

## Volume 31a: Arene—X (X = Hal, O, S, Se, Te)

	<b>Preface</b> .....	V
	<b>Volume Editor's Preface</b> .....	VII
	<b>Table of Contents</b> .....	XIII
	<b>Introduction</b>	
	C. A. Ramsden .....	1
<b>31.1</b>	<b>Product Class 1: Fluoroarenes</b>	
	G. Sandford .....	21
<b>31.2</b>	<b>Product Class 2: Chloroarenes</b>	
	S. P. Stanforth .....	79
<b>31.3</b>	<b>Product Class 3: Bromoarenes</b>	
	S. P. Stanforth .....	121
<b>31.4</b>	<b>Product Class 4: Aryl Iodine Compounds</b>	
<b>31.4.1</b>	<b>Product Subclass 1: Hypervalent Iodoarenes and Aryliodonium Salts</b>	
	V. V. Zhdankin .....	161
<b>31.4.2</b>	<b>Product Subclass 2: Iodoarenes</b>	
	S. R. Waldvogel and K. M. Wehming .....	235
<b>31.5</b>	<b>Product Class 5: Phenols and Phenolates</b>	
<b>31.5.1</b>	<b>Product Subclass 1: Monohydric Phenols and Corresponding Phenolates</b>	
	C. González-Bello and L. Castedo .....	275
<b>31.5.1.1</b>	<b>Synthesis by Substitution</b>	
	C. González-Bello and L. Castedo .....	277
<b>31.5.1.2</b>	<b>Synthesis by Elimination</b>	
	C. González-Bello and L. Castedo .....	305
<b>31.5.1.3</b>	<b>Synthesis by Rearrangement</b>	
	C. González-Bello and L. Castedo .....	319
<b>31.5.1.4</b>	<b>Synthesis with Retention of the Functional Group</b>	
	C. González-Bello and L. Castedo .....	331
<b>31.5.1.5</b>	<b>Synthesis from Nonaromatic Precursors</b>	
	A. W. Thomas .....	337

<b>31.5.2</b>	<b>Product Subclass 2: Polyhydric Phenols and Corresponding Phenolates</b> M. A. Marsini and T. R. R. Pettus .....	403
<b>31.5.2.1</b>	<b>Synthesis by Substitution</b> M. A. Marsini and T. R. R. Pettus .....	405
<b>31.5.2.2</b>	<b>Synthesis by Elimination</b> M. A. Marsini and T. R. R. Pettus .....	415
<b>31.5.2.3</b>	<b>Synthesis by Addition</b> M. A. Marsini and T. R. R. Pettus .....	421
<b>31.5.2.4</b>	<b>Synthesis by Rearrangement</b> M. A. Marsini and T. R. R. Pettus .....	431
<b>31.5.2.5</b>	<b>Synthesis with Retention of the Functional Group</b> M. A. Marsini and T. R. R. Pettus .....	441
<b>31.6</b>	<b>Product Class 6: Aryl Ethers</b>	
<b>31.6.1</b>	<b>Product Subclass 1: Diaryl Ethers</b> A. W. Thomas .....	469
<b>31.6.2</b>	<b>Product Subclass 2: Alkyl Aryl Ethers</b> C. M. R. Low .....	545
<b>31.6.2.1</b>	<b>Synthesis by Substitution</b> C. M. R. Low .....	547
<b>31.6.2.2</b>	<b>Synthesis by Elimination</b> C. M. R. Low .....	627
<b>31.6.2.3</b>	<b>Synthesis by Rearrangement</b> C. M. R. Low .....	633
<b>31.6.2.4</b>	<b>Synthesis with Retention of the Functional Group</b> C. M. R. Low .....	637
<b>31.6.2.5</b>	<b>Synthesis from Nonaromatic Precursors</b> M. Gerster and A. W. Thomas .....	643
<b>31.7</b>	<b>Product Class 7: Aryl Hypohalites, Aryl Peroxides, and Aryloxy Sulfur Compounds</b> J. Chen and C. K.-F. Chiu .....	665
<b>31.8</b>	<b>Product Class 8: Cyclic Aryl Ethers</b> D. Craig .....	705

<b>31.9</b>	<b>Product Class 9: Arenesulfonic Acids and Derivatives</b>	
<b>31.9.1</b>	<b>Product Subclass 1: Arenesulfonic Acids and Arenesulfonate Salts</b> B. Fravel, R. Murugan, and E. F. V. Scriven .....	739
<b>31.9.2</b>	<b>Product Subclass 2: Arenesulfonic Acid Derivatives</b> I. Shcherbakova .....	775
<b>31.10</b>	<b>Product Class 10: Aryl Sulfones and Nitrogen Derivatives</b> S. Nakamura and T. Toru .....	833
<b>31.11</b>	<b>Product Class 11: Arenesulfinic Acids and Derivatives</b> S. Nakamura and T. Toru .....	879
<b>31.12</b>	<b>Product Class 12: Aryl Sulfoxides and S-Arylsulfimides</b> S. G. Collins and A. R. Maguire .....	907
<b>31.13</b>	<b>Product Class 13: Arenethiols and Arenethiolates</b> O. A. Rakitin .....	949
<b>31.14</b>	<b>Product Class 14: Aryl Sulfides</b> O. A. Rakitin .....	975
<b>31.15</b>	<b>Product Class 15: Arylsulfonium Salts and Derivatives</b> I. Fernández and N. Khair .....	1001
<b>31.16</b>	<b>Product Class 16: Arenesulfenic Acids and Derivatives</b> S. Perrio, V. Reboul, and P. Metzner .....	1041
<b>31.17</b>	<b>Product Class 17: Aryl Polysulfides</b> O. A. Rakitin .....	1085
<b>31.18</b>	<b>Product Class 18: Cyclic Aryl Sulfides</b> O. A. Rakitin .....	1097
<b>31.19</b>	<b>Product Class 19: Aryl Selenium Compounds</b> S. Watanabe and T. Kataoka .....	1107
<b>31.20</b>	<b>Product Class 20: Aryl Tellurium Compounds</b> T. Kataoka and S. Watanabe .....	1159
	<b>Keyword Index</b> .....	i
	<b>Author Index</b> .....	lxv
	<b>Abbreviations</b> .....	cxxv

## Table of Contents

### Introduction

C. A. Ramsden

<b>Introduction</b> .....	1
---------------------------	---

### 31.1 Product Class 1: Fluoroarenes

G. Sandford

<b>31.1</b>	<b>Product Class 1: Fluoroarenes</b> .....	21
<b>31.1.1</b>	Synthesis of Product Class 1 .....	24
<b>31.1.1.1</b>	Synthesis by Substitution of Hydrogen .....	24
<b>31.1.1.1.1</b>	Method 1: Direct Fluorination with Elemental Fluorine .....	24
<b>31.1.1.1.2</b>	Method 2: Reaction with Electrophilic N–F Reagents .....	31
<b>31.1.1.1.2.1</b>	Variation 1: With 1-Fluoropyridinium Salts .....	31
<b>31.1.1.1.2.2</b>	Variation 2: With 1-(Chloromethyl)-4-fluoro-1,4-diazoniabicyclo[2.2.2]- octane Bis(tetrafluoroborate) .....	34
<b>31.1.1.1.2.3</b>	Variation 3: With Other Electrophilic N–F Reagents .....	35
<b>31.1.1.1.3</b>	Method 3: Reaction with Xenon Difluoride .....	36
<b>31.1.1.1.4</b>	Method 4: Reaction with Organic Hypofluorites .....	37
<b>31.1.1.1.5</b>	Method 5: Reaction with Cesium Fluoroxysulfate .....	41
<b>31.1.1.2</b>	Synthesis by Substitution of Organometallic Groups .....	42
<b>31.1.1.2.1</b>	Method 1: Reaction of Aryllithium Derivatives .....	42
<b>31.1.1.2.2</b>	Method 2: Reaction of Phenylmagnesium Halides .....	43
<b>31.1.1.2.3</b>	Method 3: Reactions of Aryl–Group 14 Derivatives .....	44
<b>31.1.1.3</b>	Synthesis by Substitution of Halogen Atoms .....	45
<b>31.1.1.3.1</b>	Method 1: Reaction with Alkali Metal Fluorides .....	46
<b>31.1.1.4</b>	Synthesis by Substitution of Sulfur .....	52
<b>31.1.1.4.1</b>	Method 4: Reaction of Sulfonyl Derivatives .....	52
<b>31.1.1.5</b>	Synthesis by Substitution of Nitrogen .....	53
<b>31.1.1.5.1</b>	Method 1: Replacement of Nitro Groups .....	53
<b>31.1.1.5.1.1</b>	Variation 1: Reaction with Potassium Fluoride .....	53
<b>31.1.1.5.1.2</b>	Variation 2: Reaction with Tetraalkylammonium Fluorides .....	56
<b>31.1.1.5.2</b>	Method 2: Replacement of Diazo Groups .....	56
<b>31.1.1.5.2.1</b>	Variation 1: Reaction with Hydrogen Fluoride .....	57
<b>31.1.1.5.2.2</b>	Variation 2: Reaction with Hydrogen Fluoride/Pyridine Mixtures .....	58
<b>31.1.1.5.2.3</b>	Variation 3: Reaction of Diazonium Tetrafluoroborates .....	61
<b>31.1.1.5.2.4</b>	Variation 4: Reaction of Diazonium Hexafluoroantimonates .....	63
<b>31.1.1.5.2.5</b>	Variation 5: Reaction with Nitrosonium Tetrafluoroborate .....	64
<b>31.1.1.5.2.6</b>	Variation 6: Reaction of Triazenes .....	65
<b>31.1.1.6</b>	Synthesis by Elimination .....	66
<b>31.1.1.6.1</b>	Method 1: Elimination of Hydrogen Fluoride .....	66

31.1.1.6.2	Method 2: Elimination of Fluorine	66
31.1.1.7	Synthesis with Retention of Fluorine	68
31.1.1.7.1	Method 1: Reactions of Fluoroarenes	68
31.1.1.7.2	Method 2: Reactions of Perfluoroarenes	70
<b>31.2</b>	<b>Product Class 2: Chloroarenes</b>	
	S. P. Stanforth	
<b>31.2</b>	<b>Product Class 2: Chloroarenes</b>	79
<b>31.2.1</b>	Synthesis of Product Class 2	79
<b>31.2.1.1</b>	Synthesis by Substitution	79
<b>31.2.1.1.1</b>	Method 1: Electrophilic Chlorination	80
<b>31.2.1.1.1.1</b>	Variation 1: Of Phenols and Anisoles	80
<b>31.2.1.1.1.2</b>	Variation 2: Of Anilines and Acetanilides	82
<b>31.2.1.1.1.3</b>	Variation 3: Of Alkylbenzenes	84
<b>31.2.1.1.1.4</b>	Variation 4: Of Polycyclic Aromatics	85
<b>31.2.1.1.2</b>	Method 2: The Sandmeyer Reaction	86
<b>31.2.1.1.3</b>	Method 3: Substitution of a Nitro Group	87
<b>31.2.1.1.4</b>	Method 4: Substitution of a Phenolic Hydroxy Group	88
<b>31.2.1.2</b>	Synthesis by Elimination	89
<b>31.2.1.2.1</b>	Method 1: Dehydrohalogenation	89
<b>31.2.1.2.2</b>	Method 2: Dehalogenation	90
<b>31.2.1.2.3</b>	Method 3: Pyrolytic Loss of a Small Molecule	91
<b>31.2.1.2.4</b>	Method 4: Transition-Metal-Catalyzed Decarbonylation	92
<b>31.2.1.3</b>	Synthesis by Cycloaddition	93
<b>31.2.1.3.1</b>	Method 1: Cycloadditions Reactions of Tetrachlorothiophene Dioxide	94
<b>31.2.1.3.2</b>	Method 2: Cobalt-Catalyzed Reactions	95
<b>31.2.1.4</b>	Synthesis by Rearrangement	95
<b>31.2.1.4.1</b>	Method 1: Rearrangement During Chlorination	95
<b>31.2.2</b>	Applications of Product Class 2 in Organic Synthesis	96
<b>31.2.2.1</b>	Method 1: Cross-Coupling Reactions	96
<b>31.2.2.1.1</b>	Variation 1: Synthesis of Biaryls	97
<b>31.2.2.1.2</b>	Variation 2: Synthesis of Arylalkenes	106
<b>31.2.2.1.3</b>	Variation 3: Synthesis of Arylalkynes	108
<b>31.2.2.1.4</b>	Variation 4: Synthesis of Arylalkanes	109
<b>31.2.2.1.5</b>	Variation 5: Carbonylation and Cyanation Reactions	110
<b>31.2.2.1.6</b>	Variation 6: Metal-Catalyzed Heterosubstitution Reactions	111
<b>31.2.2.2</b>	Method 2: Nucleophilic Substitution Reactions	114
<b>31.2.2.2.1</b>	Variation 1: The $S_NAr$ Reaction	114
<b>31.2.2.2.2</b>	Variation 2: The $S_{RN}1$ Reaction	115
<b>31.2.2.2.3</b>	Variation 3: Substitution via Benzyne Intermediates	115
<b>31.2.2.3</b>	Method 3: Enzymatic Oxidation Reactions	117

<b>31.3</b>	<b>Product Class 3: Bromoarenes</b> S. P. Stanforth	
<b>31.3</b>	<b>Product Class 3: Bromoarenes</b> .....	121
<b>31.3.1</b>	Synthesis of Product Class 3 .....	121
<b>31.3.1.1</b>	Synthesis by Substitution .....	121
<b>31.3.1.1.1</b>	Method 1: Electrophilic Bromination .....	121
<b>31.3.1.1.1.1</b>	Variation 1: Of Phenols and Anisoles .....	122
<b>31.3.1.1.1.2</b>	Variation 2: Of Anilines .....	125
<b>31.3.1.1.1.3</b>	Variation 3: Of Benzene and Alkylbenzenes .....	126
<b>31.3.1.1.1.4</b>	Variation 4: Of Deactivated Benzenes .....	128
<b>31.3.1.1.1.5</b>	Variation 5: Of Polycyclic Aromatics .....	129
<b>31.3.1.1.2</b>	Method 2: Synthesis from Organometallics .....	130
<b>31.3.1.1.2.1</b>	Variation 1: From Aryllithiums .....	130
<b>31.3.1.1.2.2</b>	Variation 2: From Arylsilanes .....	131
<b>31.3.1.1.2.3</b>	Variation 3: From Arylstannanes .....	132
<b>31.3.1.1.3</b>	Method 3: The Sandmeyer Reaction .....	132
<b>31.3.1.1.4</b>	Method 4: Substitution of a Phenolic Group .....	134
<b>31.3.1.2</b>	Synthesis by Elimination .....	134
<b>31.3.1.2.1</b>	Method 1: Dehydrohalogenation .....	135
<b>31.3.1.2.2</b>	Method 2: Dehalogenation .....	135
<b>31.3.1.2.3</b>	Method 3: Transition-Metal-Catalyzed Decarbonylation .....	136
<b>31.3.1.2.4</b>	Method 4: The Cristol–Firth–Hunsdiecker Reaction .....	136
<b>31.3.1.3</b>	Synthesis by Cycloaddition .....	137
<b>31.3.2</b>	Applications of Product Class 3 in Organic Synthesis .....	139
<b>31.3.2.1</b>	Cross-Coupling Reactions .....	139
<b>31.3.2.1.1</b>	Method 1: Synthesis of Biaryls .....	139
<b>31.3.2.1.2</b>	Method 2: Synthesis of Arylalkenes .....	144
<b>31.3.2.1.3</b>	Method 3: Synthesis of Arylalkynes .....	146
<b>31.3.2.1.4</b>	Method 4: Synthesis of Arylalkanes .....	147
<b>31.3.2.1.5</b>	Method 5: Carbonylation and Cyanation Reactions .....	149
<b>31.3.2.1.6</b>	Method 6: Metal-Catalyzed Heterosubstitution Reactions .....	150
<b>31.3.2.2</b>	Nucleophilic Substitution Reactions .....	153
<b>31.3.2.2.1</b>	Method 1: The $S_NAr$ Reaction .....	153
<b>31.3.2.2.2</b>	Method 2: The $S_{RN}1$ Reaction .....	153
<b>31.3.2.2.3</b>	Method 3: Substitution via Benzyne Intermediates .....	154
<b>31.3.2.3</b>	Generation of Aryl Radicals .....	155
<b>31.3.2.4</b>	Generation of Organometallic Reagents .....	156
<b>31.3.2.5</b>	Enzymatic Oxidation Reactions .....	156

