## Table of Contents

### Introduction

T. J. J. Müller

---

Introduction .....	1
--------------------	---

### 1.1 Relative Reactivities of Functional Groups as the Key to Multicomponent Reactions

T. J. J. Müller

---

1.1 Relative Reactivities of Functional Groups as the Key to Multicomponent Reactions .....	5
1.1.1 Organic Reactivity .....	7
1.1.2 Selected Reactive Functionalities in Multicomponent Reactions .....	9
1.1.2.1 The Carbonyl Group: Gradual Transformations of an Electrophile .....	9
1.1.2.2 The Isocyanide: A Perfectly Suited Electronic Amphiphile .....	13
1.1.2.3 Generation and Transformation of Pericyclic Intermediates .....	15
1.1.2.4 Insertions Guide the Way to Catalytic Transition-Metal-Catalyzed Multicomponent Reactions .....	19
1.1.3 Types of Multicomponent Reactions .....	21
1.1.4 Diversity of Multicomponent Reactions .....	23

### 1.2 Reactions Involving a Carbonyl Compound as Electrophilic Component

---

#### 1.2.1 With an Amine or Analogue as One Nucleophilic Component

---

##### 1.2.1.1 Third Component 1,3-Dicarbonyl Compound (with Ureas: Biginelli Reaction)

V. A. Chebanov, N. Yu. Gorobets, and Yu. V. Sedash

---

1.2.1.1 Third Component 1,3-Dicarbonyl Compound (with Ureas: Biginelli Reaction) .....	29
1.2.1.1.1 Biginelli Heterocyclizations Catalyzed by Brønsted Acids .....	31
1.2.1.1.1.1 Classical Reaction .....	31
1.2.1.1.1.2 Reaction with Fluorinated $\beta$ -Dicarbonyl Compounds .....	36
1.2.1.1.1.3 Application of Lewis Acid Catalysis .....	37
1.2.1.1.1.4 Organosilicon Compounds as Biginelli Reaction Promoters .....	41
1.2.1.1.1.5 Application of Ionic Liquids .....	43

<b>1.2.1.1.4.1</b>	Ionic Liquid Mediated or Catalyzed Biginelli Reaction .....	43
<b>1.2.1.1.4.2</b>	Ionic Liquid Supported Biginelli Reaction .....	46
<b>1.2.1.1.5</b>	Application of Ultrasonication .....	48
<b>1.2.1.1.6</b>	Application of Microwave Irradiation .....	50
<b>1.2.1.1.7</b>	Polymer-Supported Biginelli-Type Heterocyclizations .....	52
<b>1.2.1.1.8</b>	Solvent-Free Biginelli-Type Heterocyclizations .....	54
<b>1.2.1.1.9</b>	Stereoselective Biginelli Heterocyclizations .....	56
<b>1.2.1.1.9.1</b>	Application of Chiral Metal Complexes .....	56
<b>1.2.1.1.9.2</b>	Application of Organocatalysts .....	57
<b>1.2.1.2</b>	<b>Third Component 1,3-Dicarbonyl Compound (with Ammonia or Amines: Hantzsch Pyridine Synthesis)</b>	
	J. J. Vanden Eynde and A. Mayence	
<b>1.2.1.2</b>	<b>Third Component 1,3-Dicarbonyl Compound (with Ammonia or Amines: Hantzsch Pyridine Synthesis) .....</b>	67
<b>1.2.1.2.1</b>	Mechanism, Relevant Modifications, and Scope .....	70
<b>1.2.1.2.2</b>	Preparation of Symmetrical 1,4-Dihydropyridines .....	71
<b>1.2.1.2.2.1</b>	Variations in the Solvent .....	73
<b>1.2.1.2.2.1.1</b>	Reactions in an Ionic Liquid .....	73
<b>1.2.1.2.2.1.2</b>	Reactions in a Fluorinated Solvent .....	74
<b>1.2.1.2.2.1.3</b>	Reactions in Water .....	75
<b>1.2.1.2.2.1.4</b>	Reactions in the Absence of Solvent .....	76
<b>1.2.1.2.2.2</b>	Variations in the Nitrogen Component .....	77
<b>1.2.1.2.2.3</b>	Variations in the Aldehyde Component and Use of Alternative Reagents .....	78
<b>1.2.1.2.3</b>	Preparation of Unsymmetrical 1,4-Dihydropyridines .....	79
<b>1.2.1.2.3.1</b>	Preparation of Diastereomeric Mixtures .....	79
<b>1.2.1.2.3.1.1</b>	Reactions in an Organic Solvent .....	80
<b>1.2.1.2.3.1.2</b>	Reactions in an Ionic Liquid .....	83
<b>1.2.1.2.3.1.3</b>	Reactions in Water .....	84
<b>1.2.1.2.3.1.4</b>	Reactions in the Absence of Solvent .....	85
<b>1.2.1.2.3.2</b>	Preparation of Enantiopure 1,4-Dihydropyridines .....	86
<b>1.2.1.2.3.2.1</b>	By Recrystallization or Chromatography .....	86
<b>1.2.1.2.3.2.2</b>	Using a Chiral Reagent .....	87
<b>1.2.1.2.3.2.3</b>	Using a Chiral Catalyst .....	89
<b>1.2.1.2.3.2.4</b>	By Enzymatic Resolution .....	90
<b>1.2.1.2.4</b>	Preparation of Isotopically Labeled 1,4-Dihydropyridines .....	90
<b>1.2.1.2.5</b>	Assisted Syntheses .....	90

