

## Table of Contents

### Volume 2: Compounds of Groups 7–3 (Mn<sup>...</sup>, Cr<sup>...</sup>, V<sup>...</sup>, Ti<sup>...</sup>, Sc<sup>...</sup>, La<sup>...</sup>, Ac<sup>...</sup>)

2.4	<b>Product Class 4: Arene Organometallic Complexes of Chromium, Molybdenum, and Tungsten</b>		
2.4.12	<b>Arene Organometallic Complexes of Chromium, Molybdenum, and Tungsten</b>		2010
	M. Uemura		
2.4.12	<b>Arene Organometallic Complexes of Chromium, Molybdenum, and Tungsten</b>		1
2.4.12.1	Method 1: Synthesis of Tricarbonylmetal–Arene Complexes by Arene Modification		1
2.4.12.1.1	Variation 1: Via Nucleophilic Substitution		1
2.4.12.1.2	Variation 2: Under Thermal Conditions; Chromium Migration		3
2.4.12.2	Method 2: Synthesis of Tricarbonylmetal–Arene Complexes by Side-Chain Modification		7
2.4.12.2.1	Variation 1: Via Cycloaddition		7
2.4.12.2.2	Variation 2: Via Radical Coupling		8
2.4.12.3	Method 3: Synthesis of Optically Active Arene Complexes		14
2.4.12.3.1	Variation 1: Diastereo- and Enantioselective Lithiation–Electrophilic Addition Reactions		15
2.4.12.3.2	Variation 2: Palladium-Catalyzed Reactions; Catalytic Asymmetric Synthesis		17
2.4.12.4	Method 4: (Arene)tricarbonylchromium(0) Complexes as Catalysts		19
2.4.12.5	Method 5: (Arene)tricarbonylchromium(0) Complexes as Chiral Ligands		20

### Volume 4: Compounds of Group 15 (As, Sb, Bi) and Silicon Com- pounds

4.4	<b>Product Class 4: Silicon Compounds</b>		
4.4.26.7	<b>1-Diazo-1-silylalkanes</b>		2010
	Y. Hari, T. Aoyama, and T. Shioiri		
4.4.26.7	<b>1-Diazo-1-silylalkanes</b>		25
4.4.26.7.1	Synthesis of 1-Diazo-1-silylalkanes		25
4.4.26.7.1.1	Method 1: Synthesis of 1-Diazo-1-silylalkanes from Diazoacetates		25

2010 Updated Section · 2010 Completely Revised Contributions · New New Contributions

4.4.26.7.1.2	Method 2:	Reaction of Metalated Diazo(trimethylsilyl)methane with Electrophiles	27
4.4.26.7.1.2.1	Variation 1:	Hydroxyalkylation of Diazo(trimethylsilyl)methane	27
4.4.26.7.1.2.2	Variation 2:	Borylation of Diazo(trimethylsilyl)methane	28
4.4.26.7.1.2.3	Variation 3:	Sulfidation of Diazo(trimethylsilyl)methane	28
4.4.26.7.1.2.4	Variation 4:	Phosphinylation of Diazo(trimethylsilyl)methane	28
4.4.26.7.2		Applications of 1-Diazo-1-silylalkanes	29
4.4.26.7.2.1	Method 1:	Diazo(trimethylsilyl)methane as a One-Carbon Unit	30
4.4.26.7.2.2	Method 2:	Diazo(trimethylsilyl)methane as a C—N—N Unit	45
4.4.26.7.2.3	Method 3:	Applications of Diazo(trimethylsilyl)methane in the Generation of Alkylidene Carbenes	48
4.4.26.7.2.4	Method 4:	Applications of 2-Diazo-2-(trimethylsilyl)ethanols	57
4.4.26.7.2.5	Method 5:	Applications of Diazo(silyl)acetates	60
4.4.26.7.2.6	Method 6:	Applications of Diazo(silyl)methyl Ketones	64

