

# Photocatalysis in Organic Synthesis

	<b>Preface</b> .....	V
	<b>Abstracts</b> .....	IX
	<b>Table of Contents</b> .....	XXIII
<b>1</b>	<b>Introduction</b> B. König .....	1
<b>2</b>	<b>Photocatalysis: The Principles</b> F. Gaida, A. G. Griesbeck, and M. Vollmer .....	3
<b>3</b>	<b>Practical Aspects of Photocatalysis</b> E. Speckmeier and K. Zeitler .....	101
<b>4</b>	<b>Photocatalytic Oxidative C—C Bond Formation</b> G. Pandey and R. Laha .....	133
<b>5</b>	<b>Decarboxylative Coupling Reactions</b> Q.-Q. Zhou, Y. Wei, L.-Q. Lu, and W.-J. Xiao .....	167
<b>6</b>	<b>Proton-Coupled Electron Transfer</b> S. M. Thullen, M. A. Ashley, and T. Rovis .....	219
<b>7</b>	<b>Organocatalysis with Amines in Photocatalysis</b> Y. P. Rey, H. B. Hepburn, and P. Melchiorre .....	243
<b>8</b>	<b>Copper-Based Photocatalysts for Visible-Light-Mediated Organic Transformations</b> P. Ehrnsberger and O. Reiser .....	271
<b>9</b>	<b>Gold in Photocatalysis</b> M. N. Hopkinson and S. Dix .....	297
<b>10</b>	<b>Palladium in Photocatalysis</b> M. Wang, P. Li, and L. Wang .....	317
<b>11</b>	<b>Nickel in Photocatalysis</b> C. B. Kelly, J. K. Matsui, J. P. Phelan, Á. Gutiérrez Bonet, S. B. Lang, and G. A. Molander .....	339
<b>12</b>	<b>Acridinium Dyes and Quinones in Photocatalysis</b> M. Brasholz .....	371

---

13	<b>Flavins in Photocatalysis</b> J. B. Metternich, R. J. Mudd, and R. Gilmour .....	391
14	<b>Organic Dyes in Photocatalytic Reductive C–H Arylations</b> I. Ghosh .....	405
15	<b>Silicates in Photocatalysis</b> V. Corcé, C. Lévêque, C. Ollivier, and L. Fensterbank .....	427
16	<b>Photocatalytic Cycloadditions</b> A. G. Amador, S. O. Scholz, K. L. Skubi, and T. P. Yoon .....	467
17	<b>Photocatalytic Carbon–Heteroatom Bond Formation</b> A. Ruffoni and D. Leonori .....	517
18	<b>Photocatalytic Introduction of Fluorinated Groups</b> T. Koike and M. Akita .....	559
19	<b>Heterogeneous Photocatalysis in Organic Synthesis</b> J. Albero and H. García .....	575
20	<b>Photocatalysis in the Pharmaceutical Industry</b> D. A. DiRocco and D. M. Schultz .....	611
	<b>Keyword Index</b> .....	637
	<b>Author Index</b> .....	669
	<b>Abbreviations</b> .....	693

