

Base-Metal Catalysis 1

	Preface	V
	Abstracts	IX
	Table of Contents	XXIII
1	Introduction N. Yoshikai ^{ib}	1
1.1	Modern Ullmann-Type Couplings J. Huang ^{ib} and D. Ma ^{ib}	5
1.2	Copper(I) Hydride Catalyzed Transformations T. Xiong ^{ib} and Y. Li	33
1.3	Copper-Catalyzed Alkene Difunctionalization S. R. Chemler ^{ib} and J. J. Kennedy-Ellis ^{ib}	57
1.4	Copper-Catalyzed C–H Functionalization via Radicals P. Chen ^{ib} and G. Liu ^{ib}	113
1.5	Copper-Catalyzed Directed C–H Functionalization H. Xu and H.-X. Dai ^{ib}	143
1.6	Copper-Catalyzed Acidic C–H Functionalization Y. Shang ^{ib} , Y. Ren ^{ib} , and W. Su ^{ib}	219
1.7	Copper-Catalyzed/Mediated Trifluoromethylation and other Fluoroalkylations Y. Ouyang ^{ib} , J.-Y. Shou, and F.-L. Qing ^{ib}	245
1.8	Copper-Catalyzed Aerobic Oxidation of Alcohols Y. Sasano ^{ib} and Y. Iwabuchi ^{ib}	325
1.9	Base-Metal-Catalyzed Carboxylation Using Carbon Dioxide T. Fujihara ^{ib}	361
1.10	Nickel-Catalyzed Cross-Electrophile Coupling Reactions X.-Z. Shu ^{ib} and X. Pang	403
1.11	Nickel-Catalyzed Enantioselective Reductive Cross-Coupling Reactions C. Wang ^{ib} and F. Yang	447
1.12	Nickel-Catalyzed Alkene Dicarbofunctionalization B. C. Lee, L. Lin, C. Ko, and M. J. Koh ^{ib}	469

1.13	Nickel-Catalyzed Cross Coupling Involving Alkenes S. Zhu 	513
1.14	Nickel-Catalyzed Directed C–H Functionalization N. Chatani 	535
1.15	Nickel-Catalyzed Nondirected C–H Functionalization Y. Nakao 	555
1.16	Nickel-Catalyzed Bond Activation for Functional-Group Shuttling T. Delcaillau and B. Morandi 	577
1.17	Nickel-Catalyzed Cross Coupling via C–O and C–N Activation T. Yoshida and M. Tobisu 	591
	Author Index	631
	Abbreviations	653

Table of Contents

1	Introduction N. Yoshikai ^{1b}	
1	Introduction	1
1.1	Modern Ullmann-Type Couplings J. Huang ^{1b} and D. Ma ^{1b}	
1.1	Modern Ullmann-Type Couplings	5
1.1.1	Ligands and Mechanism	5
1.1.2	C–N Coupling Reactions with Nitrogen Nucleophiles	6
1.1.2.1	C–N Bond-Forming Reactions Involving Ammonia and Surrogates	6
1.1.2.1.1	Couplings with (Het)aryl Iodides and (Het)aryl Bromides	6
1.1.2.1.2	Couplings with (Het)aryl Chlorides	8
1.1.2.2	C–N Bond-Forming Reactions Involving Alkylamines	9
1.1.2.2.1	C–N Bond-Forming Reactions Involving Primary Alkylamines and Cyclic Secondary Alkylamines	9
1.1.2.2.2	C–N Bond-Forming Reactions Involving Acyclic Secondary Alkylamines	11
1.1.2.3	C–N Bond-Forming Reactions Involving Aryl- and Hetaryl amines	12
1.1.2.4	C–N Coupling Bond-Forming Reactions Involving N-Hetarenes	13
1.1.2.5	C–N Bond-Forming Reactions Involving Amides, Lactams, and Oxazolidinones	15
1.1.2.6	C–N Bond-Forming Reactions Involving Hydrazines	17
1.1.2.7	C–N Bond-Forming Reactions Involving Other Nitrogen Nucleophiles	19
1.1.3	C–O Coupling Reactions with Oxygen Nucleophiles	19
1.1.3.1	C–O Bond-Forming Reactions Involving Hydroxides	19
1.1.3.2	C–O Bond-Forming Reactions Involving Phenols	20
1.1.3.3	C–O Bond-Forming Reactions Involving Primary Alcohols	21
1.1.3.4	C–O Bond-Forming Reactions with Secondary Alcohols	22
1.1.4	C–S Coupling Reactions with Sulfur Nucleophiles	24
1.1.4.1	C–S Bond-Forming Reactions Involving Thiols	24
1.1.4.2	C–S Bond-Forming Reactions Involving Sulfinic Acid Salts	25
1.1.5	C–C Coupling Reactions with Active Methylene Compounds	25
1.1.5.1	Intermolecular Reactions	25
1.1.5.2	Intramolecular Reactions	27
1.1.6	C–X Coupling Reactions with Other Nucleophiles	28
1.1.7	Conclusions	29