## Volume 7: Compounds of Groups 13 and 2 (Al, Ga, In, Tl, Be...Ba)

7.1	<b>Product Class 1: Aluminum Compounds</b>		
7.1.2.44	<b>Aluminum Hydrides</b>		2010
	H. Naka and S. Saito		
7.1.2.44	<b>Aluminum Hydrides</b>		69
7.1.2.44.1	Method 1:	Amine- and Amide-Aluminate Complexes Prepared from Lithium Aluminum Hydride and Amines	69
7.1.2.44.2	Method 2:	Sodium Bis(2-methoxyethoxy)aluminum Hydride	69
7.1.2.44.3	Method 3:	Sodium Bis(2-methoxyethoxy)aluminum Hydride with Pyrrolidine and Potassium <i>tert</i> -Butoxide	70
7.1.2.44.4	Method 4:	Diisobutylaluminum Hydride with Metal Alkoxides	72
7.1.2.44.5	Method 5:	Diisobutylaluminum Hydride with Lithium Amides	72
7.1.2.44.6	Method 6:	Diisobutylaluminum Hydride with Nickel Compounds	73
7.1.2.44.7	Method 7:	Trivalent Aluminum Trihydride-Amine Complexes	76
7.1.3.18	<b>Aluminum Halides</b>		2010
	H. Naka and S. Saito		
7.1.3.18	<b>Aluminum Halides</b>		79
7.1.3.18.1	Method 1:	Aluminum Halides with Amino Ligands	79
7.1.3.18.2	Method 2:	Aluminum Halides with Chiral Alkoxide Ligands	81
7.1.3.18.3	Method 3:	Aluminum Halides Coordinated with Thiols or Sulfides	88
7.1.3.18.4	Method 4:	Aluminum Halides with Onium Salts	88
7.1.3.18.5	Method 5:	Aluminum Bromide with Organosilicon Halides	89
7.1.3.18.6	Method 6:	Aluminum Triiodide	90

2010 Updated Section · 2010 Completely Revised Contributions · New New Contributions

7.1.9.11	<b>Triorganoaluminum Compounds</b>	2010
	M. Oishi and H. Takikawa	
<hr/>		
7.1.9.11	<b>Triorganoaluminum Compounds</b> .....	93
7.1.9.11.1	Method 1: Applications in Addition to C—C Multiple Bonds .....	93
7.1.9.11.1.1	Variation 1: Carboalumination of Alkenes and Alkynes .....	93
7.1.9.11.1.2	Variation 2: Conjugate Addition .....	97
7.1.9.11.2	Method 2: Applications in Addition Reactions to Carbon—Heteroatom Multiple Bonds .....	102
7.1.9.11.2.1	Variation 1: Reaction with Carbonyl Substrates .....	102
7.1.9.11.3	Method 3: Applications in Activation of Inert Chemical Bonds .....	104
7.1.9.11.3.1	Variation 1: Alkylative Defluorination .....	104
7.1.9.11.3.2	Variation 2: Carbon—Hydrogen Bond Activation .....	107
7.2	<b>Product Class 2: Gallium Compounds</b>	
<hr/>		
7.2.8	<b>Gallium Compounds</b>	2010
	M. Yamaguchi	
<hr/>		
7.2.8	<b>Gallium Compounds</b> .....	113
7.2.8.1	Method 1: Synthesis of Organogallium(III) Complexes Containing Gal- lium—Gallium Bonds .....	113
7.2.8.2	Method 2: Synthesis of Organogallium Complexes Containing a Bond between Gallium and a Transition Metal .....	114
7.2.8.3	Method 3: Synthesis of Organogallium(III) Halides .....	115
7.2.8.4	Method 4: Synthesis of Organogallium(III) Complexes Containing a Bond between Gallium and a Group 16 Element .....	116
7.2.8.5	Method 5: Synthesis of Organogallium(III) Complexes Containing a Bond between Gallium and a Group 15 Element .....	117
7.2.8.6	Method 6: Synthesis of Triorganogallium(III) Complexes .....	119
7.2.8.7	Method 7: Synthesis of Organogallium(I) Complexes .....	120
7.3	<b>Product Class 3: Indium Compounds</b>	2010
	S. Araki and T. Hirashita	
<hr/>		
7.3	<b>Product Class 3: Indium Compounds</b> .....	125
7.3.1	<b>Product Subclass 1: Allylic Indium Complexes</b> .....	125
	Synthesis of Product Subclass 1 .....	126
7.3.1.1	Method 1: Addition of Indium Metal to Allylic Halides .....	126
7.3.1.1.1	Variation 1: In Ionic Liquids .....	126
7.3.1.1.2	Variation 2: Allylic Indium Complex from 4-Bromobuta-1,2-diene .....	126
7.3.1.1.3	Variation 3: Allylic Diindium Complex .....	127
7.3.1.2	Method 2: Reaction of Indium(I) Salts with Allylic Compounds .....	127
7.3.1.2.1	Variation 1: Reaction of Allylboronates with Catalytic Indium(I) Iodide ...	128
7.3.1.2.2	Variation 2: Electrochemical Processes .....	128
7.3.1.3	Method 3: Transmetalation from Allylic Stannanes to Indium(III) Chloride	129