## Table of Contents

<b>1</b>	<b>Introduction</b> B. König	
<b>1</b>	<b>Introduction</b> .....	<b>1</b>
<b>2</b>	<b>Photocatalysis: The Principles</b> F. Gaida, A. G. Griesbeck, and M. Vollmer	
<b>2</b>	<b>Photocatalysis: The Principles</b> .....	<b>3</b>
<b>2.1</b>	Basic Ideas .....	<b>3</b>
<b>2.1.1</b>	Photochemical Concepts, Laws, and Rules .....	<b>4</b>
<b>2.1.2</b>	Energetic Considerations: Donor and Acceptor Properties .....	<b>7</b>
<b>2.1.3</b>	Photophysical and Photochemical Processes: General Principles .....	<b>9</b>
<b>2.1.4</b>	Violation of Laws and Rules .....	<b>12</b>
<b>2.2</b>	Light Sources: Sun, Lamps, and Lasers .....	<b>13</b>
<b>2.3</b>	Photochemical Reactors: Side-on, Immersion, Batch, Flow, and Microreactors	<b>16</b>
<b>2.4</b>	Chemical Yields, Quantum Yields, and Quantum Efficiencies .....	<b>17</b>
<b>2.5</b>	Solvents and Excited State–Solvent Interactions .....	<b>21</b>
<b>2.6</b>	Excited-State–Ground-State Interaction Kinetics .....	<b>23</b>
<b>2.7</b>	Spin Photochemistry: Reactivity and Selectivity Depends on Excited-State Spin Multiplicity .....	<b>27</b>
<b>2.7.1</b>	Spin Titration .....	<b>30</b>
<b>2.8</b>	What is Photocatalysis? .....	<b>32</b>
<b>2.8.1</b>	Electron-Transfer Photocatalysis (Photoinduced Electron Transfer): Photoredox Catalysis .....	<b>33</b>
<b>2.8.2</b>	Electron-Transfer-Induced Semiconductor Catalysis .....	<b>36</b>
<b>2.8.3</b>	Hydrogen-Atom-Transfer Photocatalysis .....	<b>37</b>
<b>2.9</b>	Data from Electrochemistry: The Electrochemical Gap and Use of Redox Potentials .....	<b>38</b>
<b>2.9.1</b>	Relevant Photoinduced Electron-Transfer Catalysts in Photoredox Chemistry ..	<b>39</b>
<b>2.9.2</b>	Relevant Electron Acceptors in Photoredox Chemistry .....	<b>39</b>
<b>2.9.3</b>	Relevant Electron Donors in Photoredox Chemistry .....	<b>40</b>
<b>2.9.4</b>	Mesolysis: A Key Step in Photoinitiated Redox Chemistry .....	<b>42</b>
<b>2.10</b>	Performing and Analyzing Photochemical Processes: A Recipe for Success ....	<b>42</b>
<b>2.11</b>	Case Studies for Photocatalysis .....	<b>43</b>
<b>2.11.1</b>	Case Study I: Photocatalytic Decarboxylation .....	<b>44</b>
<b>2.11.1.1</b>	<i>N</i> -(Acyloxy)phthalimide Esters .....	<b>45</b>

2.11.1.1.1	Photodecarboxylation with Activated Esters and Sacrificial Additives	46
2.11.1.1.2	Photodecarboxylation with Activated Esters but without Sacrificial Additives	47
2.11.1.2	Nonactivated Carboxylic Acids	48
2.11.1.2.1	Photodecarboxylation with Sacrificial Additives	48
2.11.1.2.2	Photodecarboxylation without Sacrificial Additives	50
2.11.1.2.3	Photodecarboxylation with Singlet Oxygen as a Sacrificial Electron Acceptor	51
2.11.1.2.4	A Coupling Partner Regenerates the Transformed Catalyst	52
2.11.1.3	Sequential Double Decarboxylation	53
2.11.1.3.1	Double Decarboxylation; First Reductive, Then Oxidative	54
2.11.1.3.2	Radical Formation by Twofold Decarboxylation from Oxalic Acid Monoesters	55
2.11.1.4	Decarboxylation by Dual Photoredox Catalysis	56
2.11.1.5	Photoredox Catalysis Followed by Decarboxylation	57
2.11.1.6	Photocatalysis Merged with Metal Catalysis	59
2.11.1.6.1	Photoredox Catalysis Coupled to a Secondary Nickel-Mediated Cross-Coupling Cycle	59
2.11.1.6.2	Secondary Copper Cycle for Enantioselective Coupling Reactions	60
2.11.1.6.3	Titanium(IV) Oxide Semiconductor Catalysis Coupled with Nickel Catalysis	61
2.11.1.6.4	Photocatalyst and Palladium-Mediated Cross Coupling Connected by Oxygen	62
2.11.1.7	Photoredox-Initiated Carboxylation: The Other Way Around	63
2.11.2	Case Study II: Photocatalytic Fluorination/Fluoroalkylation	64
2.11.2.1	Fluoroalkylation Methods	66
2.11.2.2	Trifluoromethylation	66
2.11.2.3	Difluoroalkylation	76
2.11.2.4	Perfluoroalkylation	79
2.11.2.5	Other Fluoroalkylation Reactions	81
2.11.2.6	Direct Photocatalytic Monofluorination	82
2.11.3	Case Study III: Photocatalytic Oxygenation	85
2.11.3.1	Triplet Oxygen Trapping of Photogenerated Radicals (Type I)	86
2.11.3.2	Trapping of Photogenerated Radical Cations (Types I/III)	88
2.11.3.3	Trapping of Photogenerated Biradicals (Type I)	88
2.11.3.4	Superoxide Radical Anion Generation and Reactions (Type III)	89
2.11.3.5	Generation of Singlet Oxygen and Its Reactions (Type II)	91

