**Volume 34:  
Fluorine**

	<b>Preface</b> .....	V
	<b>Volume Editor's Preface</b> .....	VII
	<b>Table of Contents</b> .....	IX
	<b>Introduction</b>	
	J. M. Percy .....	1
<b>34.1</b>	<b>Product Class 1: Fluoroalkanes</b>	
	J. M. Percy .....	11
<b>34.1.1</b>	<b>Synthesis by Substitution of Hydrogen</b>	
	G. Sandford .....	21
<b>34.1.2</b>	<b>Synthesis by Substitution of Metals</b>	
	V. Gouverneur and M. Tredwell .....	39
<b>34.1.3</b>	<b>Synthesis by Substitution of Carbon Functionalities</b>	
	M. A. Carroll .....	49
<b>34.1.4</b>	<b>Synthesis by Substitution of Heteroatoms</b> .....	57
<b>34.1.4.1</b>	<b>Synthesis by Substitution of a Halogen</b>	
	T. P. Lequeux .....	57
<b>34.1.4.2</b>	<b>Synthesis by Substitution of Hydroxy Groups in Alcohols</b>	
	K. Dax .....	71
<b>34.1.4.3</b>	<b>Synthesis by Substitution of Oxygen and Sulfur Functionalities</b>	
	T. P. Lequeux .....	149
<b>34.1.5</b>	<b>Synthesis by Addition Reactions to Alkenes</b>	
	G. Haufe .....	169
<b>34.1.6</b>	<b>Synthesis with Retention of the Functional Group</b>	
	T. Yamazaki .....	225
<b>34.2</b>	<b>Product Class 2: Fluorocyclopropanes</b>	
	J. M. Percy .....	245
<b>34.3</b>	<b>Product Class 3: (Fluoromethyl)cyclopropanes</b>	
	J. M. Percy .....	267
<b>34.4</b>	<b>Product Class 4: Fluorocyclobutanes</b>	
	J. M. Percy .....	271
<b>34.5</b>	<b>Product Class 5: Propargylic Fluorides</b>	
	J. A. L. Miles and J. M. Percy .....	277

<b>34.6</b>	<b>Product Class 6: Benzylic Fluorides</b> A. Sai Krishna Murthy, R. Tardivel, and R. Grée .....	295
<b>34.7</b>	<b>Product Class 7: Allylic Fluorides</b> R. Roig and J. M. Percy .....	319
<b>34.8</b>	<b>Product Class 8: Homoallylic Fluorides</b> J. M. Percy .....	341
<b>34.9</b>	<b>Product Class 9: <math>\beta</math>-Fluoro Alcohols</b> G. Haufe .....	345
<b>34.10</b>	<b>Product Class 10: <math>\beta</math>-Fluoroamines</b> J. M. Percy .....	379
	<b>Keyword Index</b> .....	387
	<b>Author Index</b> .....	403
	<b>Abbreviations</b> .....	419

## Table of Contents

### Introduction

J. M. Percy

<b>Introduction</b> .....	1
---------------------------	---

### 34.1 Product Class 1: Fluoroalkanes

J. M. Percy

<b>34.1 Product Class 1: Fluoroalkanes</b> .....	11
--	----

### 34.1.1 Synthesis by Substitution of Hydrogen

G. Sandford

<b>34.1.1 Synthesis by Substitution of Hydrogen</b> .....	21
<b>34.1.1.1</b> Method 1: Direct Fluorination with Elemental Fluorine .....	21
<b>34.1.1.2</b> Method 2: Reaction with Selectfluor .....	29
<b>34.1.1.3</b> Method 3: Reaction with Xenon Difluoride .....	32
<b>34.1.1.4</b> Method 4: Reaction with Organic Hypofluorites .....	33
<b>34.1.1.5</b> Method 5: Reaction with Cesium Fluoroxysulfate .....	35
<b>34.1.1.6</b> Method 6: Reaction with Hydrogen Fluoride/Pyridine and Nitrosonium Tetrafluoroborate .....	37

### 34.1.2 Synthesis by Substitution of Metals

V. Gouverneur and M. Tredwell

<b>34.1.2 Synthesis by Substitution of Metals</b> .....	39
<b>34.1.2.1</b> Method 1: Synthesis from Organosilanes .....	40
<b>34.1.2.2</b> Method 2: Synthesis from an Organothallium Compound .....	42
<b>34.1.2.3</b> Method 3: Synthesis from Organomercury Compounds .....	43
<b>34.1.2.4</b> Method 4: Synthesis from Organomagnesium Compounds .....	44
<b>34.1.2.5</b> Method 5: Synthesis from Organolithium Compounds .....	45
<b>34.1.2.5.1</b> Variation 1: Using Molecular Fluorine .....	45
<b>34.1.2.5.2</b> Variation 2: Using Perchloryl Fluoride .....	46