## 31.4 Product Class 4: Aryl Iodine Compounds

### 31.4.1 Product Subclass 1: Hypervalent Iodoarenes and Aryliodonium Salts

V. V. Zhdankin

<b>31.4.1</b>	<b>Product Subclass 1: Hypervalent Iodoarenes and Aryliodonium Salts</b>	161
<b>31.4.1.1</b>	Synthesis of Product Subclass 1	162
<b>31.4.1.1.1</b>	Synthesis by Oxidative Addition to Iodoarenes	162
<b>31.4.1.1.1.1</b>	Method 1: Iodylarenes by Oxidation of Iodoarenes	162
<b>31.4.1.1.1.2</b>	Method 2: (Difluoroiodo)arenes by Fluorination of Iodoarenes	164
<b>31.4.1.1.1.2.1</b>	Variation 1: Fluorination by Powerful Fluorinating Reagents	164
<b>31.4.1.1.1.2.2</b>	Variation 2: Electrochemical Fluorination	165
<b>31.4.1.1.1.3</b>	Method 3: (Dichloroiodo)arenes by Chlorination of Iodoarenes	165
<b>31.4.1.1.1.4</b>	Method 4: (Diacloxyiodo)arenes by the Oxidation of Iodoarenes in the Presence of a Carboxylic Acid	166
<b>31.4.1.1.1.5</b>	Method 5: Benziodazoles by Oxidation of 2-Iodobenzamides	168
<b>31.4.1.1.2</b>	Synthesis by Ligand Exchange of Hypervalent Iodine Compounds	169
<b>31.4.1.1.2.1</b>	Method 1: Aryliodine(V) Carboxylates from Iodylarenes	169
<b>31.4.1.1.2.2</b>	Method 2: (Diacloxyiodo)arenes from (Diacetoxyiodo)benzene by Ligand Exchange with a Carboxylic Acid	170
<b>31.4.1.1.2.3</b>	Method 3: Aryliodine(III) Peroxides by Exchange with <i>tert</i> -Butyl Hydroperoxide	171
<b>31.4.1.1.2.4</b>	Method 4: Aryliodine(III) Sulfonates from Arenes	172
<b>31.4.1.1.2.4.1</b>	Variation 1: [Hydroxy(organosulfonyloxy)iodo]arenes from (Diacetoxyiodo)arenes	172
<b>31.4.1.1.2.4.2</b>	Variation 2: Oxygen-Bridged Derivatives from (Diacetoxyiodo)benzene or Iodosylbenzene	173
<b>31.4.1.1.2.4.3</b>	Variation 3: (Organosulfonyloxy)benziodoxoles from 1-Hydroxybenziodoxoles	174
<b>31.4.1.1.2.5</b>	Method 5: Iodosylarenes by Hydrolysis of Aryliodine(III) Derivatives	175
<b>31.4.1.1.2.5.1</b>	Variation 1: Iodosylarenes by Hydrolysis of (Diacloxyiodo)arenes	175
<b>31.4.1.1.2.5.2</b>	Variation 2: Iodosylarenes by Hydrolysis of (Dichloroiodo)arenes	176
<b>31.4.1.1.2.6</b>	Method 6: Aryliodine(III) Amides from (Acyloxyiodo)arenes	176
<b>31.4.1.1.2.7</b>	Method 7: Aryliodine(III) Azides from (Acyloxyiodo)arenes	177
<b>31.4.1.1.2.8</b>	Method 8: (Difluoroiodo)arenes from Hypervalent Iodoarenes	178
<b>31.4.1.1.2.9</b>	Method 9: Alkynyl(aryl)iodonium Salts from Hypervalent Iodoarenes	179
<b>31.4.1.1.2.9.1</b>	Variation 1: Alkynyl(aryl)iodonium Tetrafluoroborates	179
<b>31.4.1.1.2.9.2</b>	Variation 2: Alkynyl(aryl)iodonium Arenesulfonates	179
<b>31.4.1.1.2.9.3</b>	Variation 3: Alkynyl(aryl)iodonium Trifluoromethanesulfonates	181
<b>31.4.1.1.2.10</b>	Method 10: Aryl- and Hetaryliodonium Salts from Hypervalent Iodoarenes	183
<b>31.4.1.1.2.10.1</b>	Variation 1: Diaryliodonium Tetrafluoroborates	183
<b>31.4.1.1.2.10.2</b>	Variation 2: Aryl- and Hetaryliodonium Sulfates and Sulfonates	184
<b>31.4.1.1.2.10.3</b>	Variation 3: Aryl- and Hetaryliodonium Halides	188
<b>31.4.1.1.2.11</b>	Method 11: Alkenyl(aryl)iodonium Salts from Hypervalent Iodoarenes	189
<b>31.4.1.1.2.11.1</b>	Variation 1: Alkenyl(aryl)iodonium Tetrafluoroborates	189

31.4.1.1.2.11.2	Variation 2:	Alkenyl(aryl)iodonium Organosulfonates .....	190
31.4.1.1.2.12	Method 12:	Synthesis of Alkyl(aryl)iodonium Salts .....	192
31.4.1.1.2.12.1	Variation 1:	Aryl(polyfluoroalkyl)iodonium Organosulfonates .....	193
31.4.1.1.2.12.2	Variation 2:	[(Arylsulfonyl)methyl](phenyl)iodonium Trifluoromethane- sulfonates .....	194
31.4.1.1.2.13	Method 13:	Aryl(cyano)iodonium Derivatives from Hypervalent Iodoarenes .....	195
31.4.1.1.2.13.1	Variation 1:	Aryl(cyano)iodonium Organosulfonates .....	195
31.4.1.1.2.13.2	Variation 2:	Cyanobenziodoxoles .....	195
31.4.1.1.2.14	Method 14:	Aryliodonium Ylides from Hypervalent Iodoarenes .....	196
31.4.1.1.2.15	Method 15:	Aryliodonium Imides from Hypervalent Iodoarenes .....	197
31.4.1.2		Applications of Product Subclass 1 in Organic Synthesis .....	198
31.4.1.2.1		Preparation of Products with a New C—C Bond .....	199
31.4.1.2.1.1	Method 1:	Reactions of Alkynyl(aryl)iodonium Salts .....	199
31.4.1.2.1.1.1	Variation 1:	Preparation of Substituted Alkynes .....	199
31.4.1.2.1.1.2	Variation 2:	Synthesis of Substituted Cyclopentenes via Intramolecular Carbene Insertion .....	201
31.4.1.2.1.1.3	Variation 3:	Synthesis of Nitrogen and Oxygen Heterocycles via Carbene Cyclizations .....	202
31.4.1.2.1.2	Method 2:	Reactions of Diaryliodonium Salts .....	204
31.4.1.2.1.2.1	Variation 1:	Reactions via a Benzyne Intermediate .....	204
31.4.1.2.1.2.2	Variation 2:	Arylations .....	205
31.4.1.2.1.3	Method 3:	Reactions of Alkenyl(aryl)iodonium Salts .....	206
31.4.1.2.1.3.1	Variation 1:	Alkenylations .....	206
31.4.1.2.1.3.2	Variation 2:	Reactions via Alkylidene-carbene Intermediates .....	208
31.4.1.2.1.4	Method 4:	Reactions of Alkyl(aryl)iodonium Derivatives .....	208
31.4.1.2.1.4.1	Variation 1:	Fluoroalkylations with Aryl(polyfluoroalkyl)iodonium Organo- sulfonates .....	208
31.4.1.2.1.4.2	Variation 2:	Reactions of [(Arylsulfonyl)methyl](phenyl)iodonium Trifluoromethanesulfonates with Nucleophiles .....	209
31.4.1.2.1.4.3	Variation 3:	Reactions of ( $\beta$ -Oxoalkyl)phenyliodonium Salts .....	210
31.4.1.2.1.5	Method 5:	Reactions of Aryliodonium Ylides .....	210
31.4.1.2.1.5.1	Variation 1:	Reactions via Carbene Intermediates .....	210
31.4.1.2.1.5.2	Variation 2:	Cycloadditions .....	211
31.4.1.2.2		Preparation of Products with a New C—F Bond .....	211
31.4.1.2.2.1	Method 1:	Fluorination with (Difluoroiodo)arenes .....	211
31.4.1.2.2.1.1	Variation 1:	$\alpha$ -Fluorination of Carbonyl Compounds .....	211
31.4.1.2.2.1.2	Variation 2:	Fluorination of Alkenes .....	212
31.4.1.2.3		Preparation of Products with a New C—Cl Bond .....	212
31.4.1.2.3.1	Method 1:	Chlorination with (Dichloroiodo)arenes .....	212
31.4.1.2.4		Preparation of Products with a New C—I Bond .....	213
31.4.1.2.4.1	Method 1:	Oxidative Iodination Using Hypervalent Iodoarenes .....	213
31.4.1.2.5		Oxidations and Oxidative Rearrangements .....	214
31.4.1.2.5.1	Method 1:	Oxidations with Iodylarenes and Aryliodine(V) Carboxylates .....	214

31.4.1.2.5.1.1	Variation 1:	Oxidation of Alcohols to Aldehydes	214
31.4.1.2.5.1.2	Variation 2:	Oxidation at a Benzylic Position	214
31.4.1.2.5.1.3	Variation 3:	Oxidative Cyclizations	215
31.4.1.2.5.1.4	Variation 4:	Oxidation of Sulfides to Sulfoxides	215
31.4.1.2.5.2	Method 2:	Oxidations with (Acyloxyiodo)arenes	216
31.4.1.2.5.2.1	Variation 1:	Hydroxylation of Enolizable Ketones	216
31.4.1.2.5.2.2	Variation 2:	Oxidation of Phenols and Phenol Ethers	217
31.4.1.2.5.2.3	Variation 3:	Oxidative Rearrangements	218
31.4.1.2.5.3	Method 3:	Oxidations with Peroxybenziodoxole	219
31.4.1.2.5.4	Method 4:	Oxidations with [Hydroxy(organosulfonyloxy)iodo]benzenes	219
31.4.1.2.5.4.1	Variation 1:	Tosyloxylation of Enolizable Ketones	219
31.4.1.2.5.4.2	Variation 2:	Oxidative Rearrangements	220
31.4.1.2.5.5	Method 5:	Oxidations with Iodosylarenes	220
31.4.1.2.5.5.1	Variation 1:	Oxidation of Alcohols	221
31.4.1.2.5.5.2	Variation 2:	$\alpha$ -Hydroxylation and $\alpha$ -Alkoxylation of Carbonyl Compounds	221
31.4.1.2.5.5.3	Variation 3:	Transition-Metal-Catalyzed Oxygenations	221
31.4.1.2.6		Preparation of Products with a New C—S Bond	221
31.4.1.2.6.1	Method 1:	Oxidative Thiocyanation Using Hypervalent Iodoarenes	221
31.4.1.2.7		Preparation of Products with a New C—N Bond	222
31.4.1.2.7.1	Method 1:	Reactions of Aryliodine(III) Amides	222
31.4.1.2.7.2	Method 2:	Reactions of Aryliodine(III) Azides	222
31.4.1.2.7.2.1	Variation 1:	Azidations with (Diazoiodo)benzene In Situ	222
31.4.1.2.7.2.2	Variation 2:	Azidations with Azidobenziodoxole	223
31.4.1.2.7.3	Method 3:	Reactions of Aryliodonium Imides	223
31.4.1.2.7.3.1	Variation 1:	C—H Amidation	224
31.4.1.2.7.3.2	Variation 2:	Azirdination of Alkenes	224
31.4.1.2.7.4	Method 4:	Hypervalent Iodoarenes as Reagents for Hofmann Rearrangements	225

### 31.4.2 Product Subclass 2: Iodoarenes

S. R. Waldvogel and K. M. Wehming

31.4.2		<b>Product Subclass 2: Iodoarenes</b>	235
31.4.2.1		Synthesis of Product Subclass 2	235
31.4.2.1.1	Method 1:	Electrophilic Iodination	235
31.4.2.1.1.1	Variation 1:	Of Phenols	235
31.4.2.1.1.2	Variation 2:	Of Naphthols	239
31.4.2.1.1.3	Variation 3:	Of Alkoxyarenes	240
31.4.2.1.1.4	Variation 4:	Of Naphthyl Ethers	242
31.4.2.1.1.5	Variation 5:	Of Anilines	243
31.4.2.1.1.6	Variation 6:	Of Benzenes and Their Alkyl Derivatives	245
31.4.2.1.1.7	Variation 7:	Of Halobenzenes	248
31.4.2.1.1.8	Variation 8:	Of Electron-Deficient Arenes	250
31.4.2.1.2	Method 2:	Iodination by Electrophilic Metalation	252
31.4.2.1.2.1	Variation 1:	Iododethallation	253
31.4.2.1.2.2	Variation 2:	Iododemercuration	254

31.4.2.1.2.3	Variation 3:	Iododepalladation	256
31.4.2.1.3	Method 3:	Iodination by <i>ortho</i> -Lithiation	257
31.4.2.1.3.1	Variation 1:	With <i>ortho</i> -Directing Halogen Substituents	257
31.4.2.1.3.2	Variation 2:	With <i>ortho</i> -Directing Alkoxy Substituents	258
31.4.2.1.3.3	Variation 3:	With Strong Directing Groups for <i>ortho</i> -Metalation	259
31.4.2.1.4	Method 4:	Sandmeyer-Type Reactions	260
31.4.2.1.4.1	Variation 1:	Direct Conversion of Amino Groups or Diazonium Salts	260
31.4.2.1.4.2	Variation 2:	Substitution of Triazenes	262
31.4.2.1.4.3	Variation 3:	Reactions of 2,5-Dimethyl-1 <i>H</i> -pyrrole-Substituted Aryls	263
31.4.2.1.5	Method 5:	Replacement of Bromine	263
31.4.2.1.6	Method 6:	Iododesilylation	266
31.4.2.1.7	Method 7:	Iododestannylation	268