2010 Updated Section · 2010 Completely Revised Contributions · New New Contributions

7.3.1.4	Method 4:	Transmetalation from $\pi$ -Allylpalladium and $\pi$ -Allylnickel Complexes	130
7.3.1.4.1	Variation 1:	Transmetalation from $\pi$ -Allylpalladium Complexes	130
7.3.1.4.2	Variation 2:	Transmetalation from $\pi$ -Allylnickel Complexes	132
7.3.1.5	Method 5:	Hydroindation of 1,3-Dienes	133
		Applications of Product Subclass 1 in Organic Synthesis	134
7.3.1.6	Method 6:	Regioselective Allylation of Carbonyl Compounds	134
7.3.1.7	Method 7:	Diastereoselective Allylation of Carbonyl Compounds	135
7.3.1.7.1	Variation 1:	Allylation of Aldehydes Bearing Coordinative Substituents	136
7.3.1.7.2	Variation 2:	Allylation with Allylindium Bearing Coordinative Substituents	137
7.3.1.8	Method 8:	Enantioselective Allylation of Carbonyl Compounds	138
7.3.1.9	Method 9:	Allylation of Imines	139
7.3.1.9.1	Variation 1:	Diastereoselective Allylation	139
7.3.1.9.2	Variation 2:	Enantioselective Allylation	139
7.3.1.10	Method 10:	Carboindation of Carbon—Carbon Multiple Bonds	140
7.3.1.11	Method 11:	Cross-Coupling Reaction	142
7.3.1.12	Method 12:	Photolytic Radical Reaction	142
7.3.2		<b>Product Subclass 2: Propargylic/Allenlylic Indium Complexes</b>	143
		Synthesis of Product Subclass 2	143
7.3.2.1	Method 1:	Addition of Indium Metal to Propargylic Halides	143
7.3.2.2	Method 2:	Insertion of Indium(I) Halide into Propargylic Halides	144
7.3.2.3	Method 3:	Transmetalation from Organopalladium Complexes	144
		Applications of Product Subclass 2 in Organic Synthesis	145
7.3.2.4	Method 4:	Addition to Carbonyl and Imine Compounds	145
7.3.2.5	Method 5:	Coupling Reaction	146
7.3.3		<b>Product Subclass 3: Indium Enolates</b>	147
		Synthesis of Product Subclass 3	147
7.3.3.1	Method 1:	Insertion of Indium Metal or Indium(I) Halides into $\alpha$ -Halo Esters	147
		Applications of Product Subclass 3 in Organic Synthesis	147
7.3.3.2	Method 2:	Reformatsky-Type Reactions	147
7.3.3.3	Method 3:	1,4-Addition	148
7.3.4		<b>Product Subclass 4: Arylindium(III) Complexes</b>	148
		Synthesis of Product Subclass 4	148
7.3.4.1	Method 1:	Transmetalation	148
7.3.4.2	Method 2:	Insertion of Indium Metal into Aryl Iodides	148
		Applications of Product Subclass 4 in Organic Synthesis	149
7.3.4.3	Method 3:	Nucleophilic Substitution	149
7.3.4.4	Method 4:	Cross-Coupling Reactions	150
7.3.4.4.1	Variation 1:	Palladium-Catalyzed Cross-Coupling Reactions	150
7.3.4.4.2	Variation 2:	Copper-Catalyzed Three-Component Coupling Reactions	151