### 34.1.3 Synthesis by Substitution of Carbon Functionalities

M. A. Carroll

<b>34.1.3 Synthesis by Substitution of Carbon Functionalities</b> .....	49
<b>34.1.3.1</b> Method 1: Synthesis from Alkanecarboxylates Using Fluorine .....	49
<b>34.1.3.2</b> Method 2: Synthesis from Alkanecarboxylic Acids .....	50
<b>34.1.3.2.1</b> Variation 1: Using Titanium(IV) Oxide/Silver(I) Fluoride .....	50
<b>34.1.3.2.2</b> Variation 2: Using Xenon Difluoride .....	51
<b>34.1.3.2.3</b> Variation 3: Using Bromine Trifluoride .....	53
<b>34.1.3.2.4</b> Variation 4: Using Triethylamine Trihydrofluoride .....	54
<b>34.1.3.3</b> Method 3: Synthesis from Cyclopropanes .....	54

<b>34.1.4</b>	<b>Synthesis by Substitution of Heteroatoms</b>		
<b>34.1.4.1</b>	<b>Synthesis by Substitution of a Halogen</b>		
	T. P. Lequeux		
<hr/>			
<b>34.1.4.1</b>	<b>Synthesis by Substitution of a Halogen</b>	.....	57
<b>34.1.4.1.1</b>	Method 1: Substitution of Primary Halides	.....	57
<b>34.1.4.1.1.1</b>	Variation 1: Using Metal Fluorides	.....	57
<b>34.1.4.1.1.2</b>	Variation 2: Using Hydrogen Fluoride Complexes	.....	60
<b>34.1.4.1.1.3</b>	Variation 3: Using Tetraalkylammonium Fluorides	.....	61
<b>34.1.4.1.1.4</b>	Variation 4: Using Fluorosilicate Derivatives	.....	62
<b>34.1.4.1.2</b>	Method 2: Substitution of Secondary Halides	.....	62
<b>34.1.4.1.2.1</b>	Variation 1: Using Metal Fluorides	.....	63
<b>34.1.4.1.2.2</b>	Variation 2: Using Hydrogen Fluoride Complexes	.....	65
<b>34.1.4.1.3</b>	Method 3: Substitution of Tertiary Halides	.....	66
<b>34.1.4.1.3.1</b>	Variation 1: Using Metal Fluorides	.....	66
<b>34.1.4.1.3.2</b>	Variation 2: Using Base–Hydrogen Fluoride Complexes	.....	67
<b>34.1.4.1.3.3</b>	Variation 3: Using Silver(I) Tetrafluoroborate	.....	67
<b>34.1.4.1.3.4</b>	Variation 4: Using Ruthenium Complexes	.....	68
<b>34.1.4.2</b>	<b>Synthesis by Substitution of Hydroxy Groups in Alcohols</b>		
	K. Dax		
<hr/>			
<b>34.1.4.2</b>	<b>Synthesis by Substitution of Hydroxy Groups in Alcohols</b>	.....	71
<b>34.1.4.2.1</b>	Method 1: Reaction with Fluoro- $\lambda^4$ -sulfanes	.....	72
<b>34.1.4.2.1.1</b>	Variation 1: With <i>N,N</i> -Diethylaminosulfur Trifluoride	.....	76
<b>34.1.4.2.1.2</b>	Variation 2: With <i>N,N</i> -Bis(2-methoxyethyl)aminosulfur Trifluoride (Deoxo-Fluor)	.....	108
<b>34.1.4.2.1.3</b>	Variation 3: With Morpholinosulfur Trifluoride	.....	111
<b>34.1.4.2.1.4</b>	Variation 4: With <i>N,N</i> -Dimethylaminosulfur Trifluoride	.....	113
<b>34.1.4.2.1.5</b>	Variation 5: With Other Dialkylaminofluoro- $\lambda^4$ -sulfanes	.....	113
<b>34.1.4.2.1.6</b>	Variation 6: With Sulfur Tetrafluoride	.....	114
<b>34.1.4.2.1.7</b>	Variation 7: With Alkoxysulfur Trifluorides	.....	116
<b>34.1.4.2.2</b>	Method 2: Reaction with Selenium Tetrafluoride	.....	117
<b>34.1.4.2.3</b>	Method 3: Reaction with Fluorophosphoranes	.....	118
<b>34.1.4.2.3.1</b>	Variation 1: With Difluoro(triphenyl)phosphorane	.....	119
<b>34.1.4.2.3.2</b>	Variation 2: With Trifluoro(diphenyl)phosphorane	.....	119
<b>34.1.4.2.3.3</b>	Variation 3: With Tetrafluoro(phenyl)phosphorane	.....	119
<b>34.1.4.2.4</b>	Method 4: Reaction with Fluoroalkylamine Reagents	.....	121
<b>34.1.4.2.4.1</b>	Variation 1: With 2-Chloro- <i>N,N</i> -diethyl-1,1,2-trifluoroethylamine (Yarovenko Reagent)	.....	122
<b>34.1.4.2.4.2</b>	Variation 2: With <i>N,N</i> -Diethyl-1,1,2,3,3,3-hexafluoropropylamine (Ishikawa Reagent)	.....	124
<b>34.1.4.2.4.3</b>	Variation 3: With <i>N,N</i> -Diethyl(trifluoromethyl)amine	.....	125
<b>34.1.4.2.4.4</b>	Variation 4: With 1,1-Difluoro- <i>N,N</i> -dimethyl-1-phenylmethanamine	.....	126
<b>34.1.4.2.4.5</b>	Variation 5: With <i>N,N</i> -Dimethyl(1,1,2,2-tetrafluoroethyl)amine	.....	126
<b>34.1.4.2.4.6</b>	Variation 6: With <i>N,N</i> -Diethyl-1,1-difluoro-1-(3-tolyl)methanamine	.....	127
<b>34.1.4.2.4.7</b>	Variation 7: With 2,2-Difluoro-1,3-dimethylimidazolidine	.....	129

