 1:	Metalation of Heterosubstituted Arenes	1455
8.3.7.8	Method 8:	Metalation of Heteroarenes with Superbases	1457
8.3.7.9	Method 9:	Metalation of Alkylarenes with Superbases	1459
	Applications of Product Subclass 7 in Organic Synthesis		
8.3.7.10	Method 10:	Reaction of Allyl- and Dienylpotassium Reagents with Electrophiles	1462
8.3.7.10.1	Variation 1:	Reaction of Allylpotassium Compounds with Carbon Electrophiles	1463
8.3.7.10.2	Variation 2:	Use of Allylpotassium Compounds for the Stereoselective Preparation of Allylmetals	1466
8.3.7.11	Method 11:	Use of Metalated Fluorotoluenes in Synthesis	1468
8.3.7.12	Method 12:	Use of Metalated Alkylarenes in Synthesis	1469

8.4	Product Class 4: Rubidium and Cesium Compounds A. Streitwieser	
<hr/>		
8.4	Product Class 4: Rubidium and Cesium Compounds	1475
8.4.1	Product Subclass 1: Rubidium and Cesium Metals A. Streitwieser and F. Hasanayn	
<hr/>		
8.4.1	Product Subclass 1: Rubidium and Cesium Metals	1477
8.4.2	Product Subclass 2: Rubidium and Cesium Halides R. M. Kellogg	
<hr/>		
8.4.2	Product Subclass 2: Rubidium and Cesium Halides	1485
	Applications of Product Subclass 2 in Organic Synthesis	1486
8.4.2.1	Method 1: Nucleophilic Substitution by Cesium Fluoride	1487
8.4.2.2	Method 2: Activation of Organic Reactions	1487
8.4.2.2.1	Variation 1: Addition of Carbon Nucleophiles to Carbonyl Compounds ..	1487
8.4.2.2.2	Variation 2: Michael Reactions	1488
8.4.2.2.3	Variation 3: Aldol-Type Reactions	1489
8.4.2.2.4	Variation 4: Oxy-Cope Rearrangements	1490
8.4.2.2.5	Variation 5: Nucleophilic Substitutions and Additions	1490
8.4.2.2.6	Variation 6: Hydrosilylation	1492
8.4.2.2.7	Variation 7: Cross-Coupling Reactions	1492
8.4.2.2.8	Variation 8: 1,3-Dipolar Cycloadditions	1493
8.4.2.3	Method 3: Use of Fluorides as Templates for Crown Ether Synthesis ...	1493
8.4.3	Product Subclass 3: Rubidium and Cesium Carbonates R. M. Kellogg	
<hr/>		
8.4.3	Product Subclass 3: Rubidium and Cesium Carbonates	1497
	Applications of Product Subclass 3 in Organic Synthesis	1498
8.4.3.1	Method 1: Synthesis of Macrocycles	1498
8.4.3.1.1	Variation 1: Macrocyclic Lactones	1498
8.4.3.1.2	Variation 2: Macrocyclic Amines	1501
8.4.3.1.3	Variation 3: Crown Thioethers	1502
8.4.3.1.4	Variation 4: Carbocycles	1504
8.4.3.2	Method 2: Use of Cesium Carbonate To Generate Nucleophiles	1506
8.4.3.2.1	Variation 1: Nucleophilic Substitution with Cesium Carboxylates	1506
8.4.3.2.2	Variation 2: Substitutions Using Cesium Thiocarboxylates	1508
8.4.3.2.3	Variation 3: Substitution Using Cesium Carboxylates Activated by Crown Ethers	1509
8.4.3.3	Method 3: Further Synthetic Uses of Cesium Nucleophiles	1511
8.4.3.4	Method 4: Use of Cesium Carbonate in Cross-Coupling Reactions	1511
8.4.3.5	Method 5: Carboxylation Mediated by Cesium Carbonate	1512

8.4.4	Product Subclass 4: Organometallic Compounds of Rubidium and Cesium	
	A. Streitwieser and L. Xie	
<hr/>		
8.4.4	Product Subclass 4: Organometallic Compounds of Rubidium and Cesium	1517
	Synthesis of Product Subclass 4	1517
8.4.4.1	Method 1: Hydrogen–Metal Exchange	1517
8.4.4.1.1	Variation 1: Removal of Hydrogen by Rubidium or Cesium Metal	1517
8.4.4.1.2	Variation 2: Removal of Hydrogen by Acid–Base Reactions	1518
8.4.4.2	Method 2: Metal–Metal Exchange	1519
8.4.4.2.1	Variation 1: With Rubidium or Cesium Metal	1520
8.4.4.2.2	Variation 2: With Rubidium or Cesium Salts	1520
8.4.4.3	Method 3: Reduction of C–C Bonds	1521
8.4.4.4	Method 4: Substitution of Heteroatoms	1522
8.4.4.5	Method 5: Addition of Cesium Fluoride to Alkenes	1523
	Applications of Product Subclass 4 in Organic Synthesis	1524
8.4.4.6	Method 6: Transmetalation	1524
8.4.4.7	Method 7: Addition to Carbonyl Groups	1524
8.4.4.8	Method 8: Halogenation	1524
8.4.4.9	Method 9: Anionic Polymerization	1525
8.4.4.10	Method 10: Alkylation	1526
	Keyword Index	1529
	Author Index	1567
	Abbreviations	1611
