

## Table of Contents

<b>1</b>	<b>Introduction</b> E. Fernández	
<b>1</b>	<b>Introduction</b> .....	<b>1</b>
<b>2</b>	<b>Mechanistic Aspects of Carbon–Boron Bond Formation</b> J. J. Carbó and F. Maseras	
<b>2</b>	<b>Mechanistic Aspects of Carbon–Boron Bond Formation</b> .....	<b>5</b>
<b>2.1</b>	Electronic Structure of Boron Reagents .....	<b>5</b>
<b>2.2</b>	Transition-Metal-Free Reactivity .....	<b>6</b>
<b>2.2.1</b>	Electrophilic and Nucleophilic Addition of Diboron Compounds to Unsaturated Substrates .....	<b>6</b>
<b>2.2.2</b>	Lewis Base Activation of Diboron Reagents .....	<b>10</b>
<b>2.2.3</b>	Chemo- and Regioselectivity in Diboration Reactions .....	<b>13</b>
<b>2.2.4</b>	Reactivity of Boryl Fragments Bonded to Alkali Metals and Alkaline-Earth Metals	<b>15</b>
<b>2.2.5</b>	Reactivity of Boryl Fragments Bonded to p-Block Elements .....	<b>16</b>
<b>2.2.5.1</b>	Silylborane Reagents .....	<b>16</b>
<b>2.2.5.2</b>	Amino- and Phosphinoborane Reagents .....	<b>17</b>
<b>2.2.5.3</b>	Sulfanyl- and Selanylborane Reagents .....	<b>17</b>
<b>2.3</b>	Transition-Metal-Catalyzed Reactions .....	<b>20</b>
<b>2.3.1</b>	Hydroboration .....	<b>20</b>
<b>2.3.2</b>	Diboration .....	<b>22</b>
<b>2.3.3</b>	Borylation .....	<b>24</b>
<b>2.4</b>	Conclusions and Perspectives .....	<b>27</b>
<b>3</b>	<b>Diboron Compounds: Synthesis and Applications</b> H. Yoshida	
<b>3</b>	<b>Diboron Compounds: Synthesis and Applications</b> .....	<b>31</b>
<b>3.1</b>	Symmetrical Diboron Compounds .....	<b>31</b>
<b>3.1.1</b>	Synthesis of Tetraalkoxydiboron Compounds .....	<b>31</b>
<b>3.1.2</b>	Application in Transition-Metal-Catalyzed Borylation .....	<b>32</b>
<b>3.1.2.1</b>	Diboration, Hydroboration, Aminoboration, and Carboboration of Unsaturated Carbon–Carbon Bonds .....	<b>32</b>
<b>3.1.2.2</b>	Borylation of $\alpha,\beta$ -Unsaturated Carbonyls and Related Compounds .....	<b>51</b>
<b>3.1.2.3</b>	Borylation of Organic Halides and Related Compounds .....	<b>53</b>