<b>3</b>	<b>Practical Aspects of Photocatalysis</b> E. Speckmeier and K. Zeitler	
<b>3</b>	<b>Practical Aspects of Photocatalysis</b> .....	101
<b>3.1</b>	Light Sources .....	101
<b>3.1.1</b>	Compact Fluorescent Lamps .....	102
<b>3.1.2</b>	LEDs (Light-Emitting Diodes) .....	103
<b>3.1.3</b>	Ultraviolet Lamps .....	106
<b>3.1.4</b>	Lasers .....	106
<b>3.1.5</b>	Irradiation with Cut-off Filters .....	106
<b>3.2</b>	Photoreactions in Batch .....	108
<b>3.2.1</b>	Limitations of Batch Methods .....	109
<b>3.2.2</b>	Different Irradiation Approaches for Batch Reactions .....	110
<b>3.3</b>	Photoreactions in Flow .....	116
<b>3.3.1</b>	Advantages of Flow Systems for Photocatalytic Reactions .....	116
<b>3.3.2</b>	Construction Designs for Flow Reactors in Photochemistry .....	117
<b>3.3.3</b>	Up-Scaling .....	118
<b>3.3.4</b>	Photoflow Reactors for Special Applications .....	119
<b>3.4</b>	Specialized Irradiation Equipment .....	121
<b>3.4.1</b>	Irradiation inside NMR Tubes .....	121
<b>3.4.2</b>	Irradiation inside EPR Tubes .....	122
<b>3.4.3</b>	Irradiation inside Autoclave Reactors .....	122
<b>3.4.4</b>	Irradiation inside a Vibration Ball Mill .....	123
<b>3.5</b>	Techniques for the Determination of Quantum Yields of Photocatalytic Reactions .....	124
<b>3.5.1</b>	Quantum Yield Determination by Standard Ferrioxalate Actinometry .....	125
<b>3.5.2</b>	Quantum Yield Determination in Photoflow Setups .....	126
<b>3.5.3</b>	Quantum Yield Determination by a Physical Device Using Solar Cells .....	126
<b>3.6</b>	Additional Mechanistic Tools for Photocatalytic Reactions .....	128
<b>3.6.1</b>	Trapping Experiments .....	128
<b>3.6.2</b>	Electrochemical Characterization .....	128
<b>3.6.3</b>	Quenching Experiments .....	128

