

Volume 32:
X—Ene—X (X = F, Cl, Br, I, O, S, Se, Te, N, P),
Ene—Hal, and Ene—O Compounds

	Preface	V
	Volume Editor's Preface	VII
	Table of Contents	XIII
	Introduction	
	J. Mulzer	1
32.1	Product Class 1: 1,3-Bis(heteroatom-substituted) Allenes and Analogous Higher Cumulenes	
	A. S. K. Hashmi	13
32.2	Product Class 2: Monofunctionalized Allenes and Higher Cumulenes	
	A. S. K. Hashmi	23
32.3	Product Class 3: 1,2-Bis(heteroatom-substituted) Alkenes	
32.3.1	Product Subclass 1: 1,2-Dihaloalkenes	
	U. Nubbemeyer	57
32.3.2	Product Subclass 2: 1-Halo-2-(organooxy)alkenes	
	U. Nubbemeyer	169
32.3.3	Product Subclass 3: 1-Halo-2-(organochalcogeno)alkenes	
	U. Nubbemeyer	201
32.3.4	Product Subclass 4: 1-Nitrogen-Functionalized 2-Haloalkenes	
	U. Nubbemeyer	235
32.3.5	Product Subclass 5: 1-Phosphorus-Functionalized 2-Haloalkenes	
	U. Nubbemeyer	289
32.3.6	Product Subclass 6: 1,2-Bis(organooxy)alkenes	
	M. Sainsbury	299
32.3.7	Product Subclass 7: 1-(Organochalcogeno)-2-(organooxy)alkenes	
	B. List, C. Chandler, R. R. Torres, and A. Erkkilä	335
32.3.8	Product Subclass 8: 1-Nitrogen-Functionalized 2-(Organooxy)alkenes	
	B. List, C. Chandler, R. R. Torres, and A. Erkkilä	351
32.3.9	Product Subclass 9: 1-Phosphorus-Functionalized 2-(Organooxy)alkenes	
	B. List, C. Chandler, R. R. Torres, and A. Erkkilä	361

32.3.10	Product Subclass 10: 1,2-Bis(sulfur-functionalized) Alkenes C. Chandler, R. R. Torres, A. Erkkilä, and B. List	365
32.3.11	Product Subclass 11: 1-Sulfur-Functionalized 2-(Organochalcogeno)-alkenes C. Chandler, R. R. Torres, A. Erkkilä, and B. List	381
32.3.12	Product Subclass 12: 1-Sulfur-Functionalized 2-Nitrogen-Functionalized Alkenes C. Chandler, R. R. Torres, A. Erkkilä, and B. List	385
32.3.13	Product Subclass 13: 1-Sulfur-Functionalized 2-Phosphorus-Functionalized Alkenes C. Chandler, R. R. Torres, A. Erkkilä, and B. List	399
32.3.14	Product Subclass 14: 1,2-Bis(nitrogen-functionalized) Alkenes B. List, C. Chandler, R. R. Torres, and A. Erkkilä	405
32.3.15	Product Subclass 15: 1-Nitrogen-Functionalized 2-Phosphorus-Functionalized Alkenes B. List, C. Chandler, R. R. Torres, and A. Erkkilä	421
32.3.16	Product Subclass 16: 1,2-Bis(phosphorus-functionalized) Alkenes B. List, C. Chandler, R. R. Torres, and A. Erkkilä	427
32.4	Product Class 4: Haloalkenes A. Pollex	431
32.5	Product Class 5: (Organooxy)alkenes	
32.5.1	Product Subclass 1: Enols D. Trauner	533
32.5.2	Product Subclass 2: Enolates D. Trauner	547
32.5.3	Product Subclass 3: Enol Ethers V. Milata, S. Rádl, and S. Voltrová	589
32.5.4	Product Subclass 4: Ene—OX Compounds (X = O, S, Se, Te) G. Sartori and R. Maggi	757
32.5.5	Product Subclass 5: Ene—ON Compounds G. Sartori and R. Maggi	783
32.5.6	Product Subclass 6: Ene—OP Compounds G. Sartori and R. Maggi	795

Table of Contents

	Introduction	
	J. Mulzer	
	<hr/>	
	Introduction	1
32.1	Product Class 1: 1,3-Bis(heteroatom-substituted) Allenes and Analogous Higher Cumulenes	
	A. S. K. Hashmi	
	<hr/>	
32.1	Product Class 1: 1,3-Bis(heteroatom-substituted) Allenes and Analogous Higher Cumulenes	13
32.1.1	Product Subclass 1: 1,3-Dihaloallenes	13
32.1.1.1	Synthesis of Product Subclass 1	13
32.1.1.1.1	Method 1: Synthesis Using Alkylolithium Reagents and Pyran-2-ones	13
32.1.2	Product Subclass 2: 1-Halo-3-(organooxy)allenes	15
32.1.3	Product Subclass 3: 1-Halo-3-(organochalcogeno)allenes	15
32.1.3.1	Synthesis of Product Subclass 3	15
32.1.3.1.1	Method 1: Synthesis Using Sulfonoselenoate Reagents and Alkynes	15
32.1.4	Product Subclass 4: 1-Nitrogen-Functionalized 3-Haloallenes	16
32.1.5	Product Subclass 5: 1-Phosphorus-Functionalized 3-Haloallenes	17
32.1.6	Product Subclass 6: 1,3-Bis(organooxy)allenes	17
32.1.7	Product Subclass 7: 1-(Organochalcogeno)-3-(organooxy)allenes	17
32.1.7.1	Synthesis of Product Subclass 7	17
32.1.7.1.1	Method 1: Synthesis Using Silyl Ketene Reagents and Alkynes	17
32.1.8	Product Subclass 8: 1-Nitrogen-Functionalized 3-(Organooxy)allenes	18
32.1.9	Product Subclass 9: 1-Phosphorus-Functionalized 3-(Organooxy)allenes	18
32.1.10	Product Subclass 10: 1,3-Bis(organochalcogeno)allenes	18
32.1.11	Product Subclass 11: 1-Nitrogen-Functionalized 3-(Organochalcogeno)-allenes	19
32.1.12	Product Subclass 12: 1-Phosphorus-Functionalized 3-(Organochalcogeno)-allenes	19
32.1.13	Product Subclass 13: 1,3-Bis(nitrogen-functionalized) Allenes	19
32.1.14	Product Subclass 14: 1-Nitrogen-Functionalized 3-Phosphorus-Functionalized Allenes	19
32.1.15	Product Subclass 15: 1,3-Bis(phosphorus-functionalized) Allenes	19
32.1.16	Product Subclass 16: 1,ω-Bis(heteroatom-functionalized) Cumulenes	20

32.2	Product Class 2: Monofunctionalized Allenes and Higher Cumulenes	
	A. S. K. Hashmi	
<hr/>		
32.2	Product Class 2: Monofunctionalized Allenes and Higher Cumulenes	23
32.2.1	Product Subclass 1: Haloallenes	23
32.2.1.1	Synthesis of Product Subclass 1	24
32.2.1.1.1	Method 1: Fluoroallenes by Fluoride Substitution with Organocuprates	24
32.2.1.1.2	Method 2: Chloroallenes by Isomerization of Propargylic Chlorides	25
32.2.1.1.2.1	Variation 1: Using a Copper(I)/Copper(0) Catalyst	25
32.2.1.1.2.2	Variation 2: Using Only a Copper(I) Catalyst	26
32.2.1.1.3	Method 3: Chloroallenes from Propargylic Alcohols and Thionyl Chloride	26
32.2.1.1.4	Method 4: Chloroallenes from Propargylic Alcohols and Hydrogen Chloride	27
32.2.1.1.5	Method 5: Flash-Vacuum Thermolysis of 1-Chlorocyclopropenes	27
32.2.1.1.6	Method 6: Chloroallenes from Benzyne and Propargyl Chloride	28
32.2.1.1.7	Method 7: Chloroallenes from Ketene Silyl Acetals	28
32.2.1.1.8	Method 8: Chloroallenes from Alkynes and Benzil	29
32.2.1.1.9	Method 9: Chloroallenes from Propargylic Alcohols and Titanium(IV) Chloride	30
32.2.1.1.10	Method 10: Bromoallenes by Alkynylogous Ring Opening of Oxiranes	31
32.2.1.1.11	Method 11: Bromoallenes by Copper-Mediated Nucleophilic Substitution of Propargylic Methanesulfonates	32
32.2.1.1.12	Method 12: Bromoallenes from Acid Chlorides	32
32.2.1.1.13	Method 13: Bromoallenes from Phosphonium Bromides	33
32.2.1.1.14	Method 14: Iodoallenes from Propargylic Alcohols	34
32.2.1.1.14.1	Variation 1: Activation of the Propargylic Alcohol by a Phosphonium Species	34
32.2.1.1.14.2	Variation 2: Using a Copper(I)/Copper(0) Catalyst	34
32.2.2	Product Subclass 2: (Organo)halcogenoallenes	35
32.2.2.1	Synthesis of Product Subclass 2	35
32.2.2.1.1	Method 1: Isomerization of Propargyl Ethers by Potassium <i>tert</i> -Butoxide/ <i>tert</i> -Butyl Alcohol	35
32.2.2.1.2	Method 2: Isomerization of Propargyl Ethers by Potassium <i>tert</i> -Butoxide/Pentane	36
32.2.2.1.3	Method 3: Isomerization–Elimination of Propargyl Ethers by Potassium <i>tert</i> -Butoxide/Benzene	37
32.2.2.1.4	Method 4: Metalation of Alkoxyallenes and Addition to Aldehydes	37
32.2.2.1.5	Method 5: Alkylation of the Intermediate Obtained from Acylsilanes and Acetylides	38
32.2.2.1.6	Method 6: Wittig Alkenation of Chromium–Carbene Complexes	39
32.2.2.1.7	Method 7: Alkylation–Isomerization of Propargyl Sulfides	40
32.2.2.1.8	Method 8: Allenyl Sulfides and Selenides by the Wittig Route	41
32.2.2.1.9	Method 9: Allenyl Sulfides by a Three-Component Reaction	42
32.2.2.1.10	Method 10: Allenyl Sulfides by Palladium-Catalyzed Coupling	43

