

Stereoselective Synthesis 3: Stereoselective Pericyclic Reactions, Cross Coupling, and C—H and C—X Activation

	Preface	V
	Volume Editors' Preface	VII
	Abstracts	XI
	Table of Contents	XXV
	Introduction	
	P. A. Evans	1
3.1	[m + n]-Cycloaddition Reactions (Excluding [4 + 2])	
	G.-J. Jiang, Y. Wang, and Z.-X. Yu	7
3.2	[4 + 2]-Cycloaddition Reactions	
	K. Ishihara and A. Sakakura	67
3.3	[m + n + 1]-Carbocyclization Reactions	
	T. Shibata	125
3.4	[m + n + 2]-Carbocyclization Reactions	
	C. Aubert, M. Malacria, and C. Ollivier	145
3.5	Asymmetric Cycloisomerizations	
	I. D. G. Watson and F. D. Toste	243
3.6	Ene Reactions	
	M. Terada	309
3.7	Sigmatropic Rearrangements	
	J. Zeh and M. Hiersemann	347
3.8	Electrocyclic Reactions	
	B. Gaspar and D. Trauner	383
3.9	Allylic Substitution Reactions	
	M. L. Crawley	403
3.10	Isomerizations To Form a Stereogenic Center and Allylic Rearrangements	
	S. Jautze and R. Peters	443

3.11	Allylic and Benzylic Oxidation M. B. Andrus	469
3.12	Mizoroki–Heck Reaction M. Shibasaki, T. Ohshima, and W. Itano	483
3.13	C–C Bond Formation by C–H Bond Activation H. M. L. Davies and D. Morton	513
3.14	Cross Coupling M. Shimizu and T. Hiyama	567
3.15	Protonation, Alkylation, Arylation, and Vinylation of Enolates B. M. Stoltz and J. T. Mohr	615
3.16	α-Functionalization of Carbonyl Compounds D. W. C. MacMillan and A. J. B. Watson	675
3.17	Baeyer–Villiger Reactions S. Levinger	747
3.18	Ring Opening of Epoxides, Aziridines, and Cyclic Anhydrides J. B. Johnson	759
3.19	Acylation of Alcohols and Amines T. Oriyama	829
3.20	Asymmetric Fluorination, Monofluoromethylation, Difluoromethylation, and Trifluoromethylation Reactions V. Gouverneur and O. Lozano	851
3.21	Stereoselective Polymerization J.-F. Carpentier and E. Kirillov	931
3.22	Oxidation of Sulfides A. Lattanzi	973
	Keyword Index	1017
	Author Index	1081
	Abbreviations	1113

Table of Contents

Introduction

P. A. Evans

Introduction	1
---------------------------	---

3.1 [m + n]-Cycloaddition Reactions (Excluding [4 + 2])

G.-J. Jiang, Y. Wang, and Z.-X. Yu

3.1	[m + n]-Cycloaddition Reactions (Excluding [4 + 2])	7
3.1.1	[2 + 2]-Cycloaddition Reactions	8
3.1.1.1	[2 + 2] Cycloadditions Catalyzed by Transition Metals	8
3.1.1.1.1	Chiral Titanium Catalysts	8
3.1.1.1.2	Chiral Copper Catalysts	10
3.1.1.1.3	Chiral Rhodium Catalysts	11
3.1.1.1.4	Chiral Iridium Catalysts	12
3.1.1.2	[2 + 2] Cycloadditions Catalyzed by Organic Molecules	14
3.1.1.2.1	Lectka's Quinine-Derived Catalysts	14
3.1.1.2.2	Fu's 4-Pyrrolidinopyridine Catalysts	16
3.1.1.2.2.1	Asymmetric Staudinger Synthesis of β -Lactams	16
3.1.1.2.2.2	[2 + 2] Cycloadditions of Disubstituted Ketenes with Aldehydes	17
3.1.1.2.2.3	[2 + 2] Cycloadditions of Ketenes with Azo Compounds	18
3.1.1.2.2.4	[2 + 2] Cycloadditions of Ketenes with Nitroso Compounds	19
3.1.1.2.3	Corey's Oxazaborolidine Catalysts	20
3.1.1.2.4	Ye's N-Heterocyclic Carbene Catalysts	22
3.1.1.2.4.1	N-Heterocyclic Carbene Catalyzed Staudinger Reaction of Ketenes	22
3.1.1.2.4.2	N-Heterocyclic Carbene Catalyzed [2 + 2] Cycloadditions of Disubstituted Ketenes with 2-Oxoaldehydes	23
3.1.1.2.4.3	N-Heterocyclic Carbene Catalyzed [2 + 2] Cycloadditions of Ketenes with Ketones	24
3.1.1.2.4.4	N-Heterocyclic Carbene Catalyzed [2 + 2] Cycloadditions of Ketenes with Azodicarboxylates	25
3.1.2	[3 + 2]-Cycloaddition Reactions	26
3.1.2.1	Phosphine-Catalyzed [3 + 2]-Cycloaddition Reactions of Allenates with Dienophiles	27
3.1.2.1.1	Cycloaddition Reactions Catalyzed by P-Chiral 7-Phosphabicyclo[2.2.1]heptane	28
3.1.2.1.2	Cycloaddition Reactions Catalyzed by Binaphthyl-Derived Phosphines	29
3.1.2.1.3	Cycloaddition Reactions Catalyzed by Amino Acid Based Phosphines	31