3.1.2.4	Borylation of C—H Bonds	57
3.1.3	Application in Non-Transition-Metal-Catalyzed Borylation	59
3.1.3.1	Diboration and Hydroboration of Unsaturated Carbon–Carbon Bonds	59
3.1.3.2	Borylation of $\alpha,\beta$ -Unsaturated Carbonyls and Related Compounds	60
3.1.3.3	Borylation of Organic Halides and Related Compounds	61
3.2	Unsymmetrical Diboron Compounds	63
3.2.1	Synthesis of Naphthalene-1,8-diamine-Substituted Diboron Compounds	63
3.2.1.1	Synthesis of (pin)B-B(dan)	63
3.2.1.2	Application of (pin)B-B(dan) in Transition-Metal-Catalyzed Borylation	64
3.2.1.3	Application of (pin)B-B(dan) in Non-Transition-Metal-Catalyzed Borylation	68
3.2.2	Amino Diol Substituted $sp^2/sp^3$ Hybridized Diboron Compounds	69
3.2.2.1	Synthesis of Bis(2-hydroxypropyl)amine-Based Diboron Compounds	69
3.2.2.2	Application of Bis(2-hydroxypropyl)amine-Based Diboron Compounds in Borylation	71
3.2.3	2-Aminobenzamide-Based Diboron Compounds	72
3.2.3.1	Synthesis of a 2-Aminobenzamide-Based Diboron Compound	72
3.2.3.2	Application of a 2-Aminobenzamide-Based Diboron Compound in Borylation	73
3.3	Conclusions	74
4	<b>Synthesis of <i>gem</i>-Diboron Compounds from Diboron Reagents</b> Y. Ping, C. Wu, and J. Wang	
4	<b>Synthesis of <i>gem</i>-Diboron Compounds from Diboron Reagents</b>	83
4.1	Diborylation of <i>gem</i> -Dibromides	84
4.2	Diborylation of Alkenes	85
4.3	Diborylation of Benzylic C—H Bonds	87
4.4	Diborylation of Carbonyls and Carbamates	92
4.5	Carbene Insertion into Diboron Compounds	97
5	<b><i>anti</i> Boron Addition to Alkynes</b> M. Sawamura and H. Ohmiya	
5	<b><i>anti</i> Boron Addition to Alkynes</b>	105
5.1	<i>anti</i> Carboboration	105
5.1.1	Transition-Metal-Mediated Carboboration	105
5.1.2	Phosphine-Catalyzed Carboboration	109
5.1.3	Carboboration of Propargylic Alkoxide Anions	110
5.1.4	Acid-Promoted Carboboration	112

<b>5.2</b>	<i>anti</i> Silaboration and Diboration .....	112
<b>5.2.1</b>	Palladium-Catalyzed Silaboration .....	112
<b>5.2.2</b>	Phosphine-Catalyzed Silaboration and Diboration .....	113
<b>5.2.3</b>	Diboration of Propargylic Alkoxide Anions .....	116
<b>5.2.4</b>	Brønsted Base Mediated Silaboration and Diboration .....	117
<b>5.3</b>	<i>anti</i> Hydroboration .....	118
<b>5.3.1</b>	Transition-Metal-Catalyzed Hydroboration .....	118
<b>5.3.2</b>	Catalyst-Free Hydroboration .....	124
<b>5.3.3</b>	Borenium Cation Mediated Hydroboration .....	125
<b>5.3.4</b>	Phosphine-Catalyzed Hydroboration .....	126
<b>5.3.5</b>	Radical-Mediated Hydroboration .....	127

## **6 Borylation of Carbonyl and Imine Groups**

T. B. Clark and H. Y. Cho

---

<b>6</b>	<b>Borylation of Carbonyl and Imine Groups</b> .....	131
<b>6.1</b>	Early Examples of Borylation of Polarized Double Bonds .....	135
<b>6.2</b>	Borylation of Carbonyls .....	136
<b>6.2.1</b>	Development and Scope of Copper-Catalyzed Borylation .....	136
<b>6.2.2</b>	Mechanism of Copper-Catalyzed Diborylation of Carbonyls .....	138
<b>6.2.3</b>	Asymmetric Borylation of Carbonyls .....	139
<b>6.3</b>	Protection of $\alpha$ -Hydroxy Boronate Esters .....	144
<b>6.3.1</b>	Protection as Silyl Ethers .....	144
<b>6.3.2</b>	Protection as Trifluoroborate Salts .....	148
<b>6.4</b>	Reactions of $\alpha$ -Oxy Boronate Esters and Trifluoroborate Salts .....	151
<b>6.4.1</b>	Coupling Reactions of $\alpha$ -Oxy Boronate Esters and Trifluoroborate Salts .....	151
<b>6.4.2</b>	Homologation Reactions of $\alpha$ -Oxy Boronate Esters .....	156
<b>6.4.3</b>	Deoxygenative Geminal Difunctionalization of Carbonyls .....	159
<b>6.4.4</b>	Formation of Vinylboronate Esters by Elimination of Tertiary $\alpha$ -Oxy Boronate Esters .....	166
<b>6.5</b>	Borylation of Imines .....	167
<b>6.5.1</b>	Diastereoselective Borylation of Imines .....	167
<b>6.5.2</b>	Enantioselective Borylation of Imines .....	172
<b>6.6</b>	Reactions of $\alpha$ -Amino Boronate Esters .....	177
<b>6.6.1</b>	Asymmetric Synthesis of Bortezomib .....	177
<b>6.6.2</b>	Enantioselective Synthesis of a Cetirizine Precursor .....	179