## 31.5 Product Class 5: Phenols and Phenolates

---

### 31.5.1 Product Subclass 1: Monohydric Phenols and Corresponding Phenolates

C. González-Bello and L. Castedo

---

#### 31.5.1 Product Subclass 1: Monohydric Phenols and Corresponding Phenolates 275

#### 31.5.1.1 Synthesis by Substitution

C. González-Bello and L. Castedo

---

31.5.1.1	<b>Synthesis by Substitution</b>	277
31.5.1.1.1	Method 1: Substitution of Hydrogen via Metal-Catalyzed Oxidation	277
31.5.1.1.1.1	Variation 1: Using Oxygen/Air	277
31.5.1.1.1.2	Variation 2: Using Nitrous Oxide	278
31.5.1.1.1.3	Variation 3: Using Hydrogen Peroxide	278
31.5.1.1.2	Method 2: Substitution of Hydrogen via Reductive Oxidation	280
31.5.1.1.3	Method 3: Substitution of Hydrogen via Electrochemical Hydroxylation	
	Using Electron-Withdrawing Groups	280
31.5.1.1.4	Method 4: Substitution of Hydrogen via Electrophilic Hydroxylation	281
31.5.1.1.4.1	Variation 1: Using Hydrogen Peroxide and Superacids	281
31.5.1.1.4.2	Variation 2: Using Peroxy Acids	283
31.5.1.1.5	Method 5: Substitution of Hydrogen via Nucleophilic Hydroxylation of Nitroarenes Using Alkyl Peroxides	283
31.5.1.1.6	Method 6: Substitution of Hydrogen via Biomimetic Processes	285
31.5.1.1.7	Method 7: Substitution of Organometallic Groups via Direct Oxidation	286
31.5.1.1.7.1	Variation 1: Using Oxygen	286
31.5.1.1.7.2	Variation 2: Using Hydroperoxides	287
31.5.1.1.7.3	Variation 3: Using Molybdenum Peroxides	287
31.5.1.1.7.4	Variation 4: Using 2-Sulfonyloxaziridines	288
31.5.1.1.8	Method 8: Substitution of Organometallic Groups via Indirect Oxidation	288
31.5.1.1.8.1	Variation 1: Oxidation of Boronic Esters	288
31.5.1.1.8.2	Variation 2: Using Bis(trimethylsilyl) Peroxide	290

31.5.1.1.9	Method 9:	Substitution of Aryl Aldehydes	290
31.5.1.1.10	Method 10:	Substitution of Alkyl Aryl Ketones	293
31.5.1.1.11	Method 11:	Substitution of Sulfonic Acids via Alkaline Fusion	293
31.5.1.1.12	Method 12:	Hydrolysis of Diazonium Salts	293
31.5.1.1.12.1	Variation 1:	Thermal Hydrolysis	294
31.5.1.1.12.2	Variation 2:	Copper–Redox Hydrolysis	294
31.5.1.1.13	Method 13:	Hydrolysis of Arylamines	295
31.5.1.1.13.1	Variation 1:	Acidic Hydrolysis	295
31.5.1.1.13.2	Variation 2:	Basic Hydrolysis	295
31.5.1.1.14	Method 14:	Substitution of Halides via Alkaline Fusion	296
31.5.1.1.15	Method 15:	Substitution of Halides via Metal-Catalyzed Carbon–Oxygen Coupling Reactions	297
31.5.1.1.16	Method 16:	Nucleophilic Hydroxylation of Fluoroarenes	299
31.5.1.1.16.1	Variation 1:	Reaction of Fluoronitroarenes with Alkyl Hydroperoxides	299
31.5.1.1.16.2	Variation 2:	Reaction of Fluoroarenes with Alkoxides	299
31.5.1.1.17	Method 17:	Reaction of Substituted 1,2-Dichloroarenes with Nitrites	301

### 31.5.1.2 Synthesis by Elimination

C. González-Bello and L. Castedo

31.5.1.2	<b>Synthesis by Elimination</b>	305	
31.5.1.2.1	Method 1:	Elimination of Esters by Hydrolysis	305
31.5.1.2.1.1	Variation 1:	By Acid Alcoholysis/Hydrolysis	305
31.5.1.2.1.2	Variation 2:	By Basic Alcoholysis/Hydrolysis	306
31.5.1.2.2	Method 2:	Elimination of Esters by Addition of Metallic Hydrides	307
31.5.1.2.3	Method 3:	Elimination of Alkyl Ethers	307
31.5.1.2.3.1	Variation 1:	Reaction with Brønsted Acids	308
31.5.1.2.3.2	Variation 2:	Reaction with Lewis Acids	308
31.5.1.2.3.3	Variation 3:	Reaction with Nucleophiles	309
31.5.1.2.4	Method 4:	Elimination from Benzyl Ethers	310
31.5.1.2.4.1	Variation 1:	Hydrogenolysis of Benzyl Ethers	310
31.5.1.2.4.2	Variation 2:	Radical Cleavage of Aryl 4-Methoxybenzyl Ethers	310
31.5.1.2.4.3	Variation 3:	Photocleavage of Nitrobenzyl Ethers	311
31.5.1.2.5	Method 5:	Elimination of Sulfonates	312
31.5.1.2.5.1	Variation 1:	By Basic Hydrolysis	312
31.5.1.2.5.2	Variation 2:	By Reaction with Nucleophiles	313
31.5.1.2.6	Method 6:	Aromatization of Cyclohexanones and Cyclohexenones	314

### 31.5.1.3 Synthesis by Rearrangement

C. González-Bello and L. Castedo

31.5.1.3	<b>Synthesis by Rearrangement</b>	319	
31.5.1.3.1	Method 1:	Rearrangement of Allyl Aryl Ethers	319
31.5.1.3.2	Method 2:	Rearrangement of Alkyl and Benzyl Aryl Ethers	322
31.5.1.3.3	Method 3:	Rearrangement of Diaryl Ethers	323
31.5.1.3.4	Method 4:	Rearrangement of Dienones	324
31.5.1.3.5	Method 5:	Rearrangement of Phenolic Esters	326

<b>31.5.1.4</b>	<b>Synthesis with Retention of the Functional Group</b> C. González-Bello and L. Castedo	
<hr/>		
<b>31.5.1.4</b>	<b>Synthesis with Retention of the Functional Group</b> .....	331
<b>31.5.1.4.1</b>	Method 1: Electrophilic Substitution of Phenols .....	331

<hr/>		
<b>31.5.2.1</b>	<b>Synthesis by Substitution</b> .....	405
<b>31.5.2.1.1</b>	Method 1: Oxidation of Phenols with 1-Hydroxy-1,2-benziodoxol-3(1 <i>H</i> )-one 1-Oxide .....	405

31.5.2.1.2	Method 2:	Palladium-Catalyzed Substitution of Halides by Hydroxide	408
31.5.2.1.3	Method 3:	Copper(I)-Mediated Phenol Oxidation	409
31.5.2.1.4	Method 4:	Biooxidation of Arenes	409
31.5.2.1.5	Method 5:	Dakin Oxidation	410
31.5.2.1.5.1	Variation 1:	Under Basic Conditions	411
31.5.2.1.5.2	Variation 2:	Using Urea/Hydrogen Peroxide	411
31.5.2.1.5.3	Variation 3:	Using Catalytic Selenium Dioxide	411
31.5.2.1.6	Method 6:	Elb's Persulfate Oxidation	412
31.5.2.1.7	Method 7:	Oxidation–Reduction with Frémy's Salt and Sodium Dithionite	412
31.5.2.2	<b>Synthesis by Elimination</b>		
	M. A. Marsini and T. R. R. Pettus		
<hr/>			
31.5.2.2	<b>Synthesis by Elimination</b>		415
31.5.2.2.1	Method 1:	Condensation–Aromatization of Cyclohexane-1,4-diones	415
31.5.2.2.2	Method 2:	Aromatization of <i>myo</i> -2-Inosose	416
31.5.2.2.3	Method 3:	Aromatization of 3-Hydroxycyclohex-2-enone Derivatives	416
31.5.2.2.4	Method 4:	Oxidation of Cyclohexane-1,3-dione	417
31.5.2.2.5	Method 5:	Reductive Aromatization of an Epoxy Enone	418
31.5.2.3	<b>Synthesis by Addition</b>		
	M. A. Marsini and T. R. R. Pettus		
<hr/>			
31.5.2.3	<b>Synthesis by Addition</b>		421
31.5.2.3.1	Method 1:	Reduction of Quinones	421
31.5.2.3.1.1	Variation 1:	Reduction with Sodium Dithionite	421
31.5.2.3.1.2	Variation 2:	Reduction with Sodium Borohydride	421
31.5.2.3.1.3	Variation 3:	Reduction by Catalytic Hydrogenation	422
31.5.2.3.1.4	Variation 4:	Reduction with Raney Nickel	422
31.5.2.3.1.5	Variation 5:	Reduction with Tin(II) Chloride	423
31.5.2.3.1.6	Variation 6:	Reduction with Chromium(II) Chloride	423
31.5.2.3.2	Method 2:	Reductive Alkylation of Quinones	424
31.5.2.3.2.1	Variation 1:	1,4-Addition of Trialkylboranes	424
31.5.2.3.2.2	Variation 2:	1,4-Addition of Organonickel Reagents	424
31.5.2.3.2.3	Variation 3:	1,4-Addition of Heterocyclic Amines	425
31.5.2.3.2.4	Variation 4:	Addition of Trimethylsilyl Cyanide	425
31.5.2.3.2.5	Variation 5:	Sulfonylation in Ionic Liquids	426
31.5.2.3.2.6	Variation 6:	Addition to an <i>o</i> -Quinomethane	426
31.5.2.3.2.7	Variation 7:	Arene Addition to 2-Formylbenzo-1,4-quinone	427
31.5.2.3.3	Method 3:	Photoacylation of Quinones	428
31.5.2.3.4	Method 4:	Benzopyran Reduction	428

<b>31.5.2.4</b>	<b>Synthesis by Rearrangement</b>	
	M. A. Marsini and T. R. R. Pettus	
<hr/>		
<b>31.5.2.4</b>	<b>Synthesis by Rearrangement</b>	431
<b>31.5.2.4.1</b>	Method 1: Claisen Rearrangement	431
<b>31.5.2.4.1.1</b>	Variation 1: Under Thermal Conditions	431
<b>31.5.2.4.1.2</b>	Variation 2: Under Lewis Acidic Conditions	432
<b>31.5.2.4.1.3</b>	Variation 3: Under Basic Conditions	432
<b>31.5.2.4.1.4</b>	Variation 4: Using a Chiral Reagent	433
<b>31.5.2.4.2</b>	Method 2: Fries Rearrangement	433
<b>31.5.2.4.2.1</b>	Variation 1: Using Zinc/Microwave Radiation	433
<b>31.5.2.4.2.2</b>	Variation 2: Using a Lewis Acid	434
<b>31.5.2.4.2.3</b>	Variation 3: Photo-Fries Rearrangement	435
<b>31.5.2.4.3</b>	Method 3: 1,2-Addition with Dienone–Phenol Rearrangement	435
<b>31.5.2.4.3.1</b>	Variation 1: Using Boron Trifluoride–Diethyl Ether Complex/Allylstannanes	436
<b>31.5.2.4.3.2</b>	Variation 2: Using Bismuth(III) Trifluoromethanesulfonate/Allylsilanes	437
<b>31.5.2.4.3.3</b>	Variation 3: By Addition of an Allylindium Reagent	437
<b>31.5.2.4.3.4</b>	Variation 4: Using Tetrabutylammonium Fluoride/Trifluoro(3-methyl- but-2-enyl)silane	438
<b>31.5.2.4.4</b>	Method 4: Base-Induced Benzoyl Migration	438
<b>31.5.2.5</b>	<b>Synthesis with Retention of the Functional Group</b>	
	M. A. Marsini and T. R. R. Pettus	
<hr/>		
<b>31.5.2.5</b>	<b>Synthesis with Retention of the Functional Group</b>	441
<b>31.5.2.5.1</b>	Method 1: Friedel–Crafts Formylation	441
<b>31.5.2.5.1.1</b>	Variation 1: Under Gattermann Conditions	441
<b>31.5.2.5.1.2</b>	Variation 2: Under Vilsmeier–Haack Conditions	442
<b>31.5.2.5.1.3</b>	Variation 3: Under Duff Formylation Conditions	443
<b>31.5.2.5.2</b>	Method 2: Friedel–Crafts Acylation	443
<b>31.5.2.5.2.1</b>	Variation 1: By Houben–Hoesch Condensation	444
<b>31.5.2.5.2.2</b>	Variation 2: Using Boron Trifluoride–Diethyl Ether Complex with Carboxylic Acid or Acid Anhydride	444
<b>31.5.2.5.2.3</b>	Variation 3: Using Aluminum Trichloride with an Acid Anhydride or Acid Chloride	446
<b>31.5.2.5.2.4</b>	Variation 4: Using Aluminum Trichloride/(Trichloromethyl)benzene	447
<b>31.5.2.5.2.5</b>	Variation 5: Using Zinc Dust with Microwave Irradiation	448
<b>31.5.2.5.2.6</b>	Variation 6: Using <i>N</i> -Alkylnitrilium Salts	448
<b>31.5.2.5.2.7</b>	Variation 7: Using Protic Acid	449
<b>31.5.2.5.2.8</b>	Variation 8: Using Zinc(II) Chloride/Phosphoryl Chloride	449
<b>31.5.2.5.3</b>	Method 3: Friedel–Crafts Alkylation	450
<b>31.5.2.5.3.1</b>	Variation 1: By Protic Acid Catalyzed Condensation	450
<b>31.5.2.5.3.2</b>	Variation 2: By Allylation Catalyzed by Bis(trifluoromethylsulfonyl)amine	451
<b>31.5.2.5.3.3</b>	Variation 3: Using Solid-Supported Reagents	452
<b>31.5.2.5.3.4</b>	Variation 4: Using Titanium(IV) Chloride with Imines	453
<b>31.5.2.5.3.5</b>	Variation 5: By Mannich Reaction	453
<b>31.5.2.5.4</b>	Method 4: Alkylation of Phenolates	454

31.5.2.5.4.1	Variation 1:	By Aldol Reaction with Aldehydes	454
31.5.2.5.4.2	Variation 2:	By Michael Reaction with Enones	456
31.5.2.5.4.3	Variation 3:	By Prenylation	457
31.5.2.5.4.4	Variation 4:	By Addition of an Iron–Dienyl Complex	457
31.5.2.5.4.5	Variation 5:	By Addition of an Aryllithium Followed by Deprotection	458
31.5.2.5.4.6	Variation 6:	By Carboxylation	458
31.5.2.5.4.7	Variation 7:	By Buffer-Mediated Addition	459
31.5.2.5.4.8	Variation 8:	By Glycosylation under Basic Conditions	460
31.5.2.5.4.9	Variation 9:	By Glycosylation under Lewis Acidic Conditions	460
31.5.2.5.5	Method 5:	Enzymatic Alkylation	461
31.5.2.5.6	Method 6:	Transition-Metal-Promoted Aryl Coupling	462
31.5.2.5.6.1	Variation 1:	Under Heck Conditions	462
31.5.2.5.6.2	Variation 2:	Palladium-Catalyzed Allylation	463
31.5.2.5.6.3	Variation 3:	Under Stille Coupling Conditions	463
31.5.2.5.6.4	Variation 4:	Rhodium(I)-Catalyzed Alkenylation	464
31.5.2.5.6.5	Variation 5:	Copper-Mediated Biaryl Formation	464
31.5.2.5.6.6	Variation 6:	Ruthenium(III)-Mediated Benzylation	465
31.5.2.5.7	Method 7:	Decarboxylation	465