32.2.3	Product Subclass 3: Nitrogen-Functionalized Allenes	43
32.2.3.1	Synthesis of Product Subclass 3	43
32.2.3.1.1	Method 1: Allenyl Amides by Base-Catalyzed Rearrangement	43
32.2.3.1.2	Method 2: Morpholinoallenes by Conjugate Addition	44
32.2.3.1.3	Method 3: 4-Vinylideneoxazolidin-2-ones by Palladium Catalysis	45
32.2.3.1.4	Method 4: Copper-Catalyzed Coupling of Allenyl Halides with Amides, Carbamates, and Ureas	46
32.2.3.1.5	Method 5: Rhodium-Catalyzed Coupling of Propargylic Carbonates and Sulfonamides	48
32.2.4	Product Subclass 4: Phosphorus-Functionalized Allenes	49
32.2.4.1	Synthesis of Product Subclass 4	50
32.2.4.1.1	Method 1: Isomerization of Propargylphosphines under Basic Conditions	50
32.2.5	Product Subclass 5: Monofunctionalized Cumulenes	50
32.2.5.1	Synthesis of Product Subclass 5	50
32.2.5.1.1	Method 1: Wittig Route to Bromobutatrienes	50
32.2.5.1.2	Method 2: Elimination/Deprotonation/Regioselective Reprotonation	52

32.3 Product Class 3: 1,2-Bis(heteroatom-substituted) Alkenes

32.3.1 Product Subclass 1: 1,2-Dihaloalkenes

U. Nubbemeyer

32.3.1	Product Subclass 1: 1,2-Dihaloalkenes	57
32.3.1.1	Synthesis of Product Subclass 1	58
32.3.1.1.1	Method 1: Synthesis by Oxidation of Arenes or Hetarenes	58
32.3.1.1.1.1	Variation 1: Oxidation of 3,4-Dibromo-2,5-bis(phenylsulfanyl)furan	58
32.3.1.1.1.2	Variation 2: Oxidation of Halogenated Azatriquinacenes	58
32.3.1.1.1.3	Variation 3: Oxidation of Phenols	59
32.3.1.1.1.4	Variation 4: Oxidation of Aniline	60
32.3.1.1.2	Method 2: Synthesis by Reduction	60
32.3.1.1.2.1	Variation 1: Reductive Defluorination	60
32.3.1.1.2.2	Variation 2: Reductive Dechlorination	61
32.3.1.1.2.3	Variation 3: Reductive Elimination of Mixed Halogen Atoms	62
32.3.1.1.2.4	Variation 4: Reductive Coupling	64
32.3.1.1.3	Method 3: Synthesis by Substitution	68
32.3.1.1.3.1	Variation 1: Substitution of Fluorine	68
32.3.1.1.3.2	Variation 2: Substitution of Chlorine or Bromine Atoms	69
32.3.1.1.3.3	Variation 3: Substitution of Halogens by Alkyl or Aryl Groups	79
32.3.1.1.3.4	Variation 4: Substitution of Oxygen	83
32.3.1.1.4	Method 4: Synthesis by Elimination	88
32.3.1.1.4.1	Variation 1: Dehydrofluorination	88
32.3.1.1.4.2	Variation 2: Dehydrochlorination	92
32.3.1.1.4.3	Variation 3: Dehydrobromination	94

32.3.1.1.4.4	Variation 4:	Dehydroiodination	98
32.3.1.1.4.5	Variation 5:	Elimination of Sulfur	99
32.3.1.1.4.6	Variation 6:	Elimination with Fragmentation	100
32.3.1.1.5	Method 5:	Synthesis by Addition	101
32.3.1.1.5.1	Variation 1:	Addition of Methyl Hypofluorite to Allenes or Butadienes	101
32.3.1.1.5.2	Variation 2:	Addition of Chlorine to Alkynes	102
32.3.1.1.5.3	Variation 3:	Addition of Bromine to Alkynes	103
32.3.1.1.5.4	Variation 4:	Addition of Iodine to Alkynes	107
32.3.1.1.5.5	Variation 5:	Addition of Bromine Monofluoride to Alkynes	108
32.3.1.1.5.6	Variation 6:	Addition of an Iodine and a Fluorine Atom to Alkynes	109
32.3.1.1.5.7	Variation 7:	Addition of Halogen Chlorides or Halogen Bromides to Alkynes	112
32.3.1.1.5.8	Variation 8:	Addition of Nucleophiles to <i>vic</i> -Dihaloquinones and Related Systems	115
32.3.1.1.5.9	Variation 9:	Carbene Dimerization	117
32.3.1.1.6	Method 6:	Synthesis by Cycloaddition	118
32.3.1.1.6.1	Variation 1:	Synthesis by [2 + 2] Cycloaddition	118
32.3.1.1.6.2	Variation 2:	Synthesis by [2 + 2 + 1] Cycloaddition	121
32.3.1.1.6.3	Variation 3:	Synthesis by [3 + 2] Cycloaddition	122
32.3.1.1.6.4	Variation 4:	Synthesis by [4 + 2] Cycloaddition	123
32.3.1.1.6.5	Variation 5:	Synthesis by [5 + 2] Cycloaddition	132
32.3.1.1.6.6	Variation 6:	Synthesis by [4 + 3] Cycloaddition	133
32.3.1.1.7	Method 7:	Synthesis by Rearrangement	134
32.3.1.1.7.1	Variation 1:	Migration of Fluorine	134
32.3.1.1.7.2	Variation 2:	Cyclopropane Isomerization	135
32.3.1.1.7.3	Variation 3:	Carbon Framework Rearrangements	137
32.3.1.1.7.4	Variation 4:	Sigmatropic Rearrangement	139
32.3.1.1.7.5	Variation 5:	Electrocyclic Reactions	139
32.3.1.1.7.6	Variation 6:	Miscellaneous Rearrangements	141
32.3.1.1.8	Method 8:	Synthesis from Alkenyl Compounds with Retention of C=C Bond Configuration	143
32.3.1.1.8.1	Variation 1:	Boron Replacement	143
32.3.1.1.8.2	Variation 2:	Silane Replacement	145
32.3.1.1.8.3	Variation 3:	Silane Replacement with Rearrangement	146
32.3.1.1.8.4	Variation 4:	Stannane Replacement	148
32.3.1.1.8.5	Variation 5:	Hydroxyalkylation of (<i>E</i>)- or (<i>Z</i>)-Iodo(pentafluoropropenyl)zinc Intermediates	149
32.3.1.1.8.6	Variation 6:	Zinc Displacement	150
32.3.1.1.8.7	Variation 7:	Zinc/Copper Displacement	152
32.3.1.2		Applications of Product Subclass 1 in Organic Synthesis	153
32.3.2		Product Subclass 2: 1-Halo-2-(organooxy)alkenes U. Nubbemeyer	
32.3.2		Product Subclass 2: 1-Halo-2-(organooxy)alkenes	169
32.3.2.1		Synthesis of Product Subclass 2	169

32.3.2.1.1	Method 1:	Synthesis by Oxidation and Reduction	169
32.3.2.1.2	Method 2:	Synthesis by Substitution of a Leaving Group	171
32.3.2.1.3	Method 3:	Synthesis by Substitution of a Metal	173
32.3.2.1.3.1	Variation 1:	Substitution of Tin	173
32.3.2.1.3.2	Variation 2:	Substitution of Rhodium (via Carbenoid Intermediates)	175
32.3.2.1.4	Method 4:	Synthesis by Enolate Alkylation or Acylation	180
32.3.2.1.5	Method 5:	Synthesis by Elimination	180
32.3.2.1.6	Method 6:	Synthesis by Addition	185
32.3.2.1.6.1	Variation 1:	Intermolecular Additions to Alkynes	185
32.3.2.1.6.2	Variation 2:	Addition to Alkynes/Halocyclization	186
32.3.2.1.7	Method 7:	Synthesis by C—C Bond Formation	189
32.3.2.1.7.1	Variation 1:	Nazarov Cyclization	189
32.3.2.1.7.2	Variation 2:	Cycloadditions	191
32.3.2.1.8	Method 8:	Synthesis by Rearrangement	192
32.3.2.1.9	Method 9:	Synthesis with Retention of the Functional Group	193

32.3.3 Product Subclass 3: 1-Halo-2-(organochalcogeno)alkenes

U. Nubbemeyer

32.3.3	Product Subclass 3: 1-Halo-2-(organochalcogeno)alkenes	201
32.3.3.1	Synthesis of Product Subclass 3	201
32.3.3.1.1	Method 1: Synthesis by Oxidation	201
32.3.3.1.1.1	Variation 1: Oxidation of Aryl Sulfides or Sulfoxides	201
32.3.3.1.1.2	Variation 2: β -Halogenation of Vinyl Sulfides	203
32.3.3.1.2	Method 2: Synthesis by Reduction	203
32.3.3.1.3	Method 3: Synthesis by Substitution	204
32.3.3.1.3.1	Variation 1: Replacement of a Halogen	204
32.3.3.1.3.2	Variation 2: Replacement of a Metal	206
32.3.3.1.4	Method 4: Synthesis by Elimination	208
32.3.3.1.5	Method 5: Synthesis by the Addition of Halogens to Allenes	209
32.3.3.1.5.1	Variation 1: Addition to Allenyl Sulfides or Selenides	210
32.3.3.1.5.2	Variation 2: Addition to Allenyl Sulfoxides with Concomitant Reduction	213
32.3.3.1.5.3	Variation 3: Addition to Allenyl Sulfoxides	214
32.3.3.1.5.4	Variation 4: Addition to Allenesulfinic Acids and Allenyl Sulfones	217
32.3.3.1.6	Method 6: Synthesis by Addition to Alkynes	218
32.3.3.1.6.1	Variation 1: Chloroalkylation of Selanylalkynes	218
32.3.3.1.6.2	Variation 2: Addition of Sulfonyl Halides to Alkynes	219
32.3.3.1.6.3	Variation 3: Addition of Selenenyl Halides to Alkynes	223
32.3.3.1.6.4	Variation 4: Addition of Tellurium Halides to Alkynes	225
32.3.3.1.6.5	Variation 5: Addition of Sulfonyl Halides to Alkynes	226
32.3.3.1.6.6	Variation 6: Addition of Sulfur(VI) Halopentafluorides to Alkynes	227
32.3.3.1.6.7	Variation 7: Addition of Tellurium(IV) Chloride to Propargyl Alcohols	229
32.3.3.1.7	Method 7: Cycloaddition	229
32.3.3.1.8	Method 8: Synthesis by Rearrangement	230
32.3.3.1.9	Method 9: Synthesis with Retention of the Functional Group	231