<b>7</b>	<b>Borylative Ring Opening</b> M. Pineschi and C. Boldrini	
<hr/>		
<b>7</b>	<b>Borylative Ring Opening</b> .....	183
<b>7.1</b>	Nickel-Catalyzed Reactions .....	183
<b>7.1.1</b>	Ring Opening of Electron-Poor Vinylcyclopropanes .....	183
<b>7.1.2</b>	Ring Opening of Aryl Cyclopropyl Ketones .....	186
<b>7.1.3</b>	Ring Opening of Vinyl Epoxides and Vinyl Aziridines .....	187
<b>7.2</b>	Copper-Catalyzed Reactions .....	191
<b>7.2.1</b>	Ring Opening of Vinyl Epoxides .....	191
<b>7.2.2</b>	Ring Opening of Alk-1-ynyl-Substituted Three- and Four-Membered Rings ...	196
<b>7.2.3</b>	Ring Opening of Aliphatic Epoxides .....	202
<b>7.2.4</b>	Ring Opening of Five-Membered Cyclic Vinyl Carbonates .....	204
<b>7.2.5</b>	Asymmetric Ring Opening of Diazabicycles .....	207
<b>7.3</b>	Palladium-Catalyzed Reactions .....	209
<b>7.3.1</b>	Ring Opening of Vinylcyclopropanes and Vinyl Aziridines .....	209
<b>7.3.2</b>	Ring Opening of Aryl-Substituted Aziridines .....	211
<b>7.4</b>	Miscellaneous Reactions .....	212
<b>7.4.1</b>	Reactions of Boronic Esters with Lithiated Epoxides .....	212
<b>7.4.2</b>	Organocatalyzed Ring Opening of Vinyl Epoxides and Vinyl Aziridines .....	214
<b>7.4.3</b>	Iron-Catalyzed Ring Opening (via Hydroboration) of Vinylcyclopropanes .....	215
<b>7.4.4</b>	Gold-Catalyzed Ring Opening (via Silaboration) of Oxetanes and Epoxides ...	218
<b>7.4.5</b>	One-Pot Ring Opening of Epoxides/Copper-Catalyzed Cross-Coupling Reaction .....	220
<b>7.4.6</b>	One-Pot Ring Opening of Epoxides/Palladium-Catalyzed Dehydroborylation Reaction .....	223
<b>8</b>	<b>Borylative Ring Closing</b> K. Kubota and H. Ito	
<hr/>		
<b>8</b>	<b>Borylative Ring Closing</b> .....	227
<b>8.1</b>	Borylative Ring Closing Involving the Formation of C—C Bonds .....	227
<b>8.1.1</b>	Ring Closing of Alkenes Bearing Leaving Groups .....	227
<b>8.1.1.1</b>	Copper-Catalyzed Borylative Ring Closing of Silylated Allylic Carbonates .....	227
<b>8.1.1.2</b>	Copper-Catalyzed Borylative Ring Closing of Aryl- and Hetaryl-Substituted Allylic Phosphates .....	228
<b>8.1.1.3</b>	Copper-Catalyzed Borylative Ring Closing of Alkenyl Sulfonates .....	229
<b>8.1.1.4</b>	Copper-Catalyzed Borylative Ring Closing of Unactivated Alkenes .....	231