## 31.6 Product Class 6: Aryl Ethers

---

### 31.6.1 Product Subclass 1: Diaryl Ethers

A. W. Thomas

---

31.6.1	<b>Product Subclass 1: Diaryl Ethers</b>	469
31.6.1.1	Synthesis of Product Subclass 1	469
31.6.1.1.1	Method 1: Reaction of Phenols with Arylbismuth Compounds	469
31.6.1.1.2	Method 2: Reaction of Phenols with Arylboron Compounds	471
31.6.1.1.3	Method 3: Reaction of Phenols with Thallium(III) Nitrate and Some Related Oxidative Coupling Reactions	480
31.6.1.1.4	Method 4: Reaction of Phenols with Aryl Halides	486
31.6.1.1.4.1	Variation 1: With Aryl Fluorides	486
31.6.1.1.4.2	Variation 2: With Aryl Chlorides	496
31.6.1.1.4.3	Variation 3: With Aryl Bromides	499
31.6.1.1.4.4	Variation 4: With Aryl Iodides	505
31.6.1.1.4.5	Variation 5: With Hypervalent Aryliodine Compounds	509
31.6.1.1.5	Method 5: Reaction of Phenols with Aryl Sulfides	512
31.6.1.1.6	Method 6: Reactions of Sulfonyl- or Silicon-Activated Phenols	512
31.6.1.1.7	Method 7: Synthesis Using Metal–Arene Complexes	517
31.6.1.1.8	Method 8: Pummerer-Type Rearrangements	522
31.6.1.1.9	Method 9: Benzannulation Methods	523
31.6.1.1.9.1	Variation 1: Chromium Carbene Induced Benzannulation	523
31.6.1.1.9.2	Variation 2: Robinson Annulation	525
31.6.1.1.9.3	Variation 3: Other Benzannulation Methods	525
31.6.1.1.10	Method 10: Diels–Alder and Related Cycloaddition Reactions	526

31.6.1.1.11	Method 11: Reactions of Benzo-1,2-quinones with Aryl Grignard and Other Reagents .....	529
31.6.1.1.12	Method 12: Synthesis from Benzo-1,4-quinones .....	531
31.6.1.1.13	Method 13: Synthesis from Cyclohexenones and Their Derivatives .....	534
<b>31.6.2</b>	<b>Product Subclass 2: Alkyl Aryl Ethers</b> C. M. R. Low	
<hr/>		
<b>31.6.2</b>	<b>Product Subclass 2: Alkyl Aryl Ethers</b> .....	545
<b>31.6.2.1</b>	<b>Synthesis by Substitution</b> C. M. R. Low	
<hr/>		
<b>31.6.2.1</b>	<b>Synthesis by Substitution</b> .....	547
31.6.2.1.1	Method 1: Synthesis by Substitution of Hydrogen .....	547
31.6.2.1.1.1	Variation 1: Oxidation of Arenes .....	547
31.6.2.1.1.2	Variation 2: Methylation of Phenols .....	550
31.6.2.1.1.3	Variation 3: Alkylation of Phenols .....	559
31.6.2.1.1.4	Variation 4: Addition of Phenols to Alkenes .....	576
31.6.2.1.1.5	Variation 5: Arylation of Alcohols .....	578
31.6.2.1.2	Method 2: Synthesis by Substitution of Organometallic Groups .....	579
31.6.2.1.2.1	Variation 1: Copper-Catalyzed Cross Coupling .....	579
31.6.2.1.2.2	Variation 2: The Ullmann Ether Synthesis .....	581
31.6.2.1.2.3	Variation 3: The Hartwig–Buchwald Reaction .....	588
31.6.2.1.2.4	Variation 4: $\pi$ -Allylpalladium Reactions (Trost Reaction) .....	594
31.6.2.1.2.5	Variation 5: Reactions with Other Metals .....	603
31.6.2.1.3	Method 3: Synthesis by Substitution of Heteroatoms .....	609
31.6.2.1.3.1	Variation 1: Nucleophilic Aromatic Substitution of Fluorine .....	609
31.6.2.1.3.2	Variation 2: Nucleophilic Aromatic Substitution of Chlorine .....	617
31.6.2.1.3.3	Variation 3: Nucleophilic Aromatic Substitution of a Nitro Group .....	619
31.6.2.1.3.4	Variation 4: Cleavage of a Siloxy Group (Si–O Bond Cleavage) .....	620
31.6.2.1.3.5	Variation 5: Nucleophilic Aromatic Substitution of a Trifluoroacetoxy Group .....	621
<b>31.6.2.2</b>	<b>Synthesis by Elimination</b> C. M. R. Low	
<hr/>		
<b>31.6.2.2</b>	<b>Synthesis by Elimination</b> .....	627
31.6.2.2.1	Method 1: Synthesis of Anisole from Cyclohexanone .....	627
31.6.2.2.2	Method 2: Synthesis of (Aryloxy)alkynes from Trihaloethenes and Phenols and of Halogenated (Aryloxy)alkenals and Derivatives .....	627
31.6.2.2.3	Method 3: 1-(Aryloxy)perfluoroalk-1-yne from Phosphoranes .....	630

<b>31.6.2.3</b>	<b>Synthesis by Rearrangement</b> C. M. R. Low	
<hr/>		
<b>31.6.2.3</b>	<b>Synthesis by Rearrangement</b> .....	633
<b>31.6.2.3.1</b>	Method 1: Synthesis from Alkynyl(phenyl)iodonium salts .....	633
<b>31.6.2.3.2</b>	Method 2: Synthesis by Enyne–Diene Benzannulation .....	635
<b>31.6.2.4</b>	<b>Synthesis with Retention of the Functional Group</b> C. M. R. Low	
<hr/>		
<b>31.6.2.4</b>	<b>Synthesis with Retention of the Functional Group</b> .....	637
<b>31.6.2.4.1</b>	Method 1: Elimination of Hydrogen Halides from the Alkyl Group .....	637
<b>31.6.2.4.2</b>	Method 2: Addition of an Aluminate to an Epoxide .....	638
<b>31.6.2.4.3</b>	Method 3: Cleavage from a Polymer-Supported Reagent .....	638
<b>31.6.2.4.4</b>	Method 4: Synthesis by Dimerization .....	640
<b>31.6.2.5</b>	<b>Synthesis from Nonaromatic Precursors</b> M. Gerster and A. W. Thomas	
<hr/>		
<b>31.6.2.5</b>	<b>Synthesis from Nonaromatic Precursors</b> .....	643
<b>31.6.2.5.1</b>	Method 1: Synthesis from Cyclohex-2-enones .....	643
<b>31.6.2.5.1.1</b>	Variation 1: Aromatization of Cyclohex-2-enones Using Iodine in Methanol .....	643
<b>31.6.2.5.1.2</b>	Variation 2: Aromatization of Cyclohex-2-enones Using Iodine and Ammonium Cerium(IV) Nitrate in an Alcohol .....	644
<b>31.6.2.5.1.3</b>	Variation 3: Aromatization of Cyclohex-2-enones Using Oxovanadium Reagents in an Alcohol .....	645
<b>31.6.2.5.1.4</b>	Variation 4: Oxidation of 3-Methoxycyclohex-2-enones .....	646
<b>31.6.2.5.1.5</b>	Variation 5: Oxidative Rearrangement of Isophorone .....	647
<b>31.6.2.5.1.6</b>	Variation 6: Isomerization of $\omega$ -Alkenyl-Substituted Cyclohexane-1,3-dione Enols .....	647
<b>31.6.2.5.2</b>	Method 2: Synthesis from Cyclohexadienones .....	648
<b>31.6.2.5.2.1</b>	Variation 1: Photorearrangement of Cyclohexa-2,5-dienones .....	648
<b>31.6.2.5.2.2</b>	Variation 2: Reaction of 6-Acetylcyclohexa-2,4-dienone with Organometallic Reagents .....	648
<b>31.6.2.5.3</b>	Method 3: Synthesis from Benzoquinones .....	649
<b>31.6.2.5.3.1</b>	Variation 1: Synthesis from Benzo-1,4-quinones by Cycloaddition .....	649
<b>31.6.2.5.3.2</b>	Variation 2: Synthesis from Benzo-1,4-quinones by Radical Addition .....	649
<b>31.6.2.5.3.3</b>	Variation 3: Synthesis from Benzo-1,2-quinones by [4+2] Cycloaddition with Sinapyl Alcohol Derivatives .....	650
<b>31.6.2.5.3.4</b>	Variation 4: Synthesis from 4,5-Dimethoxybenzo-1,2-quinone .....	650
<b>31.6.2.5.4</b>	Method 4: Synthesis from Cyclohexadienes .....	651
<b>31.6.2.5.4.1</b>	Variation 1: Oxidation of Cyclohexa-1,3- and Cyclohexa-1,4-dienes .....	651
<b>31.6.2.5.4.2</b>	Variation 2: Reductive Aromatization of 4,4-Dimethoxycyclohexa- 2,5-dienols .....	652
<b>31.6.2.5.5</b>	Method 5: Benzannulation Methods .....	652

31.6.2.5.5.1	Variation 1:	Synthesis of Resorcinol Derivatives by Diels–Alder Reactions	652
31.6.2.5.5.2	Variation 2:	Other Cycloaromatizations	653
31.6.2.5.5.3	Variation 3:	From Vinylketenes Derived from Cyclobutenones	655
31.6.2.5.5.4	Variation 4:	From Vinylketenes Derived from Tricarbonyliron Complexes	656
31.6.2.5.5.5	Variation 5:	From Vinylketenes Derived from $\alpha,\beta$ -Unsaturated $\alpha'$ -Diazo- $\alpha'$ -silyl Ketones	656
31.6.2.5.5.6	Variation 6:	Synthesis from Vinylcyclobutenones	657
31.6.2.5.6	Method 6:	Synthesis from Chromium–Carbene Complexes	658
31.6.2.5.6.1	Variation 1:	Dötz Benzannulation of $\alpha,\beta$ -Unsaturated Fischer Carbene Complexes with Alkynes	658
31.6.2.5.6.2	Variation 2:	Dötz Benzannulation of $\alpha,\beta$ -Unsaturated Fischer Carbene Complexes with Ketene Acetals	659
31.6.2.5.6.3	Variation 3:	Dötz Benzannulation of Chromium–Arylcarbene Complexes with Alkynes	660
31.6.2.5.6.4	Variation 4:	Cycloaddition/Benzannulation Reactions of Chromium–Alkynylcarbene Complexes with Dienes	661
31.6.2.5.6.5	Variation 5:	[5 + 5] Cycloadditions of Chromium–(Alkynylaryl)carbene Complexes with Enyne Aldehydes	662
31.6.2.5.6.6	Variation 6:	Intramolecular Dötz Reactions	662
<b>31.7</b>	<b>Product Class 7: Aryl Hypohalites, Aryl Peroxides, and Aryloxy Sulfur Compounds</b>		
	J. Chen and C. K.-F. Chiu		
<b>31.7</b>	<b>Product Class 7: Aryl Hypohalites, Aryl Peroxides, and Aryloxy Sulfur Compounds</b>		665
<b>31.7.1</b>	<b>Product Subclass 1: Aryl Hypohalites</b>		665
31.7.1.1	Synthesis of Product Subclass 1		665
31.7.1.1.1	Method 1:	Synthesis by Formation of the Ar <sup>1</sup> O–Hal Bond	665
<b>31.7.2</b>	<b>Product Subclass 2: Aryl Peroxides</b>		666
31.7.2.1	Synthesis of Product Subclass 2		666
31.7.2.1.1	Method 1:	Synthesis by Formation of the Ar <sup>1</sup> –OOR <sup>1</sup> Bond	666
31.7.2.1.1.1	Variation 1:	Air Oxidation	666
31.7.2.1.1.2	Variation 2:	Photo-Oxygenation	667
31.7.2.1.1.3	Variation 3:	Oxidation with 3-Chloroperoxybenzoic Acid	668
31.7.2.1.1.4	Variation 4:	S <sub>N</sub> 2 Displacement of Activated Aryl Halides by Hydroperoxides	668
31.7.2.1.2	Method 2:	Synthesis by Formation of the Ar <sup>1</sup> O–OR <sup>1</sup> Bond	670
<b>31.7.3</b>	<b>Product Subclass 3: (Aryloxy)sulfur Polyhalides</b>		671
31.7.3.1	Synthesis of Product Subclass 3		671
31.7.3.1.1	Method 1:	Synthesis by Formation of the Ar <sup>1</sup> –OSHal <sub>3</sub> Bond	671
31.7.3.1.2	Method 2:	Synthesis by Formation of the Ar <sup>1</sup> O–SHal <sub>3</sub> Bond	671
<b>31.7.4</b>	<b>Product Subclass 4: Aryl Halosulfonates</b>		672
31.7.4.1	Synthesis of Product Subclass 4		673

31.7.4.1.1	Method 1:	Synthesis by Formation of the Ar <sup>1</sup> —OSO <sub>2</sub> Hal Bond	673
31.7.4.1.1.1	Variation 1:	Via Arenediazonium Salts	673
31.7.4.1.1.2	Variation 2:	Via Oxidation of Arenes	673
31.7.4.1.2	Method 2:	Synthesis by Formation of the Ar <sup>1</sup> O—SO <sub>2</sub> Hal Bond	674
31.7.4.2		Applications of Product Subclass 4 in Organic Synthesis	676
31.7.4.2.1	Method 1:	Palladium-Mediated Cross Coupling	676
31.7.4.2.2	Method 2:	Palladium-Mediated Alkoxyacylation	677
31.7.4.2.3	Method 3:	Synthesis of Diaryl Sulfates and <i>O</i> -Aryl Sulfamates	678
31.7.5		<b>Product Subclass 5: Aryl Sulfates</b>	679
31.7.5.1		Synthesis of Product Subclass 5	679
31.7.5.1.1	Method 1:	Synthesis by Formation of the Ar <sup>1</sup> —OSO <sub>2</sub> OR <sup>1</sup> Bond	679
31.7.5.1.2	Method 2:	Synthesis by Formation of the Ar <sup>1</sup> O—SO <sub>2</sub> OR <sup>1</sup> Bond	680
31.7.5.1.2.1	Variation 1:	Via an Amine–Sulfur Trioxide Complex	680
31.7.5.1.2.2	Variation 2:	Via Alkyl Chlorosulfonates	681
31.7.5.1.2.3	Variation 3:	Via Sulfuryl Chloride	684
31.7.5.1.3	Method 3:	Synthesis by Formation of the Ar <sup>1</sup> OSO <sub>2</sub> —OR <sup>1</sup> Bond	685
31.7.5.2		Applications of Product Subclass 5 in Organic Synthesis	685
31.7.5.2.1	Method 1:	Synthesis of Sulfamates Using Catechol Sulfate	686
31.7.5.2.2	Method 2:	Synthesis of 5'-Aminoadenosines Using Bis(1 <i>H</i> -benzotriazol-1-yl) Sulfate	686
31.7.6		<b>Product Subclass 6: Aryl Thiosulfates</b>	687
31.7.7		<b>Product Subclass 7: Aryl Sulfamates</b>	687
31.7.7.1		Synthesis of Product Subclass 7	688
31.7.7.1.1	Method 1:	Synthesis by Formation of the Ar <sup>1</sup> OS(O) <sub>2</sub> —NR <sup>1</sup> <sub>2</sub> Bond	688
31.7.7.1.1.1	Variation 1:	<i>O</i> -4-Nitrophenyl Sulfamates from 4-Nitrophenyl Chlorosulfonate	688
31.7.7.1.1.2	Variation 2:	<i>O</i> -2-Hydroxyphenyl Sulfamates from Catechol Sulfate	689
31.7.7.1.1.3	Variation 3:	<i>O</i> -Aryl Sulfamates from <i>O</i> -Aryl Chlorosulfonates: Lewis Acid Catalyzed Amination	689
31.7.7.1.2	Method 2:	Synthesis by Formation of the Ar <sup>1</sup> O—S(O) <sub>2</sub> NR <sup>1</sup> <sub>2</sub> Bond	690
31.7.7.1.2.1	Variation 1:	<i>O</i> -Aryl Sulfamates via Reaction of Phenols with Sulfamoyl Chloride	690
31.7.7.1.2.2	Variation 2:	<i>O</i> -Aryl Sulfamates via Reaction of Phenols with Chlorosulfonyl Isocyanate Followed by Hydrolysis	691
31.7.7.1.2.3	Variation 3:	<i>O</i> -Aryl Sulfamates via Aryloxysulfonyl Azides	691
31.7.7.2		Applications of Product Subclass 7 in Organic Synthesis	691
31.7.7.2.1	Method 1:	Synthesis of Hydroxyaryl Sulfonamides via Fries-Type Rearrangement of <i>N,N</i> -Dialkylsulfamates	692
31.7.7.2.2	Method 2:	Synthesis of Sulfamates and Sulfamides via Nucleophilic Displacement of <i>O</i> -Aryl Sulfamates	692
31.7.7.2.3	Method 3:	<i>O</i> -Aryl Sulfamates as Precursors of Nitrenes for C—H Bond Insertion: Elaboration of Complex <i>O</i> -Aryl Sulfamates	693