1.2.1.2.5.1	Ultrasound-Assisted Syntheses .....	90
1.2.1.2.5.2	Microwave-Assisted Syntheses .....	90
1.2.1.2.5.3	Use of Immobilized Reagents and Combinatorial Approaches .....	91
1.2.1.2.5.4	Use of Baker's Yeast .....	93
1.2.1.3	<b>Third Component Cyanide (Strecker and Strecker-Type Reactions)</b>	
	M. Ayaz, F. De Moliner, G. A. Morales, and C. Hulme	
1.2.1.3	<b>Third Component Cyanide (Strecker and Strecker-Type Reactions) .....</b>	99
1.2.1.3.1	Classic Strecker Procedure .....	101
1.2.1.3.2	Strecker Reactions Employing Trimethylsilyl Cyanide .....	102
1.2.1.3.2.1	Uncatalyzed Strecker Reactions Employing Trimethylsilyl Cyanide .....	102
1.2.1.3.2.2	Lewis Acid Catalyzed Strecker Reactions Employing Trimethylsilyl Cyanide .....	103
1.2.1.3.2.3	Brønsted Acid Catalyzed Strecker Reactions Employing Trimethylsilyl Cyanide .....	103
1.2.1.3.2.4	Strecker Reactions Employing Trimethylsilyl Cyanide under Combined Brønsted/Lewis Acid Catalysis .....	104
1.2.1.3.3	Strecker Reactions Employing Other Cyanide Ion Sources .....	105
1.2.1.3.4	Asymmetric Strecker Reactions .....	106
1.2.1.3.4.1	Auxiliary-Controlled Asymmetric Strecker Reactions .....	107
1.2.1.3.4.2	Chiral Pool Approach .....	109
1.2.1.3.4.3	Metal 1,1'-Bi-2-naphtholate Catalysis .....	110
1.2.1.3.4.4	Organocatalytic Asymmetric Strecker Reactions .....	111
1.2.1.3.4.4.1	Brønsted Acids as Organocatalysts .....	112
1.2.1.3.4.4.2	Chiral Thioureas as Organocatalysts .....	112
1.2.1.3.4.5	Summary and Outlook of Asymmetric Strecker Reactions .....	113
1.2.1.3.5	Strecker-Type Reactions .....	114
1.2.1.3.5.1	Oxidative Strecker Reactions .....	114
1.2.1.3.5.2	Porta Radical-Type Strecker Reactions .....	115
1.2.1.3.5.3	Three-Center Five-Component Sequential Strecker-like/Strecker Reactions .....	116
1.2.1.3.5.4	Bucherer–Bergs Hydantoin Synthesis .....	118
1.2.1.3.5.5	Reissert Reactions .....	119
1.2.1.4	<b>Third Component Enolizable Carbonyl Compound (Mannich Reaction)</b>	
	L. Bernardi and A. Ricci	
1.2.1.4	<b>Third Component Enolizable Carbonyl Compound (Mannich Reaction) .....</b>	123
1.2.1.4.1	Indirect Mannich Reactions .....	125
1.2.1.4.1.1	Lewis Acid Catalyzed Indirect Mannich Reaction .....	125