32.3.4	Product Subclass 4: 1-Nitrogen-Functionalized 2-Haloalkenes	
	U. Nubbemeyer	
<hr/>		
32.3.4	Product Subclass 4: 1-Nitrogen-Functionalized 2-Haloalkenes	235
32.3.4.1	Synthesis of Product Subclass 4	235
32.3.4.1.1	Method 1: Synthesis by Oxidation	235
32.3.4.1.1.1	Variation 1: β -Halogenation of Enamines	235
32.3.4.1.1.2	Variation 2: α -Halogenation of Enamino Ketones	236
32.3.4.1.1.3	Variation 3: β -Halogenation of <i>N</i> -Alkenylated Amides	242
32.3.4.1.1.4	Variation 4: β -Halogenation of <i>N</i> -Vinylcarbamates	245
32.3.4.1.1.5	Variation 5: Synthesis of Enamino(phenyl)iodonium Salts	248
32.3.4.1.2	Method 2: Synthesis by Reduction	248
32.3.4.1.2.1	Variation 1: Reduction of Chlorides	248
32.3.4.1.2.2	Variation 2: Reduction of Aromatic Heterocycles	249
32.3.4.1.2.3	Variation 3: Reductive Alkylation	249
32.3.4.1.3	Method 3: Synthesis by Substitution	250
32.3.4.1.3.1	Variation 1: Substitution of Fluoride	250
32.3.4.1.3.2	Variation 2: Substitution of a Chlorine Atom Bonded to C3 of a Cyclopentenone	254
32.3.4.1.3.3	Variation 3: Substitution of Chlorine or Bromine Atoms Bonded to Heterocycles	256
32.3.4.1.3.4	Variation 4: Substitution of Iodine	259
32.3.4.1.3.5	Variation 5: Substitution of Hydroxy or Alkoxy Groups	261
32.3.4.1.3.6	Variation 6: Substitution of Acyloxy Functions	263
32.3.4.1.3.7	Variation 7: Synthesis of β -Halovinyl Azides	265
32.3.4.1.3.8	Variation 8: Substitution of Silicon or Tin	266
32.3.4.1.4	Method 4: Synthesis by Elimination	267
32.3.4.1.5	Method 5: Synthesis by Addition	269
32.3.4.1.5.1	Variation 1: Additions to Allenes	269
32.3.4.1.5.2	Variation 2: Intermolecular Additions to Alkynes	269
32.3.4.1.5.3	Variation 3: Chlorocyclization of Alkynes	271
32.3.4.1.5.4	Variation 4: Bromo- and Iodocyclization of Alkynes	272
32.3.4.1.5.5	Variation 5: Vilsmeier Reactions	275
32.3.4.1.5.6	Variation 6: Condensations of α -Halo Ketones	276
32.3.4.1.6	Method 6: Synthesis by Rearrangement	277
32.3.4.1.6.1	Variation 1: Thermolyses of Cyclopropanes	277
32.3.4.1.6.2	Variation 2: Electrocyclic Ring Opening	277
32.3.4.1.7	Method 7: Synthesis with Retention of the Functional Group	278
32.3.4.1.7.1	Variation 1: Additions to Arenes	278
32.3.4.1.7.2	Variation 2: Additions to Hetarenes	279
32.3.5	Product Subclass 5: 1-Phosphorus-Functionalized 2-Haloalkenes	
	U. Nubbemeyer	
<hr/>		
32.3.5	Product Subclass 5: 1-Phosphorus-Functionalized 2-Haloalkenes	289
32.3.5.1	Synthesis of Product Subclass 5	289

32.3.5.1.1	Method 1:	Synthesis by Substitution	289
32.3.5.1.1.1	Variation 1:	Substitution of a Halogen	289
32.3.5.1.1.2	Variation 2:	Substitution of a Metal	290
32.3.5.1.2	Method 2:	Synthesis by Elimination	291
32.3.5.1.3	Method 3:	Synthesis by Addition	292
32.3.5.1.3.1	Variation 1:	Intermolecular Additions to Alkynes	292
32.3.5.1.3.2	Variation 2:	Intramolecular Additions to Allenes	293
32.3.5.1.4	Method 4:	Synthesis by Condensation	296
32.3.5.1.5	Method 5:	Synthesis of 2-Chlorovinyl Dichlorophosphonates and Dichlorothiophosphonates	297
32.3.6	Product Subclass 6: 1,2-Bis(organooxy)alkenes		
	M. Sainsbury		
32.3.6	Product Subclass 6: 1,2-Bis(organooxy)alkenes		299
32.3.6.1	Synthesis of Product Subclass 6		300
32.3.6.1.1	1,2-Dioxyethenes		300
32.3.6.1.1.1	Method 1:	Dehalogenation or Dehydrohalogenation of 1,2-Dialkoxy- or 1,2-Diaryloxy-1,2-dihaloalkanes	300
32.3.6.1.1.2	Method 2:	Elimination of Alcohols from Acetals or Ortho Esters	305
32.3.6.1.1.3	Method 3:	Selective Reduction of 1,2-Dialkoxyacetylenes	306
32.3.6.1.1.4	Method 4:	Synthesis from 2-Acetoxyvinylmercury(II) Chlorides	306
32.3.6.1.1.5	Method 5:	Synthesis from Carbenes and Related Species	307
32.3.6.1.1.6	Method 6:	Carbonylation and Sulfanylation of 2,3-Dimethoxybuta- 1,3-diene	310
32.3.6.1.1.7	Method 7:	Synthesis of Polycyclic Systems Containing a 1,2-Dialkoxyethene Component	310
32.3.6.1.2	1,3-Dioxoles		311
32.3.6.1.2.1	Method 1:	Addition of Diazomethane to α,β -Dicarbonyl Compounds	311
32.3.6.1.2.2	Method 2:	Synthesis from α -Diazocarbonyl Compounds	312
32.3.6.1.2.3	Method 3:	Cathodic Reduction of 1,2-Diarylethanediones in the Presence of <i>N</i> -Arylcarbonimidic Dichlorides	314
32.3.6.1.2.4	Method 4:	Synthesis from α -Hydroxy Ketones	314
32.3.6.1.2.5	Method 5:	Synthesis by the Intermediacy of Carbenes or Their Equivalents	315
32.3.6.1.2.6	Method 6:	Retro-Diels–Alder Reactions	317
32.3.6.1.2.7	Method 7:	Synthesis from 1,3-Dioxolanes	318
32.3.6.1.2.8	Method 8:	Modification of Other 1,3-Dioxoles	320
32.3.6.1.3	2,3-Dihydro-1,4-dioxins		321
32.3.6.1.3.1	Method 1:	Synthesis from α,β -Dicarbonyl Compounds	321
32.3.6.1.3.2	Method 2:	Cycloannulation	321
32.3.6.1.3.3	Method 3:	Cyclization of 2-(1,3-Dioxolan-2-yl)ethanols, Bis(2-hydroxyethyl) Ethers, or 2-(Propargyloxy)ethanols	322
32.3.6.1.3.4	Method 4:	Fragmentation and Concomitant Recyclization of a 2,2'-Bioxirane	323

32.3.6.1.3.5	Method 5:	Synthesis from 1,4-Dioxanes	323
32.3.6.1.3.6	Method 6:	Synthesis from Other 2,3-Dihydro-1,4-dioxins	325
32.3.6.2		Applications of Product Subclass 6	326
32.3.6.2.1	Method 1:	Cycloaddition Reactions	326
32.3.6.2.2	Method 2:	Reactions of Metal Complexes or Lithium Salts	328
32.3.6.2.3	Method 3:	Addition Reactions	329
32.3.6.2.4	Method 4:	Polymerization	331
32.3.7	Product Subclass 7: 1-(Organochalcogeno)-2-(organooxy)alkenes		
	B. List, C. Chandler, R. R. Torres, and A. Erkkilä		
<hr/>			
32.3.7	Product Subclass 7: 1-(Organochalcogeno)-2-(organooxy)alkenes		335
32.3.7.1	Synthesis of Product Subclass 7		335
32.3.7.1.1	Method 1:	Synthesis by Substitution	335
32.3.7.1.1.1	Variation 1:	Substitution of Haloalkenes	335
32.3.7.1.1.2	Variation 2:	Substitution of Sulfonylalkenes	336
32.3.7.1.1.3	Variation 3:	Synthesis from Alkylsulfanyl Ketones (Perkow-Type Reaction)	336
32.3.7.1.1.4	Variation 4:	Synthesis from Bis(dialkylsulfonium) Salts	337
32.3.7.1.2	Method 2:	Synthesis by O-Sulfonylation of Acyl Sulfonium Ylides	337
32.3.7.1.3	Method 3:	Synthesis by O-Acylation of α -Alkylsulfanyl Derivatives	337
32.3.7.1.3.1	Variation 1:	O-Acylation of α -Sulfonium Enones	337
32.3.7.1.3.2	Variation 2:	Synthesis from α -Sulfonyl Ketones	338
32.3.7.1.3.3	Variation 3:	Synthesis from Dihydrothiopyranones	338
32.3.7.1.3.4	Variation 4:	Synthesis from α -Oxosulfonium Aldehydes	338
32.3.7.1.4	Method 4:	Synthesis by O-Phosphorylation of α -Sulfanyl Enolates	338
32.3.7.1.5	Method 5:	Synthesis from α -Chloro Ketones	339
32.3.7.1.6	Method 6:	Synthesis from Alkynes	339
32.3.7.1.6.1	Variation 1:	Synthesis by Halotosyloxylation	339
32.3.7.1.6.2	Variation 2:	Addition of Alcohols to Alkynes	340
32.3.7.1.6.3	Variation 3:	Synthesis by Electrophilic Cyclization of Acetylenic Aldehydes	340
32.3.7.1.6.4	Variation 4:	Synthesis from Alkynylselenonium Salts	340
32.3.7.1.6.5	Variation 5:	Synthesis from Alkynyliodonium Salts	341
32.3.7.1.6.6	Variation 6:	Synthesis Using Dimethyl Sulfide Ditrifluoromethane-sulfonate	341
32.3.7.1.6.7	Variation 7:	Synthesis by Electrophilic–Nucleophilic Addition to Triple Bonds	342
32.3.7.1.6.8	Variation 8:	Synthesis by Addition of O-Sulfenyl Arenesulfonates to Alkynes	342
32.3.7.1.7	Method 7:	Synthesis from Allenes	343
32.3.7.1.7.1	Variation 1:	Synthesis by Nucleophilic Addition	343
32.3.7.1.7.2	Variation 2:	Synthesis by Inverse-Electron-Demand Diels–Alder Reaction	343
32.3.7.1.7.3	Variation 3:	Synthesis from Thioaldehydes	343
32.3.7.1.8	Method 8:	Synthesis from 1,2-Thiazetidine 1,1-Dioxide	344
32.3.7.1.9	Method 9:	Synthesis from 2-(Methylsulfanyl)benzoxazole	344
32.3.7.1.10	Method 10:	Synthesis by Double-Bond Migration	344
32.3.7.1.11	Method 11:	Synthesis by Chain Elongation	345
32.3.7.1.12	Method 12:	Synthesis by Cycloaddition	345