<b>8.1.2</b>	Ring Closing of Alkynes Bearing Leaving Groups .....	232
<b>8.1.2.1</b>	Copper-Catalyzed Borylative Ring Closing of Silicon-Tethered Alkynes .....	232
<b>8.1.2.2</b>	Copper-Catalyzed Borylative Ring Closing of Propargyl Ethers and Amines ...	233
<b>8.1.3</b>	Ring Closing of Allenes Bearing Leaving Groups .....	234
<b>8.1.3.1</b>	Copper-Catalyzed Borylative Ring Closing of Terminal Allenes .....	234
<b>8.1.4</b>	Ring Closing of Alkenes Bearing Carbonyl Electrophiles .....	234
<b>8.1.4.1</b>	Copper-Catalyzed Borylative Ring Closing of Enone Diones .....	234
<b>8.1.4.2</b>	Copper-Catalyzed Borylative Ring Closing of Alkenyl Aryl Ketones .....	235
<b>8.1.4.3</b>	Copper-Catalyzed Borylative Ring Closing of Carbamoyl Chlorides .....	236
<b>8.1.5</b>	Ring Closing of Allenes Bearing Carbonyl Electrophiles .....	237
<b>8.1.5.1</b>	Copper-Catalyzed Borylative Ring Closing of Allene Cyclohexanediones .....	237
<b>8.1.6</b>	Ring Closing of Alkenes Bearing Isocyanides .....	238
<b>8.1.6.1</b>	Copper-Catalyzed Borylative Ring Closing of Alkenes Bearing Isocyanides ...	238
<b>8.1.7</b>	Ring Closing of Alkenes Bearing Imine Moieties .....	239
<b>8.1.7.1</b>	Copper-Catalyzed Borylative Ring Closing of <i>N</i> -(2-Vinylaryl)benzaldimines ...	239
<b>8.1.8</b>	Ring Closing of Allenes Bearing Cyano Groups .....	241
<b>8.1.8.1</b>	Copper-Catalyzed Borylative Ring Closing of 3-(2-Cyanophenyl)prop-1-yne .	241
<b>8.1.9</b>	Ring Closing of Alkynes Bearing Epoxide Moieties .....	243
<b>8.1.9.1</b>	Copper-Catalyzed Borylative Ring Closing of Alkynes Bearing Epoxide Moieties	243
<b>8.1.10</b>	Ring Closing of Diynes .....	243
<b>8.1.10.1</b>	Palladium-Catalyzed Borylsilylative and Borylstannylative Ring Closing of Diynes .....	244
<b>8.1.10.2</b>	Nickel-Catalyzed Borylsilylative Ring Closing of Diynes .....	245
<b>8.1.11</b>	Ring Closing of Enynes .....	246
<b>8.1.11.1</b>	Palladium-Catalyzed Borylsilylative Ring Closing of Enynes .....	246
<b>8.1.11.2</b>	Palladium-Catalyzed Borylative Ring Closing of Enynes with Diboron .....	247
<b>8.1.11.3</b>	Palladium-Catalyzed Borylative Ring Closing of Carbonate-Containing Enynes	247
<b>8.1.11.4</b>	Palladium-Catalyzed Borylative Ring Closing of Dienynes and Ene-dienynes ...	248
<b>8.1.11.5</b>	Copper-Catalyzed Borylative Ring Closing of Cyclohexadienone-Containing 1,6-Enynes .....	249
<b>8.1.12</b>	Ring Closing of Allenynes .....	250
<b>8.1.12.1</b>	Palladium-Catalyzed Borylstannylative Ring Closing of Allenynes .....	250
<b>8.1.12.2</b>	Palladium-Catalyzed Borylative Ring Closing of Allenynes .....	251
<b>8.1.13</b>	Ring Closing of Enallenes .....	252
<b>8.1.13.1</b>	Palladium-Catalyzed Nonoxidative Borylative Ring Closing of Enallenes .....	252
<b>8.1.13.2</b>	Palladium-Catalyzed Oxidative Borylative Ring Closing of Enallenes .....	253