3.1.2.1.4	Cycloaddition Reactions Catalyzed by Planar-Chiral 2-Phospha[3]ferrocenophanes	32
3.1.2.1.5	Cycloaddition Reactions Catalyzed by Chiral Thiourea-Containing Phosphines	33
3.1.2.2	Palladium-Catalyzed Asymmetric [3 + 2] Trimethylenemethane Cycloaddition Reactions	34
3.1.3	[4 + 1]-Cycloaddition Reactions	39
3.1.3.1	Rhodium- and Platinum-Catalyzed Asymmetric [4 + 1]-Cycloaddition Reactions of Vinylallenes and Carbon Monoxide	39
3.1.3.2	Copper-Catalyzed Asymmetric [4 + 1] Cycloadditions of Enones with Diazo Compounds	42
3.1.4	[3 + 3]-Cycloaddition Reactions	45
3.1.4.1	Chiral Lewis Acid Catalyzed [3 + 3] Cycloadditions of Nitrones to Doubly Activated Cyclopropanes	45
3.1.4.2	Palladium-Catalyzed Asymmetric [3 + 3] Cycloadditions of Trimethylenemethane Derivatives with Nitrones	47
3.1.5	[4 + 3]-Cycloaddition Reactions	48
3.1.5.1	Asymmetric Organocatalysis of [4 + 3]-Cycloaddition Reactions of Allylic Cations and Dienes	48
3.1.5.2	Chiral Lewis Acid Catalyzed [4 + 3] Cycloadditions of Nitrogen-Stabilized Oxyallyl Cations Derived from <i>N</i> -Allenylamides	49
3.1.5.3	Rhodium-Catalyzed Asymmetric [4 + 3] Cycloadditions between α -Diazo β,γ -Unsaturated Esters and Dienes	51
3.1.5.4	Palladium-Catalyzed [4 + 3] Cycloadditions of γ -Methylene- δ -valerolactones	54
3.1.5.5	Palladium-Catalyzed [4 + 3] Intramolecular Cycloadditions of Alkylidenecyclopropanes and Dienes	56
3.1.6	[5 + 2]-Cycloaddition Reactions	57
3.1.6.1	Rhodium-Catalyzed Asymmetric [5 + 2] Cycloadditions of Vinylcyclopropanes and π -Systems	57
3.1.7	[6 + 3]-Cycloaddition Reactions	60
3.1.7.1	Palladium-Catalyzed Asymmetric [6 + 3] Cycloaddition of Trimethylenemethane with Tropones	60
3.2	[4 + 2]-Cycloaddition Reactions K. Ishihara and A. Sakakura	
3.2	[4 + 2]-Cycloaddition Reactions	67
3.2.1	Enantioselective Diels–Alder Reactions Catalyzed by Chiral Lewis Acids	67
3.2.1.1	Enantioselective Catalysis Using Chiral Boron Compounds	67
3.2.1.1.1	Using a Cationic Oxazaborolidine	68
3.2.1.1.2	Using Boronic Acid Esters of Chiral 3-(2-Hydroxyphenyl)binaphthols	73