2010 Updated Section • 2010 Completely Revised Contributions • New New Contributions

7.3.5	<b>Product Subclass 5: Alkyl- and Alkenylindium(III) Complexes</b> .....	152
	Synthesis of Product Subclass 5 .....	152
7.3.5.1	Method 1: Transmetalation .....	152
7.3.5.2	Method 2: Alkenylindium via Hydroindation .....	152
	Applications of Product Subclass 5 in Organic Synthesis .....	152
7.3.5.3	Method 3: Allylic Substitution .....	152
7.3.5.4	Method 4: Cross-Coupling Reactions .....	153
7.3.5.4.1	Variation 1: Cross Coupling with Halides or Pseudohalides .....	153
7.3.5.4.2	Variation 2: Carbonylative Cross-Coupling Reaction .....	154
7.3.5.4.3	Variation 3: Radical Coupling Reaction .....	154
7.3.6	<b>Product Subclass 6: Tetraorganoindates</b> .....	155
	Synthesis of Product Subclass 6 .....	155
7.3.6.1	Method 1: Reaction of Indium Halides with Organolithium or Grignard Reagents .....	155
	Applications of Product Subclass 6 in Organic Synthesis .....	155
7.3.6.2	Method 2: Allylic Substitution .....	155
7.3.6.3	Method 3: Ring Opening of Epoxides .....	156
7.3.6.4	Method 4: Cross-Coupling Reactions .....	156
7.3.7	<b>Product Subclass 7: Indium(III) Chloride</b> .....	157
	Applications of Product Subclass 7 in Organic Synthesis .....	158
7.3.7.1	Method 1: Allylation and Alkylation .....	158
7.3.7.1.1	Variation 1: Allylation and Alkenylation with Organosilanes .....	158
7.3.7.1.2	Variation 2: Sakurai–Hosomi-Type Allylation .....	158
7.3.7.1.3	Variation 3: Alkylation of 1,3-Dicarbonyl Compounds .....	159
7.3.7.2	Method 2: Cycloaddition Reactions .....	160
7.3.7.2.1	Variation 1: Enantioselective Diels–Alder Reaction .....	160
7.3.7.2.2	Variation 2: Ketone–Ene Reaction .....	160
7.3.7.3	Method 3: Prins-Type Reactions .....	160
7.3.7.4	Method 4: Mukaiyama Aldol Reaction .....	161
7.3.7.5	Method 5: Mannich-Type Reaction .....	162
7.3.7.6	Method 6: Friedel–Crafts Reaction .....	162
7.3.7.7	Method 7: Intramolecular Cyclization .....	163
7.3.7.8	Method 8: Reduction .....	164
7.3.7.9	Method 9: Chlorination of Alcohols .....	165
7.3.8	<b>Product Subclass 8: Indium(III) Bromide</b> .....	165
	Applications of Product Subclass 8 in Organic Synthesis .....	166
7.3.8.1	Method 1: Reductive Aldol Reaction .....	166
7.3.8.2	Method 2: Friedel–Crafts Acylation of Arenes .....	166
7.3.8.3	Method 3: Activation of Silyl Enolates .....	167
7.3.8.3.1	Variation 1: Addition/Coupling with Alkynes .....	167
7.3.8.3.2	Variation 2: Alkylation by Alkyl Chlorides .....	167
7.3.8.4	Method 4: Carbonyl Alkynylation .....	168