8.1.14	Ring Closing of Alkynyl Isocyanates .....	255
8.1.14.1	Rhodium-Catalyzed Borylative Ring Closing of Alkynyl Isocyanates .....	255
8.1.15	Metal-Free Borylative Carbocyclizations of Alkynes .....	256
8.2	Borylative Ring Closing Involving the Formation of C–X Bonds .....	257
8.2.1	Palladium-Catalyzed Aminative Ring Closing of Alkynes .....	257
8.2.2	Gold-Catalyzed Alkoxylyative Ring Closing of Alkynes .....	257
8.2.3	Gold-Catalyzed Aminative Ring Closing of Alkynes .....	260
8.2.4	Gold-Catalyzed Alkoxylyative Ring Closing of Alkynyloximes .....	261
8.2.5	Metal-Free Borylative Heterocyclizations .....	262
8.2.5.1	Thiolative Ring Closing of Alkynes with <i>B</i> -Chlorocatecholborane .....	262
8.2.5.2	Ring-Closing Electrophilic Oxyboration of Alkynes with <i>B</i> -Chlorocatecholborane .....	263
8.2.5.3	Ring-Closing Oxyboration and Thioboration of Alkynes with Boron Trichloride	264
8.2.5.4	Borylative Ring Closing with Tris(pentafluorophenyl)borane .....	265
8.3	Conclusions .....	267

## 9 Decarbonylative/Decarboxylative Borylation

L. Xu

9	<b>Decarbonylative/Decarboxylative Borylation</b> .....	271
9.1	Synthesis of Boronic Species via Organic Halides as Intermediates .....	271
9.2	Decarbonylative Borylation of Esters, Amides, Thioesters, and Aroyl Halides ·	273
9.3	Decarboxylative Borylation of Alkyl Carboxylic Acids .....	284
9.3.1	Nickel-Catalyzed Reactions .....	284
9.3.2	Copper-Catalyzed Reactions .....	287
9.3.3	Photoredox-Mediated Reactions .....	290
9.3.4	Light-Induced Reactions .....	293
9.4	Decarboxylative Borylation of Aryl and Alkenyl Carboxylic Acids .....	295
9.4.1	Light-Induced Reactions .....	295
9.4.2	<i>tert</i> -Butyl Isonicotinate Catalyzed Reactions .....	298
9.5	Decarboxylative Borylation of Alkynyl Carboxylic Acids .....	300
9.6	Conclusions .....	301