3.2.1.2	Enantioselective Catalysis Using Chiral Copper(II) Complexes	76
3.2.1.2.1	Using a Chiral Copper(II)-Bis(4,5-dihydrooxazole) Complex	76
3.2.1.2.2	Using a Chiral Copper(II)-3-Arylalanine Amide Complex	83
3.2.1.2.3	Using a Copper(II)-DNA Complex	85
3.2.1.3	Enantioselective Catalysis Using Other Chiral Lewis Acids	86
3.2.2	Enantioselective Diels-Alder Reactions Catalyzed by Organoammonium Salts	89
3.2.2.1	Enantioselective Catalysis Using Chiral Secondary Ammonium Salts	90
3.2.2.2	Enantioselective Catalysis Using Chiral Primary Ammonium Salts	94
3.2.2.3	Enantioselective Catalysis Using Hydrogen-Bonded Complexes	99
3.2.3	Hetero-Diels-Alder Reactions	103
3.2.3.1	Enantioselective Hetero-Diels-Alder Reactions of Carbonyl Compounds	103
3.2.3.1.1	Enantioselective Catalysis Using a Chiral Chromium(III) Complex	104
3.2.3.1.2	Enantioselective Catalysis Using Other Chiral Lewis Acids	108
3.2.3.1.3	Enantioselective Catalysis Using Chiral Organocatalysts	110
3.2.3.2	Enantioselective Hetero-Diels-Alder Reactions of Imines and Related Compounds	113
3.2.3.2.1	Enantioselective Aza-Diels-Alder Reaction of Electron-Rich Dienes with Imines	113
3.2.3.2.2	Enantioselective Aza-Diels-Alder Reaction of 1-Azabuta-1,3-dienes	117
3.3	[m + n + 1]-Carbocyclization Reactions T. Shibata	
3.3	[m + n + 1]-Carbocyclization Reactions	125
3.3.1	[2 + 2 + 1] Carbocyclization of Enynes with Carbon Monoxide	125
3.3.1.1	Enantioselective Titanium-Catalyzed Pauson-Khand Reactions	125
3.3.1.2	Rhodium-Catalyzed Pauson-Khand Reactions	127
3.3.1.2.1	Enantioselective Reactions	127
3.3.1.2.2	Diastereoselective Reactions	130
3.3.1.3	Enantioselective Iridium-Catalyzed Pauson-Khand Reactions	132
3.3.1.4	Enantioselective Cobalt-Catalyzed Pauson-Khand Reactions	133
3.3.2	Rhodium-Catalyzed [2 + 2 + 1] Carbocyclization Using Aldehydes as a Carbon Monoxide Source	136
3.3.2.1	Enantioselective Rhodium-Catalyzed Reactions Using Aldehydes	136
3.3.3	Ruthenium-Catalyzed [3 + 2 + 1] Carbocyclization of Silylalkynes and Enones with Carbon Monoxide	140

3.3.4	Nickel-Catalyzed [4 + 2 + 1] Carbocyclization of Diynes with Diazomethane	141
3.3.5	Rhodium-Catalyzed [5 + 2 + 1] Carbocyclization of Vinylcyclopropanes and Alkynes with Carbon Monoxide	142
3.3.6	Palladium-Catalyzed [4 + 4 + 1] Carbocyclization of Two Vinylallenes with Carbon Monoxide	143
3.4	[m + n + 2]-Carbocyclization Reactions C. Aubert, M. Malacria, and C. Ollivier	
<hr/>		
3.4	[m + n + 2]-Carbocyclization Reactions	145
3.4.1	[2 + 2 + 2]-Carbocyclization Reactions	145
3.4.1.1	Ruthenium(II)-Mediated [2 + 2 + 2] Carbocyclizations	145
3.4.1.1.1	Control of Diastereoselectivity	146
3.4.1.1.1.1	Intramolecular Carbocyclization of Diynes	146
3.4.1.2	Cobalt(I)-Mediated [2 + 2 + 2] Carbocyclizations	147
3.4.1.2.1	Control of Diastereoselectivity	147
3.4.1.2.1.1	Cocyclization of Alkynylboronates and Alkenes	147
3.4.1.2.1.2	Cocyclization of Diynes and Alkenes	150
3.4.1.2.1.3	Cocyclization of Yne-Heterocycles with Alkynes	152
3.4.1.2.1.4	Intramolecular Carbocyclization of Ene-diynes	156
3.4.1.2.1.5	Intramolecular Carbocyclization of Diynals and Diynones	161
3.4.1.2.1.6	Intramolecular Carbocyclization of Allenediynes	162
3.4.1.2.1.7	Intramolecular Cyclotrimerization of Chiral Triynes	163
3.4.1.2.2	Control of Central Chirality	165
3.4.1.2.2.1	Intramolecular Cyclotrimerization of Allenediynes	165
3.4.1.2.3	Control of Axial Chirality	165
3.4.1.2.3.1	Carbocyclization of Acetylene and Aryl-Substituted Monoynes Bearing Phosphoryl Moieties	165
3.4.1.2.3.2	Carbocyclization of 1,7-Diynes with Nitriles	167
3.4.1.3	Rhodium(I)-Mediated [2 + 2 + 2] Carbocyclizations	168
3.4.1.3.1	Control of Central Chirality	169
3.4.1.3.1.1	Carbocyclization of Tertiary Propargylic Alcohols, Bispropargylic Alcohols, and Dialkynylphosphine Oxides with 1,6-Diyne Esters	169
3.4.1.3.1.2	Carbocyclization of 1,6-Diynes with Substituted Alkenes	172
3.4.1.3.1.3	Carbocyclization of 1,6-Diynes with Electron-Deficient Ketones	175
3.4.1.3.1.4	Carbocyclization of 1,6-Enynes and Alkynes	175
3.4.1.3.1.5	Carbocyclization of 1,6-Enynes with Electron-Deficient Ketones	177