34.1.4.2.4.8	Variation 8:	With Other Fluoroalkylamine Reagents	130
34.1.4.2.5	Method 5:	Reaction with Perfluorocyclobutane Ylides	132
34.1.4.2.6	Method 6:	Reaction with Perfluoro(2-methylpent-2-ene)	133
34.1.4.2.7	Method 7:	One-Pot Versions of the Sulfonate Displacement Route Using Alkane- or Arenesulfonyl Fluorides	134
34.1.4.2.8	Method 8:	Reaction with Hydrogen Fluoride	137
34.1.4.2.8.1	Variation 1:	In Combination with Organic Bases (Amines or Ethers)	138

### 34.1.4.3 **Synthesis by Substitution of Oxygen and Sulfur Functionalities**

T. P. Lequeux

34.1.4.3	<b>Synthesis by Substitution of Oxygen and Sulfur Functionalities</b>	149	
34.1.4.3.1	Method 1:	Substitution of Trifluoromethanesulfonates and Imidazolesulfonates	149
34.1.4.3.1.1	Variation 1:	Using Difluorosilicate Derivatives	149
34.1.4.3.1.2	Variation 2:	Using Tetrabutylammonium Fluoride	150
34.1.4.3.1.3	Variation 3:	Using Base–Hydrogen Fluoride Complexes	152
34.1.4.3.2	Method 2:	Substitution of Cyclic Sulfates	153
34.1.4.3.2.1	Variation 1:	Using Ammonium Fluoride	153
34.1.4.3.2.2	Variation 2:	Using Tetrabutylammonium Fluoride for the Substitution of Cyclic Sulfamates	155
34.1.4.3.3	Method 3:	Substitution of Carboxylic Esters and Cyclic Carbonates	156
34.1.4.3.4	Method 4:	Substitution of <i>O,S</i> -Dialkyl Dithiocarbonates	157
34.1.4.3.5	Method 5:	Substitution of Primary Sulfonates	159
34.1.4.3.5.1	Variation 1:	Using Potassium Fluoride	159
34.1.4.3.5.2	Variation 2:	Using an Ionic Liquid and Cesium Fluoride	160
34.1.4.3.5.3	Variation 3:	Using Ammonium Fluorides under High Pressure	160
34.1.4.3.5.4	Variation 4:	Using Ammonium Fluorides or Hydrogen Difluorides	161
34.1.4.3.5.5	Variation 5:	Using Difluorosilicate Derivatives	162
34.1.4.3.6	Method 6:	Substitution of Secondary Sulfonates	163
34.1.4.3.6.1	Variation 1:	Using Potassium Fluoride	163
34.1.4.3.6.2	Variation 2:	Using Ammonium Fluorides	164
34.1.4.3.6.3	Variation 3:	Using Reagents Containing Hydrogen Fluoride	164
34.1.4.3.7	Method 7:	Substitution of Sulfides	165