1.2	Copper(I) Hydride Catalyzed Transformations T. Xiong ^{id} and Y. Li	
1.2	Copper(I) Hydride Catalyzed Transformations	33
1.2.1	Enantioselective Hydroamination	34
1.2.1.1	Asymmetric Hydroamination of Aryl-Substituted Alkenes	34
1.2.1.2	Asymmetric Hydroamination of Nonactivated Alkenes	36
1.2.1.3	Asymmetric Hydroamination of Alkynes	38
1.2.2	Enantioselective Hydrocarboxylation	39
1.2.2.1	Domino Reduction/Aldol Reaction of Michael Acceptors	39
1.2.2.2	Enantioselective Hydrocarboxylation of Alkenes	40
1.2.2.2.1	Enantioselective Addition of Alkene-Derived Nucleophiles to Ketones	40
1.2.2.2.2	Asymmetric Reductive Hydroxymethylation of Styrenes with Carbon Dioxide	41
1.2.2.2.3	Asymmetric Reductive Coupling of Vinylboronates to Aldehydes	42
1.2.2.2.4	Enantioselective Allylation of Ketones with 1,3-Dienes	44
1.2.2.2.5	Enantioselective Allylation of Ketones with Allene	45
1.2.2.3	Enantioselective Hydrocarboxylation of Alkynes	47
1.2.2.3.1	Enantioselective Hydroallylation of Alkynes	47
1.2.3	Enantioselective Hydroboration	48
1.2.3.1	Enantioselective Hydroboration of Styrenes	48
1.2.3.2	Enantioselective Hydroboration of Nonactivated 1,1-Disubstituted Alkenes	49
1.2.3.3	Enantioselective Hydroboration of Conjugated Enynes	51
1.2.4	Racemic Hydrofunctionalization	52
1.2.4.1	Racemic Reduction of Aldehydes or Ketones to Alcohols	52
1.2.4.2	Anti-Markovnikov Hydrobromination of Alkynes	53
1.2.5	Conclusions	55
1.3	Copper-Catalyzed Alkene Difunctionalization S. R. Chemler ^{id} and J. J. Kennedy-Ellis ^{id}	
1.3	Copper-Catalyzed Alkene Difunctionalization	57
1.3.1	Ring-Forming Alkene Difunctionalizations	58
1.3.1.1	Formation of Nitrogen Heterocycles	58
1.3.1.1.1	Aminoxygenation Initiated by Alkene Amidocupration	58
1.3.1.1.1.1	Aminoxygenation of Dienes	59
1.3.1.1.2	Carboamination Initiated by Amidocupration	61
1.3.1.1.3	Carboamination via Addition of Carbon Radicals to Alkenes	64
1.3.1.1.4	Diamination Initiated by Amidocupration	68

1.3.1.1.5	Diamination Initiated by Amidyl Radical Addition	71
1.3.1.1.6	Ring-Forming Hydroamination Initiated by Copper Hydride Addition	75
1.3.1.2	Formation of Oxygen Heterocycles: Cyclizations of Alkenols and Acids	76
1.3.1.2.1	Hydroetherification Initiated by Oxycupration	76
1.3.1.2.2	Carboetherification Initiated by Oxycupration	79
1.3.1.2.3	Carboetherification Initiated by Addition of Carbon Radicals to Alkenes	82
1.3.1.2.4	Ring-Forming Alkene Oxyamination	87
1.3.1.2.5	Oxysulfonylation Initiated by Addition of Sulfonyl Radicals to Alkenes	88
1.3.2	Alkene Difunctionalizations Forming Acyclic Products	90
1.3.2.1	Hydroamination Initiated by Copper Hydride Addition	90
1.3.2.2	Dicarbonylation	94
1.3.2.3	Carboamination	99
1.3.2.4	Carboetherification of Enamides and Dienes	105
1.3.2.5	Oxyamination of Styrenes and Dienes	108
1.3.3	Conclusions	109