3.4.1.3.1.6	Cocyclization of Alkenyl Isocyanates and Terminal Alkynes	179
3.4.1.3.1.7	Cocyclization of Alkenyl Carbodiimides and Terminal Alkynes	181
3.4.1.3.1.8	Intramolecular Carbocyclization of Ene-dienes	183
3.4.1.3.1.9	Intramolecular Carbocyclization of Dienes	184
3.4.1.3.1.10	Intramolecular Carbocyclization of 1,n-Dienynes (n = 4–6)	185
3.4.1.3.2	Control of Helical Chirality	188
3.4.1.3.2.1	Cocyclization of Tetraynes with Diynes	188
3.4.1.3.2.2	Intramolecular Carbocyclization of Triynes	189
3.4.1.3.3	Control of Axial Chirality	190
3.4.1.3.3.1	Cyclotrimerization of Internal Alkynes	190
3.4.1.3.3.2	Cocyclization of 1,6-Diynes and Alkynes	191
3.4.1.3.3.3	Double Cocyclization of 1,6-Diynes with 1,3-Diynes	194
3.4.1.3.3.4	Cocarbocyclization of 1,6-Diynes with Ynamides	195
3.4.1.3.3.5	Cocarbocyclization of 1,6-Diynes with <i>trans</i> -Alkenes	198
3.4.1.3.3.6	Cocarbocyclization of 1,6-Diynes with Isocyanates	199
3.4.1.3.3.7	Cocyclization of 1,7-Diynes and Internal Alkynes	200
3.4.1.3.3.8	Intramolecular Cyclotrimerization of Ene-dienes and Dienes	201
3.4.1.2.3.9	Intramolecular Cyclotrimerization of Bis(dialkyl)malononitriles	203
3.4.1.3.4	Control of Planar Chirality	203
3.4.1.3.4.1	Cocyclization of Internal Diynes and Di- <i>tert</i> -butyl Acetylenedicarboxylate	203
3.4.1.3.4.2	Intramolecular Cyclotrimerization of Triynes	205
3.4.1.4	Iridium(I)-Mediated [2 + 2 + 2] Carbocyclizations	206
3.4.1.4.1	Control of Axial Chirality	206
3.4.1.4.1.1	Cocyclization of 1,n-Diynes and Internal Alkynes	206
3.4.1.4.1.2	Intramolecular Cyclotrimerization of Triynes and Hexaynes	209
3.4.1.5	Nickel(0)-Mediated [2 + 2 + 2] Carbocyclizations	211
3.4.1.5.1	Control of Diastereoselectivity	211
3.4.1.5.1.1	Cocyclization between 1,6-Diynes and Activated Alkenes	211
3.4.1.5.1.2	Cocyclization between Norbornadiene and Activated Alkenes	212
3.4.1.5.2	Control of Central Chirality	213
3.4.1.5.2.1	Intermolecular Cyclotrimerization between Two Alkynes and an Alkene	213
3.4.1.5.2.2	Bimolecular Cocyclization of Diynes and Acetylene	214
3.4.1.5.3	Control of Helical Chirality	215
3.4.1.5.3.1	Cycloisomerization of Triynes	215
3.4.1.6	Palladium(0)-Mediated [2 + 2 + 2] Carbocyclizations	216
3.4.1.6.1	Control of Helical Chirality	216

3.4.1.6.1.1	Carbocyclization of Arynes with Alkynes	216
3.4.2	[3 + 2 + 2]-Carbocyclization Reactions	217
3.4.2.1	Ruthenium(II)-Mediated [3 + 2 + 2]-Carbocyclization Reactions	219
3.4.2.1.1	Cocyclizations between an η^3 -Allylruthenium(II) Complex and Alkynes	219
3.4.2.2	Cobalt(III)-Mediated [3 + 2 + 2]-Carbocyclization Reactions	221
3.4.2.2.1	Cocyclizations between η^3 -Allyl-Type Cobalt Complexes and Alkynes	221
3.4.2.3	Rhodium(I)-Mediated [3 + 2 + 2]-Carbocyclization Reactions	224
3.4.2.3.1	Cocyclizations between Alk-6-enylidencyclopropanes and Activated Alkynes	224
3.4.2.4	Iridium(III)-Mediated [3 + 2 + 2]-Carbocyclization Reactions	225
3.4.2.4.1	Cocyclizations between η^3 -Allyliridium Complexes and Alkynes	225
3.4.2.5	Nickel(0)-Mediated [3 + 2 + 2]-Carbocyclization Reactions	226
3.4.2.5.1	Cocyclization of Ethyl Cyclopropylideneacetate and Alkynes or Diynes	226
3.4.2.5.2	Cocyclization of Chromium Fischer Carbene Complexes with Terminal Alkynes	227
3.4.3	[4 + 2 + 2]-Carbocyclization Reactions	228
3.4.3.1	Cobalt-Mediated [4 + 2 + 2]-Carbocyclization Reactions	230
3.4.3.1.1	Cocyclization of Norbornadiene with 2-Substituted Buta-1,3-dienes	230
3.4.3.2	Rhodium(I)-Mediated [4 + 2 + 2]-Carbocyclization Reactions	232
3.4.3.2.1	Cocyclization of Enynes with Buta-1,3-dienes	232
3.4.3.2.2	Cocyclization of Dienynes with Alkynes	234
3.4.3.2.3	Cocyclization of Enedienes with Alkynes	236
3.4.3.2.4	Cocyclization of Dienyl Isocyanates with Alkynes	237
3.5	Asymmetric Cycloisomerizations I. D. G. Watson and F. D. Toste	
3.5	Asymmetric Cycloisomerizations	243
3.5.1	Enyne Cycloisomerization	243
3.5.1.1	Palladium-Catalyzed Cycloisomerization	244
3.5.1.2	Rhodium-Catalyzed Cycloisomerization	257
3.5.1.3	Gold- and Platinum-Catalyzed Cycloisomerization	267
3.5.2	Diene Cycloisomerization	277
3.5.2.1	Cycloisomerization of 1,6- and 1,7-Dienes	277
3.5.2.2	Cycloisomerization of 1,6- and 1,7-Allenenes	282
3.5.3	Carbonyl-Ene Reaction	285
3.5.4	Conia-Ene Reaction	288
3.5.5	Intramolecular Cyclization Initiated by C—H Activation	292