<b>31.7.8</b>	<b>Product Subclass 8: (Aryloxy)trifluoro-<math>\lambda^6</math>-Sulfanes</b> .....	694
<b>31.7.8.1</b>	Synthesis of Product Subclass 8 .....	694
<b>31.7.8.1.1</b>	Method 1: Formation of the Ar <sup>1</sup> O—S(O)Hal <sub>3</sub> Bond .....	694
<b>31.7.9</b>	<b>Product Subclass 9: Aryl Halosulfites</b> .....	695
<b>31.7.9.1</b>	Synthesis of Product Subclass 9 .....	695
<b>31.7.9.1.1</b>	Method 1: Synthesis by Formation of the Ar <sup>1</sup> O—S(O)Hal Bond .....	695
<b>31.7.9.1.2</b>	Method 2: Synthesis by Formation of the Ar <sup>1</sup> OS(O)—Hal Bond .....	695
<b>31.7.9.1.3</b>	Method 3: Synthesis by Formation of the Ar <sup>1</sup> OS(=O)Hal Bond .....	696
<b>31.7.9.2</b>	Applications of Product Subclass 9 in Organic Synthesis .....	696
<b>31.7.9.2.1</b>	Method 1: Activation of Dimethyl Sulfoxide by Phenyl Chlorosulfite Leading to Selective <i>ortho</i> -(Methylsulfanyl)methylation of the Parent Phenol .....	696
<b>31.7.10</b>	<b>Product Subclass 10: Aryl Sulfites</b> .....	697
<b>31.7.10.1</b>	Synthesis of Product Subclass 10 .....	698
<b>31.7.10.1.1</b>	Method 1: Symmetrical Diaryl Sulfites by Formation of (Ar <sup>1</sup> O) <sub>2</sub> —S(O) Bonds .....	698
<b>31.7.10.2</b>	Applications of Product Subclass 10 in Organic Synthesis .....	699
<b>31.7.10.2.1</b>	Method 1: Use of Di(2-pyridyl) Sulfite in Dehydration Reactions .....	699
<b>31.7.10.2.2</b>	Method 2: Use of Di(2-pyridyl) Sulfite in Condensation Reactions .....	699
<b>31.7.11</b>	<b>Product Subclass 11: O-Aryl Thiosulfites</b> .....	700
<b>31.7.11.1</b>	Synthesis of Product Subclass 11 .....	700
<b>31.7.11.1.1</b>	Method 1: Synthesis by Formation of the Ar <sup>1</sup> OS(O)—SR <sup>1</sup> Bond .....	700
<b>31.7.11.1.1.1</b>	Variation 1: Reaction of Aryl Halosulfites with Alkanethiols .....	700
<b>31.7.11.1.1.2</b>	Variation 2: Reaction of an Aryl Halosulfite with a Thiocarboxylic Acid ...	701
<b>31.7.12</b>	<b>Product Subclass 12: Aryl Amidosulfites</b> .....	701
<b>31.7.12.1</b>	Synthesis of Product Subclass 12 .....	701
<b>31.7.12.1.1</b>	Method 1: Synthesis by Formation of the Ar <sup>1</sup> OS(O)—NR <sup>1</sup> <sub>2</sub> Bond .....	701
<b>31.8</b>	<b>Product Class 8: Cyclic Aryl Ethers</b> D. Craig	
<b>31.8</b>	<b>Product Class 8: Cyclic Aryl Ethers</b> .....	705
<b>31.8.1</b>	<b>Product Subclass 1: Cyclic Aryl Ethers with One sp<sup>2</sup>-Carbon—Oxygen Bond and One sp<sup>3</sup>-Carbon—Oxygen Bond</b> .....	706
<b>31.8.1.1</b>	Synthesis of Product Subclass 1 .....	706
<b>31.8.1.1.1</b>	Method 1: Synthesis by Noncatalytic Ring Closure via Formation of an sp <sup>2</sup> -Carbon—Oxygen Bond .....	706
<b>31.8.1.1.1.1</b>	Variation 1: Intramolecular Addition of Alcohols to Benzyne Intermediates	706
<b>31.8.1.1.1.2</b>	Variation 2: Intramolecular Nucleophilic Aromatic Substitution Reactions	707
<b>31.8.1.1.2</b>	Method 2: Synthesis by Catalytic Ring Closure via Formation of an sp <sup>2</sup> -Carbon—Oxygen Bond .....	709

31.8.1.1.2.1	Variation 1:	Palladium-Catalyzed Reactions	709
31.8.1.1.2.2	Variation 2:	Copper-Catalyzed Reactions	711
31.8.1.1.3	Method 3:	Synthesis by Ring Closure via Formation of an $sp^3$ -Carbon—Oxygen Bond	712
31.8.1.1.3.1	Variation 1:	Intramolecular Nucleophilic Substitution	712
31.8.1.1.4	Method 4:	Synthesis by Ring Closure via Formation of an Aryl Carbon—Non-Aryl Carbon Bond	718
31.8.1.1.4.1	Variation 1:	Metal-Catalyzed Cyclization	718
31.8.1.1.4.2	Variation 2:	Heck Reaction	719
31.8.1.1.4.3	Variation 3:	Radical Cyclization	720
31.8.1.1.5	Method 5:	Synthesis by Ring Closure via Formation of a Non-Aryl Carbon—Non-Aryl Carbon Bond	720
31.8.1.1.5.1	Variation 1:	Ring-Closing Alkene Metathesis	720
31.8.1.1.6	Method 6:	Synthesis by Cycloaddition	721
31.8.2	<b>Product Subclass 2: Cyclic Aryl Ethers with Two <math>sp^2</math>-Carbon—Oxygen Bonds</b>		722
31.8.2.1	Synthesis of Product Subclass 2		722
31.8.2.1.1	Method 1:	Synthesis by Ring Closure via Formation of a Carbon—Oxygen Bond	722
31.8.2.1.2	Method 2:	Synthesis by Ring Closure via Formation of an Aryl Carbon—Non-Aryl Carbon Bond	724
31.8.2.1.2.1	Variation 1:	Aromatic Substitution	725
31.8.2.1.2.2	Variation 2:	Metal-Assisted Processes	725
31.8.2.1.3	Method 3:	Synthesis by Ring Closure via Formation of a Non-Aryl Carbon—Non-Aryl Carbon Bond	726
31.8.2.1.4	Method 4:	Synthesis by Reduction	726
31.8.3	<b>Product Subclass 3: Cyclic Aryl Ethers with Two <math>sp^2</math>-Carbon—Oxygen Bonds and Two <math>sp^3</math>-Carbon—Oxygen Bonds</b>		727
31.8.3.1	Synthesis of Product Subclass 3		727
31.8.3.1.1	Method 1:	Synthesis by Ring Closure via Formation of an $sp^2$ -Carbon—Oxygen Bond	727
31.8.3.1.2	Method 2:	Synthesis by Ring Closure via Formation of an $sp^3$ -Carbon—Oxygen Bond	729
31.8.4	<b>Product Subclass 4: Cyclic Aryl Ethers with Three <math>sp^2</math>-Carbon—Oxygen Bonds and One <math>sp^3</math>-Carbon—Oxygen Bond</b>		732
31.8.4.1	Synthesis of Product Subclass 4		732
31.8.4.1.1	Method 1:	Synthesis by Ring Closure via Formation of an $sp^2$ -Carbon—Oxygen Bond	732
31.8.4.1.2	Method 2:	Synthesis by Ring Closure via Formation of an $sp^3$ -Carbon—Oxygen Bond	733
31.8.5	<b>Product Subclass 5: Cyclic Aryl Ethers with One <math>sp^2</math>-Carbon—Oxygen Bond and Three <math>sp^3</math>-Carbon—Oxygen Bonds</b>		733
31.8.5.1	Synthesis of Product Subclass 5		733
31.8.5.1.1	Method 1:	Synthesis by Ring Closure via Formation of an $sp^3$ -Carbon—Oxygen Bond	733

<b>31.9</b>	<b>Product Class 9: Arenesulfonic Acids and Derivatives</b>	
<b>31.9.1</b>	<b>Product Subclass 1: Arenesulfonic Acids and Arenesulfonate Salts</b> B. Fravel, R. Murugan, and E. F. V. Scriven	
<b>31.9.1</b>	<b>Product Subclass 1: Arenesulfonic Acids and Arenesulfonate Salts</b> .....	739
<b>31.9.1.1</b>	Synthesis of Product Subclass 1 .....	741
<b>31.9.1.1.1</b>	Method 1: Sulfonation .....	741
<b>31.9.1.1.1.1</b>	Variation 1: With Sulfur Trioxide .....	741
<b>31.9.1.1.1.2</b>	Variation 2: With Sulfur Trioxide Complexes .....	742
<b>31.9.1.1.1.3</b>	Variation 3: With Oleum .....	744
<b>31.9.1.1.1.4</b>	Variation 4: With Fuming Sulfuric Acid .....	745
<b>31.9.1.1.1.5</b>	Variation 5: With Concentrated Sulfuric Acid or Chlorosulfonic Acid .....	745
<b>31.9.1.1.1.6</b>	Variation 6: With Sulfamic Acid .....	751
<b>31.9.1.1.2</b>	Method 2: Substitution of Halogen by Sulfite Ions .....	751
<b>31.9.1.1.3</b>	Method 3: The Jacobsen Reaction .....	752
<b>31.9.1.1.4</b>	Method 4: Oxidation of Sulfur-Containing Substituents .....	753
<b>31.9.1.1.4.1</b>	Variation 1: Of Thiols .....	754
<b>31.9.1.1.4.2</b>	Variation 2: Of Sulfides .....	757

31.9.2.1.1.2	Method 2:	Synthesis from Cyclohexylsulfur Pentafluorides or Cyclohexa-1,4-dienylsulfur Pentafluorides	777
31.9.2.1.1.2.1	Variation 1:	Dehydrohalogenation of 2,4,5-Trihalocyclohexylsulfur Pentafluorides	777
31.9.2.1.1.2.2	Variation 2:	Dehydrogenation of Cyclohexa-1,4-dienylsulfur Pentafluorides	778
31.9.2.1.2	Arenesulfonyl Halides		779
31.9.2.1.2.1	Method 1:	Synthesis from Arenes via Electrophilic Aromatic Substitution of Hydrogen	779
31.9.2.1.2.1.1	Variation 1:	Reaction with Halosulfonic Acids	780
31.9.2.1.2.1.2	Variation 2:	Reaction with Chlorosulfonic Acid and Sodium Chloride	781
31.9.2.1.2.2	Method 2:	Synthesis from Arenes via Electrophilic Substitution of Aryl Organometallic Compounds	781
31.9.2.1.2.2.1	Variation 1:	Synthesis from Aryltrimethylsilanes and Trimethylsilyl Chlorosulfonate	781
31.9.2.1.2.2.2	Variation 2:	Synthesis from Aryl Grignard Reagents, Sulfur Dioxide, and Sulfuryl Chloride	782
31.9.2.1.2.2.3	Variation 3:	Synthesis from Aryllithium Reagents and Sulfuryl Chloride	783
31.9.2.1.2.2.4	Variation 4:	Synthesis from Aryllithium Reagents, Sulfur Dioxide, and Sulfuryl Chloride	783
31.9.2.1.2.2.5	Variation 5:	Synthesis from Aryllithium Reagents, Sulfur Dioxide, and <i>N</i> -Chlorosuccinimide	784
31.9.2.1.2.3	Method 3:	Electrophilic Substitution of Trialkyl(aryl)stannanes with Sulfuryl Chloride	785
31.9.2.1.2.4	Method 4:	Synthesis from Arenediazonium Halides (Meerwein Reaction)	786
31.9.2.1.2.5	Method 5:	Halogenation of Arenesulfonic Acids	788
31.9.2.1.2.5.1	Variation 1:	Reaction with Chlorosulfonic Acid and Thionyl Chloride	788
31.9.2.1.2.5.2	Variation 2:	Reaction with Phosphorus Pentachloride	789
31.9.2.1.2.6	Method 6:	Halogenation of Arenesulfonic Acid Salts	789
31.9.2.1.2.6.1	Variation 1:	Reaction with Halosulfonic Acids	789
31.9.2.1.2.6.2	Variation 2:	Reaction with Phosphorus Pentachloride	790
31.9.2.1.2.6.3	Variation 3:	Reaction with Phosphoryl Chloride	790
31.9.2.1.2.7	Method 7:	Halogenation of Arenesulfonylhydrazides	791
31.9.2.1.2.8	Method 8:	Oxidative Halogenation of Arenethiols	792
31.9.2.1.2.9	Method 9:	Oxidative Cleavage of Aryl Sulfides and Diaryl Disulfides	792
31.9.2.1.2.9.1	Variation 1:	Reaction with Chlorine	792
31.9.2.1.2.9.2	Variation 2:	Reaction with <i>N</i> -Chlorosuccinimide	793
31.9.2.1.2.9.3	Variation 3:	Reaction with Iodosobenzene, Hydrogen Chloride, and Silica Gel	793
31.9.2.1.2.10	Method 10:	Oxidative Halogenation of Arenesulfinic Acids or Arenesulfinic Acid Salts	794
31.9.2.1.2.10.1	Variation 1:	Reaction with Halogens	794
31.9.2.1.2.10.2	Variation 2:	Reaction with <i>N</i> -Chlorosuccinimide	794
31.9.2.1.2.11	Method 11:	Halogen Exchange of Arenesulfonyl Chlorides	795
31.9.2.1.2.11.1	Variation 1:	Chlorine–Fluorine Exchange	795
31.9.2.1.2.11.2	Variation 2:	Chlorine–Bromine Exchange	796
31.9.2.1.3	Arenesulfonates, Arenesulfonic Anhydrides, and Arenesulfonyl Peroxides		796