### 34.1.5 **Synthesis by Addition Reactions to Alkenes**

G. Haufe

34.1.5	<b>Synthesis by Addition Reactions to Alkenes</b>	169	
34.1.5.1	Vicinal Chlorofluoroalkanes from Alkenes	171	
34.1.5.1.1	Method 1:	Synthesis Using <i>N</i> -Chloro Imides and a Fluoride Source	172
34.1.5.1.1.1	Variation 1:	Using <i>N</i> -Chlorosuccinimide or <i>N</i> -Chlorosaccharin, and Hydrogen Fluoride/Pyridine	172
34.1.5.1.1.2	Variation 2:	Using <i>N</i> -Chlorosuccinimide and Triethylamine Trihydrofluoride	174
34.1.5.1.1.3	Variation 3:	Using Hexachloromelamine and Anhydrous Hydrogen Fluoride	175
34.1.5.1.2	Method 2:	Synthesis Using Chlorine and Silver(I) Fluoride	177
34.1.5.1.3	Method 3:	Synthesis Using Alkyl Hypochlorites and Boron Trifluoride	178

<b>34.1.5.2</b>	Vicinal Bromofluoroalkanes from Alkenes .....	179
<b>34.1.5.2.1</b>	Method 1: Synthesis Using <i>N</i> -Bromo Imides and a Fluoride Source .....	179
<b>34.1.5.2.1.1</b>	Variation 1: Using <i>N</i> -Bromosuccinimide and Anhydrous Hydrogen Fluoride in Coordinating Solvents .....	179
<b>34.1.5.2.1.2</b>	Variation 2: Using <i>N</i> -Bromosuccinimide or 1,3-Dibromo-5,5-dimethylimidazolidine-2,4-dione, and Hydrogen Fluoride/Pyridine or Polymer-Supported Hydrogen Fluoride/Pyridine .....	181
<b>34.1.5.2.1.3</b>	Variation 3: Using <i>N</i> -Bromosuccinimide or 1,3-Dibromo-5,5-dimethylimidazolidine-2,4-dione, and Triethylamine Trihydrofluoride or a Related Amine–Hydrogen Fluoride Reagent .....	184
<b>34.1.5.2.1.4</b>	Variation 4: <i>N</i> -Bromosuccinimide or 1,3-Dibromo-5,5-dimethylimidazolidine-2,4-dione, and Tetrabutylammonium and Tetrabutylphosphonium Hydrogen Fluorides .....	187
<b>34.1.5.2.1.5</b>	Variation 5: 1,3-Dibromo-5,5-dimethylimidazolidine-2,4-dione and Metal Fluoride–Hydrogen Fluoride Salts .....	189
<b>34.1.5.2.2</b>	Method 2: Synthesis Using Bromine Monofluoride Prepared In Situ .....	190
<b>34.1.5.2.2.1</b>	Variation 1: Preparation from Bromine and Fluorine .....	190
<b>34.1.5.2.2.2</b>	Variation 2: Preparation from Bromine and Silver(I) Fluoride .....	192
<b>34.1.5.2.3</b>	Method 3: Synthesis Using Other Fluoride Sources .....	193
<b>34.1.5.3</b>	Vicinal Fluoroiodoalkanes from Alkenes .....	194
<b>34.1.5.3.1</b>	Method 1: Reaction with Iodine Monofluoride Prepared In Situ .....	194
<b>34.1.5.3.1.1</b>	Variation 1: Prepared from Iodine and Fluorine .....	194
<b>34.1.5.3.1.2</b>	Variation 2: Prepared from Iodine and Metal Fluorides .....	196
<b>34.1.5.3.2</b>	Method 2: Reaction with <i>N</i> -Iodosuccinimide and Hydrogen Fluoride ....	197
<b>34.1.5.3.2.1</b>	Variation 1: In Coordinating Solvents .....	197
<b>34.1.5.3.2.2</b>	Variation 2: In Water with Phase-Transfer Catalysis .....	198
<b>34.1.5.3.2.3</b>	Variation 3: Using Hydrogen Fluoride/Pyridine .....	200
<b>34.1.5.3.2.4</b>	Variation 4: Using Polymer-Supported Hydrogen Fluoride/Pyridine .....	200
<b>34.1.5.3.2.5</b>	Variation 5: Using Triethylamine Trihydrofluoride .....	201
<b>34.1.5.3.2.6</b>	Variation 6: Using Metal Fluoride–Hydrogen Fluoride Salts .....	202
<b>34.1.5.3.2.7</b>	Variation 7: Using Ammonium Hydrogen Fluorides .....	203
<b>34.1.5.3.2.8</b>	Variation 8: Using Tetrabutylphosphonium Hydrogen Fluorides .....	204
<b>34.1.5.3.2.9</b>	Variation 9: Using Hexafluoropropene/Diethylamine Complex .....	205
<b>34.1.5.3.3</b>	Method 3: Reaction with Iodonium Equivalents Other Than Iodine or <i>N</i> -Iodosuccinimide and a Fluoride Source .....	206
<b>34.1.5.4</b>	Vicinal Fluoro(sulfanyl)alkanes .....	207
<b>34.1.5.4.1</b>	Method 1: Fluorosulfanylation of Alkenes .....	208
<b>34.1.5.4.1.1</b>	Variation 1: Using Dimethyl(methylsulfanyl)sulfonium Tetrafluoroborate and Triethylamine Trihydrofluoride .....	208
<b>34.1.5.4.1.2</b>	Variation 2: Using Benzenesulfonyl Chloride and Silver(I) Fluoride .....	210
<b>34.1.5.4.1.3</b>	Variation 3: Using <i>N</i> -(Phenylsulfanyl)phthalimide and Hydrogen Fluoride/Pyridine .....	211
<b>34.1.5.4.1.4</b>	Variation 4: Using Trifluoromethanesulfonyl Fluoride .....	212
<b>34.1.5.5</b>	Vicinal Fluoro(selanyl)alkanes .....	213
<b>34.1.5.5.1</b>	Method 1: Synthesis Using Benzeneselenenyl Bromide or Chloride and Silver(I) Fluoride .....	213