<b>4</b>	<b>Photocatalytic Oxidative C—C Bond Formation</b> G. Pandey and R. Laha	
<b>4</b>	<b>Photocatalytic Oxidative C—C Bond Formation</b> .....	133
<b>4.1</b>	Reactive Intermediates in the Photoredox Oxidation of Tertiary Amines .....	133
<b>4.2</b>	C—C Bond-Forming Reactions Involving Iminium Ion Intermediates .....	134
<b>4.2.1</b>	Photocatalytic Aza-Henry Reaction .....	134
<b>4.2.2</b>	Photocatalytic Mannich Reaction .....	137
<b>4.2.3</b>	Photocatalytic Friedel–Crafts Reaction .....	138
<b>4.2.4</b>	Photocatalytic Strecker Reaction .....	140
<b>4.2.5</b>	Photocatalytic $\alpha$ -Addition of Malonates to Tertiary Amines .....	142
<b>4.2.6</b>	Photocatalytic Sakurai Reaction .....	143
<b>4.3</b>	$\alpha$ -Aminoalkyl Radical Intermediates in C—C Bond Formation .....	144
<b>4.3.1</b>	Addition of $\alpha$ -Aminoalkyl Radicals to Alkenes .....	144
<b>4.3.2</b>	Coupling of $\alpha$ -Aminoalkyl Radicals with Carbon-Centered Radicals .....	151
<b>4.3.3</b>	Intramolecular Addition of $\alpha$ -Aminoalkyl Radicals to Carbonyl Groups .....	155
<b>4.3.4</b>	Coupling of $\alpha$ -Aminoalkyl Radicals with Arene Radical Anions .....	156
<b>4.3.5</b>	Photocatalytic $\alpha$ -Hetarylation of Tertiary Amines .....	157
<b>4.4</b>	Photocatalytic Oxidative C—C Bond Formation via Arene Radical Cation Intermediates .....	160
<b>5</b>	<b>Decarboxylative Coupling Reactions</b> Q.-Q. Zhou, Y. Wei, L.-Q. Lu, and W.-J. Xiao	
<b>5</b>	<b>Decarboxylative Coupling Reactions</b> .....	167
<b>5.1</b>	Visible-Light-Mediated Radical Decarboxylative Coupling Reactions of Carboxylic Acids .....	168
<b>5.1.1</b>	Carbon—Carbon Bond Formation .....	168
<b>5.1.1.1</b>	Decarboxylative Arylation Reactions .....	168
<b>5.1.1.2</b>	Decarboxylative Vinylation Reaction .....	173
<b>5.1.1.3</b>	Decarboxylative Alkynylation Reaction .....	178
<b>5.1.1.4</b>	Decarboxylative Alkylation Reaction .....	187
<b>5.1.1.5</b>	Decarboxylative Cyanation Reaction .....	193
<b>5.1.2</b>	Carbon—Heteroatom Bond Formation .....	195
<b>5.1.2.1</b>	Decarboxylative Amination .....	195
<b>5.1.2.2</b>	Decarboxylative Fluorination and Di-/Trifluoromethylsulfanylation .....	199
<b>5.1.2.3</b>	Decarboxylative Halogenation and Hydroxylation .....	203
<b>5.1.3</b>	Decarboxylative Reduction .....	204

5.2	Visible-Light-Mediated Reductive Decarboxylative Coupling Reactions of Carboxylic Acid Derivatives .....	206
5.3	Conclusions .....	216

## 6 Proton-Coupled Electron Transfer

S. M. Thullen, M. A. Ashley, and T. Rovis

6	<b>Proton-Coupled Electron Transfer</b> .....	219
6.1	Proton-Coupled Electron Transfer for Ketyl Radical Generation .....	220
6.1.1	Intramolecular Ketyl–Alkene Cyclizations .....	220
6.1.2	Intramolecular Asymmetric Aza-Pinacol Reaction .....	224
6.1.3	Homodimerization of Ketyl Radical Derivatives .....	225
6.1.4	Fragmentation of Quaternary Center Alkoxy Groups for Ketone Formation ...	226
6.1.4.1	Fragmentation of Quaternary Center Alcohols with Hydrogen-Atom Trapping	227
6.1.4.2	Fragmentation of Quaternary Center Alcohols with Halogen Trapping .....	228
6.2	Proton-Coupled Electron Transfer for Amidyl Radical Formation .....	229
6.2.1	Oxidative Alkene Carboamination Enabled by PCET .....	229
6.2.2	Hydroamination of Alkenes .....	231
6.2.2.1	Intramolecular Hydroamidation of Alkenes .....	232
6.2.2.2	Intermolecular Hydroamidation of Alkenes .....	235
6.2.3	Catalytic C–C Bond Formation at Unactivated C(sp <sup>3</sup> )–H Bonds .....	237
6.2.4	Asymmetric Radical $\beta$ -Amination .....	240