3.6	Ene Reactions M. Terada	
<hr/>		
3.6	Ene Reactions	309
3.6.1	Intramolecular Ene Reactions	309
3.6.1.1	Aldehydes and Ketones as Enophiles (Carbonyl-Ene Reactions)	310
3.6.1.1.1	Type-I Cyclizations	310
3.6.1.1.1.1	Diastereoselective Reactions	310
3.6.1.1.1.2	Enantioselective Reaction of Aldehydes	311
3.6.1.1.1.3	Enantioselective Reaction of Ketones	312
3.6.1.1.2	Type-II Cyclizations	314
3.6.1.1.2.1	Diastereoselective Reactions	314
3.6.1.1.2.2	Enantioselective Reactions	315
3.6.1.2	Alkynes as Enophiles	316
3.6.1.2.1	Type-I Cyclizations	316
3.6.1.2.1.1	Enantioselective Reaction of 1,6-Enynes	316
3.6.1.2.1.2	Enantioselective Reaction of 1,7-Enynes	318
3.6.1.2.2	Conia-Ene Reactions	319
3.6.1.2.2.1	Enantioselective Reactions	319
3.6.2	Intermolecular Ene Reactions	320
3.6.2.1	Aldehydes and Ketones as Enophiles (Carbonyl-Ene Reactions)	321
3.6.2.1.1	Enantioselective Reaction of Aldehydes	321
3.6.2.1.1.1	Unactivated Alkenes as Ene Components	321
3.6.2.1.1.2	Enol Ethers as Ene Components	326
3.6.2.1.1.3	Enamides or Encarbamates as Ene Components	328
3.6.2.1.2	Enantioselective Reaction of Ketones	330
3.6.2.1.2.1	Unactivated Alkenes as Ene Components	330
3.6.2.1.2.2	Activated Alkenes as Ene Components	332
3.6.2.2	Imines as Enophiles (Imino-Ene Reactions)	333
3.6.2.2.1	Enantioselective Reactions	333
3.6.2.2.1.1	Unactivated Alkenes as Ene Components	333
3.6.2.2.1.2	Encarbamates as Ene Components	335
3.6.2.3	Electron-Deficient Alkenes as Enophiles	338
3.6.2.3.1	Enantioselective Reactions	338
3.6.2.3.1.1	Unactivated Alkenes as Ene Components	338
3.6.2.3.1.2	Encarbamates as Ene Components	339
3.6.2.4	Heteroatom—Heteroatom Double Bonds as Enophiles	341

3.6.2.4.1	Enantioselective Reaction of Azodicarboxylates	341
3.6.2.4.1.1	Unactivated Alkenes as Ene Components	341
3.6.2.4.1.2	Enecarbamates as Ene Components	342
3.7	Sigmatropic Rearrangements J. Zeh and M. Hiersemann	
<hr/>		
3.7	Sigmatropic Rearrangements	347
3.7.1	The Claisen Rearrangement	347
3.7.1.1	The Classic Claisen Rearrangement	353
3.7.1.2	The 3-Aza-Claisen Rearrangement	355
3.7.1.3	The Thio-Claisen Rearrangement	356
3.7.1.4	The Claisen Rearrangement of Chelated Enolates	357
3.7.1.5	The Carroll–Claisen Rearrangement	359
3.7.1.6	The Eschenmoser–Claisen Rearrangement	360
3.7.1.7	The Ireland–Claisen Rearrangement	362
3.7.1.8	The Johnson–Claisen Rearrangement	366
3.7.1.9	The Aromatic Claisen Rearrangement	368
3.7.2	The Cope Rearrangement and Related Reactions	369
3.7.2.1	The Classic Cope Rearrangement	371
3.7.2.2	The Anionic Oxy-Cope Rearrangement	372
3.7.2.3	The 2-Oxonia-Cope Rearrangement	374
3.7.2.4	The 2-Azonia-Cope Rearrangement	375
3.7.3	The [2,3]-Wittig Rearrangement	375
3.7.3.1	The Classic [2,3]-Wittig Rearrangement	377
3.7.3.2	The Enolate [2,3]-Wittig Rearrangement	380
3.8	Electrocyclic Reactions B. Gaspar and D. Trauner	
<hr/>		
3.8	Electrocyclic Reactions	383
3.8.1	Synthesis of Dienes through Electrocyclic Ring Opening of Cyclobutenes	383
3.8.2	Synthesis of Cyclobutenes through Electrocyclization of Dienes	385
3.8.3	Synthesis of Five-Membered Rings through Electrocyclization of Pentadienyl Cations: The Nazarov Cyclization	386
3.8.3.1	Stoichiometric Nazarov Cyclizations	386
3.8.3.2	Catalytic Nazarov Cyclizations	388
3.8.3.3	Interrupted Nazarov Cyclizations	391