1.4 Copper-Catalyzed C–H Functionalization via Radicals

P. Chen^{1b} and G. Liu^{1b}

1.4	Copper-Catalyzed C–H Functionalization via Radicals	113
1.4.1	Copper-Catalyzed C–H Cyanation	114
1.4.2	Copper-Catalyzed C–H Arylation	118
1.4.3	Copper-Catalyzed C–H Alkynylation	123
1.4.4	Copper-Catalyzed C–H Fluoroalkylation	127
1.4.5	Copper-Catalyzed C–H Amination	129
1.4.6	Copper-Catalyzed C–H Oxygenation	135
1.4.7	Copper-Catalyzed C–H Fluorination	136
1.4.8	Copper-Catalyzed C–H Sulfanylation and Selanylation	137

1.5 Copper-Catalyzed Directed C–H Functionalization

H. Xu and H.-X. Dai^{1b}

1.5	Copper-Catalyzed Directed C–H Functionalization	143
1.5.1	Copper-Catalyzed C–C Bond Formation	144
1.5.1.1	Coupling between C–H and C–H	144
1.5.1.2	Coupling between C–H and C–B	154
1.5.1.3	Coupling between C–H and R ¹ –CO ₂ H	156
1.5.1.4	Coupling between C–H and Unsaturated Bonds	159

1.5.1.5	Coupling between C—H and Isonitriles	162
1.5.2	Copper-Catalyzed C—CN Bond Formation	163
1.5.3	Copper-Catalyzed C—N Bond Formation	166
1.5.3.1	C—H Amination with Nucleophilic N—H Reagents	166
1.5.3.2	C—H Amination with N—O Reagents	183
1.5.3.3	C—H Amination/Azidation with Azides	186
1.5.3.4	C—H Nitration with Silver(I) Nitrate and Silver(I) Nitrite	188
1.5.4	Copper-Catalyzed C—O Bond Formation	189
1.5.5	Copper-Catalyzed C—S Bond Formation	195
1.5.5.1	Thioether Synthesis	195
1.5.5.2	Sulfone Synthesis	204
1.5.5.3	Synthesis of Sulfur-Containing Heterocycles	206
1.5.6	Copper-Catalyzed C—X Bond Formation (X = Halogen)	208
1.5.7	Copper-Catalyzed C—Si Bond Formation	211
1.5.8	Copper-Catalyzed C—P Bond Formation	213
1.5.9	Conclusions	214

1.6 Copper-Catalyzed Acidic C—H Functionalization

Y. Shang^{1b}, Y. Ren^{1b}, and W. Su^{1b}

1.6	Copper-Catalyzed Acidic C—H Functionalization	219
1.6.1	Carbonyl Compounds	221
1.6.1.1	α -Alkenylation of Aldehydes	221
1.6.1.2	α -Amination of Ketones, Esters, and Aldehydes	223
1.6.1.3	Desaturation-Induced Functionalization of Carbonyl Compounds	224
1.6.1.3.1	β -Functionalization of Ketones	224
1.6.1.3.2	Consecutive Dehydrogenation of Ketones and Aldehydes	226
1.6.1.3.3	Tandem Dehydrogenation and Annulation of Ketones	227
1.6.1.3.4	Desaturation of Lactones, Lactams, and Cyclic Ketones	228
1.6.2	Nitriles	229
1.6.2.1	C—H Alkylation of Nitriles Using Simple Alkenes	229
1.6.2.2	Cross-Dehydrogenative Coupling of Nitriles with Heterocycles	230
1.6.2.3	Cross-Dehydrogenative Cyanoalkylation of Allylic Systems	231
1.6.3	Nitroalkanes	232
1.6.3.1	Nitroalkane Benzoylation	232
1.6.3.2	Cross-Dehydrogenative-Coupling of Tertiary Amines and Nitroalkanes	233