<b>1.2.1.4.1.2</b>	Lewis Acid Catalyzed Indirect Vinylogous Mannich Reaction .....	129
<b>1.2.1.4.1.3</b>	Brønsted Acid Catalyzed Indirect Mannich Reaction .....	130
<b>1.2.1.4.1.4</b>	Brønsted Acid Catalyzed Indirect Enantioselective Mannich Reaction .....	132
<b>1.2.1.4.1.5</b>	Brønsted Acid Catalyzed Indirect Enantioselective Vinylogous Mannich Reaction .....	133
<b>1.2.1.4.2</b>	Direct Mannich Reaction .....	135
<b>1.2.1.4.2.1</b>	Lewis Acid Catalyzed Direct Mannich Reaction .....	135
<b>1.2.1.4.2.2</b>	Brønsted Acid Catalyzed Direct Mannich Reaction .....	138
<b>1.2.1.4.2.3</b>	Brønsted Acid Catalyzed Direct Enantioselective Mannich Reaction .....	140
<b>1.2.1.4.2.4</b>	$\alpha$ -Amino Acid Catalyzed Direct Enantioselective Mannich Reaction with Acetone as Donor .....	141
<b>1.2.1.4.2.5</b>	$\alpha$ -Amino Acid Catalyzed Direct Enantioselective Mannich Reaction with Hydroxyacetone as Donor .....	142
<b>1.2.1.4.2.6</b>	$\alpha$ -Amino Acid Catalyzed Direct Enantioselective Mannich Reaction with Cyclic Ketones as Donors .....	145
<b>1.2.1.4.2.7</b>	$\alpha$ -Amino Acid Catalyzed Direct Enantioselective Mannich Reaction with Aldehydes as Donors .....	147
<b>1.2.1.4.2.8</b>	$\alpha$ -Amino Acid Catalyzed Direct $\alpha$ -Aminomethylation of Ketones .....	148
<b>1.2.1.4.2.9</b>	$\alpha$ -Amino Acid Catalyzed Direct Enantioselective $\alpha$ -Aminomethylation of Cyclic Enones Followed by Ring Closure .....	149
<b>1.2.1.4.3</b>	Mannich Reactions Using Unconventional Methodologies .....	150
<b>1.2.1.4.3.1</b>	Ionic Liquid Catalyzed Mannich Reaction .....	151
<b>1.2.1.4.3.2</b>	Ultrasound-Promoted Mannich Reaction .....	152
<b>1.2.1.4.3.3</b>	Water-Promoted Mannich Reaction .....	153
<b>1.2.1.4.3.4</b>	Mannich Reaction in Ammonia Solution .....	153
<b>1.2.1.4.4</b>	Mannich-Type Addition of Naphthols: The Betti Reaction .....	154
<b>1.2.1.4.4.1</b>	Betti Reaction in Alcoholic Solvents .....	155
<b>1.2.1.4.4.2</b>	Solvent-Free Betti Reaction .....	157
<b>1.2.1.4.4.3</b>	Betti Reaction in Water .....	159
<b>1.2.1.4.4.4</b>	Lewis Acid Catalyzed Betti Reaction .....	161
<b>1.2.1.5</b>	<b>Third Component Metal Alkyl or Aryl</b>	
	E. Le Gall	
<b>1.2.1.5</b>	<b>Third Component Metal Alkyl or Aryl</b> .....	165
<b>1.2.1.5.1</b>	Reactions of Arylmetal Reagents .....	166
<b>1.2.1.5.1.1</b>	Arylmagnesium and Aryllithium Reagents .....	166
<b>1.2.1.5.1.2</b>	Arylzinc Reagents .....	166
<b>1.2.1.5.1.2.1</b>	Reactions with Aromatic Aldehydes .....	167