34.1.5.5.2	Method 2: Synthesis Using <i>N</i> -(Phenylselanyl)phthalimide and Triethylamine Trihydrofluoride .....	214
34.1.5.5.3	Method 3: Synthesis Using Diphenyl Diselenide and Xenon Difluoride ...	216
34.1.5.6	Vicinal Nitro- and Nitriminofluoroalkanes .....	218
34.1.5.6.1	Method 1: Nitrofluorination of Alkenes .....	218
34.1.5.6.2	Method 2: Nitriminofluorination of Alkenes .....	219
34.1.6	<b>Synthesis with Retention of the Functional Group</b> T. Yamazaki	
<hr/>		
34.1.6	<b>Synthesis with Retention of the Functional Group</b> .....	225
34.1.6.1	Method 1: $\alpha$ -Functional Group Elimination .....	225
34.1.6.1.1	Variation 1: Free-Radical-Mediated Dehalogenation with Tributyltin Hydride .....	225
34.1.6.1.2	Variation 2: Ring Expansion with Dehalogenation Mediated by Palladium Oxide or Acid .....	228
34.1.6.1.3	Variation 3: By Desulfonylation .....	230
34.1.6.1.4	Variation 4: By Denitration .....	230
34.1.6.2	Method 2: $\beta$ -Functional Group Elimination .....	231
34.1.6.2.1	Variation 1: By Dehalogenation .....	231
34.1.6.2.2	Variation 2: By Ionic Deoxygenation .....	232
34.1.6.2.3	Variation 3: By Radical Deoxygenation .....	233
34.1.6.2.4	Variation 4: By Deselenation .....	235
34.1.6.3	Method 3: Hydrogenation of Unsaturated Compounds Containing Fluorine .....	236
34.1.6.3.1	Variation 1: Hydrogenation of Vinylic Fluorides .....	236
34.1.6.3.2	Variation 2: Hydrogenation of Allylic and Propargylic Fluorides .....	238
34.1.6.3.3	Variation 3: Reduction of Fluorinated Arenes .....	240
34.2	<b>Product Class 2: Fluorocyclopropanes</b> J. M. Percy	
<hr/>		
34.2	<b>Product Class 2: Fluorocyclopropanes</b> .....	245
34.2.1	Synthesis of Product Class 2 .....	246
34.2.1.1	Method 1: Radical Dechlorination of Chlorofluorocyclopropanes Using Tributyltin Hydride .....	246
34.2.1.2	Method 2: Debromination of Bromofluorocyclopropanes with Zinc Powder .....	247
34.2.1.3	Method 3: Carbene and Carbenoid Additions to Fluoroalkenes .....	248
34.2.1.3.1	Variation 1: Simmons–Smith Reaction of Fluoroallylic Alcohols Using a Zinc/Copper Couple .....	249
34.2.1.3.2	Variation 2: Diastereoselective Simmons–Smith Reaction Using Diethylzinc(II)/Diiodomethane .....	250
34.2.1.3.3	Variation 3: Addition of Diazoacetic Esters to Fluoroalkenes .....	251
34.2.1.3.4	Variation 4: Diastereoselective Addition of Diazoacetic Esters to Fluoroalkenes .....	251