1.6.4	Electron-Deficient Aromatic Compounds (Benzenes and Hetarenes)	234
1.6.4.1	C–H Amination of Electron-Deficient Hetarenes	234
1.6.4.2	C–H Alkynylation of Polyfluoroarenes	236
1.6.4.3	C–H Alkylation of Polyfluoroarenes	237
1.6.4.3.1	C–H/C–H Alkylation	237
1.6.4.3.2	C–H Alkylation of Polyfluoroarenes Using <i>N</i> -Tosylhydrazones and Diazo Compounds	239
1.6.4.4	Hydroxylation of Electron-Deficient Hetarenes	240
1.6.4.5	C–H/C–H Arylation of Hetarenes	241
1.7	Copper-Catalyzed/Mediated Trifluoromethylation and other Fluoroalkylations Y. Ouyang ^{1b} , J.-Y. Shou, and F.-L. Qing ^{1b}	
1.7	Copper-Catalyzed/Mediated Trifluoromethylation and other Fluoroalkylations	245
1.7.1	Copper-Catalyzed/Mediated Trifluoromethylation	245
1.7.1.1	Formation of C(sp ³)–CF ₃ Bonds	245
1.7.1.1.1	Trifluoromethylation of Prefunctionalized Alkanes	245
1.7.1.1.2	Direct Trifluoromethylation of C(sp ³)–H Bonds	251
1.7.1.1.3	Difunctionalization-Type Trifluoromethylation of Alkenes	260
1.7.1.1.4	Miscellaneous Methods for Formation of C(sp ³)–CF ₃ Bonds	272
1.7.1.2	Formation of C(sp ²)–CF ₃ Bonds	276
1.7.1.2.1	Trifluoromethylation of Prefunctionalized Arenes or Alkenes	276
1.7.1.2.2	Trifluoromethylation of C(sp ²)–H Bonds	284
1.7.1.2.3	Trifluoromethylation of Alkynes/Allenenes	289
1.7.1.3	Formation of C(sp)–CF ₃ Bonds	293
1.7.2	Copper-Catalyzed/Mediated Fluoroalkylation	296
1.7.2.1	Copper-Catalyzed/Mediated Difluoromethylation	296
1.7.2.1.1	Formation of C(sp ³)–CF ₂ H Bonds	296
1.7.2.1.2	Formation of C(sp ²)–CF ₂ H Bonds	306
1.7.2.2	Copper-Catalyzed/Mediated Trifluoromethylsulfanylation	309
1.7.2.2.1	Formation of C(sp ³)–SCF ₃ Bonds	309
1.7.2.2.2	Formation of C(sp ²)–SCF ₃ Bonds	314
1.7.3	Conclusions	321

1.8	Copper-Catalyzed Aerobic Oxidation of Alcohols Y. Sasano ^{id} and Y. Iwabuchi ^{id}	
1.8	Copper-Catalyzed Aerobic Oxidation of Alcohols	325
1.8.1	Nitroxyl Radicals as Catalysts for Alcohol Oxidation	327
1.8.2	Nitroxyl Radical/Copper Cooperative Catalysis	328
1.8.2.1	Oxidation of Primary Alcohols to Aldehydes	329
1.8.2.2	Oxidation of Secondary Alcohols to Ketones	335
1.8.3	Combination Reactions Involving Nitroxyl Radical/Copper-Catalyzed Aerobic Alcohol Oxidation	338
1.8.3.1	Lactone Synthesis	338
1.8.3.2	Oxalic Acid Diester Synthesis	341
1.8.3.3	Imine Synthesis	342
1.8.3.4	Nitrile Synthesis	343
1.8.3.5	Amide Synthesis	345
1.8.3.6	Imide Synthesis	349
1.8.4	Expanding the Substrate Scope of Nitroxyl Radical/Copper-Catalyzed Aerobic Alcohol Oxidation	352
1.8.4.1	Chemoselective Oxidation of Unprotected Amino Alcohols	352
1.8.4.2	Chemoselective Oxidation of Alcohols Bearing Divalent Sulfur Functionalities	354
1.8.5	Conclusions	356
1.9	Base-Metal-Catalyzed Carboxylation Using Carbon Dioxide T. Fujihara ^{id}	
1.9	Base-Metal-Catalyzed Carboxylation Using Carbon Dioxide	361
1.9.1	Copper-Catalyzed Carboxylation	361
1.9.1.1	Carboxylation of Unsaturated Hydrocarbons	361
1.9.1.1.1	Copper-Catalyzed Carboxylation of Alkynes	361
1.9.1.1.2	Copper-Catalyzed Carboxylation of Alkenes	364
1.9.1.1.3	Copper-Catalyzed Carboxylation of Dienes	365
1.9.1.2	Carboxylation of Organometallic Species	368
1.9.1.2.1	Copper-Catalyzed Carboxylation of Organoboron Compounds	368
1.9.1.3	Carboxylation of C–H Bonds	371
1.9.1.3.1	Copper-Catalyzed Carboxylation of C(sp) ³ –H Bonds	371
1.9.1.3.2	Copper-Catalyzed Carboxylation of C(sp ²)–H Bonds	373