32.3.7.1.13	Method 13:	Synthesis from Methyl(dimethylamino)sulfoxonium Methylide and Acyl Chlorides	345
32.3.7.1.14	Method 14:	Synthesis from Allenyl Sulfones	346
32.3.7.1.15	Method 15:	Synthesis from α -Diazo Ketones	346
32.3.7.1.16	Method 16:	Synthesis from α -(Dioxidosulfanylidene) Ketones	346
32.3.7.1.17	Method 17:	Synthesis of 2,3-Dihydro-1,4-oxathiin	347
32.3.7.1.18	Method 18:	Synthesis by Thio- and Seleno-Lactonizations of Alkynoic Acids	347
32.3.7.1.19	Method 19:	Synthesis from (Phenyltellanyl)acetaldehyde Diethyl Acetal	347

32.3.8 Product Subclass 8: 1-Nitrogen-Functionalized 2-(Organooxy)alkenes

B. List, C. Chandler, R. R. Torres, and A. Erkkilä

32.3.8	Product Subclass 8: 1-Nitrogen-Functionalized 2-(Organooxy)alkenes	351	
32.3.8.1	Synthesis of Product Subclass 8	351	
32.3.8.1.1	Method 1:	Synthesis by Substitution of Diazonium Salts	351
32.3.8.1.2	Method 2:	Synthesis by Reduction of Arenes	351
32.3.8.1.3	Method 3:	Synthesis by Amino Enolate Alkylation	351
32.3.8.1.4	Method 4:	Synthesis by C—O Bond Formation	352
32.3.8.1.5	Method 5:	Synthesis by Rearrangement	353
32.3.8.1.6	Method 6:	Synthesis by Ring Opening of Oxazoles	353
32.3.8.1.7	Method 7:	Synthesis of Oxazol-2(3 <i>H</i>)-ones	353
32.3.8.1.7.1	Variation 1:	Synthesis from α -Amino Ketones	354
32.3.8.1.7.2	Variation 2:	Synthesis from α -Hydroxy Ketones	354
32.3.8.1.7.3	Variation 3:	Synthesis from 2-Oxoalkyl Dialkylcarbamates	354
32.3.8.1.7.4	Variation 4:	Synthesis by Intramolecular Cyclization	354
32.3.8.1.7.5	Variation 5:	Synthesis by Elimination of Hydrogen Chloride	355
32.3.8.1.7.6	Variation 6:	Synthesis by Elimination of Diphenylphosphine Oxide	355
32.3.8.1.7.7	Variation 7:	Synthesis by Curtius Rearrangement	356
32.3.8.1.7.8	Variation 8:	Synthesis from 2-(Allyloxy)oxazoles	356
32.3.8.1.8	Method 8:	Synthesis from Oximes	357
32.3.8.1.9	Method 9:	Synthesis by Intramolecular Cyclization	357
32.3.8.1.10	Method 10:	Synthesis by Elimination	358
32.3.8.1.11	Method 11:	Synthesis of 3-Hydroxypyridin-4(1 <i>H</i>)-ones	358
32.3.8.1.12	Method 12:	Synthesis from <i>tert</i> -Butyl Isocyanide	359

32.3.9 Product Subclass 9: 1-Phosphorus-Functionalized 2-(Organooxy)alkenes

B. List, C. Chandler, R. R. Torres, and A. Erkkilä

32.3.9	Product Subclass 9: 1-Phosphorus-Functionalized 2-(Organooxy)alkenes	361	
32.3.9.1	Synthesis of Product Subclass 9	361	
32.3.9.1.1	Method 1:	Phosphorylation of Alkynyl Ethers	361
32.3.9.1.2	Method 2:	Phosphorylation of Vinyl Ethers	361
32.3.9.1.3	Method 3:	Synthesis by O-Alkylation of α -Oxo Ylides	361
32.3.9.1.4	Method 4:	O-Phosphorylation of an α -Oxo Ylide	362
32.3.9.1.5	Method 5:	Cleavage of Cyclic Phosphonium Salts	362

32.3.9.1.6	Method 6:	Synthesis from Enol Ethers	362
32.3.9.1.7	Method 7:	Synthesis from 1,2-Bis(triorganophosphonio)ethene Dihalides	363
32.3.9.1.8	Method 8:	Synthesis from Alkynyl Ethers	363
32.3.9.1.8.1	Variation 1:	Addition of Alkyl- or Aryldichlorophosphines	363
32.3.9.1.8.2	Variation 2:	Addition of Trihalophosphines	363
32.3.10	Product Subclass 10: 1,2-Bis(sulfur-functionalized) Alkenes C. Chandler, R. R. Torres, A. Erkkilä, and B. List		
32.3.10	Product Subclass 10: 1,2-Bis(sulfur-functionalized) Alkenes 365		
32.3.10.1	Synthesis of Product Subclass 10 365		
32.3.10.1.1	Method 1:	Synthesis from Vinyl Sulfides	365
32.3.10.1.2	Method 2:	Synthesis by Reduction	365
32.3.10.1.3	Method 3:	Synthesis by Substitution of Ammonium Salts	365
32.3.10.1.4	Method 4:	Synthesis by Substitution of a Halogen	366
32.3.10.1.5	Method 5:	Synthesis from 3-Oxotetrahydrothiophene-2-carboxylates	366
32.3.10.1.6	Method 6:	Synthesis from Cyclopropanes	367
32.3.10.1.7	Method 7:	Synthesis from Cyclopropenes	367
32.3.10.1.8	Method 8:	Synthesis by Elimination of Hydrogen Bromide	367
32.3.10.1.9	Method 9:	Synthesis by Elimination of Water	368
32.3.10.1.10	Method 10:	Synthesis by Elimination of Thiols	368
32.3.10.1.11	Method 11:	Synthesis by Addition to Allenes	369
32.3.10.1.12	Method 12:	Synthesis by Addition to Alkynes	370
32.3.10.1.13	Method 13:	Synthesis from Alkynes and Carbon Disulfide	371
32.3.10.1.14	Method 14:	Synthesis by Carbene Dimerization	372
32.3.10.1.15	Method 15:	Synthesis by Double-Bond Migration	373
32.3.10.1.16	Method 16:	Synthesis by Rearrangement of 1,3-Dithiolane 1-Oxides	373
32.3.10.1.17	Method 17:	Synthesis by Rearrangement of 1,1-Bis(sulfonyl)ethenes	373
32.3.10.1.18	Method 18:	Synthesis from Dithiins	374
32.3.10.1.19	Method 19:	Synthesis with Retention of the Functional Group	377
32.3.10.1.19.1	Variation 1:	S-Alkylation	377
32.3.10.1.19.2	Variation 2:	Synthesis by Chain Elongation	377
32.3.10.1.19.3	Variation 3:	Ring Enlargement of Dithioles	378
32.3.10.1.19.4	Variation 4:	Nucleophilic Addition to Dithiolium Salts	378
32.3.11	Product Subclass 11: 1-Sulfur-Functionalized 2-(Organochalcogeno)alkenes C. Chandler, R. R. Torres, A. Erkkilä, and B. List		
32.3.11	Product Subclass 11: 1-Sulfur-Functionalized 2-(Organochalcogeno)alkenes 381		
32.3.11.1	Synthesis of Product Subclass 11 381		
32.3.11.1.1	Method 1:	Addition to Alkynyl Sulfones	381
32.3.11.1.2	Method 2:	Selenosulfonylation of Alkynes	382
32.3.11.1.3	Method 3:	Synthesis of Cyclic 1-Sulfanyl-2-tellanylethenes	383