## 7 Organocatalysis with Amines in Photocatalysis

Y. P. Rey, H. B. Hepburn, and P. Melchiorre

7	<b>Organocatalysis with Amines in Photocatalysis</b> .....	243
7.1	$\alpha$ -Functionalization of Carbonyl Compounds via Enamine-Mediated Catalysis	245
7.1.1	$\alpha$ -Alkylation of Aldehydes with Alkyl Halides Using an External Photocatalyst	246
7.1.1.1	Use of a Ruthenium-Based Photoredox Catalyst .....	246
7.1.1.2	Use of Alternative Photoredox Catalysts .....	248
7.1.1.3	Use of Different Radical Precursors .....	249
7.1.1.4	Formation of Quaternary Carbon Stereocenters .....	250
7.1.2	$\alpha$ -Alkylation of Aldehydes with Styrenes .....	252
7.1.3	$\alpha$ -Alkylation of Aldehydes with Alkyl Halides without an External Photocatalyst	253
7.1.3.1	Photochemical Activity of Enamine-Based Electron Donor–Acceptor Complexes .....	254
7.1.3.2	Direct Photoexcitation of Enamines .....	256
7.2	$\beta$ -Functionalization of Carbonyl Compounds .....	257

7.2.1	$\beta$ -Functionalization of Saturated Carbonyl Compounds via Enamine-Mediated Catalysis .....	258
7.2.2	$\beta$ -Functionalization of Unsaturated Carbonyl Compounds via Iminium-Ion-Mediated Catalysis .....	261
7.2.2.1	Combining Iminium Ion and Photoredox Catalysis .....	261
7.2.2.2	Direct Excitation of Chiral Iminium Ions .....	265
8	<b>Copper-Based Photocatalysts for Visible-Light-Mediated Organic Transformations</b> P. Ehrnsberger and O. Reiser	
8	<b>Copper-Based Photocatalysts for Visible-Light-Mediated Organic Transformations</b> .....	271
8.1	Copper-Catalyzed Electrocyclization .....	272
8.2	Copper-Catalyzed Cross-Coupling Reactions .....	273
8.3	Copper-Catalyzed Atom Transfer Radical Addition and Related Reactions .....	277
8.3.1	Atom Transfer Radical Addition Reactions of Halides with Alkenes .....	277
8.3.2	Atom Transfer Radical Addition Reactions of Trifluoromethanesulfonyl Chloride with Alkenes .....	278
8.3.3	Atom Transfer Radical Addition Reactions of Perfluoroalkyl Iodides with Alkenes and Alkynes .....	282
8.3.4	Atom Transfer Radical Addition Reactions with Umemoto's Reagent and an External Fluoride Source .....	283
8.3.5	Atom Transfer Radical Addition Like Allylations .....	285
8.4	N-Alkylation .....	287
8.5	Azidation .....	291
8.6	Light-Switchable Azidation of Styrenes .....	292
8.7	Azidooxidation .....	294
9	<b>Gold in Photocatalysis</b> M. N. Hopkinson and S. Dix	
9	<b>Gold in Photocatalysis</b> .....	297
9.1	Arylative Difunctionalization Reactions of Alkenes .....	299
9.1.1	Oxy- and Aminoarylation of Alkenes .....	299
9.1.2	Arylative Ring Expansion of Alkenyl Cycloalkanols .....	301
9.2	Arylative Difunctionalization Reactions of Alkynes .....	302
9.2.1	Arylative Meyer-Schuster Rearrangements of Propargyl Alcohols .....	302
9.2.2	Oxy- and Aminoarylation of Alkynes .....	303
9.2.3	Intramolecular Carboarylation of Alkynes .....	304