1.9.2	Nickel-Catalyzed Carboxylation	374
1.9.2.1	Carboxylation of Unsaturated Hydrocarbons	374
1.9.2.1.1	Nickel-Catalyzed Carboxylation of Alkynes	374
1.9.2.1.2	Nickel-Catalyzed Carboxylation of Alkenes	377
1.9.2.1.3	Nickel-Catalyzed Carboxylation of Dienes	379
1.9.2.2	Carboxylation of Organometallic Species	382
1.9.2.2.1	Nickel-Catalyzed Carboxylation of Organoboron Compounds	382
1.9.2.2.2	Nickel-Catalyzed Carboxylation of Organozinc Compounds	383
1.9.2.3	Carboxylation of Organic Halides and Pseudohalides	384
1.9.2.3.1	Nickel-Catalyzed Carboxylation of Aryl Halides	384
1.9.2.3.2	Nickel-Catalyzed Carboxylation of Alkyl Halides	386
1.9.2.3.3	Nickel-Catalyzed Carboxylation of Aryl and Alkyl Pseudohalides	389
1.9.2.4	Carboxylation of Allylic Alcohols and Esters	391
1.9.3	Cobalt-Catalyzed Carboxylation	392
1.9.3.1	Cobalt-Catalyzed Carboxylation of Unsaturated Hydrocarbons	392
1.9.3.2	Cobalt-Catalyzed Carboxylation of Organic Halides and Pseudohalides	396
1.9.4	Conclusions	399

1.10 Nickel-Catalyzed Cross-Electrophile Coupling Reactions

X.-Z. Shu^{ib} and X. Pang

1.10	Nickel-Catalyzed Cross-Electrophile Coupling Reactions	403
1.10.1	C(sp ²)-C(sp ³) Coupling	404
1.10.1.1	Reactions of Alkyl Halides	404
1.10.1.2	Reactions of Acid Derivatives	411
1.10.1.2.1	Acylation Reactions	411
1.10.1.2.2	Alkylation Reactions	412
1.10.1.3	Deaminative Alkylation Using Amine Derivatives	413
1.10.1.4	Deoxygenative Alkylation Using Alcohols and Derivatives	416
1.10.2	C(sp ²)-C(sp ²) Coupling	423
1.10.3	C(sp ³)-C(sp ³) Coupling	428
1.10.4	Nickel Metallaphotocatalysis	430
1.10.5	Electrochemical Nickel Catalysis	435
1.10.6	Cross-Electrophile C-Si(Ge/Sn) Coupling	436
1.10.7	Conclusions	443