32.3.12	Product Subclass 12: 1-Sulfur-Functionalized 2-Nitrogen-Functionalized Alkenes	
	C. Chandler, R. R. Torres, A. Erkkilä, and B. List	
<hr/>		
32.3.12	Product Subclass 12: 1-Sulfur-Functionalized 2-Nitrogen-Functionalized Alkenes	385
32.3.12.1	Synthesis of Product Subclass 12	385
32.3.12.1.1	Method 1: Synthesis from Enamines	385
32.3.12.1.2	Method 2: Synthesis from Vinyl Azides	387
32.3.12.1.3	Method 3: Synthesis from Imines and Derivatives	387
32.3.12.1.4	Method 4: Synthesis from β -Oxo Sulfoxides and Amines	388
32.3.12.1.5	Method 5: Synthesis by Substitution from Heteroatom-Substituted Alkenes	388
32.3.12.1.6	Method 6: Synthesis from Aldehydes and Tosylmethyl Isocyanide	390
32.3.12.1.7	Method 7: Synthesis from Ylides and Thiocyanogen	391
32.3.12.1.8	Method 8: Synthesis by Elimination of Hydrogen Chloride	391
32.3.12.1.9	Method 9: Synthesis by Elimination of Ethanethiol	391
32.3.12.1.10	Method 10: Synthesis by Aminomercuration of Alkynes	392
32.3.12.1.11	Method 11: Synthesis by Addition of Aziridines to Alk-1-ynyl Sulfoxides, Allenyl Sulfoxides, or Allenyl Sulfoxides	392
32.3.12.1.12	Method 12: Synthesis by Ring Opening of Azirines	393
32.3.12.1.13	Method 13: Synthesis from Sulfur Ylides and Nitriles	393
32.3.12.1.14	Method 14: Synthesis by Cycloaddition of α -Imino Thiones	394
32.3.12.1.15	Method 15: Synthesis by Rearrangement of Thietanes	394
32.3.12.1.16	Method 16: Synthesis by S-Oxidation	394
32.3.12.1.17	Method 17: Synthesis from Thiazolium Salts and Nucleophiles or Electrophiles	395
32.3.12.1.18	Method 18: Synthesis from Thiazines	396
32.3.12.1.19	Method 19: Synthesis by C-Imidoylation of Sulfoxides	396
32.3.13	Product Subclass 13: 1-Sulfur-Functionalized 2-Phosphorus-Functionalized Alkenes	
	C. Chandler, R. R. Torres, A. Erkkilä, and B. List	
<hr/>		
32.3.13	Product Subclass 13: 1-Sulfur-Functionalized 2-Phosphorus-Functionalized Alkenes	399
32.3.13.1	Synthesis of Product Subclass 13	399
32.3.13.1.1	Method 1: Synthesis by Substitution	399
32.3.13.1.1.1	Variation 1: Of Chloroalkenes	399
32.3.13.1.1.2	Variation 2: Of Vinyl Sulfoxides	399
32.3.13.1.1.3	Variation 3: Of Vinylphosphonium Salts	399
32.3.13.1.2	Method 2: Synthesis by Elimination	400
32.3.13.1.3	Method 3: Synthesis by Addition to Alkynes, Alkenes, or Allenes	400
32.3.13.1.4	Method 4: Synthesis by Cycloaddition	401
32.3.13.1.5	Method 5: Synthesis by Isomerization	402
32.3.13.1.6	Methods 6: Other Methods	402

32.3.14	Product Subclass 14: 1,2-Bis(nitrogen-functionalized) Alkenes	
	B. List, C. Chandler, R. R. Torres, and A. Erkkilä	
<hr/>		
32.3.14	Product Subclass 14: 1,2-Bis(nitrogen-functionalized) Alkenes	405
32.3.14.1	Synthesis of Product Subclass 14	405
32.3.14.1.1	Method 1: Synthesis of 1,2-Dinitroalkenes	405
32.3.14.1.2	Method 2: Synthesis of 1-Amino-2-nitroalkenes	405
32.3.14.1.2.1	Variation 1: Synthesis from Ortho Esters and Nitroalkanes	405
32.3.14.1.2.2	Variation 2: Synthesis from Imines	406
32.3.14.1.2.3	Variation 3: Synthesis from Carboxylic Acid Derivatives	406
32.3.14.1.2.4	Variation 4: Synthesis from 4-Nitrocyclobut-1-en-1-amines	407
32.3.14.1.2.5	Variation 5: Synthesis from Haloalkenes	407
32.3.14.1.2.6	Variation 6: Synthesis by Rearrangement	407
32.3.14.1.3	Method 3: Synthesis of 4-Nitro-1,2-dihydro-3H-pyrazol-3-ones	408
32.3.14.1.4	Method 4: Synthesis of 1,2-Bis(diazenyl)alkenes	408
32.3.14.1.5	Method 5: Synthesis of 1-Amino-2-diazenylalkenes	409
32.3.14.1.6	Method 6: Synthesis of Alkene-1,2-diamines	409
32.3.14.1.6.1	Variation 1: Synthesis from 1-Alkoxymethanediamines	409
32.3.14.1.6.2	Variation 2: Synthesis by Amine Elimination	410
32.3.14.1.6.3	Variation 3: Synthesis from α -Halo or α -Dialkylamino Aldehydes	410
32.3.14.1.6.4	Variation 4: Synthesis from 1-Amino-2-haloalkenes	410
32.3.14.1.6.5	Variation 5: Synthesis from 1,2-Diols	411
32.3.14.1.6.6	Variation 6: Synthesis from Cyclopropenium Ion Derivatives	411
32.3.14.1.7	Method 7: Synthesis of Dihydroimidazoles	412
32.3.14.1.8	Method 8: Synthesis of 1,4-Dihydropyrazines	414
32.3.14.1.9	Method 9: Synthesis of Tetrahydropyrazines	414
32.3.14.1.10	Method 10: Synthesis of 4,5,6,7-Tetrahydro-1H-1,4-diazepines	416
32.3.14.1.11	Method 11: Synthesis of 1,2,4-Triazines	416
32.3.14.1.12	Method 12: Synthesis of 1,2-Diazidoalkenes	417
32.3.15	Product Subclass 15: 1-Nitrogen-Functionalized 2-Phosphorus-Functionalized Alkenes	
	B. List, C. Chandler, R. R. Torres, and A. Erkkilä	
<hr/>		
32.3.15	Product Subclass 15: 1-Nitrogen-Functionalized 2-Phosphorus-Functionalized Alkenes	421
32.3.15.1	Synthesis of Product Subclass 15	421
32.3.15.1.1	Method 1: Synthesis by Substitution	421
32.3.15.1.1.1	Variation 1: Substitution of Chloroalkenes	421
32.3.15.1.1.2	Variation 2: Substitution of Bromoalkenes	421
32.3.15.1.1.3	Variation 3: Substitution of Alkylphosphonium Salts	421
32.3.15.1.2	Method 2: Synthesis from Phosphorus Ylides	421
32.3.15.1.3	Method 3: Condensation of β -Oxo Phosphonium Salts with Amines	422
32.3.15.1.4	Method 4: Synthesis by Addition to Phosphorus-Functionalized Alkynes	422
32.3.15.1.5	Method 5: Synthesis of 1-(Isothiocyanato/isocyanato)-2-(difluoro-phosphoryl)alkenes	424

32.3.16	Product Subclass 16: 1,2-Bis(phosphorus-functionalized) Alkenes B. List, C. Chandler, R. R. Torres, and A. Erkkilä	
<hr/>		
32.3.16	Product Subclass 16: 1,2-Bis(phosphorus-functionalized) Alkenes	427
32.3.16.1	Synthesis of Product Subclass 16	427
32.3.16.1.1	Method 1: Substitution of Chloroalkenes	427
32.3.16.1.2	Method 2: Synthesis from Acyl Halides	427
32.3.16.1.3	Method 3: Addition to Alkynes	427
32.3.16.1.4	Method 4: Synthesis from 2,3-Dihydro-1 <i>H</i> -1,3,2-diphosphasiloles	429
32.4	Product Class 4: Haloalkenes A. Pollex	
<hr/>		
32.4	Product Class 4: Haloalkenes	431
32.4.1	Product Subclass 1: Fluoroalkenes	431
32.4.1.1	Synthesis of Product Subclass 1	432
32.4.1.1.1	Synthesis from Organometallic Compounds	432
32.4.1.1.1.1	Method 1: Synthesis from Vinylstannanes	433
32.4.1.1.1.1.1	Variation 1: Fluorodestannylation with Xenon Difluoride	433
32.4.1.1.1.1.2	Variation 2: Fluorodestannylation with Cesium Fluoroxysulfate	435
32.4.1.1.1.1.3	Variation 3: Fluorodestannylation with Selectfluor	435
32.4.1.1.1.2	Method 2: Synthesis from Vinylborates	435
32.4.1.1.1.3	Method 3: Synthesis from Vinylolithiums	436
32.4.1.1.2	Synthesis from Alkanes	436
32.4.1.1.2.1	Method 1: Dehydrohalogenation	437
32.4.1.1.2.1.1	Variation 1: Dehydrofluorination	437
32.4.1.1.2.1.2	Variation 2: Dehydrohalogenation	439
32.4.1.1.2.2	Method 2: Reductive Dehalogenation Using Reducing Metals or Hydrogen	439
32.4.1.1.2.3	Method 3: Dehalogenation with Phosphites and Phosphines	442
32.4.1.1.2.4	Method 4: Thermal <i>syn</i> Elimination	442
32.4.1.1.3	Synthesis from Alkenes	443
32.4.1.1.3.1	Method 1: Addition/Elimination Reactions	443
32.4.1.1.3.1.1	Variation 1: Using <i>N</i> -Fluorobis(trifluoromethane)sulfonimide	443
32.4.1.1.3.1.2	Variation 2: Using Trifluoromethyl Hypofluorite	443
32.4.1.1.3.1.3	Variation 3: Using Acetyl Hypofluoride	444
32.4.1.1.3.2	Method 2: Dihalocarbene Addition and Subsequent Ring Opening	444
32.4.1.1.3.2.1	Variation 1: Formation of α -Fluoro α,β -Unsaturated Carbonyl Compounds or Acetals	444
32.4.1.1.3.2.2	Variation 2: Formation of Simple Fluoroalkenes	445
32.4.1.1.3.2.3	Variation 3: Formation of Conjugated Fluorodienes	446
32.4.1.1.4	Synthesis from Aldehydes and Ketones	447
32.4.1.1.4.1	Method 1: Alkenation Reactions	447
32.4.1.1.4.1.1	Variation 1: Wittig Alkenation	447