<b>9.3</b>	Arylative Difunctionalization Reactions of Allenes .....	305
<b>9.3.1</b>	Arylative Cyclization of 2,3-Allenates .....	305
<b>9.3.2</b>	Intramolecular Oxyarylation of Allenols .....	306
<b>9.4</b>	Cross-Coupling Reactions .....	307
<b>9.4.1</b>	C(sp <sup>2</sup> )-C(sp) Coupling Reactions .....	307
<b>9.4.2</b>	C(sp <sup>2</sup> )-C(sp <sup>2</sup> ) Coupling Reactions .....	309
<b>9.4.3</b>	C(sp <sup>2</sup> )-C(sp <sup>3</sup> ) Coupling Reactions .....	310
<b>9.4.4</b>	C(sp <sup>2</sup> )-P Cross-Coupling Reactions .....	311
<b>9.5</b>	Stoichiometric Oxidation of Gold(I) Complexes under Light Irradiation .....	312
<b>9.6</b>	Thiosulfonylation of Alkenes .....	313
<b>10</b>	<b>Palladium in Photocatalysis</b> M. Wang, P. Li, and L. Wang	
<b>10</b>	<b>Palladium in Photocatalysis</b> .....	317
<b>10.1</b>	Merging Photoredox with Palladium Catalysis for C(sp <sup>2</sup> )-H Activation and Functionalization .....	317
<b>10.1.1</b>	Dual Catalysis for C(sp <sup>2</sup> )-H Arylation .....	317
<b>10.1.2</b>	Dual Catalysis for C(sp <sup>2</sup> )-H Acylation .....	320
<b>10.1.3</b>	Dual Catalysis for C(sp <sup>2</sup> )-H Alkenation .....	324
<b>10.1.4</b>	Dual Catalysis for C(sp <sup>2</sup> )-H Amination .....	325
<b>10.1.5</b>	Dual Catalysis for C(sp <sup>2</sup> )-H Carbonylation .....	327
<b>10.2</b>	Merging Photoredox with Palladium Catalysis for Allylation .....	329
<b>10.2.1</b>	Dual Catalysis for $\alpha$ -Allylation of Amines .....	329
<b>10.2.2</b>	Dual Catalysis for Decarboxylative Allylation of Amino Alkanoic Acids and Esters .....	330
<b>10.3</b>	Merging Photoredox with Palladium Catalysis for Acceptorless Dehydrogenation .....	332
<b>10.4</b>	Merging Photoredox with Palladium Catalysis for Oxidation .....	335
<b>11</b>	<b>Nickel in Photocatalysis</b> C. B. Kelly, J. K. Matsui, J. P. Phelan, Á. Gutiérrez Bonet, S. B. Lang, and G. A. Molander	
<b>11</b>	<b>Nickel in Photocatalysis</b> .....	339
<b>11.1</b>	Alkyltrifluoroborates in Nickel/Photoredox Dual Catalysis .....	341
<b>11.1.1</b>	C(sp <sup>2</sup> )-C(sp <sup>3</sup> ) Coupling Using Potassium Organotrifluoroborates and Aryl Electrophiles .....	341
<b>11.1.1.1</b>	Benzylic Organotrifluoroborates .....	342

11.1.1.2	Orthogonal Functionalization Using Borylated Bromoarenes	343
11.1.1.3	Potassium Secondary Alkyltrifluoroborates	343
11.1.1.4	Potassium (Aminomethyl)trifluoroborates	345
11.1.1.5	Potassium Tertiary Alkyltrifluoroborates	345
11.1.2	C(sp <sup>2</sup> )-C(sp <sup>3</sup> ) Coupling Using Potassium Alkyltrifluoroborates and Acyl Electrophiles	347
11.1.2.1	Acid Chlorides as Electrophiles	347
11.1.2.2	Activated Amides as Electrophiles	347
11.1.2.3	Acylation with Mixed Anhydrides	348
11.2	Alkylsilicates in Nickel/Photoredox Dual Catalysis	350
11.2.1	Using Alkylsilicates with Aryl Electrophiles	350
11.2.2	Selective Cross Coupling Using Polyfunctional Aryl Electrophiles	352
11.3	Carboxylic Acids in Nickel/Photoredox Dual Catalysis	353
11.3.1	Carboxylic Acids with Aryl Electrophiles	353
11.3.2	Using Carboxylic Acids with Alkyl Electrophiles	355
11.3.3	Acylation via Mixed Anhydrides	356
11.4	Dihydropyridines in Nickel/Photoredox Dual Catalysis	357
11.4.1	Dihydropyridines with Aryl Electrophiles	357
11.5	C-H Functionalization via Nickel/Photoredox Dual Catalysis	358
11.5.1	Quinuclidine as Hydrogen-Atom-Transfer Catalyst	358
11.5.2	Bromine and Chlorine Radicals as Hydrogen-Atom Abstractors	360
11.5.3	$\alpha$ -C(sp <sup>3</sup> )-H Arylation of <i>N,N</i> -Dialkyl- <i>N</i> -arylamines	361
11.6	Miscellaneous C-Radical Precursors	361
11.6.1	Activation of Alkyl Bromides Using Silyl Radicals	361
11.6.2	Activated Alcohols as Radical Precursors	363
11.6.3	$\alpha$ -Silylamines as Radical Precursors	364
11.7	C-Y Bond Formation via Nickel/Photoredox Dual Catalysis	365
11.7.1	C(sp <sup>2</sup> )-O and C(sp <sup>2</sup> )-N Couplings	365
11.7.2	C(sp <sup>2</sup> )-S Coupling Using Nickel/Photoredox Dual Catalysis	367
12	<b>Acridinium Dyes and Quinones in Photocatalysis</b> M. Brasholz	
12	<b>Acridinium Dyes and Quinones in Photocatalysis</b>	371
12.1	Photocatalysis with Acridinium Dyes	371
12.1.1	Synthesis of $\gamma$ -Lactones by Oxylactonization of Alkenoic Acids	372
12.1.2	Synthesis of Pyrroles by (3+2) Cyclization of 2 <i>H</i> -Azirines with Alkynes	373
12.1.3	Synthesis of Tetralins by (4+2) Cyclization of Styrenes	374