3.8.4	Electrocyclizations of Hexatrienes and Octatetraenes	392
3.8.4.1	Electrocyclizations of 6π Systems	392
3.8.4.2	Electrocyclizations of 8π Systems	398

3.19.2	Asymmetric Acylation of Amines	844
3.19.2.1	Asymmetric Acylation of Primary Amines	844
3.19.2.2	Asymmetric Acylation of Secondary Amines	846
3.20	Asymmetric Fluorination, Monofluoromethylation, Difluoromethylation, and Trifluoromethylation Reactions	
	V. Gouverneur and O. Lozano	
<hr/>		
3.20	Asymmetric Fluorination, Monofluoromethylation, Difluoromethylation, and Trifluoromethylation Reactions	851
3.20.1	Stereoselective Fluorination	852
3.20.1.1	Stereoselective Electrophilic Fluorination	852
3.20.1.1.1	Diastereoselective Electrophilic Fluorination	853
3.20.1.1.1.1	Preparation of α -Fluoro Ketones from α -Silyl Ketones	853

3.20.1.1.1.2	Preparation of α -Fluoro Carboxylic Acids, β -Fluoro Alcohols, α -Fluoro Aldehydes, α -Fluoro Ketones, and γ -Lactones from Carboxylic Acids	855
3.20.1.1.1.3	Preparation of α -Fluoro Phosphonic Acids	857
3.20.1.1.1.4	Preparation of Monofluoro Ketomethylene Dipeptide Isosteres	859
3.20.1.1.1.5	Preparation of Allylic Fluorides	860
3.20.1.1.1.6	Preparation of Fluorinated Tetrahydrofurans	862
3.20.1.1.2	Enantioselective Electrophilic Fluorination	863
3.20.1.1.2.1	Reagent-Controlled Enantioselective Fluorination	863
3.20.1.1.2.1.1	Preparation of α -Fluorinated α -Cyano Esters	864
3.20.1.1.2.1.2	Preparation of Fluorinated Keto Esters, Indolones, and Allylsilanes	865
3.20.1.1.2.2	Catalytic Enantioselective Fluorination	867
3.20.1.1.2.2.1	Catalytic Asymmetric Fluorination Mediated by Chiral Metal Complexes	868
3.20.1.1.2.2.1.1	Fluorination of β -Keto Esters and Lactones with Palladium Catalysts	869
3.20.1.1.2.2.1.2	Fluorination of β -Oxo Phosphonates with Palladium Catalysts	870
3.20.1.1.2.2.1.3	Fluorination of α -Cyano <i>tert</i> -Butyl Esters with Palladium Catalysts	871
3.20.1.1.2.2.1.4	Fluorination of Indolones with Palladium Catalysts	872
3.20.1.1.2.2.1.5	Fluorination of α -Aryl Acetic Acid Derivatives with Nickel Catalysts	873
3.20.1.1.2.2.1.6	Enantioselective Fluorination of 1,3-Dicarbonyl Derivatives Capable of Two-Point Binding with Nickel Catalysts	874
3.20.1.1.2.2.1.7	Sequential Nazarov–Fluorination with Copper Catalysts	876
3.20.1.1.2.2.2	Catalytic Enantioselective Fluorination Mediated by Organocatalysts	878
3.20.1.1.2.2.2.1	Organocatalytic Fluorination of Aldehydes: Preparation of α -Fluoro Aldehydes, β -Fluoro Alcohols, and Propargylic Fluorides	878
3.20.1.1.2.2.2.2	Catalytic Asymmetric Fluorodesilylation of Allylsilanes, Silyl Enol Ethers, and Indolones	881
3.20.1.1.2.2.2.3	Preparation of Fluorinated Flavanones	884
3.20.1.1.2.2.2.4	Asymmetric Fluorination with Chiral Bifunctional Phase-Transfer Catalysts	885
3.20.1.1.2.2.3	Catalytic Enantioselective Fluorination Mediated by Metals and Organocatalysts	887
3.20.1.2	Stereoselective Nucleophilic Fluorination	888
3.20.1.2.1	Prins Cyclization To Access Fluorinated Tetrahydrothiopyrans, Thiacyclohexanes, and Piperidines	888
3.20.1.2.2	Catalytic Asymmetric Ring Opening of Achiral Epoxides	889
3.20.2	Stereoselective Fluoroalkylation	891
3.20.2.1	Monofluoromethylation Reactions	891
3.20.2.1.1	Diastereoselective Nucleophilic Monofluoromethylation	892
3.20.2.1.1.1	Preparation of Chiral α -Monofluoromethyl Amines Using Fluoromethyl Phenyl Sulfone	892