34.2.1.3.5	Variation 5:	Addition of Diazomethane to Ethyl (2 <i>E</i> )-3-Fluoro-2-phenylacrylate with Adduct Photolysis	252
34.2.1.3.6	Variation 6:	Intramolecular Carbenoid Addition to an Ethyl (2 <i>Z</i> )-2-Fluoroalk-2-enoate	253
34.2.1.4	Method 4:	Fluorohalocyclopropanes via Fluorohalocarbene Addition to Alkenes	253
34.2.1.4.1	Variation 1:	Phase-Transfer-Catalyzed Formation of Chlorofluorocyclopropanes	254
34.2.1.4.2	Variation 2:	Titanium-Mediated Formation of Chlorofluorocyclopropanes	255
34.2.1.4.3	Variation 3:	Generation of Chlorofluorocyclopropanes from Methyl Dichlorofluoroacetate	256
34.2.1.4.4	Variation 4:	Bromofluorocarbene Addition to Alkenes Using Phase-Transfer Catalysis	257
34.2.1.5	Method 5:	Direct Fluorocarbene Addition to Alkenes	257
34.2.1.6	Method 6:	Intermolecular Addition of Fluoroiodoacetate to Alkenes and Subsequent Anionic Cyclization	260
34.2.1.7	Method 7:	Fluorination of Cyclopropanes and Their Conjugate Bases	261
34.2.1.7.1	Variation 1:	Electrophilic Fluorination of Methylene-cyclopropane Carboxylate Esters with <i>N</i> -Fluorobis(phenylsulfonyl)amine	261
34.3	<b>Product Class 3: (Fluoromethyl)cyclopropanes</b>		
	J. M. Percy		
34.3	<b>Product Class 3: (Fluoromethyl)cyclopropanes</b>		267
34.3.1	Synthesis of Product Class 3		267
34.3.1.1	Method 1:	Fluorodehydroxylation of Cyclopropylmethanol with <i>N,N</i> -Diethylaminosulfur Trifluoride	267
34.3.1.2	Method 2:	In Situ Formation and Fluoride Ion Displacement of a Cyclopropylmethyl 4-Toluenesulfonate	268
34.3.1.3	Method 3:	Ring Contraction of Cyclobutanols	268
34.3.1.4	Method 4:	Transannular Epoxide Opening with Trimethylamine Trihydrofluoride	269
34.4	<b>Product Class 4: Fluorocyclobutanes</b>		
	J. M. Percy		
34.4	<b>Product Class 4: Fluorocyclobutanes</b>		271
34.4.1	Synthesis of Product Class 4		271
34.4.1.1	Method 1:	Fluorodehydroxylation of Cyclobutanols by Reaction with <i>N,N</i> -Diethylaminosulfur Trifluoride	272
34.4.1.2	Method 2:	Reaction of Halocyclobutanes with Fluorinating Agents	273
34.4.1.2.1	Variation 1:	Reaction of Iodocubane with Xenon Difluoride	273
34.4.1.3	Method 3:	Reaction of (Iodomethyl)cyclopropane with Xenon Difluoride	274
34.4.1.4	Method 4:	Addition of Iodine Fluoride to Methylene-cyclobutanes	274

<b>34.5</b>	<b>Product Class 5: Propargylic Fluorides</b>	
	J. A. L. Miles and J. M. Percy	
<hr/>		
<b>34.5</b>	<b>Product Class 5: Propargylic Fluorides</b>	277
<b>34.5.1</b>	Synthesis of Product Class 5	277
<b>34.5.1.1</b>	Method 1: Nucleophilic Substitution of Propargylic Alcohols with 1-Fluoro- <i>N,N</i> -diisopropyl-2-methylprop-1-en-1-amine	277
<b>34.5.1.2</b>	Method 2: Nucleophilic Substitution of Silyl Ethers with Piperidinosulfur Trifluoride	278
<b>34.5.1.3</b>	Method 3: Reaction of Prop-2-yn-1-ol with 2-Chloro- <i>N,N</i> -diethyl-1,1,2-trifluoroethanamine	280
<b>34.5.1.4</b>	Method 4: Nucleophilic Substitution with Tetrabutylammonium Fluoride	281
<b>34.5.1.5</b>	Method 5: Ring Opening of Oxetanes Using Silicon Tetrafluoride	282
<b>34.5.1.6</b>	Method 6: Nucleophilic Substitution Using Sulfur Tetrafluoride	282
<b>34.5.1.7</b>	Method 7: Nucleophilic Substitution of Propargylic Alcohols with <i>N,N</i> -Diethylaminosulfur Trifluoride	283
<b>34.5.1.7.1</b>	Variation 1: Inverse Addition of a Propargylic Alcohol Precursor to a Cold Solution of <i>N,N</i> -Diethylaminosulfur Trifluoride without Low Temperature Quenching	284
<b>34.5.1.7.2</b>	Variation 2: Inverse Addition of a Propargylic Alcohol Precursor to a Cold Solution of <i>N,N</i> -Diethylaminosulfur Trifluoride with Low Temperature Quenching	286
<b>34.5.1.7.3</b>	Variation 3: From Propargylic Alcohols by Inverse Addition to a Cooled Solution of <i>N,N</i> -Diethylaminosulfur Trifluoride	287
<b>34.5.1.7.4</b>	Variation 4: From Hexacarbonyldicobalt-Protected Propargylic Alcohols	288
<b>34.5.1.8</b>	Method 8: Synthesis From 3-Substituted 1,1,3-Tribromo-1-fluoropropanes via (Alk-1-ynyl)fluorocarbenes	291
<b>34.6</b>	<b>Product Class 6: Benzylic Fluorides</b>	
	A. Sai Krishna Murthy, R. Tardivel, and R. Grée	
<hr/>		
<b>34.6</b>	<b>Product Class 6: Benzylic Fluorides</b>	295
<b>34.6.1</b>	Synthesis of Product Class 6	295
<b>34.6.1.1</b>	Nucleophilic Fluorination	295
<b>34.6.1.1.1</b>	Method 1: Dehydrofluorination	295
<b>34.6.1.1.1.1</b>	Variation 1: Electrochemical Methods	295
<b>34.6.1.1.1.2</b>	Variation 2: Photochemical Methods	300
<b>34.6.1.1.2</b>	Method 2: Dehydroxyfluorination	300
<b>34.6.1.1.2.1</b>	Variation 1: With <i>N,N</i> -Diethylaminosulfur Trifluoride and Related Reagents	301
<b>34.6.1.1.2.2</b>	Variation 2: With Nonfluorobutanesulfonyl Fluoride with a Trialkylamine Trihydrofluoride and a Base	304
<b>34.6.1.1.2.3</b>	Variation 3: With Fluoroalkylamines and Related Reagents	304
<b>34.6.1.1.2.4</b>	Variation 4: Fluorination with Rearrangement	305
<b>34.6.1.1.3</b>	Method 3: Desulfurative Fluorinations	307
<b>34.6.1.1.4</b>	Method 4: Halogen-Exchange Reactions	307
<b>34.6.1.1.5</b>	Method 5: Nucleophilic Substitutions	311