31.9.2.1.3.1	Method 1:	Arenesulfonates from Arenesulfonyl Halides	796
31.9.2.1.3.2	Method 2:	Arenesulfonates via Alkylation of Arenesulfonic Acids	797
31.9.2.1.3.2.1	Variation 1:	Reaction with Diazoalkanes	798
31.9.2.1.3.2.2	Variation 2:	Reaction with Resin-Bound Primary <i>N</i> -Alkyltriazenes	798
31.9.2.1.3.2.3	Variation 3:	Reaction with Ortho Esters	799
31.9.2.1.3.2.4	Variation 4:	Reaction with Diethyl Carbonate	799
31.9.2.1.3.2.5	Variation 5:	Reaction with Trialkyl Phosphates	800
31.9.2.1.3.2.6	Variation 6:	Reaction with Dialkyl Acylphosphonates	800
31.9.2.1.3.3	Method 3:	Arenesulfonates via Reaction of Arenesulfonic Acids with Alcohols	801
31.9.2.1.3.3.1	Variation 1:	Synthesis Catalyzed by Silica Chloride	801
31.9.2.1.3.3.2	Variation 2:	Synthesis Catalyzed by Iron(III)-Exchanged Montmorillonite Clay	802
31.9.2.1.3.4	Method 4:	Arenesulfonates from Arenesulfonic Acid Salts	802
31.9.2.1.3.4.1	Variation 1:	Reaction with Alkyl Halides	802
31.9.2.1.3.4.2	Variation 2:	Reaction with Pentafluorophenol	803
31.9.2.1.3.5	Method 5:	Arenesulfonates from Arenesulfonic Anhydrides	803
31.9.2.1.3.6	Method 6:	Arenesulfonates from Arenesulfonamides	804
31.9.2.1.3.7	Method 7:	Arenesulfonates via Oxidation of Arenesulfenates	805
31.9.2.1.3.8	Method 8:	Arenesulfonic Anhydrides from Arenes	805
31.9.2.1.3.9	Method 9:	Arenesulfonic Anhydrides from Arenesulfonic Acids	806
31.9.2.1.3.10	Method 10:	Arenesulfonic Anhydrides via Oxidation of Diaryl Disulfides	806
31.9.2.1.3.11	Method 11:	Arenesulfonyl Peroxides via Oxidation of Arenesulfonyl Chlorides	807
31.9.2.1.4		Arenesulfonamides, <i>N</i> -Haloarenesulfonamides, <i>N</i> -Hydroxyarenesulfonamides, and <i>N</i> -Oxoarenesulfonamides	807
31.9.2.1.4.1	Method 1:	Arenesulfonamides from Arenes via Electrophilic Substitution of Hydrogen	808
31.9.2.1.4.1.1	Variation 1:	Reaction with Sulfamoyl Chlorides	808
31.9.2.1.4.1.2	Variation 2:	Thia-Fries Rearrangement of Phenyl Dialkylsulfamates	809
31.9.2.1.4.2	Method 2:	Electrophilic Substitution of Aryltrimethylsilanes with Sulfamoyl Chloride	810
31.9.2.1.4.3	Method 3:	Electrophilic Substitution of Trialkyl(aryl)stannanes with Chlorosulfonyl Isocyanate	810
31.9.2.1.4.4	Method 4:	Arenesulfonamides from Arenesulfinic Acid Salts	811
31.9.2.1.4.4.1	Variation 1:	Reaction with <i>N</i> -Chlorodialkylamines	811
31.9.2.1.4.4.2	Variation 2:	Reaction with Hydroxylamine- <i>O</i> -sulfonic Acid	811
31.9.2.1.4.5	Method 5:	Arenesulfonamides from Arenesulfonyl Halides	812
31.9.2.1.4.5.1	Variation 1:	Reaction with Ammonia	812
31.9.2.1.4.5.2	Variation 2:	Reaction with Amino-Functionalized Resins	813
31.9.2.1.4.5.3	Variation 3:	Reaction with Primary Amines	813
31.9.2.1.4.5.4	Variation 4:	Reaction with Resin-Bound Secondary Amines	814
31.9.2.1.4.5.5	Variation 5:	Reaction with Secondary Amines	814
31.9.2.1.4.6	Method 6:	Arenesulfonamides from Arenesulfonic Acid Salts	815
31.9.2.1.4.7	Method 7:	Arenesulfonamides via Reduction of Arenesulfonyl Azides	815
31.9.2.1.4.8	Method 8:	<i>N</i> -Substituted Arenesulfonamides from Arenesulfonamides	817
31.9.2.1.4.8.1	Variation 1:	<i>N</i> -Alkylation with Alkyl Halides	817

31.9.2.1.4.8.2	Variation 2:	N-Alkylation with Alcohols	817
31.9.2.1.4.8.3	Variation 3:	N-Arylation with Trimethylsilylaryl Trifluoromethanesulfonates	818
31.9.2.1.4.8.4	Variation 4:	N-Arylation with Arylboronic Acids	819
31.9.2.1.4.8.5	Variation 5:	N-Arylation with Bromoarenes	819
31.9.2.1.4.9	Method 9:	Arenesulfonamides from N-Substituted Arenesulfonamides	820
31.9.2.1.4.9.1	Variation 1:	N-Dealkylation of N-Alkylarenesulfonamides	820
31.9.2.1.4.9.2	Variation 2:	Reaction of 1-(Phenylsulfonyl)-1 <i>H</i> -Benzotriazole or 1-(Arylsulfonyl)-3-methylimidazolium Chlorides with Amines	821
31.9.2.1.4.10	Method 10:	N-Haloarenesulfonamides via N-Halogenation of Arenesulfonamides	821
31.9.2.1.4.10.1	Variation 1:	Reaction with Halogens	821
31.9.2.1.4.10.2	Variation 2:	Reaction with Hypohalites	822
31.9.2.1.4.11	Method 11:	N-Hydroxyarenesulfonamides via Reaction of Arenesulfonyl Chlorides with Hydroxylamines	823
31.9.2.1.4.12	Method 12:	N-Oxoarenesulfonamides via Reaction of Arenesulfinic Acids with Dinitrogen Tetroxide	823
31.9.2.1.5		Arenesulfonylhydrazides, N-Nitrosoarenesulfonamides, and N-Nitroarenesulfonamides	824
31.9.2.1.5.1	Method 1:	Arenesulfonylhydrazides from Arenesulfonyl Halides	824
31.9.2.1.5.2	Method 2:	N-Nitrosoarenesulfonamides via Nitrosation of Arenesulfonamides with Nitrous Acid	825
31.9.2.1.5.3	Method 3:	N-Nitroarenesulfonamides via Nitration of Arenesulfonamides with Nitric Acid	825
31.9.2.1.6		Arenesulfonyl Azides	826
31.9.2.1.6.1	Method 1:	Synthesis from Arenesulfonyl Chlorides and Sodium Azide	826
31.9.2.1.6.2	Method 2:	Synthesis from Arenesulfonylhydrazides and Nitrous Acid	827
<b>31.10</b>	<b>Product Class 10: Aryl Sulfones and Nitrogen Derivatives</b>		
	S. Nakamura and T. Toru		
<b>31.10</b>	<b>Product Class 10: Aryl Sulfones and Nitrogen Derivatives</b>		833
<b>31.10.1</b>	<b>Product Subclass 1: Aryl Sulfones</b>		833
<b>31.10.1.1</b>	Synthesis of Product Subclass 1		833
<b>31.10.1.1.1</b>	Method 1:	Synthesis by Formation of the C–S Bond	833
<b>31.10.1.1.1.1</b>	Variation 1:	Addition of Arenesulfinic Acids to Alkenes and Alkynes	833
<b>31.10.1.1.1.2</b>	Variation 2:	Nucleophilic Displacement with Arenesulfinates	834
<b>31.10.1.1.1.3</b>	Variation 3:	Addition of Arenesulfonyl Radicals to Alkenes and Alkynes	836
<b>31.10.1.1.1.4</b>	Variation 4:	Reaction of Arenesulfonic Esters or Arenesulfonyl Halides with Nucleophiles	837
<b>31.10.1.1.1.5</b>	Variation 5:	Rearrangement of Arenesulfinic Esters	839
<b>31.10.1.1.2</b>	Method 2:	Oxidation of Aryl Sulfides and Sulfoxides	840
<b>31.10.1.1.3</b>	Method 3:	Synthesis from $\alpha,\beta$ -Unsaturated Sulfones	841
<b>31.10.1.1.3.1</b>	Variation 1:	Nucleophilic Addition to $\alpha,\beta$ -Unsaturated Sulfones	841
<b>31.10.1.1.3.2</b>	Variation 2:	Radical Addition to $\alpha,\beta$ -Unsaturated Sulfones	843

31.10.1.1.3.3	Variation 3: Cycloaddition of $\alpha,\beta$ -Unsaturated Sulfones	844
31.10.1.2	Applications of Product Subclass 1 in Organic Synthesis	849
31.10.1.2.1	Method 1: Reaction of $\alpha$ -Arylsulfonyl Carbanions	849
31.10.1.2.1.1	Variation 1: Protonation of $\alpha$ -Arylsulfonyl Carbanions	850
31.10.1.2.1.2	Variation 2: Alkylation of $\alpha$ -Arylsulfonyl Carbanions	851
31.10.1.2.1.3	Variation 3: Michael Addition of $\alpha$ -Arylsulfonyl Carbanions	853
31.10.1.2.1.4	Variation 4: Reaction of $\alpha$ -Arylsulfonyl Carbanions with Carbonyl Compounds	855
31.10.1.2.2	Method 2: Elimination of Arylsulfonyl Groups To Give Alkenes	856
31.10.1.2.3	Method 3: Reductive Elimination of Arylsulfonyl Groups	859
31.10.2	<b>Product Subclass 2: S-Arylsulfoximides</b>	860
31.10.2.1	Synthesis of Product Subclass 2	860
31.10.2.1.1	Method 1: Nucleophilic Substitution of Arenesulfonimidoyl Halides and Sulfonimidates	861
31.10.2.1.2	Method 2: Oxidation of S-Arylsulfoximides	861
31.10.2.1.3	Method 3: Imination of Aryl Sulfoxides	862
31.10.2.1.4	Method 4: N-Alkylation and N-Arylation of S-Arylsulfoximides	864
31.10.2.1.5	Method 5: Optical Resolution of Chiral S-Arylsulfoximides	865
31.10.2.2	Applications of Product Subclass 2 in Organic Synthesis	865
31.10.2.2.1	Method 1: Reactions of $\alpha$ -Carbanions Derived from S-Arylsulfoximides	866
31.10.2.2.2	Method 2: Reductive Elimination of S-Arylsulfoximides	867
31.10.2.2.3	Method 3: Catalytic Enantioselective Reactions Using Chiral S-Arylsulfoximides	868
31.10.3	<b>Product Subclass 3: Arylsulfonediimines</b>	869
31.10.3.1	Synthesis of Product Subclass 3	869
31.10.3.1.1	Method 1: Imination of S-Arylsulfoximides	869
31.10.3.2	Applications of Product Subclass 3 in Organic Synthesis	870
31.10.3.2.1	Method 1: Reactions of Arylsulfonediimines	870
31.11	<b>Product Class 11: Arenesulfinic Acids and Derivatives</b> S. Nakamura and T. Toru	
31.11	<b>Product Class 11: Arenesulfinic Acids and Derivatives</b>	879
31.11.1	<b>Product Subclass 1: Arenesulfinyl Chlorides</b>	879
31.11.1.1	Synthesis of Product Subclass 1	879
31.11.1.1.1	Method 1: Synthesis from Arenesulfinic Acids and Their Derivatives	879
31.11.1.1.2	Method 2: Chlorination of Diaryl Disulfides	880
31.11.1.1.3	Method 3: Sulfinylation of Aromatic Compounds	881
31.11.1.2	Applications of Product Subclass 1 in Organic Synthesis	882
31.11.1.2.1	Method 1: Reaction of Arenesulfinyl Chlorides with Nucleophiles	882
31.11.2	<b>Product Subclass 2: Arenesulfinic Acids</b>	883
31.11.2.1	Synthesis of Product Subclass 2	883

31.11.2.1.1	Method 1:	Reduction of Arenesulfonyl Halides	883
31.11.2.1.2	Method 2:	Hydrolysis of Arenesulfinic Acid Esters and Arenesulfinyl Halides	884
31.11.2.1.3	Method 3:	Reaction of Sulfur Dioxide with Nucleophiles	884
31.11.2.2	Applications of Product Subclass 2 in Organic Synthesis		884
31.11.2.2.1	Method 1:	Nucleophilic Reaction of Arenesulfinic Acids and Their Salts with Electrophiles	884
31.11.2.2.2	Method 2:	Oxidation and Reduction of Arenesulfinic Acids	886
31.11.3	<b>Product Subclass 3: Arenesulfinic Acid Esters</b>		887
31.11.3.1	Synthesis of Product Subclass 3		887
31.11.3.1.1	Method 1:	Condensation of Arenesulfinic Acids and Alcohols	887
31.11.3.1.2	Method 2:	Oxidation of Arenethiols or Aryl Disulfides	888
31.11.3.1.3	Method 3:	Reaction of Arenesulfinyl Chlorides with Alcohols	888
31.11.3.1.3.1	Variation 1:	Reaction of Arenesulfinyl Chlorides with Menthol	888
31.11.3.1.3.2	Variation 2:	Reaction of Arenesulfinyl Chlorides with Other Chiral Alcohols	889
31.11.3.1.3.3	Variation 3:	Reaction of Arenesulfinyl Chlorides with Chiral Alcohols through Reduction of Arenesulfonyl Chlorides	890
31.11.3.1.3.4	Variation 4:	Enantioselective Reaction of Arenesulfinyl Chlorides and Alcohols with Chiral Bases	891
31.11.3.1.4	Method 4:	Ring Opening of Chiral Sulfites	893
31.11.3.2	Applications of Product Subclass 3 in Organic Synthesis		894
31.11.3.2.1	Method 1:	Reaction with Organometallic Reagents	894
31.11.4	<b>Product Subclass 4: Arenesulfinamides</b>		896
31.11.4.1	Synthesis of Product Subclass 4		896
31.11.4.1.1	Method 1:	Reaction of Arenesulfinyl Chlorides with Amines	896
31.11.4.1.2	Method 2:	Substitution Reactions of Various Arenesulfinyl Derivatives	898
31.11.4.1.3	Method 3:	Oxidation of Arenesulfenamides	899
31.11.4.1.4	Method 4:	Nucleophilic Addition of Grignard Reagents to <i>N</i> -Thionylanilines	900
31.11.4.2	Applications of Product Subclass 4 in Organic Synthesis		900
31.11.4.2.1	Method 1:	Reaction with Nucleophiles	900
31.11.4.2.2	Method 2:	Reaction with Alcohols and Thiols	901
31.11.4.2.3	Method 3:	Oxidation of Arenesulfinamides to Arenesulfonimides	902
31.11.4.2.4	Method 4:	Desulfinylation of Arenesulfinamides	902
31.11.4.2.5	Method 5:	Direct <i>ortho</i> -Lithiation of Arenesulfinamides	902
31.11.4.2.6	Method 6:	Thermal Treatment of Arenesulfinamides	903
31.12	<b>Product Class 12: Aryl Sulfoxides and S-Arylsulfimides</b> S. G. Collins and A. R. Maguire		
31.12	<b>Product Class 12: Aryl Sulfoxides and S-Arylsulfimides</b>		907
31.12.1	<b>Product Subclass 1: Symmetrical and Racemic Aryl Sulfoxides</b>		907
31.12.1.1	Synthesis of Product Subclass 1		907