3.20.2.1.2	Catalytic Enantioselective Nucleophilic Monofluoromethylation	895
3.20.2.1.2.1	Preparation of α -Monofluoromethylated Amines	895
3.20.2.1.2.2	Preparation of β -Monofluoromethylated Ketones and γ -Monofluoromethylated Alcohols	897
3.20.2.1.2.3	Asymmetric Allylic Monofluoromethylation	900
3.20.2.2	Difluoromethylation Reactions	902
3.20.2.2.1	Diastereoselective Nucleophilic Difluoromethylation	903
3.20.2.2.1.1	Preparation of Homochiral α - and β -Difluoromethyl Amines	903
3.20.2.2.1.2	Preparation of Chiral Difluoromethylated 1,3-Diols	908
3.20.2.2.2	Electrophilic and Radical Difluoromethylation	909
3.20.2.3	Trifluoromethylation Reactions	910
3.20.2.3.1	Diastereoselective Nucleophilic Trifluoromethylation	910
3.20.2.3.1.1	Trifluoromethylation of Carbohydrates	910
3.20.2.3.1.2	Trifluoromethylation of Steroidal Derivatives	912
3.20.2.3.1.3	Asymmetric Synthesis of Trifluoromethylated Aldehydes, Diols, Amino Alcohols, and Triols	914
3.20.2.3.1.3.1	Trifluoromethylated Aldehydes, 1,2-Diols, and 1,2-Amino Alcohols	914
3.20.2.3.1.3.2	Asymmetric Synthesis of 2-(Trifluoromethyl)-1,2,3-triols	916
3.20.2.3.1.4	Asymmetric Synthesis of Trifluoromethylated Amines and Diamines	918
3.20.2.3.2	Enantioselective Trifluoromethylation	920
3.20.2.3.2.1	Nucleophilic Trifluoromethylation of Aryl Ketones, Aryl Aldehydes, and Azomethine Imines	920
3.20.2.3.2.2	Electrophilic Trifluoromethylation of β -Keto Esters	923
3.20.2.3.2.3	Asymmetric Radical α -Trifluoromethylation of Aldehydes	924
3.21	Stereoselective Polymerization J.-F. Carpentier and E. Kirillov	
3.21	Stereoselective Polymerization	931
3.21.1	Stereoselective Polymerization of Propene: Isotactic Polypropene; Syndiotactic Polypropene	931
3.21.1.1	Isotactic Polypropene	932
3.21.1.2	Syndiotactic Polypropene	933
3.21.2	Stereoselective Polymerization of Higher Alk-1-enes: Isotactic Poly(hex-1-ene) and Poly(oct-1-ene); Syndiotactic Poly(hex-1-ene) and Poly(oct-1-ene)	934
3.21.2.1	Isotactic Poly(alk-1-ene)s	934
3.21.2.2	Syndiotactic Poly(alk-1-ene)s	936