---

<b>1.2.1.5.1.2.2</b>	Reactions with Paraformaldehyde .....	168
<b>1.2.1.5.2</b>	Reactions of Benzylmetal Reagents .....	170
<b>1.2.1.5.2.1</b>	Benzylmagnesium Reagents .....	170
<b>1.2.1.5.2.2</b>	Benzylzinc Reagents .....	170
<b>1.2.1.5.2.2.1</b>	Preformed Benzylzinc Reagents .....	170
<b>1.2.1.5.2.2.2</b>	In Situ Generated Benzylzinc Reagents .....	172
<b>1.2.1.5.3</b>	Reactions of Allylmetal Reagents .....	173
<b>1.2.1.5.3.1</b>	Allylzinc Reagents .....	173
<b>1.2.1.5.3.2</b>	Allylindium Reagents .....	174
<b>1.2.1.5.3.2.1</b>	Reaction with Primary Amines .....	174
<b>1.2.1.5.3.2.2</b>	Reaction with Secondary Amines .....	175
<b>1.2.1.5.3.3</b>	Allyltin Reagents .....	176
<b>1.2.1.5.4</b>	Reactions of Alkynylmetal Reagents .....	177
<b>1.2.1.5.4.1</b>	Alkynylcopper Reagents .....	178
<b>1.2.1.5.4.2</b>	Alkynylgold Reagents .....	179
<b>1.2.1.5.4.3</b>	Alkynylmetal Reagent and Chiral Ligand .....	180
<b>1.2.1.5.5</b>	Reactions of Alkylmetal Reagents .....	181
<b>1.2.1.5.5.1</b>	Alkylzinc Reagents .....	181
<b>1.2.1.5.5.2</b>	Alkylinium Reagents .....	183
<b>1.2.1.5.6</b>	Reactions of $\alpha$ -Metalated Carbonyl Compounds .....	184
<b>1.2.1.5.6.1</b>	Organozinc Reagents .....	184
<b>1.2.1.5.6.2</b>	Organoindium Reagents .....	185
<b>1.2.1.6</b>	<b>Third Component Alkyne</b>	
	W.-J. Yoo, L. Zhao, and C.-J. Li	
<b>1.2.1.6</b>	<b>Third Component Alkyne</b> .....	189
<b>1.2.1.6.1</b>	Alkynylation Involving Primary Amines .....	190
<b>1.2.1.6.2</b>	Alkynylation Involving Secondary Amines .....	193
<b>1.2.1.6.3</b>	Asymmetric Coupling Reactions .....	198
<b>1.2.1.6.4</b>	Coupling in Tandem Processes .....	203
<b>1.2.1.7</b>	<b>Third Component Boronic Acid (Petasis Reaction)</b>	
	B. Carboni and F. Berrée	
<b>1.2.1.7</b>	<b>Third Component Boronic Acid (Petasis Reaction)</b> .....	219
<b>1.2.1.7.1</b>	Reaction of Glyoxylic Acid and Derivatives .....	220
<b>1.2.1.7.1.1</b>	With Alkyl-, Aryl-, and Hetarylaminies .....	220

---

<b>1.2.1.7.1.2</b>	With 2-Amino Alcohols and 1,2-Diamines .....	223
<b>1.2.1.7.1.3</b>	With Carboxylic Amino Acids, Amino Acid Esters, and Phosphonic Analogues .....	224
<b>1.2.1.7.1.4</b>	With Hydroxylamines, Hydrazines, and Derivatives .....	225
<b>1.2.1.7.1.5</b>	With N-Sulfinyl-Protected Amines .....	227
<b>1.2.1.7.2</b>	Reaction of Glyoxal and Derivatives .....	228
<b>1.2.1.7.2.1</b>	With 2-Amino Alcohols .....	229
<b>1.2.1.7.2.2</b>	With Diamines .....	231
<b>1.2.1.7.3</b>	Reaction of Glycolaldehyde and Other $\alpha$ -Hydroxyaldehydes .....	232
<b>1.2.1.7.3.1</b>	With Alkyl- and Arylamines .....	232
<b>1.2.1.7.3.2</b>	With Amino Acids and Derivatives .....	236
<b>1.2.1.7.3.3</b>	With Hydrazides .....	238
<b>1.2.1.7.4</b>	Reaction of Salicylaldehyde and Derivatives .....	240
<b>1.2.1.7.5</b>	Solid-Supported Synthesis .....	244
<b>1.2.1.7.6</b>	Related Reactions .....	248
<b>1.2.1.7.7</b>	Catalytic Enantioselective Reactions .....	254
 <b>1.2.1.8</b>	<b>Third Component Sulfur (Willgerodt–Kindler Reaction)</b>	
	Y. Huang and A. Dömling