1.11	Nickel-Catalyzed Enantioselective Reductive Cross-Coupling Reactions C. Wang  and F. Yang	
1.11	Nickel-Catalyzed Enantioselective Reductive Cross-Coupling Reactions	447
1.11.1	Nickel-Catalyzed Enantioselective Reductive Cross Coupling between Two Organic Halides	448
1.11.1.1	Nickel-Catalyzed Enantioselective Reductive Cross Coupling of Acyl Chlorides with Benzyl Chlorides	448
1.11.1.2	Nickel-Catalyzed Enantioselective Reductive Cross Coupling of Vinyl Bromides with Benzyl Chlorides	449
1.11.1.3	Nickel-Catalyzed Asymmetric Reductive Cross Coupling of (Het)aryl Iodides with Benzyl Chlorides	451
1.11.2	Nickel-Catalyzed Enantioselective Reductive Cross Coupling of Vinyl Bromides with <i>N</i> -Hydroxyphthalimide Esters	452
1.11.3	Nickel-Catalyzed Asymmetric Reductive Cross Coupling of Hetaryl Iodides with α -Chloro Nitriles or α -Chloro Esters	452
1.11.4	Nickel-Catalyzed Enantioselective Reductive Ring-Opening Reactions	454
1.11.4.1	Nickel/Photo-Cocatalyzed Reductive Cross Coupling of Styrene Oxides with Aryl Iodides	455
1.11.4.2	Nickel-Catalyzed Reductive Cross Coupling of 2-Aryl- <i>N</i> -tosylaziridines with Aryl Iodides	456
1.11.4.3	Nickel-Catalyzed Asymmetric Reductive Ring Opening of Cyclobutanones with Alkyl Bromides	457
1.11.5	Nickel-Catalyzed Enantioselective Two-Component Reductive Difunctionalization of Alkenes	458
1.11.5.1	Nickel-Catalyzed Enantioselective Two-Component Reductive Diarylation of Alkenes	458
1.11.5.2	Nickel-Catalyzed Enantioselective Two-Component Reductive Arylalkylation of Alkenes	459
1.11.5.3	Nickel-Catalyzed Enantioselective Two-Component Reductive Arylbenzylation of Alkenes	460
1.11.5.4	Nickel-Catalyzed Enantioselective Two-Component Reductive Arylalkenylation of Alkenes	461
1.11.5.5	Nickel-Catalyzed Enantioselective Two-Component Reductive Divinylation of Alkenes	461
1.11.5.6	Nickel-Catalyzed Enantioselective Two-Component Reductive Carbamoylalkylation of Alkenes	462
1.11.5.7	Nickel-Catalyzed Enantioselective Diarylation of Vinylarenes	463

1.11.6	Nickel-Catalyzed Enantioselective Three-Component Reductive Dicarbonylation of Alkenes	464
1.11.6.1	Nickel-Catalyzed Enantioselective Three-Component Reductive Fluoroalkylation of Allyl Esters	464
1.11.6.2	Nickel-Catalyzed Enantioselective Three-Component Reductive Alkylarylation of Enamides	466
1.11.7	Conclusions	467
1.12	Nickel-Catalyzed Alkene Dicarbonylation B. C. Lee, L. Lin, C. Ko, and M. J. Koh ^{1b}	
1.12	Nickel-Catalyzed Alkene Dicarbonylation	469
1.12.1	Two-Component Dicarbonylation	471
1.12.1.1	Two-Component Redox-Neutral Dicarbonylation of Alkenes	471
1.12.1.2	Two-Component Reductive Dicarbonylation of Alkenes	475
1.12.1.3	Two-Component Enantioselective Dicarbonylation of Alkenes	480
1.12.1.4	Two-Component Nickel/Photoredox Dual-Catalyzed Dicarbonylation of Alkenes	484
1.12.2	Three-Component Dicarbonylation	490
1.12.2.1	Three-Component Nickel-Catalyzed Redox-Neutral Dicarbonylation of Alkenes	490
1.12.2.1.1	Three-Component Diarylation of Activated Alkenes with a Directing Group	490
1.12.2.1.2	Three-Component Redox-Neutral Alkylarylation of Unactivated Alkenes with a Directing Group	492
1.12.2.1.3	Three-Component Redox-Neutral Dialkylation of Unactivated Alkenes with a Directing Group	493
1.12.2.1.4	Three-Component Redox-Neutral Dicarbonylation of Unactivated Alkenes without Directing Groups	495
1.12.2.2	Three-Component Nickel-Catalyzed Reductive Dicarbonylation of Alkenes	497
1.12.2.2.1	Reductive Carboacylation of Alkenes with a Directing Group	497
1.12.2.2.2	Reductive Arylalkylation of Alkenes without a Directing Group	499
1.12.2.3	Three-Component Nickel-Catalyzed Enantioselective Dicarbonylation of Alkenes	501
1.12.2.3.1	Enantioselective Reductive Diarylation of Activated Alkenes	501
1.12.2.3.2	Enantioselective Reductive Diarylation of Unactivated Alkenes	503
1.12.2.4	Three-Component Nickel/Photoredox Dual-Catalyzed Dicarbonylation of Alkenes	505
1.12.3	Conclusions	511