32.4.1.1.4.1.2	Variation 2:	Horner–Wadsworth–Emmons Alkenation	448
32.4.1.1.4.1.3	Variation 3:	Julia Alkenation	449
32.4.1.1.4.1.4	Variation 4:	Miscellaneous Alkenations	450
32.4.1.1.4.2	Method 2:	Substitution of Oxygen in Carbonyl Compounds	450
32.4.1.1.5		Synthesis from Carboxylic Acids and Their Derivatives	450
32.4.1.1.5.1	Method 1:	Wittig Alkenation	451
32.4.1.1.5.2	Method 2:	Horner–Wadsworth–Emmons Alkenation	451
32.4.1.1.6		Synthesis from Alkynes and Allenes	452
32.4.1.1.6.1	Method 1:	Addition of Hydrogen Fluoride to Alkynes	452
32.4.1.1.6.2	Method 2:	Addition of Halogen Fluorides to Alkynes	453
32.4.1.1.6.3	Method 3:	Formal Addition of Benzenesulfonyl Fluoride to Alkynes	454
32.4.1.1.6.4	Method 4:	Formal Addition of Benzeneselenenyl Fluoride to Alkynes	454
32.4.1.1.6.5	Method 5:	Addition to Allenes	455
32.4.1.1.7		Modifications of Compounds Already Containing a Fluorovinyl Substituent	455
32.4.1.1.7.1	Method 1:	Cross-Coupling Reactions	456
32.4.1.1.7.1.1	Variation 1:	Suzuki–Miyaura Cross Coupling	456
32.4.1.1.7.1.2	Variation 2:	Stille Cross Coupling	456
32.4.1.1.7.1.3	Variation 3:	Negishi Cross Coupling	458
32.4.1.1.7.1.4	Variation 4:	Sonogashira Cross Coupling	459
32.4.1.1.7.2	Method 2:	Functional-Group Exchange	459
32.4.1.1.7.2.1	Variation 1:	Dehalogenation	459
32.4.1.1.7.2.2	Variation 2:	Hydrodefluorination with Trialkylphosphines	460
32.4.1.1.7.2.3	Variation 3:	Iododefluorination with Trialkylphosphines	460
32.4.1.1.7.2.4	Variation 4:	Hydrodestannylation	460
32.4.1.1.7.3	Method 3:	Allylic Substitution with <i>N,N</i> -Diethylaminosulfur Trifluoride	461
32.4.1.1.7.4	Method 4:	Isomerization	461
32.4.1.1.7.5	Method 5:	Rearrangement	461
32.4.2		Product Subclass 2: Chloro-, Bromo-, and Iodoalkenes	462
32.4.2.1		Synthesis of Product Subclass 2	463
32.4.2.1.1		Synthesis from Organometallic Compounds	463
32.4.2.1.1.1	Method 1:	Synthesis from Vinylstannanes	464
32.4.2.1.1.2	Method 2:	Stepwise Replacement of Zirconium or Tin	467
32.4.2.1.1.3	Method 3:	Synthesis from Vinylsilanes	468
32.4.2.1.1.4	Method 4:	Synthesis from Vinylaluminum Compounds	470
32.4.2.1.1.5	Method 5:	Synthesis from Vinylborates	471
32.4.2.1.1.6	Method 6:	Synthesis from Vinylzirconium Compounds	473
32.4.2.1.1.7	Method 7:	Synthesis from Vinylmagnesium Compounds	474
32.4.2.1.2		Synthesis from Alkanes	475
32.4.2.1.2.1	Method 1:	Dehydrohalogenation	475
32.4.2.1.2.1.1	Variation 1:	Under Basic Conditions	475
32.4.2.1.2.1.2	Variation 2:	Under Thermal Conditions	477
32.4.2.1.2.2	Method 2:	Electroreduction	477
32.4.2.1.2.3	Method 3:	Dehalogenation with Reducing Metals	478
32.4.2.1.2.4	Method 4:	Dehalogenation with Phosphites and Phosphines	479
32.4.2.1.2.5	Method 5:	Thermal <i>syn</i> Elimination	479

32.4.2.1.3	Synthesis from Alkenes	480
32.4.2.1.3.1	Method 1: C-Halogenation	480
32.4.2.1.3.2	Method 2: Dihalocarbene Addition and Subsequent Ring Opening	480
32.4.2.1.3.2.1	Variation 1: Formation of Haloalkenes	480
32.4.2.1.3.2.2	Variation 2: Formation of α -Halo α,β -Unsaturated Carbonyl Compounds	481
32.4.2.1.3.2.3	Variation 3: Formation of Conjugated Halodienes	482
32.4.2.1.4	Synthesis from Halocarbenes	482
32.4.2.1.5	Synthesis from Aldehydes and Ketones	483
32.4.2.1.5.1	Method 1: Wittig Alkenation	483
32.4.2.1.5.1.1	Variation 1: Formation of Chloroalkenes	483
32.4.2.1.5.1.2	Variation 2: Formation of Bromoalkenes	483
32.4.2.1.5.1.3	Variation 3: Formation of Iodoalkenes	485
32.4.2.1.5.1.4	Variation 4: Formation of α -Halo α,β -Unsaturated Esters	486
32.4.2.1.5.2	Method 2: Horner–Wadsworth–Emmons Alkenation	486
32.4.2.1.5.3	Method 3: Takai Alkenation	488
32.4.2.1.5.4	Method 4: Halo-Julia Alkenation	490
32.4.2.1.5.5	Method 5: Chromium(II)- and Iron(0)-Mediated Alkenation	490
32.4.2.1.5.6	Method 6: Morita–Baylis–Hillmann Addition	491
32.4.2.1.5.7	Method 7: Vilsmeier Haloformylation	491
32.4.2.1.5.8	Method 8: Substitution of Oxygen in Carbonyl Compounds	492
32.4.2.1.5.8.1	Variation 1: Using Phosphorus Pentachloride	492
32.4.2.1.5.8.2	Variation 2: Via Vinyl Trifluoromethanesulfonates	492
32.4.2.1.5.8.3	Variation 3: Via Vinyl Phosphates	493
32.4.2.1.5.8.4	Variation 4: Reaction of Enolizable Aldehydes with 2-Chlorobenzoxazolium Salts	493
32.4.2.1.5.9	Method 9: Allylborination	494
32.4.2.1.6	Synthesis from Carboxylic Acids and Derivatives	494
32.4.2.1.6.1	Method 1: The Hunsdiecker Reaction	494
32.4.2.1.6.2	Method 2: Wittig Alkenation	495
32.4.2.1.7	Synthesis from Alkynes and Allenes	495
32.4.2.1.7.1	Method 1: Hydrohalogenation of Alkynes	496
32.4.2.1.7.1.1	Variation 1: Addition of Halogen Acids	496
32.4.2.1.7.1.2	Variation 2: Hydrohalogenation with Alkali Metal Halides	496
32.4.2.1.7.2	Method 2: Halogenation of Alkynes	498
32.4.2.1.7.3	Method 3: Addition of a Halogen and a Heteroatom	500
32.4.2.1.7.3.1	Variation 1: Addition of Halogen and Nitrogen	500
32.4.2.1.7.3.2	Variation 2: Addition of Halogen and Oxygen	500
32.4.2.1.7.3.3	Variation 3: Addition of Halogen and Sulfur or Selenium	501
32.4.2.1.7.4	Method 4: Transformations of Haloalkynes	501
32.4.2.1.7.4.1	Variation 1: Using Boranes	501
32.4.2.1.7.4.2	Variation 2: Using Lithium Aluminum Hydride	502
32.4.2.1.7.4.3	Variation 3: Using Diimides	502
32.4.2.1.7.5	Method 5: Alkene–Alkyne Coupling	502
32.4.2.1.7.6	Method 6: Iodocyclization of Alkynes	504
32.4.2.1.7.7	Method 7: Hydrohalogenation of Allenes	504

32.4.2.1.7.8	Method 8:	Halogenation of Allenes	505
32.4.2.1.7.9	Method 9:	Addition of Halogen and Oxygen to Allenes	505
32.4.2.1.7.9.1	Variation 1:	Halohydroxylation	505
32.4.2.1.7.9.2	Variation 2:	Haloacetylation	506
32.4.2.1.7.10	Method 10:	S _N 2' Reactions of Allenols	506
32.4.2.1.8	Modification of Compounds Already Containing a Halogenated Alkenyl Function		507
32.4.2.1.8.1	Method 1:	Cross-Coupling Reactions	507
32.4.2.1.8.1.1	Variation 1:	Suzuki–Miyaura Cross Coupling	507
32.4.2.1.8.1.2	Variation 2:	Stille Cross Coupling	509
32.4.2.1.8.1.3	Variation 3:	Negishi Cross Coupling	511
32.4.2.1.8.1.4	Variation 4:	Sonogashira Cross Coupling	512
32.4.2.1.8.1.5	Variation 5:	Kumada Cross Coupling	512
32.4.2.1.8.2	Method 2:	Carbonyl Addition of Vinylithium Reagents	513
32.4.2.1.8.3	Method 3:	Substitution of Halogens by Other Nucleophiles	514
32.4.2.1.8.4	Method 4:	Halodemetalation	515
32.4.2.1.8.4.1	Variation 1:	Halodestannylation or Halodeboration	515
32.4.2.1.8.5	Method 5:	Dehalogenation	516
32.4.2.1.8.5.1	Variation 1:	Using Lithium Aluminum Hydride	516
32.4.2.1.8.5.2	Variation 2:	Using Reducing Metals	516
32.4.2.1.8.5.3	Variation 3:	Via Stannanes	517
32.4.2.1.8.5.4	Variation 4:	Using Organolithiums	517
32.4.2.1.8.5.5	Variation 5:	Using Diethyl Phosphonates	518
32.4.2.1.8.6	Method 6:	Ring Opening of 1,2-Dihalocyclopropenes	518

32.5 Product Class 5: (Organooxy)alkenes

32.5.1 Product Subclass 1: Enols

D. Trauner

32.5.1	Product Subclass 1: Enols		533
32.5.1.1	Synthesis of Product Subclass 1		535
32.5.1.1.1	Method 1:	Equilibration from the Corresponding Carbonyl Form	535
32.5.1.1.2	Method 2:	Transition-Metal-Catalyzed Isomerization of Allylic Alcohols	536
32.5.1.1.3	Method 3:	Photochemical Cleavage	536
32.5.1.1.4	Method 4:	Mild Hydrolysis of Enol Ketene Acetals or Enol Ortho Esters	536
32.5.1.1.5	Method 5:	Sigmatropic Rearrangements	537
32.5.1.2	Applications of Product Subclass 1 in Organic Synthesis		537
32.5.1.2.1	Method 1:	Deprotonation and Subsequent Reaction as an Enolate	537
32.5.1.2.2	Method 2:	O-Alkylation and O-Silylation under Neutral Conditions	538
32.5.1.2.3	Method 3:	Hydrogenation	539
32.5.1.2.4	Method 4:	Reaction with Carbon Electrophiles under Neutral or Acidic Conditions	540
32.5.1.2.5	Method 5:	Reaction with Nitrogen Electrophiles	541