12.1.4	Sulfonamidation of Pyrroles	375
12.1.5	Decarboxylative 1,4-Radical Addition to Alkenes	375
12.2	Photocatalysis with Quinones	377
12.2.1	Photocatalysis with 2,3-Dichloro-5,6-dicyanobenzo-1,4-quinone	380
12.2.1.1	Photooxidation of Alcohols	380
12.2.1.2	Benzylic C(sp <sup>3</sup> )–H Oxygenations	382
12.2.2	Anthraquinone Photocatalysis	383
12.2.2.1	Photocatalytic Cross-Dehydrogenative C–H Amination of Indoles	383
12.2.2.2	Radical Alkylation of C(sp <sup>3</sup> )–H Bonds	384
12.2.2.3	Fluorination of Non-activated C(sp <sup>3</sup> )–H Bonds with Selectfluor	386
12.2.2.4	Cross-Dehydrogenative Coupling/Cyclization Cascade of <i>N</i> -Aryltetrahydroisoquinolines with Nitromethane	387
13	<b>Flavins in Photocatalysis</b> J. B. Metternich, R. J. Mudd, and R. Gilmour	
13	<b>Flavins in Photocatalysis</b>	391
13.1	Oxidation	392
13.1.1	Benzylic Alcohols to Aldehydes	392
13.1.2	Benzylic Amines to Aldehydes (Benzyl Deprotection)	394
13.1.3	Benzylic C–H Bonds to Carbonyl Groups	395
13.1.4	Sulfides to Sulfoxides	397
13.2	Halogenation	398
13.3	Isomerization	399
13.4	Cyclization	400
13.5	Cycloaddition	401
14	<b>Organic Dyes in Photocatalytic Reductive C–H Arylations</b> I. Ghosh	
14	<b>Organic Dyes in Photocatalytic Reductive C–H Arylations</b>	405
14.1	C–H Arylation Reactions Using Organic Dyes as Photoredox Catalysts	407
14.1.1	Eosin Y Catalyzed C–H (Het)Arylation Reactions Using (Het)Arenediazonium Salts	407
14.1.2	C–H Arylation Reactions Using Aryl Halides and Consecutive Photoinduced Electron Transfer (conPET) Catalysts	409
14.1.3	Rhodamine 6G Catalyzed Selective and Sequential C–H Arylation Reactions	415
14.1.4	9,10-Dicyanoanthracene-Catalyzed C–H Arylation Reactions	418

14.1.5	10-Phenylphenothiazine-Catalyzed C—H Arylation Reactions Using Aryl Halides .....	419
14.1.6	Eosin Y Catalyzed Fluoroarylation of Arenes and Hetarenes .....	420
14.2	Tips and Tricks for Radical-Based C—H (Het)Arylation Reactions Using Photoredox Catalytic Methods .....	423
14.3	Conclusion: Achievements and Challenges Ahead .....	424
<b>15</b>	<b>Silicates in Photocatalysis</b> V. Corcé, C. Lévêque, C. Ollivier, and L. Fensterbank	
<b>15</b>	<b>Silicates in Photocatalysis</b> .....	427
<b>15.1</b>	Synthesis of Bis(catecholato)silicates .....	428