34.6.1.2	Electrophilic Fluorination .....	313
34.6.1.2.1	Method 1: Fluorination of Alkylbenzenes with Cesium Fluoroxy sulfate ..	313
34.6.1.3	C–C Bond Formation of Fluorinated Compounds .....	314
34.6.1.3.1	Method 1: Transition-Metal-Catalyzed Reactions .....	314
34.6.1.3.2	Method 2: Cycloadditions to Vinylic Fluorides .....	315
34.7	<b>Product Class 7: Allylic Fluorides</b> R. Roig and J. M. Percy	
<hr/>		
34.7	<b>Product Class 7: Allylic Fluorides</b> .....	319
34.7.1	<b>Product Subclass 1: Allyl Fluorides</b> .....	319
34.7.1.1	Synthesis of Product Subclass 1 .....	319
34.7.1.1.1	Method 1: Deoxofluorination of Allylic Alcohols with <i>N,N</i> -Diethylaminosulfur Trifluoride .....	319
34.7.1.1.1.1	Variation 1: Deoxofluorination of Allylic Alcohols with Bis(dialkylamino)sulfur Difluorides .....	322
34.7.1.1.2	Method 2: Addition to $\alpha$ -Fluoroalkynes .....	323
34.7.1.1.3	Method 3: Electrophilic Fluorination of Alkenes .....	325
34.7.1.1.3.1	Variation 1: Electrophilic Fluorination of Alkenes with Acetyl Hypofluorite	325
34.7.1.1.3.2	Variation 2: Electrophilic Fluorination of Activated Alkenes with Elemental Fluorine .....	326
34.7.1.1.3.3	Variation 3: Electrophilic Fluorination of Alkenes with <i>N</i> -Fluoropyridinium Salts .....	327
34.7.1.1.4	Method 4: Nucleophilic Substitution of Allylic Halides .....	328
34.7.1.1.4.1	Variation 1: Nucleophilic Substitution of Allylic Halides with Tetraethylammonium Fluoride .....	328
34.7.1.1.4.2	Variation 2: Heterogeneous Fluorination of Allylic Halides by the Combination of Lead(II) Fluoride and a Sodium Salt .....	329
34.7.1.1.4.3	Variation 3: A Facile Method for the Fluorination of Phenyl Thioethers via Sulfonium Salts Using Cesium Fluoride .....	330
34.7.1.1.5	Method 5: Fluoroalkenylation of 1,3-Bis( <i>tert</i> -butyldimethylsilyl) Ethers ....	331
34.7.1.1.6	Method 6: Oxidative Elimination of $\beta$ -Fluoro Selenides .....	332
34.7.1.1.7	Methods 7: Additional Methods .....	332
34.7.2	<b>Product Subclass 2: <math>\alpha</math>-Fluoroallyl- and 3-Fluoroalk-1-enylphosphonate Esters</b> .....	333
34.7.2.1	Synthesis of Product Subclass 2 .....	334
34.7.2.1.1	Method 1: Deoxofluorination of $\alpha$ -Hydroxyallylphosphonate Esters with <i>N,N</i> -Diethylaminosulfur Trifluoride .....	334
34.7.2.1.2	Method 2: Coupling of $\alpha$ -Fluoro Phosphonate Esters with Vinylic Halides	334
34.7.2.1.3	Method 3: Catalytic Hydrogenation of $\alpha$ -Fluoropropargylphosphonate Esters .....	335
34.7.3	<b>Product Subclass 3: <math>\gamma</math>-Fluoro <math>\alpha,\beta</math>-Unsaturated Esters</b> .....	337
34.7.3.1	Synthesis of Product Subclass 3 .....	337
34.7.3.1.1	Method 1: Horner–Emmons Condensation of $\alpha$ -Fluoro Aldehydes and Ketones .....	337