32.5.1.2.6	Method 6:	Reaction with Oxygen Electrophiles	541
32.5.1.2.7	Method 7:	Reaction with Sulfur and Selenium Electrophiles	542
32.5.1.2.8	Method 8:	Reaction with Electrophilic Halide Reagents	543
32.5.1.2.9	Method 9:	Photochemical Cycloadditions	543
32.5.1.2.10	Method 10:	Oxidative Cyclizations	544

32.5.2 Product Subclass 2: Enolates

D. Trauner

32.5.2	Product Subclass 2: Enolates	547
32.5.2.1	Synthesis of Product Subclass 2	548
32.5.2.1.1	Method 1: Synthesis by Deprotonation	549
32.5.2.1.1.1	Variation 1: Kinetic Deprotonation of a Ketone	549
32.5.2.1.1.2	Variation 2: Deprotonation under Thermodynamic Conditions	551
32.5.2.1.1.3	Variation 3: Double Deprotonation of a 1,4-Dicarbonyl Compound	552
32.5.2.1.1.4	Variation 4: Enantioselective Deprotonation of Symmetrical Ketones	553
32.5.2.1.1.5	Variation 5: Deprotonation with Organozinc Compounds	554
32.5.2.1.2	Method 2: Synthesis by Cleavage of Enol Esters and Ethers	555
32.5.2.1.2.1	Variation 1: Cleavage of Enol Esters	556
32.5.2.1.2.2	Variation 2: Cleavage of Enol Ethers	556
32.5.2.1.2.3	Variation 3: Cleavage of Silyl Enol Ethers	556
32.5.2.1.3	Method 3: Synthesis by Reduction of α -Halocarbonyl and Related Compounds	557
32.5.2.1.4	Method 4: Synthesis by Conjugate Reduction	558
32.5.2.1.5	Method 5: Synthesis by Conjugate Addition	560
32.5.2.1.6	Method 6: Synthesis by Nucleophilic Addition to Ketenes	561
32.5.2.1.7	Method 7: Synthesis by Base-Induced Rearrangement of Epoxides	562
32.5.2.1.8	Method 8: Synthesis by Anionic Oxy-Cope Rearrangement	563
32.5.2.1.9	Method 9: Synthesis by Rearrangement of Allylic Alkoxides	565
32.5.2.2	Applications of Product Subclass 2 in Organic Synthesis	565
32.5.2.2.1	Method 1: Transmetalation To Form Transition Metal Enolates and Zinc Enolates	566
32.5.2.2.1.1	Variation 1: Transmetalation with Organotitanium or Organozirconium Complexes	566
32.5.2.2.1.2	Variation 2: Transmetalation with Nickel(II) or Palladium(II) Complexes	567
32.5.2.2.1.3	Variation 3: Transmetalation with Magnesium, Titanium, Manganese, or Zinc Salts	569
32.5.2.2.2	Method 2: Formation of Boron Enolates	569
32.5.2.2.3	Method 3: O-Alkylation and O-Acylation To Form Enol Ethers and Enol Esters	570
32.5.2.2.4	Method 4: Formation of Silyl Enol Ethers and Tin Enolates	571
32.5.2.2.5	Method 5: Reaction with S-Electrophiles: Formation of Enol Trifluoromethanesulfonates	572
32.5.2.2.6	Method 6: Protonation and Deuteration of Enolates	573
32.5.2.2.7	Method 7: Reaction on the C-Terminus with C-Electrophiles	575
32.5.2.2.7.1	Variation 1: Alkylation	575

32.5.2.2.7.2	Variation 2:	Aldol Addition	577
32.5.2.2.7.3	Variation 3:	Acylation (Claisen Condensation)	579
32.5.2.2.8	Method 8:	Reaction of Enolates on the C-Terminus with Electrophilic Heteroatom Species	580
32.5.2.2.8.1	Variation 1:	Reaction with Electrophilic Nitrogen Species	580
32.5.2.2.8.2	Variation 2:	Reaction with Electrophilic Oxygen Species	581
32.5.2.2.8.3	Variation 3:	Reaction with Electrophilic Sulfur and Selenium Species	582
32.5.2.2.8.4	Variation 4:	Reaction with Electrophilic Halogen Species	583
32.5.2.2.9	Method 9:	Oxidative Dimerization of Enolates and Related Oxidative Couplings	584

32.5.3 Product Subclass 3: Enol Ethers

V. Milata, S. Rádl, and S. Voltrová

32.5.3	Product Subclass 3: Enol Ethers	589
32.5.3.1	Synthesis of Product Subclass 3	590
32.5.3.1.1	Formation of an O—R ¹ Bond (Alkylation of the Oxygen Atom)	590
32.5.3.1.1.1	Method 1: Alkylation of Carbonyl Compounds	590
32.5.3.1.1.1.1	Variation 1: Reactions of Enolates with Alkylating Agents	591
32.5.3.1.1.1.2	Variation 2: Reactions of Enolates with Diazoalkanes	592
32.5.3.1.1.1.3	Variation 3: Reaction of Ketones with Ethyl Diazoacetate	592
32.5.3.1.1.2	Method 2: Alkylation of Silyl Ethers	593
32.5.3.1.2	Formation of the α -C—O Bond	594
32.5.3.1.2.1	Method 1: Reaction of Vinyl Halides or Activated Vinyl Derivatives with Alcohols or Phenols	595
32.5.3.1.2.1.1	Variation 1: Nucleophilic Displacement	595
32.5.3.1.2.1.2	Variation 2: Copper-Catalyzed C—O Bond-Forming Reactions	598
32.5.3.1.2.1.3	Variation 3: Palladium-Catalyzed C—O Bond-Forming Reactions	602
32.5.3.1.2.1.4	Variation 4: Reaction of Perfluorovinyl Fluorides with Alcohols or Phenols	604
32.5.3.1.2.2	Method 2: Addition to Alkynes	605
32.5.3.1.2.2.1	Variation 1: Addition of Alcohols to Alkynes	605
32.5.3.1.2.2.2	Variation 2: <i>cis</i> Addition of Alcohols to Alkynones and Alkynoic Acid Derivatives	607
32.5.3.1.2.2.3	Variation 3: <i>trans</i> Addition of Alcohols to Alkynones and Alkynoic Acid Derivatives	608
32.5.3.1.2.2.4	Variation 4: Addition of Carbonyl Compounds to Alkynones and Alkynoic Acid Derivatives	610
32.5.3.1.2.2.5	Variation 5: Addition to Alkynes with Formation of Cyclic Enol Ethers	612
32.5.3.1.2.3	Method 3: Addition to Allenes or Methylenecyclopropanes	613
32.5.3.1.2.3.1	Variation 1: Addition to Sulfonyl-Stabilized Allenes	614
32.5.3.1.2.3.2	Variation 2: Reactions Involving Phosphorus-Based Anion-Stabilizing Groups	615
32.5.3.1.2.3.3	Variation 3: Photochemically Induced Reactions of Allenes Involving the Addition of an Alcohol	617
32.5.3.1.2.3.4	Variation 4: Palladium-Catalyzed Cascade Reaction of 4-(Alkoxy-carbonyloxy)but-2-yn-1-ols with Phenols	618

32.5.3.1.2.3.5	Variation 5:	Addition of Methanol to a Methylene-cyclopropane System	619
32.5.3.1.2.4	Method 4:	Alkoxide-Mediated Ring-Opening Reactions	620
32.5.3.1.2.4.1	Variation 1:	Ring Opening of 1-Phenylthiophenium Salts	620
32.5.3.1.2.4.2	Variation 2:	Ring Opening of Isothiazole 1,1-Dioxides	621
32.5.3.1.2.5	Method 5:	Transesterification of Vinyl Ethers	622
32.5.3.1.2.5.1	Variation 1:	Catalysis with Mercury(II) Salts	622
32.5.3.1.2.5.2	Variation 2:	Catalysis with Palladium Compounds	625
32.5.3.1.2.6	Method 6:	Transfer of a Vinyl Group from a Vinyl Ester	630
32.5.3.1.3		Substitution at the α -Carbon Atom	631
32.5.3.1.3.1	Method 1:	The Heck Reaction	631
32.5.3.1.3.2	Method 2:	Transition-Metal-Mediated Cross-Coupling Reactions	635
32.5.3.1.3.2.1	Variation 1:	The Stille Reaction	635
32.5.3.1.3.2.2	Variation 2:	Suzuki and Negishi Coupling Reactions	638
32.5.3.1.3.2.3	Variation 3:	Sonogashira Coupling	643
32.5.3.1.3.3	Method 3:	Treatment of α -Metalated Vinyl Ethers with Electrophiles	644
32.5.3.1.3.4	Methods 4:	Other Methods	647
32.5.3.1.4		Formation of the C=C Bond by Condensation Reactions	648
32.5.3.1.4.1	Method 1:	Condensation of Aldehydes, Ketones, or Ortho Esters with Acidic Methylene Derivatives	648
32.5.3.1.4.1.1	Variation 1:	Condensation Reactions of Aldehydes or Ketones with Acidic Methylene Derivatives	648
32.5.3.1.4.1.2	Variation 2:	Condensation Reactions of Esters or Ortho Esters with Acidic Methylene Derivatives	649
32.5.3.1.4.1.3	Variation 3:	Condensation Reactions of Silyl Ethers with Acidic Methylene Derivatives (Peterson Alkenation)	652
32.5.3.1.4.2	Method 2:	Condensation of Carbonyl Compounds with Organophosphorus Reagents	653
32.5.3.1.4.2.1	Variation 1:	Condensation of Esters with Organophosphorus Reagents (Wittig-like Reaction)	654
32.5.3.1.4.2.2	Variation 2:	Condensation of Aldehydes or Ketones with Organophosphorus Reagents (Wittig Reaction)	657
32.5.3.1.4.2.3	Variation 3:	Modifications of the Wittig Reaction	658
32.5.3.1.4.3	Method 3:	Reductive Coupling of Ketones with Esters in the Presence of Titanium Complexes (The McMurry Coupling)	661
32.5.3.1.4.4	Method 4:	Alkylidenation of Esters with Alkylidene Complexes of Titanium	661
32.5.3.1.4.4.1	Variation 1:	With Tebbe's Reagent	661
32.5.3.1.4.4.2	Variation 2:	With the Petasis Reagent	665
32.5.3.1.4.4.3	Variation 3:	With the Takeda Reagents	670
32.5.3.1.4.4.4	Variation 4:	With the Takai Reagent	677
32.5.3.1.4.4.5	Variation 5:	With the Grubbs Reagents	679
32.5.3.1.4.5	Method 5:	Reaction of Fischer Carbene Complexes with Acetylenes	683
32.5.3.1.5		Formation of the C=C Bond through Elimination	687
32.5.3.1.5.1	Method 1:	Elimination of Alcohols from Acetals	687
32.5.3.1.5.1.1	Variation 1:	Acid-Catalyzed Eliminations	687