31.12.1.1.1	Method 1:	Reactions of Arene Derivatives	907
31.12.1.1.1.1	Variation 1:	With Thionyl Chloride	907
31.12.1.1.1.2	Variation 2:	With Sulfinyl Chlorides	909
31.12.1.1.1.3	Variation 3:	With Sulfur Dioxide	911
31.12.1.1.1.4	Variation 4:	With Sodium Sulfinates	912
31.12.1.1.2	Method 2:	Reduction of Sulfones	912
31.12.1.1.2.1	Variation 1:	By Hydride Reduction	912
31.12.1.1.2.2	Variation 2:	Using Titanium(IV) Oxide	913
31.12.1.1.3	Method 3:	Reactions of Organometallic Compounds	913
31.12.1.1.3.1	Variation 1:	With Sulfurous Acid Derivatives	914
31.12.1.1.3.2	Variation 2:	With Sulfinic Acid Derivatives	915
31.12.1.1.3.3	Variation 3:	With Sulfonyl Chlorides	916
31.12.1.1.4	Method 4:	Oxidation of Sulfides	916
31.12.1.1.4.1	Variation 1:	Using Hydrogen Peroxide	916
31.12.1.1.4.2	Variation 2:	Using Organic Peroxides	918
31.12.1.1.4.3	Variation 3:	Using Organic Peracids	919
31.12.1.1.4.4	Variation 4:	Using Sodium Perborate	920
31.12.1.1.4.5	Variation 5:	Using Nitrogen-Containing Oxidants	920
31.12.1.1.4.6	Variation 6:	Using Molecular Halogens	921
31.12.1.1.4.7	Variation 7:	Using Hypochlorites	923
31.12.1.1.4.8	Variation 8:	Using Chlorites	923
31.12.1.1.4.9	Variation 9:	Using Iodine-Containing Oxidants	924
31.12.1.1.4.10	Variation 10:	Using Periodates	925
31.12.1.1.4.11	Variation 11:	Using <i>N</i> -Halo Compounds	926
31.12.1.1.5	Methods 5:	Miscellaneous Methods	927
31.12.1.2		Applications of Product Subclass 1 in Organic Synthesis	927
31.12.1.2.1	Method 1:	$\alpha$ -Halogenation of Sulfoxides	927
31.12.1.2.2	Method 2:	Modification of the $\alpha$ -Heteroatom Substituent of $\alpha$ -Heteroatom-Substituted Sulfoxides	928
31.12.1.2.3	Method 3:	Substitution Reactions of Aryl Sulfoxides	928
31.12.1.2.4	Method 4:	Generation and Reactions of $\alpha$ -Sulfinyl Carbanions	929
31.12.2		<b>Product Subclass 2: Optically Active Aryl Sulfoxides</b>	929
31.12.2.1		Synthesis of Product Subclass 2	929
31.12.2.1.1	Method 1:	Nucleophilic Displacement at Sulfur	929
31.12.2.1.1.1	Variation 1:	Nucleophilic Substitutions of Chiral Acyclic Sulfinylating Agents	929
31.12.2.1.1.2	Variation 2:	Nucleophilic Substitution on Chiral, Diastereomerically Pure Cyclic Sulfinylating Agents	931
31.12.2.1.2	Method 2:	Chemical Oxidation of Prochiral Sulfides	932
31.12.2.1.2.1	Variation 1:	Stoichiometric Enantioselective Oxidation of Sulfides	932
31.12.2.1.2.2	Variation 2:	Catalytic Enantioselective Oxidation of Sulfides	933
31.12.2.1.2.3	Variation 3:	Oxidation of Sulfides Bearing a Removable Chiral Auxiliary	935
31.12.2.1.2.4	Variation 4:	Biological Sulfoxidations	936
31.12.2.1.3	Method 3:	Optical Resolution	937
31.12.2.1.3.1	Variation 1:	Using Classical Methods	937
31.12.2.1.3.2	Variation 2:	Using Nonclassical Methods	937

31.12.2.1.4	Method 4: Kinetic Resolution of Sulfoxides .....	937
31.12.2.2	Applications of Product Subclass 2 in Organic Synthesis .....	938
31.12.3	<b>Product Subclass 3: S-Arylsulfimides</b> .....	939
31.12.3.1	Synthesis of Product Subclass 3 .....	939
31.12.3.1.1	Method 1: Reaction of Dialkoxy(diaryl)- $\lambda^4$ -sulfanes with Amines and Amides .....	939
31.12.3.1.2	Method 2: Reactions of Aryl Sulfoxides with <i>N</i> -Sulfinylsulfonamides ....	939
31.12.3.1.3	Method 3: Reaction of Sulfides with <i>N</i> -Halo Compounds .....	940
31.12.3.1.4	Method 4: Preparation of <i>N</i> -Unsubstituted Sulfimides .....	941
31.12.3.1.5	Method 5: Asymmetric Sulfimidation .....	941
31.12.3.2	Applications of Product Subclass 3 in Organic Synthesis .....	942
31.13	<b>Product Class 13: Arenethiols and Arenethiolates</b>	
	O. A. Rakitin	
<hr/>		
31.13	<b>Product Class 13: Arenethiols and Arenethiolates</b> .....	949
31.13.1	Synthesis of Product Class 13 .....	949
31.13.1.1	Method 1: Lithiation of Arenes Followed by Sulfur Addition .....	949
31.13.1.2	Method 2: Reduction of Thiocyanates Formed by the Reaction of Arenes with Bromine and Inorganic Thiocyanates .....	950
31.13.1.3	Method 3: Reaction of Activated Aryl Halides with Sodium Sulfide, Sodium Hydrosulfide, or Disodium Disulfide .....	951
31.13.1.4	Method 4: Reaction of Aryl Iodides with Thiourea and a Nickel Catalyst	952
31.13.1.5	Method 5: Reaction of Grignard Reagents with Sulfur .....	952
31.13.1.6	Method 6: Newman–Kwart Rearrangement of Phenols .....	953
31.13.1.7	Method 7: Diazotization of Anilines Followed by Reaction with Potassium Ethyl Dithiocarbonate .....	954
31.13.1.8	Method 8: Hydrolysis of Aryl Trialkylsilyl Sulfides .....	955
31.13.1.9	Method 9: Dealkylation of Alkyl Aryl Sulfides .....	956
31.13.1.10	Method 10: Debenzylation of Aryl Benzyl Sulfides with Lewis Acids .....	957
31.13.1.11	Method 11: Hydrolysis of <i>tert</i> -Butyl or Acetoxymethyl Aryl Sulfides .....	957
31.13.1.12	Method 12: Deprotection of Alkoxy carbonyl or Carbamoyl Sulfides by Hydrolysis .....	958
31.13.1.13	Method 13: Hydrolysis of Acyl Aryl Sulfides .....	958
31.13.1.14	Method 14: Debenzoylation of <i>S</i> -Aryl Thiobenzoates with Titanium(IV) Chloride and Zinc .....	959
31.13.1.15	Method 15: Reduction of Arenesulfonyl Chlorides .....	960
31.13.1.15.1	Variation 1: Reduction with Lithium Aluminum Hydride .....	960
31.13.1.15.2	Variation 2: Reduction with Zinc .....	960
31.13.1.16	Method 16: Reduction of Arenesulfonic Acids with a Triphenylphosphine/Iodine Mixture .....	961
31.13.1.17	Method 17: Reduction of Sodium Arenesulfinates with Tin .....	962
31.13.1.18	Method 18: Reduction of Diaryl Disulfides .....	962
31.13.1.18.1	Variation 1: Reduction with Zinc in Acids .....	963
31.13.1.18.2	Variation 2: Reduction with Sodium Sulfide .....	963

31.13.1.18.3	Variation 3:	Reduction with Lithium Tri- <i>tert</i> -butoxyaluminum Hydride ...	964
31.13.1.18.4	Variation 4:	Reduction with Sodium Borohydride .....	965
31.13.1.19	Method 19:	Reduction of <i>N</i> -(Arylsulfanyl)phthalimides with Lithium Aluminum Hydride .....	965
31.13.1.20	Method 20:	Ring Opening of Benzothiazoles .....	966
31.13.1.20.1	Variation 1:	Hydrolysis with Sodium Hydroxide .....	966
31.13.1.20.2	Variation 2:	Ring Opening Accompanied by Ring-Forming Reactions of <i>N</i> -Acetylbenzothiazol-2-ones with Aliphatic Amines .....	967
31.13.1.21	Method 21:	Ring Opening of Benzodithiazolium Chlorides (Herz Reaction)	968
31.13.1.22	Method 22:	Ring Opening of Benzothiophenes and Dibenzothiophenes	969
31.13.1.22.1	Variation 1:	Reductive Cleavage of Benzo[ <i>b</i> ]thiophene .....	969
31.13.1.22.2	Variation 2:	Reaction of Dibenzothiophenes with Grignard Reagents .....	970
31.13.1.23	Method 23:	Ring Opening of 1,4,2-Benzodithiazin-3-amine 1,1-Dioxides by Hydrolysis with Hydrazine Hydrate .....	971

## 31.14 Product Class 14: Aryl Sulfides

O. A. Rakitin

31.14	<b>Product Class 14: Aryl Sulfides</b> .....	975	
31.14.1	Synthesis of Product Class 14 .....	975	
31.14.1.1	Method 1:	Reaction of Arenes with Sulfur and Aluminum Trichloride ...	975
31.14.1.2	Method 2:	Reaction of Arenes with Sulfur Chlorides .....	975
31.14.1.3	Method 3:	Reaction of Arenes with Dialkyl Disulfides .....	976
31.14.1.4	Method 4:	Reaction of Arylboronic Acids with Alkanethiols .....	977
31.14.1.5	Method 5:	Reaction of Arylboronic Acids with <i>N</i> -Sulfanylated Succinimides .....	978
31.14.1.6	Method 6:	Reaction of Arylboronic Acids with Diaryl Disulfides .....	979
31.14.1.7	Method 7:	Synthesis of Symmetrical Aryl Sulfides by Reaction of Aryl Halides with Sodium Sulfide .....	980
31.14.1.8	Method 8:	Synthesis of Alkyl Aryl Sulfides by Reaction of Aryl Halides with Alkanethiolates .....	980
31.14.1.9	Method 9:	Reaction of Haloarenes with Thiolates under Copper or Nickel Catalysis .....	981
31.14.1.10	Method 10:	Reaction of Haloarenes with Dialkyl Disulfides .....	982
31.14.1.11	Method 11:	Synthesis of Alkyl Aryl Sulfides from Aryl Iodides and Organoboron Compounds .....	982
31.14.1.12	Method 12:	Reaction of Aryl Trifluoromethanesulfonates with Alkyl Sulfides in the Presence of Palladium Catalysts .....	983
31.14.1.13	Method 13:	Reaction of Phenols with Thiols .....	984
31.14.1.14	Method 14:	Substitution of Amino Groups via Diazonium Salts .....	984
31.14.1.15	Method 15:	Nucleophilic Substitutions of Alkyl and Aryl Halides with Arenethiols .....	985
31.14.1.16	Method 16:	Reaction of Arenethiols with Diazo Compounds .....	985
31.14.1.17	Method 17:	Reaction of Arenethiols with Quinones .....	986
31.14.1.18	Method 18:	Oxidative Coupling Reactions between Arenethiols and Arenes .....	987
31.14.1.19	Method 19:	Reaction of Activated Alkenes with Arenethiols .....	987

31.14.1.20	Method 20:	Radical Additions of Arenethiols to Alkenes	988
31.14.1.21	Method 21:	Reaction of Aryl Trimethylsilyl Sulfides and Haloarenes	989
31.14.1.22	Method 22:	Reduction of Sulfoxides	990
31.14.1.22.1	Variation 1:	With Zinc	990
31.14.1.22.2	Variation 2:	With Phosphites	990
31.14.1.22.3	Variation 3:	With Sodium Borohydride	991
31.14.1.23	Method 23:	Reduction of Sulfones	992
31.14.1.24	Method 24:	Reaction of Aryl Thiocyanates with Haloarenes	992
31.14.1.25	Method 25:	Reaction of <i>N</i> -(Arylsulfanyl)phthalimides with Arenes	993
31.14.1.26	Method 26:	Reaction between Arenesulfenyl Chlorides and Arenes	994
31.14.1.27	Method 27:	Reaction of Diaryl Disulfides with Arenes	994
31.14.1.27.1	Variation 1:	Sulfenylation of Arenes with Diaryl Disulfides Catalyzed by Lewis Acids	995
31.14.1.27.2	Variation 2:	Sulfenylation of Arenes with Diaryl Disulfides in the Presence of a Butyllithium	995
31.14.1.28	Method 28:	Reaction of Diaryl Disulfides with Haloalkanes or Haloarenes	996
31.14.1.28.1	Variation 1:	Synthesis of Aryl Sulfides from Grignard Reagents and Diaryl Disulfides	996
31.14.1.28.2	Variation 2:	Synthesis of Aryl Sulfides from Aryl Iodides, Butyllithium, and Diaryl Disulfides	996
31.14.1.29	Method 29:	Reaction of Diaryl Disulfides with Organoboron Compounds	997
31.14.1.30	Method 30:	Reaction of Diaryl Disulfides with Alkyl 4-Toluenesulfonates	997

## 31.15

**Product Class 15: Arylsulfonium Salts and Derivatives**

I. Fernández and N. Khair

31.15	<b>Product Class 15: Arylsulfonium Salts and Derivatives</b>	1001	
31.15.1	<b>Product Subclass 1: Triarylsulfonium Salts</b>	1001	
31.15.1.1	Synthesis of Product Subclass 1	1001	
31.15.1.1.1	Method 1:	Reactions of Arenethiols with Diaryliodonium Salts	1001
31.15.1.1.2	Method 2:	Synthesis from Phenols and Thionyl Chloride	1002
31.15.1.1.3	Method 3:	Synthesis from Arenes and Sulfur Monochloride	1003
31.15.1.1.4	Method 4:	Synthesis from Arenes and Diaryl(halo)sulfonium Salts	1003
31.15.1.1.5	Method 5:	Synthesis from Activated Diaryl Sulfoxides by Electrophilic Aromatic Substitution	1004
31.15.1.1.5.1	Variation 1:	Using Sulfuric Acid as the Activator	1004
31.15.1.1.5.2	Variation 2:	Using a Lewis Acid as the Activator	1004
31.15.1.1.5.3	Variation 3:	Using Phosphorus Pentoxide/Methanesulfonic Acid as the Activators	1005
31.15.1.1.5.4	Variation 4:	Using Acetic Anhydride and Sulfuric Acid as the Activators	1005
31.15.1.1.6	Method 6:	Synthesis from Activated Diaryl Sulfoxides by Reactions with Grignard Reagents	1006
31.15.1.1.7	Method 7:	Synthesis from Diaryl(ethoxy)sulfonium Salts by Reactions with Grignard Reagents	1007
31.15.1.1.8	Method 8:	Synthesis from Sulfimides	1007
31.15.1.1.8.1	Variation 1:	By Treatment with Arenes and Aluminum Trichloride	1007