1.13	Nickel-Catalyzed Cross Coupling Involving Alkenes S. Zhu 	
<hr/>		
1.13	Nickel-Catalyzed Cross Coupling Involving Alkenes	513
1.13.1	Nickel-Catalyzed (Remote) Hydrofunctionalization of Alkenes	513
1.13.1.1	Reductive (Remote) Hydrofunctionalization of Alkenes	513
1.13.1.1.1	Reductive (Remote) Hydroarylation	516
1.13.1.1.2	Reductive (Remote) Hydroalkylation	517
1.13.1.1.3	Reductive (Remote) Hydrocarboxylation	520
1.13.1.1.4	Reductive (Remote) Hydroamination	521
1.13.1.2	Redox-Neutral (Remote) Hydrofunctionalization of Alkenes	522
1.13.2	Nickel-Catalyzed (Migratory) Difunctionalization of Alkenes	523
1.13.2.1	Borofunctionalization of Alkenes	524
1.13.2.2	Dicarbonylation of Alkenes	526
1.13.2.2.1	<i>syn</i> -Insertion/Cross Coupling	526
1.13.2.2.2	Radical Addition/Cross Coupling	528
1.13.2.3	Aminative Functionalization of Alkenes	530
1.13.3	Conclusions	532
1.14	Nickel-Catalyzed Directed C–H Functionalization N. Chatani 	
<hr/>		
1.14	Nickel-Catalyzed Directed C–H Functionalization	535
1.14.1	Use of a Bidentate Directing Group	536
1.14.1.1	C–H Annulation with Alkynes	537
1.14.1.2	C–H Alkylation with Alkyl Halides	539
1.14.1.3	C–H Arylation with Aryl Iodides	541
1.14.1.4	C–H Alkynylation with Alkynyl Bromides	544
1.14.1.5	C–H Amination	545
1.14.2	Use of a Monodentate Directing Group	547
1.14.2.1	C–H Annulation with Alkynes	547
1.14.2.2	C–H Alkylation with Alkyl Halides	549
1.14.3	Conclusions	552

1.15 Nickel-Catalyzed Nondirected C–H FunctionalizationY. Nakao 

1.15	Nickel-Catalyzed Nondirected C–H Functionalization	555
1.15.1	C–C(sp ³) Bond Formation	555
1.15.1.1	C–H Activation/Alkylation with Alkyl Electrophiles or Nucleophiles	555
1.15.1.2	C–H Activation/Alkylation with Alkenes	556
1.15.1.3	C–H Activation/Alkylation with Carbenes	564
1.15.2	C–C(sp ²) Bond Formation	565
1.15.2.1	Hetarene C–H Activation	565
1.15.2.1.1	Alkenylation with Alkenyl Electrophiles	565
1.15.2.1.2	Alkenylation with Alkynes	566
1.15.2.1.3	Arylation with Aryl Electrophiles/Nucleophiles	570
1.15.3	C–C(sp) Bond Formation	572
1.15.3.1	C–H Activation/Alkynylation Reactions	572
1.15.4	C–H Borylation Reactions	573

1.16 Nickel-Catalyzed Bond Activation for Functional-Group ShuttlingT. Delcaillau and B. Morandi 

1.16	Nickel-Catalyzed Bond Activation for Functional-Group Shuttling	577
1.16.1	Development of Hydrogen Cyanide (HCN) Shuttle Reactions	578
1.16.1.1	Carbocyanation and the Emergence of Reversible C–CN Oxidative Addition ..	578
1.16.1.2	Transfer Hydrocyanation	580
1.16.2	Functional-Group Exchange	585
1.16.2.1	Reversible Metathesis between Aryl Sulfides and Aryl Nitriles	585
1.16.2.2	Non-Reversible Ester Transfer	588
1.16.2.3	Non-Reversible Sulfide Transfer	589

1.17 Nickel-Catalyzed Cross Coupling via C–O and C–N ActivationT. Yoshida and M. Tobisu 

1.17	Nickel-Catalyzed Cross Coupling via C–O and C–N Activation	591
1.17.1	C(aryl)–O Bond Cleavage	592
1.17.1.1	Aryl Esters and Carbamates	592
1.17.1.2	Aryl Ethers	606
1.17.2	C(benzyl)–O Bond Cleavage	613
1.17.2.1	Benzyl Esters and Carbamates	614
1.17.2.2	Benzyl Ethers	615

1.17.3	C(acyl)—O Bond Cleavage	616
1.17.4	C—N Bond Transformations	619
1.17.4.1	C(aryl)—N Bond Cleavage	620
1.17.4.2	C(acyl)—N Bond Cleavage	623
1.17.5	Conclusions	626
	Author Index	631