3.21.3	Stereoselective (Co)Polymerization of Styrene: Isotactic and Syndiotactic Polystyrenes	936
3.21.3.1	Isotactic Polystyrene	937
3.21.3.2	Syndiotactic Polystyrene	938
3.21.4	Stereoselective Polymerization of Cycloalkenes: <i>alt-cis/trans</i> -1,3-Poly(cyclopentene)	939
3.21.4.1	Polycycloalkenes	939
3.21.4.1.1	Poly(cyclopentene)s	940
3.21.5	Stereoselective Polymerization of Linear Conjugated Dienes: <i>cis</i> - and <i>trans</i> -1,4-Polybutadiene and -Polyisoprene; Syndiotactic 1,2-Polybutadiene; Isotactic 3,4-Polyisoprene	941
3.21.5.1	<i>cis</i> -1,4-Polybutadiene and -Polyisoprene	942
3.21.5.2	<i>trans</i> -1,4-Polybutadiene and -Polyisoprene	942
3.21.5.3	Syndiotactic 1,2-Polybutadiene	943
3.21.5.4	Isotactic 3,4-Polyisoprene	943
3.21.6	Stereoselective Polymerization of Cyclic Conjugated Dienes: <i>cis</i> -1,4-Poly(cyclohexa-1,3-diene)	944
3.21.7	Stereoselective Cyclopolymerization of Nonconjugated Dienes: Isotactic and Syndiotactic <i>cis/trans</i> -Poly(hexa-1,5-diene)	945
3.21.7.1	Poly(methylene-1,3-cyclopentane) from Hexa-1,5-diene	946
3.21.8	Stereoselective Ring-Opening Metathesis Polymerization of Cyclic Alkenes: <i>cis</i> -Isotactic and <i>cis</i> -Syndiotactic Poly(norbornene) and Poly(<i>endo</i> -dicyclo- pentadiene); Tactic <i>trans</i> -Poly(3-substituted cyclopropene)	947
3.21.8.1	Polymers of Cyclic Alkenes	947
3.21.8.1.1	Poly(norbornene)s and Poly(norbornadiene)s	947
3.21.8.1.2	Poly(<i>endo</i> -dicyclopentadiene)s	949
3.21.8.1.3	Poly(3-substituted cyclopropene)s	951
3.21.9	Stereoselective Polymerization of Alkynes	951
3.21.9.1	Poly(acetylene)	952
3.21.9.2	Substituted Poly(acetylene)s	953
3.21.10	Stereoselective Copolymerization of Alk-1-enes and Carbon Monoxide: Isotactic and Syndiotactic Polyketones Derived from Propene and Styrene ...	954
3.21.10.1	Polyketones	954
3.21.10.1.1	Isotactic Poly(propene- <i>alt</i> -carbon monoxide)	955
3.21.10.1.2	Isotactic and Syndiotactic Poly(styrene- <i>alt</i> -carbon monoxide)s	956
3.21.11	Stereoselective Polymerization of Acrylates: Syndiotactic, Isotactic, and Heterotactic Poly(alkyl methacrylate)s	957
3.21.11.1	Isotactic Poly(alkyl methacrylate)s	958

3.21.11.2	Syndiotactic Poly(alkyl methacrylate)s	958
3.21.11.3	Heterotactic Poly(alkyl methacrylate)s	959
3.21.12	Stereoselective Polymerization of Racemic and Meso Epoxides and Their Copolymerization with Carbon Dioxide: Optically Active Isotactic Polyethers and Polycarbonates	960
3.21.12.1	Isotactic Polyethers	961
3.21.12.2	Stereoregular Polycarbonates	963
3.21.12.2.1	Isotactic Poly(cycloalkene carbonate)s	963
3.21.12.2.2	Syndiotactic Poly(cycloalkene carbonate)s	963
3.21.13	Stereoselective Ring-Opening Polymerization of Lactones: Isotactic, Stereoblock, Syndiotactic, and Heterotactic Poly(lactide)s; Syndiotactic Poly(3-Hydroxybutanoate)	964
3.21.13.1	Poly(lactide)s	964
3.21.13.1.1	Isotactic Poly(lactide)	965
3.21.13.1.2	Stereoblock Isotactic Poly(lactide)	965
3.21.13.1.3	Syndiotactic Poly(lactide)	966
3.21.13.1.4	Heterotactic Poly(lactide)	967
3.21.13.2	Poly(3-hydroxybutanoate)	967
3.22	Oxidation of Sulfides A. Lattanzi	
3.22	Oxidation of Sulfides	973
3.22.1	Oxidation of Sulfides Using Achiral Reagents	974
3.22.2	Chiral Metal Complex Catalyzed Oxidation of Sulfides	976
3.22.2.1	Catalysis Using Titanium/Chiral Diols	976
3.22.2.1.1	Using Titanium(IV) Isopropoxide/(<i>R,R</i>)-Diethyl Tartrate	976
3.22.2.1.2	Using Titanium(IV) Isopropoxide/1,1'-Bi-2-naphthol or Diols	984
3.22.2.1.3	Using Titanium(IV) Isopropoxide/Chiral Alkyl Hydroperoxides	988
3.22.2.2	Catalysis Using Titanium/Chiral Schiff Base Ligands	989
3.22.2.3	Catalysis Using Vanadium/Chiral Schiff Base Ligands	991
3.22.2.4	Catalysis Using Iron/Chiral Schiff Base Ligands	995
3.22.2.5	Catalysis Using Aluminum/Salalen-Based Ligands	999
3.22.2.6	Catalysis Using Chiral Molybdenum- and Niobium-Based Catalysts	1000
3.22.3	Organocatalytic Oxidation of Sulfides	1002
3.22.3.1	Using Chiral Oxaziridines and Oxaziridinium Salts	1002
3.22.3.2	Using a Chiral Ketone/Oxone System	1004
3.22.4	Biological Oxidation of Sulfides	1005

3.22.4.1	Oxidation Using Isolated Enzymes	1006
3.22.4.1.1	Using Peroxidases and Monooxygenases	1006
3.22.4.2	Oxidation Using Whole-Cell Systems	1010