32.5.3.1.5.1.2	Variation 2:	Eliminations Using Combinations of Bases and Silyl Halides or Silyl Trifluoromethanesulfonates	688
32.5.3.1.5.1.3	Variation 3:	Base-Catalyzed Elimination Reactions	693
32.5.3.1.5.1.4	Variation 4:	Titanium(IV) Chloride Promoted Formation of Enol Ethers	694
32.5.3.1.5.1.5	Variations 5:	Miscellaneous Alcohol Elimination Reactions	695
32.5.3.1.5.2	Method 2:	Elimination of Hydrogen Halides from Halo Ethers	696
32.5.3.1.5.3	Method 3:	Elimination Reactions of Sulfoxides, Sulfones, or Selenoxides	700
32.5.3.1.5.4	Method 4:	Dehydration of α -Alkoxy β -Hydroxy Esters	702
32.5.3.1.5.5	Method 5:	Elimination of Nitrogen from 3-Alkoxydihydropyrazoles	703
32.5.3.1.5.6	Methods 6:	Miscellaneous Elimination Reactions	704
32.5.3.1.6		Formation of the C=C Bond through Isomerization	705
32.5.3.1.6.1	Method 1:	Base-Induced Isomerization	705
32.5.3.1.6.2	Method 2:	Isomerizations Involving Metalated Carbanionic Intermediates	706
32.5.3.1.6.3	Method 3:	Metal-Complex-Catalyzed Isomerizations	707
32.5.3.1.6.3.1	Variation 1:	Using Rhodium and Palladium Complexes	707
32.5.3.1.6.3.2	Variation 2:	Using Iron Complexes	708
32.5.3.1.6.4	Method 4:	Ring-Closing Metathesis Followed by Isomerization	709
32.5.3.1.6.4.1	Variation 1:	Activation of the Ring-Closing-Metathesis Catalyst by Hydrogen	709
32.5.3.1.6.4.2	Variation 2:	Activation of the Ring-Closing-Metathesis Catalyst by Addition of Inorganic Hydrides	710
32.5.3.1.6.4.3	Variation 3:	Activation of the Ring-Closing-Metathesis Catalyst by Addition of Ethyl Vinyl Ether	711
32.5.3.1.6.5	Method 5:	Oxidative Isomerizations	712
32.5.3.1.7		Formation of the C=C Bond by Reduction	713
32.5.3.1.7.1	Method 1:	Partial Reduction of Phenyl Ethers	713
32.5.3.1.7.2	Method 2:	Reduction of Alkynyl Ethers	713
32.5.3.1.8		Substitution of the β -Carbon	717
32.5.3.1.8.1	Method 1:	Palladium-Catalyzed Coupling Reactions	717
32.5.3.1.8.1.1	Variation 1:	Heck Arylations	717
32.5.3.1.8.1.2	Variation 2:	Stille Coupling Reactions	721
32.5.3.1.8.1.3	Variation 3:	Suzuki and Negishi Couplings	721
32.5.3.1.8.1.4	Variation 4:	Sonogashira Couplings	724
32.5.3.1.8.1.5	Variation 5:	Nazarov Reaction	725
32.5.3.1.8.2	Method 2:	Ruthenium-Catalyzed Cross-Enyne Metathesis	728
32.5.3.1.8.3	Method 3:	Trifluoroacetylation of Vinyl Ethers	729
32.5.3.1.8.4	Method 4:	Friedel-Crafts Reaction of Enol Ethers	729
32.5.3.1.8.5	Method 5:	Reaction of β -Alkenyllithiums with Aldehydes	730
32.5.3.1.9		Rearrangements Leading to Enol Ethers	731
32.5.3.1.9.1	Method 1:	[3,3]-Sigmatropic Rearrangements	731
32.5.3.1.9.2	Method 2:	Ring-Opening Reactions	731
32.5.3.1.9.3	Method 3:	Ring-Expansion Reactions	733
32.5.3.1.10		Concerted Formation of More Than One Bond	735
32.5.3.1.10.1	Method 1:	Intermolecular Hetero-Diels-Alder Reactions	735

32.5.3.1.10.1.1	Variation 1:	Reaction of Dienophiles with Propenal, Alkylpropenals, or Methyl Vinyl Ketone	735
32.5.3.1.10.1.2	Variation 2:	Reaction of Dienophiles with Substituted 2-Oxobut-3-enoic Acid Esters	737
32.5.3.1.10.1.3	Variation 3:	Reaction of Dienophiles with 2-Methylene 1,3-Diketones or 2-Benzoacrylonitriles	739
32.5.3.1.10.1.4	Variation 4:	Treatment of Dienophiles with Phosphonoheterodienes	741
32.5.3.1.10.1.5	Variation 5:	Reaction of Dienophiles with α -Sulfanyl, α -Sulfinyl, or α -Sulfonyl Heterodienes	742
32.5.3.1.10.1.6	Variation 6:	Reaction of Dienophiles with α -Trifluoromethyl Heterodienes	744
32.5.3.1.10.2	Method 2:	Intramolecular Hetero-Diels–Alder Reactions	745
32.5.3.1.11	Miscellaneous Methods		746
32.5.3.1.11.1	Method 1:	Retro-Nazarov Reaction	746

32.5.4 Product Subclass 4: Ene–OX Compounds (X = O, S, Se, Te)

G. Sartori and R. Maggi

32.5.4	Product Subclass 4: Ene–OX Compounds (X = O, S, Se, Te)	757
32.5.4.1	Synthesis of Product Subclass 4	757
32.5.4.1.1	Method 1: Enolate Tosylation	757
32.5.4.1.2	Method 2: Addition to Alkynes	758
32.5.4.1.2.1	Variation 1: Halotosyloxylation of Alkynes	758
32.5.4.1.2.2	Variation 2: Selenotosyloxylation of Alkynes	759
32.5.4.1.3	Method 3: Dehydrofluorination of Polyfluoropropyl 4-Toluenesulfonates	760
32.5.4.1.4	Method 4: Substituent Modification of Polyfluoro-1-(tosyloxy)-prop-1-enes	760
32.5.4.1.5	Method 5: Enolate Trifluoromethylsulfonylation by Trifluoromethanesulfonic Anhydride	761
32.5.4.1.6	Method 6: Enolate Trifluoromethylsulfonylation by <i>N</i> -Aryl Trifluoromethanesulfonimides	766
32.5.4.1.7	Method 7: Enolate Trifluoromethylsulfonylation by <i>N</i> -Phenylbis(trifluoromethane)sulfonimide	771
32.5.4.1.8	Method 8: Enolate Perfluoroalkylsulfonylation	774
32.5.4.1.9	Methods 9: Miscellaneous Reactions	777

32.5.5 Product Subclass 5: Ene–ON Compounds

G. Sartori and R. Maggi

32.5.5	Product Subclass 5: Ene–ON Compounds	783
32.5.5.1	Synthesis of Product Subclass 5	783
32.5.5.1.1	Method 1: Cycloaddition Reactions	783
32.5.5.1.1.1	Variation 1: 1,3-Dipolar Cycloaddition of Nitrones to Electron-Deficient Allenes	783
32.5.5.1.1.2	Variation 2: Addition of Hydroxylamines to Electron-Deficient Allenes	785
32.5.5.1.1.3	Variation 3: Cycloaddition of Nitrones to Acetylenic Compounds	787

32.5.5.1.1.4	Variation 4:	Cyclization of <i>N</i> -Propargylhydroxylamines	789
32.5.5.1.2	Method 2:	Addition of Oximes to Acetylene	790
32.5.6	Product Subclass 6: Ene–OP Compounds		
	G. Sartori and R. Maggi		
<hr/>			
32.5.6	Product Subclass 6: Ene–OP Compounds		795
32.5.6.1	Synthesis of Product Subclass 6		795
32.5.6.1.1	Method 1:	Enolate Phosphorylation	795
32.5.6.1.1.1	Variation 1:	Synthesis from Aldehydes	795
32.5.6.1.1.2	Variation 2:	Synthesis from Ketones	797
32.5.6.1.1.3	Variation 3:	Synthesis from Imides	802
32.5.6.1.2	Method 2:	Addition of Nucleophilic Reagents to Alkynes	803
32.5.6.1.2.1	Variation 1:	Addition to Terminal Alkynes	803
32.5.6.1.2.2	Variation 2:	Addition to Internal Alkynes	805
32.5.6.1.3	Method 3:	Perkow Reaction	807
32.5.6.1.4	Method 4:	Skeleton Modification of <i>P</i> -Oxyalkenes	808
32.5.6.1.4.1	Variation 1:	Diels–Alder Reactions	808
32.5.6.1.4.2	Variation 2:	[2,3]-Sigmatropic Rearrangements	809
32.5.6.1.5	Methods 5:	Miscellaneous Reactions	811