<b>10</b>	<b>Borylation Reactions in Water</b> T. Kitanosono and S. Kobayashi	
<hr/>		
<b>10</b>	<b>Borylation Reactions in Water</b> .....	303
<b>10.1</b>	Miyaura Borylation in Water .....	303
<b>10.1.1</b>	Miyaura Borylation of Aryl Halides in Water .....	303
<b>10.1.2</b>	Miyaura Borylation of Arenediazonium Salts in Water .....	311
<b>10.1.3</b>	Miyaura Borylation of Alkyl Bromides in Water .....	313
<b>10.2</b>	Borane Addition to Alkynes in Water .....	314
<b>10.2.1</b>	Borane Addition to Acetylenic Esters or Amides in Water .....	314
<b>10.2.2</b>	Borane Addition to Aryl- and Alkylalkynes in Water .....	317
<b>10.3</b>	Borylation of Allylic Alcohols in Water .....	321
<b>10.4</b>	Ring-Opening Borylation in Water .....	323
<b>10.5</b>	Decarboxylative Borylation in Water .....	324
<b>10.6</b>	Addition of Boron to Double Bonds in Water .....	325
<b>10.6.1</b>	Addition to Double Bonds in Water Using N-Heterocyclic Carbene–Boranes ..	325
<b>10.6.2</b>	Addition to Double Bonds in Water Using Copper(II) Catalysis .....	327
<b>11</b>	<b>Nanocatalyzed Borylation Reactions</b> K. Geetharani and S. K. Bose	
<hr/>		
<b>11</b>	<b>Nanocatalyzed Borylation Reactions</b> .....	335
<b>11.1</b>	Nanocatalyzed Diboration .....	335
<b>11.1.1</b>	Diboration of Alkynes .....	336
<b>11.1.2</b>	Diboration of Alkenes .....	339
<b>11.1.3</b>	Diboration of Allenes .....	340
<b>11.2</b>	Nanocatalyzed Hydroboration .....	341
<b>11.2.1</b>	Hydroboration of Alkynes .....	341
<b>11.2.2</b>	Hydroboration of $\alpha,\beta$ -Unsaturated Ketones .....	344
<b>11.3</b>	Nanocatalyzed Silaboration .....	344
<b>11.3.1</b>	Silaboration of Alkynes .....	345
<b>11.3.2</b>	Silaboration of Strained Ethers .....	346
<b>11.3.3</b>	Silaboration of Allenes .....	347
<b>11.4</b>	Nanocatalyzed C–X Borylation .....	347
<b>11.4.1</b>	C–X Borylation of Aryl Halides .....	347
<b>11.4.2</b>	C–X Borylation of Alkyl Halides .....	348

11.5	Nanocatalyzed C–H Borylation .....	350
11.5.1	Benzylic C–H Borylation .....	350
11.5.2	C–H Borylation of Arenes .....	351
11.6	Conclusions and Future Perspectives .....	352
12	<b>Reactions through Radical Boryl Moieties</b> F.-L. Zhang and Y.-F. Wang	
12	<b>Reactions through Radical Boryl Moieties</b> .....	355
12.1	Boryl-Radical-Promoted Reduction Reactions .....	355
12.1.1	Reduction of Xanthates .....	355
12.1.2	Reduction of Organic Halides .....	357
12.1.3	Reduction of Organic Nitriles .....	359
12.1.4	Reduction of Thioamides .....	361
12.1.5	Coupling of Pyridine-4-carbonitrile with Radical Acceptors .....	364
12.2	Boryl Radicals in the Synthesis of Organoboron Compounds .....	365
12.2.1	Radical Borylative Cyclizations for the Synthesis of Boron-Containing Cyclic Molecules .....	365
12.2.1.1	Radical Borylative Cyclizations of 1,6-Enynes .....	365
12.2.1.2	Radical Borylative Cyclizations of Diynes .....	367
12.2.1.3	Radical Borylative Cyclizations of 1,6-Dienes .....	369
12.2.1.4	Radical Borylative Cyclizations of <i>N</i> -Allylcyanamides .....	371
12.2.1.5	Radical Borylative Cyclizations of Propargyl Acetates .....	373
12.2.2	Radical Hydroboration Reactions .....	374
12.2.2.1	Radical Hydroboration of Imines .....	374
12.2.2.2	Radical Hydroboration of Alkynes .....	375
12.2.2.3	Radical Hydroboration of $\alpha,\beta$ -Unsaturated Carbonyl Compounds .....	376
12.2.3	Radical Borylation Using Diboron Reagents .....	378
12.2.3.1	Radical Deaminative Borylation .....	378
12.2.3.2	Radical Borylation of Organic Halides .....	383
12.2.3.3	Radical Decarboxylative Borylation of Carboxylic Acid Derivatives .....	385
12.2.3.4	Radical Demethylative Borylation of Methylarenes .....	388
12.2.3.5	Radical 1,2-Carboboration of Alkenes .....	389
12.3	Conclusions .....	391

<b>13</b>	<b>Boron “Ate” Complexes for Asymmetric Synthesis</b> S. G. Aiken, J. M. Bateman, and V. K. Aggarwal