31.15.1.1.8.2	Variation 2: By Reactions with Grignard Reagents	1008
31.15.1.1.9	Method 9: Arylation of Diaryl Sulfides	1009
31.15.2	<b>Product Subclass 2: Alkyl- and Alkenyl(diaryl)sulfonium Salts</b>	1009
31.15.2.1	Synthesis of Product Subclass 2	1009
31.15.2.1.1	Method 1: Synthesis from Alkyl(aryl)(halo)sulfonium Salts by Electrophilic Aromatic Substitution	1009
31.15.2.1.2	Method 2: Synthesis from Sodium Methanesulfinate by Electrophilic Aromatic Substitution	1010
31.15.2.1.3	Method 3: Synthesis from Activated Sulfoxides by Reactions with Alkenes Using Trifluoromethanesulfonic Anhydride	1011
31.15.2.1.4	Method 4: Synthesis from Alkoxy-sulfonium Salts by Reactions with Grignard Reagents	1011
31.15.2.1.5	Method 5: Arylation of Aryl Sulfides Using Activated Quinones	1011
31.15.2.1.6	Method 6: Alkylation of Diaryl Sulfides	1012
31.15.2.1.6.1	Variation 1: Using Alkyl Halides in the Presence of Silver(I) Salts	1012
31.15.2.1.6.2	Variation 2: Intramolecular Cyclization of Diazo Ketones	1013
31.15.2.1.7	Method 7: Synthesis from Sulfonium Salts via Sulfonium Ylides (C-Alkylation)	1013
31.15.3	<b>Product Subclass 3: Dialkyl(aryl)sulfonium Salts</b>	1014
31.15.3.1	Synthesis of Product Subclass 3	1014
31.15.3.1.1	Method 1: Synthesis from Arenes and Dialkyl(halo)sulfonium Salts	1014
31.15.3.1.2	Method 2: Synthesis from Benzo-1,4-quinone, a Dialkyl Sulfide, and Perchloric Acid	1014
31.15.3.1.3	Method 3: Synthesis from Arenes and Dialkyl Sulfoxides	1015
31.15.3.1.3.1	Variation 1: Using Hydrogen Chloride	1015
31.15.3.1.3.2	Variation 2: Using Phosphorus Pentoxide/Methanesulfonic Acid	1016
31.15.3.1.4	Method 4: Synthesis from Dialkyl Sulfoxides Using Nitrilium Salts	1017
31.15.3.1.5	Method 5: Synthesis from Alkoxy-sulfonium Salts by Reactions with Grignard Reagents	1017
31.15.3.1.6	Method 6: Synthesis from Arenes or Hetarenes and Azasulfonium Salts	1018
31.15.3.1.7	Method 7: Synthesis from Dialkyl(nitrosyl)sulfonium Salts and Arenes	1018
31.15.3.1.8	Method 8: Arylation of Dialkyl Sulfides with 4-Nitrophenyl 4-Toluenesulfonate	1019
31.15.3.1.9	Method 9: S-Alkylation of Alkyl Aryl Sulfides	1019
31.15.3.1.9.1	Variation 1: Using Alkyl Halides	1019
31.15.3.1.9.2	Variation 2: Using Dialkyl Sulfates	1020
31.15.3.1.10	Method 10: Reactions of Sulfides with Diazo Ketones	1021
31.15.3.1.11	Method 11: Synthesis via Sulfonium Ylides by Reactions of Dialkyl Sulfides with Benzyne	1021
31.15.4	<b>Product Subclass 4: Arylsulfonium Derivatives</b>	1021
31.15.4.1	Synthesis of Product Subclass 4	1021
31.15.4.1.1	Halosulfonium Salts	1021
31.15.4.1.1.1	Method 1: Reactions between Sulfides and Halides	1022
31.15.4.1.2	Alkoxy(diaryl)sulfonium Salts	1022

<b>31.15.4.1.2.1</b>	Method 1:	Synthesis from Alkoxylated Sulfuranes .....	1022
<b>31.15.4.1.2.2</b>	Method 2:	Synthesis via the O-Alkylation of Sulfoxides .....	1023
<b>31.15.4.1.2.2.1</b>	Variation 1:	Using Trialkyloxonium Salts .....	1023
<b>31.15.4.1.2.2.2</b>	Variation 2:	Using Dialkoxycarbenium Salts .....	1023
<b>31.15.4.1.3</b>		Diaryl(aza)sulfonium Salts .....	1023
<b>31.15.4.1.3.1</b>	Method 1:	Reactions of Sulfoxides with <i>N</i> -Ethyl- <i>N</i> -sulfinylethanaminium Tetrafluoroborate .....	1023
<b>31.15.4.1.3.2</b>	Method 2:	Synthesis from Dialkoxy(diaryl)sulfuranes .....	1024
<b>31.15.4.1.3.3</b>	Method 3:	Synthesis from <i>N</i> -Alkylsulfimides .....	1024
<b>31.15.4.1.3.4</b>	Method 4:	Synthesis from <i>N</i> -Tosylsulfimides .....	1025
<b>31.15.4.1.3.5</b>	Method 5:	Synthesis from <i>N</i> -Chlorosulfimides .....	1026
<b>31.15.4.1.3.6</b>	Method 6:	Reactions between Sulfides and O-(Mesitylsulfonyl)hydroxylamine .....	1026
<b>31.15.4.1.3.7</b>	Method 7:	Modification of Existing Azasulfonium Salts .....	1027
<b>31.15.4.1.4</b>		Alkyl(aryl)(halo)sulfonium Salts .....	1028
<b>31.15.4.1.4.1</b>	Method 1:	Reactions of Sulfoxides with Hydrobromic Acid .....	1028
<b>31.15.4.1.4.2</b>	Method 2:	Reactions of Sulfides with Halogens .....	1028
<b>31.15.4.1.5</b>		Alkoxy(alkyl)arylsulfonium Salts .....	1029
<b>31.15.4.1.5.1</b>	Method 1:	Reactions of Sulfoxides with Alkyl Halides .....	1029
<b>31.15.4.1.5.2</b>	Method 2:	Reactions of Sulfoxides with Trialkyloxonium Salts .....	1029
<b>31.15.4.1.5.3</b>	Method 3:	S-Alkylation of Arenesulfenic Esters .....	1030
<b>31.15.4.1.5.4</b>	Method 4:	Synthesis from Sulfides via Sulfuranes .....	1030
<b>31.15.4.1.6</b>		Alkyl(aryl)(aza)sulfonium Salts .....	1030
<b>31.15.4.1.6.1</b>	Method 1:	Reactions between Sulfoxides and Dialkyl(sulfinyl)ammonium Salts .....	1030
<b>31.15.4.1.6.2</b>	Method 2:	Reactions between Sulfides and O-(Mesitylsulfonyl)hydroxylamine .....	1031
<b>31.15.4.1.6.3</b>	Method 3:	Reactions between Sulfides, 1-Chlorobenzotriazole, and an Amine .....	1031
<b>31.15.4.1.7</b>		Dialkoxy(aryl)sulfonium Salts .....	1032
<b>31.15.4.1.7.1</b>	Method 1:	Synthesis from Arenesulfinate Esters .....	1032
<b>31.15.4.1.7.2</b>	Method 2:	Synthesis from Sulfuranes .....	1032
<b>31.15.4.1.8</b>		Alkoxy(aryl)(aza)sulfonium Salts .....	1033
<b>31.15.4.1.8.1</b>	Method 1:	Synthesis from Arenesulfinamides .....	1033
<b>31.15.4.1.8.2</b>	Method 2:	Synthesis from Arenesulfenamides .....	1034
<b>31.15.4.1.9</b>		Diaza(aryl)sulfonium Salts .....	1035
<b>31.15.4.1.9.1</b>	Method 1:	Synthesis from Alkoxy(amino)(aryl)sulfonium Salts .....	1035
<b>31.15.4.1.9.2</b>	Method 2:	Synthesis from Arenesulfenamides .....	1036
<b>31.15.4.1.9.3</b>	Method 3:	Synthesis from Arenesulfenamides via Sulfinimidamides ...	1036
<b>31.15.4.1.9.4</b>	Method 4:	Modification of Existing Arylsulfonium Salts .....	1037

<b>31.16</b>	<b>Product Class 16: Arenesulfenic Acids and Derivatives</b> S. Perrio, V. Reboul, and P. Metzner	
<b>31.16</b>	<b>Product Class 16: Arenesulfenic Acids and Derivatives</b> .....	1041
<b>31.16.1</b>	<b>Product Subclass 1: Arenesulfenyl Chlorides</b> .....	1041
<b>31.16.1.1</b>	Synthesis of Product Subclass 1 .....	1041
<b>31.16.1.1.1</b>	Method 1: Synthesis from Thiols .....	1041
<b>31.16.1.1.1.1</b>	Variation 1: By Reaction with Chlorine .....	1041
<b>31.16.1.1.1.2</b>	Variation 2: By Reaction with Sulfuryl Chloride .....	1042
<b>31.16.1.1.1.3</b>	Variation 3: By Reaction with <i>N</i> -Chlorosuccinimide .....	1042
<b>31.16.1.1.1.4</b>	Variation 4: By Reaction with (Dichloroiodo)benzene .....	1043
<b>31.16.1.1.2</b>	Method 2: Synthesis from Thioesters and Sulfuryl Chloride .....	1043
<b>31.16.1.1.3</b>	Method 3: Synthesis from Sulfides .....	1044
<b>31.16.1.1.3.1</b>	Variation 1: By Reaction with Sulfuryl Chloride .....	1044
<b>31.16.1.1.4</b>	Method 4: Synthesis from Disulfides .....	1044
<b>31.16.1.1.4.1</b>	Variation 1: By Reaction with Chlorine .....	1044
<b>31.16.1.1.4.2</b>	Variation 2: By Reaction with Thionyl Chloride .....	1045
<b>31.16.1.1.4.3</b>	Variation 3: By Reaction with Sulfuryl Chloride .....	1045
<b>31.16.2</b>	<b>Product Subclass 2: Arenesulfenyl Bromides</b> .....	1045
<b>31.16.2.1</b>	Synthesis of Product Subclass 2 .....	1046
<b>31.16.2.1.1</b>	Method 1: Synthesis from Disulfides and Bromine .....	1046
<b>31.16.3</b>	<b>Product Subclass 3: Arenesulfenyl Iodides</b> .....	1046
<b>31.16.3.1</b>	Synthesis of Product Subclass 3 .....	1046
<b>31.16.3.1.1</b>	Method 1: Reaction of Thiols with Iodine .....	1046
<b>31.16.4</b>	<b>Product Subclass 4: Arenesulfenic Acids</b> .....	1047
<b>31.16.4.1</b>	Synthesis of Product Subclass 4 .....	1047
<b>31.16.4.1.1</b>	Method 1: Oxidation of Thiols .....	1047
<b>31.16.4.1.2</b>	Method 2: Alkaline Hydrolysis of Sulfenic Acid Esters .....	1048
<b>31.16.4.1.3</b>	Method 3: Thermolysis of Sulfoxides .....	1048
<b>31.16.4.1.4</b>	Method 4: Thermolysis of <i>N</i> -(Sulfinyl)phenylmethanimines .....	1049
<b>31.16.5</b>	<b>Product Subclass 5: Arenesulfenic Acid Salts</b> .....	1050
<b>31.16.5.1</b>	Synthesis of Product Subclass 5 .....	1050
<b>31.16.5.1.1</b>	Method 1: Oxidation of Thiols .....	1050
<b>31.16.5.1.2</b>	Method 2: Synthesis from Silylated Sulfenic Acid Esters and Tetrabutylammonium Fluoride .....	1051
<b>31.16.5.1.3</b>	Method 3: Addition/Elimination Reactions of Sulfoxides .....	1052
<b>31.16.5.1.4</b>	Method 4: Deprotonation/Elimination Reactions of Sulfoxides .....	1053
<b>31.16.5.1.5</b>	Method 5: Synthesis from a 4-Tolylsulfinylacetylene by Transmetalation with Diethylzinc and a Palladium Catalyst .....	1054
<b>31.16.6</b>	<b>Product Subclass 6: Arenesulfenic Acid Esters</b> .....	1054
<b>31.16.6.1</b>	Synthesis of Product Subclass 6 .....	1055
<b>31.16.6.1.1</b>	Method 1: Reactions of Sulfenic Acid Salts with Hard Electrophiles .....	1055

31.16.6.1.2	Method 2:	Synthesis from Sulfenyl Chlorides	1055
31.16.6.1.2.1	Variation 1:	By Reaction with Alcohols	1055
31.16.6.1.2.2	Variation 2:	By Reaction with Alkoxides	1056
31.16.6.1.3	Method 3:	Reaction of Sulfenic Acid Esters with Alcohols	1057
31.16.7	<b>Product Subclass 7: Arenesulfenamides</b>		1057
31.16.7.1	Synthesis of Product Subclass 7		1057
31.16.7.1.1	Method 1:	Synthesis from Thiols	1057
31.16.7.1.1.1	Variation 1:	By Reaction with Hydroxylamine- <i>O</i> -sulfonic Acids	1057
31.16.7.1.1.2	Variation 2:	By Reaction with <i>N</i> -Chlorosuccinimide or <i>N</i> -Bromophthalimide	1058
31.16.7.1.2	Method 2:	Synthesis from Sulfenyl Chlorides	1059
31.16.7.1.2.1	Variation 1:	By Reaction with Amines	1059
31.16.7.1.2.2	Variation 2:	By Reaction with Amides or Lactams	1061
31.16.7.1.3	Method 3:	Reactions of Sulfenic Acid Esters with Amines	1061
31.16.7.1.4	Method 4:	Synthesis from Disulfides	1062
31.16.7.1.4.1	Variation 1:	By Reaction with Amines	1062
31.16.7.1.4.2	Variation 2:	By Reaction with Lithium Amides	1063
31.16.7.1.4.3	Variation 3:	By Electrosynthesis	1064
31.16.7.1.4.4	Variation 4:	By Reaction with <i>N</i> -Chloro- or <i>N</i> -Bromosuccinimide or <i>N</i> -Bromophthalimide	1064
31.16.7.1.5	Method 5:	Reaction of Thiosulfonates with Amines	1065
31.16.7.1.6	Method 6:	Reaction of <i>N</i> -Sulfanylated Imines with Organolithiums	1065
31.16.7.1.7	Method 7:	2,3-Sigmatropic Rearrangements of Sulfimides	1066
31.16.7.1.8	Method 8:	Pummerer Rearrangement of $\beta$ -Sulfinylated Amines	1067
31.16.7.1.9	Method 9:	Synthesis from Sulfenamides	1068
31.16.7.1.9.1	Variation 1:	By Acylation	1068
31.16.7.1.9.2	Variation 2:	By Amino Transfer	1069
31.16.8	<b>Product Subclass 8: <i>N</i>-(Arylsulfonyl)imines</b>		1071
31.16.8.1	Synthesis of Product Subclass 8		1071
31.16.8.1.1	Method 1:	Synthesis from Sulfenic Acid Chlorides	1071
31.16.8.1.1.1	Variation 1:	By Reaction with Amines	1071
31.16.8.1.1.2	Variation 2:	By Reaction with Imines	1072
31.16.8.1.2	Method 2:	Synthesis from Disulfides	1073
31.16.8.1.2.1	Variation 1:	By Reaction with Ammonia and Carbonyl Compounds or with Imines	1073
31.16.8.1.2.2	Variation 2:	By Reaction with Oximes	1074
31.16.8.1.2.3	Variation 3:	From $\alpha$ -Aminoalkanoates	1075
31.16.8.1.3	Method 3:	Synthesis from Sulfenamides	1075
31.16.8.1.3.1	Variation 1:	By Reaction with Carbonyl Compounds	1075
31.16.8.1.3.2	Variation 2:	By Oxidation	1076
31.16.8.1.3.3	Variation 3:	By Fluoride-Catalyzed Reactions	1076
31.16.8.1.4	Method 4:	Reaction of a Sulfenamide Enolate Equivalent with Electrophiles	1077
31.16.8.1.5	Method 5:	Synthesis from Tris(phenylsulfonyl)amine	1078

<b>31.16.9</b>	<b>Product Subclass 9: S-Nitrosoarenethiols</b> .....	1078
<b>31.16.9.1</b>	Synthesis of Product Subclass 9 .....	1078
<b>31.16.9.1.1</b>	Method 1: Nitrosation of Thiols .....	1078
<b>31.16.10</b>	<b>Product Subclass 10: S-Nitroarenethiols</b> .....	1079
<b>31.16.10.1</b>	Synthesis of Product Subclass 10 .....	1079
<b>31.16.10.1.1</b>	Method 1: Oxidation of Arenethiols .....	1079
<b>31.16.10.1.2</b>	Method 2: Oxidation of S-Nitrosoarenethiols .....	1079
<b>31.16.11</b>	<b>Product Subclass 11: (Arylsulfanyl)diazenes</b> .....	1079
<b>31.16.11.1</b>	Synthesis of Product Subclass 11 .....	1080
<b>31.16.11.1.1</b>	Method 1: Reaction of Thiols with Anilines .....	1080
<b>31.17</b>	<b>Product Class 17: Aryl Polysulfides</b> O. A. Rakitin	
<hr/>		
<b>31.17</b>	<b>Product Class 17: Aryl Polysulfides</b> .....	1085