<b>34.8</b>	<b>Product Class 8: Homoallylic Fluorides</b> J. M. Percy	
<hr/>		
<b>34.8</b>	<b>Product Class 8: Homoallylic Fluorides</b> .....	341
<b>34.8.1</b>	Synthesis of Product Class 8 .....	341
<b>34.8.1.1</b>	Method 1: Ring Opening of Cyclopropylmethanols with a Fluoride Ion Source .....	341
<b>34.9</b>	<b>Product Class 9: <math>\beta</math>-Fluoro Alcohols</b> G. Haufe	
<hr/>		
<b>34.9</b>	<b>Product Class 9: <math>\beta</math>-Fluoro Alcohols</b> .....	345
<b>34.9.1</b>	Synthesis of Product Class 9 .....	345
<b>34.9.1.1</b>	Method 1: Synthesis Using Hydrogen Fluoride .....	348
<b>34.9.1.1.1</b>	Variation 1: Aqueous Hydrogen Fluoride .....	348
<b>34.9.1.1.2</b>	Variation 2: Anhydrous Hydrogen Fluoride in Coordinating Solvents .....	349
<b>34.9.1.1.3</b>	Variation 3: Anhydrous Hydrogen Fluoride in the Presence of Lewis Acids .....	350
<b>34.9.1.2</b>	Method 2: Synthesis Using Metal Fluorides and Metal Hydrogen Fluorides .....	351
<b>34.9.1.2.1</b>	Variation 1: Alkali Metal Hydrogen Fluorides in Coordinating Solvents .....	351
<b>34.9.1.2.2</b>	Variation 2: Potassium Hydrogen Difluoride or Silver(I) Fluoride in the Presence of a Chiral Lewis Acid .....	355
<b>34.9.1.3</b>	Method 3: Synthesis Using Alkylammonium and Alkylphosphonium Fluorides .....	357
<b>34.9.1.3.1</b>	Variation 1: Tetrabutylammonium and Tetrabutylphosphonium Fluorides .....	357
<b>34.9.1.3.2</b>	Variation 2: Tetraethylammonium Fluorides .....	360
<b>34.9.1.4</b>	Method 4: Synthesis Using Amine Polyhydrofluorides .....	361
<b>34.9.1.4.1</b>	Variation 1: Hydrogen Fluoride/Pyridine .....	362
<b>34.9.1.4.2</b>	Variation 2: Alkylamine Hydrofluorides .....	367
<b>34.9.1.5</b>	Method 5: Synthesis Using Boron Trifluoride–Diethyl Ether Complex .....	374
<b>34.10</b>	<b>Product Class 10: <math>\beta</math>-Fluoroamines</b> J. M. Percy	
<hr/>		
<b>34.10</b>	<b>Product Class 10: <math>\beta</math>-Fluoroamines</b> .....	379
<b>34.10.1</b>	Synthesis of Product Class 10 .....	379
<b>34.10.1.1</b>	Method 1: Reduction of $\beta$ -Fluoro Azides .....	379
<b>34.10.1.2</b>	Method 2: Displacement of $\beta$ -Fluoro 4-Toluenesulfonates by Amines .....	380
<b>34.10.1.3</b>	Method 3: Ring Opening of Aziridines with Hydrogen Fluoride Equivalents .....	381
<b>34.10.1.3.1</b>	Variation 1: Ring Opening of Aziridines by Fluoride Ion .....	382
<b>34.10.1.3.2</b>	Variation 2: Ring Opening of Azabicyclo[1.1.0]butanes with Hydrogen Fluoride/Pyridine .....	383
<b>34.10.4</b>	Method 4: Ring Opening of Cyclic Sulfamates with Fluoride Ion .....	384