2010 Updated Section • 2010 Completely Revised Contributions • New New Contributions

7.3.8.5	Method 5: Intramolecular Cyclization	168
7.3.8.5.1	Variation 1: Indole Synthesis	168
7.3.8.5.2	Variation 2: Intramolecular Michael Addition	169
7.3.9	<b>Product Subclass 9: Indium(III) Iodide</b>	169
	Synthesis of Product Subclass 9	170
7.3.9.1	Method 1: Reaction of Indium Metal with Iodine	170
	Applications of Product Subclass 9 in Organic Synthesis	170
7.3.9.2	Method 2: $\alpha$ -Alkylation of Carbonyl Compounds	170
7.3.9.3	Method 3: Strecker Reaction	171
7.3.9.4	Method 4: Transesterification	171
7.3.9.5	Method 5: Allylation of Ketones	172
7.3.9.6	Method 6: Ring Opening of Aziridines	172
7.3.10	<b>Product Subclass 10: Indium(III) Trifluoromethanesulfonate</b>	173
	Applications of Product Subclass 10 in Organic Synthesis	173
7.3.10.1	Method 1: Allylation	173
7.3.10.1.1	Variation 1: Allylation of Ketones and Imines	173
7.3.10.1.2	Variation 2: Enantioselective Allylation	174
7.3.10.2	Method 2: Reaction of Alkynes	175
7.3.10.2.1	Variation 1: Addition of $\beta$ -Dicarbonyl Compounds to Unactivated Alkynes	175
7.3.10.2.2	Variation 2: Asymmetric Addition of Enamines to Alkynes	176
7.3.10.2.3	Variation 3: Conia-Ene Reaction	177
7.3.10.3	Method 3: Rearrangement	178
7.3.10.4	Method 4: Diels–Alder Reaction	178
7.3.10.5	Method 5: Retro-Claisen Condensation	179
7.3.10.6	Method 6: Cycloaddition	180
7.3.10.7	Method 7: Carbonyl-Ene Reaction	180
7.3.11	<b>Product Subclass 11: Indium(III) Trifluoromethanesulfonimide</b>	181
	Applications of Product Subclass 11 in Organic Synthesis	181
7.3.11.1	Method 1: Addition of 1,3-Dicarbonyl Compounds to Alkynes	181
7.3.11.2	Method 2: Alkylation of Pyrroles	182
7.3.12	<b>Product Subclass 12: Indium(I) Iodide</b>	183
	Synthesis of Product Subclass 12	183
7.3.12.1	Method 1: Reaction of Indium Metal with Iodine	183
	Applications of Product Subclass 12 in Organic Synthesis	183
7.3.12.2	Method 2: Cleavage of Diselenides and Disulfides	183
7.3.12.2.1	Variation 1: Synthesis of Unsymmetrical Diorganyl Selenides and Related Compounds	183
7.3.12.2.2	Variation 2: Synthesis of Vinyl Selenides	184
7.3.12.2.3	Variation 3: Aziridine Ring Opening	184
7.3.13	<b>Product Subclass 13: Zerovalent Indium</b>	184
	Applications of Product Subclass 13 in Organic Synthesis	185

2010 Updated Section · 
 2010 Completely Revised Contributions · 
 New New Contributions

7.3.13.1	Method 1:	Reduction	185
7.3.13.1.1	Variation 1:	Reduction of Conjugated Alkenes	185
7.3.13.1.2	Variation 2:	Reduction of Nitro and <i>N</i> -Oxide Groups and Hydroxylamines	185
7.3.13.2	Method 2:	Radical Reaction	186
7.3.13.2.1	Variation 1:	Intermolecular Reaction	186
7.3.13.2.2	Variation 2:	Intramolecular Reaction	186
7.3.13.3	Method 3:	Elimination	189

## 7.9 Product Class 9: Barium Compounds

7.9.5	<b>Barium Compounds</b>	2010
	A. Yanagisawa	
7.9.5	<b>Barium Compounds</b>	195
7.9.5.1	Applications of Barium in Organic Synthesis	195
7.9.5.1.1	Method 1: Reactions of Propargylic Bromides with Carbonyl Compounds	195
7.9.5.1.2	Method 2: Reactions of Propargylic Bromides with Imines	196
7.9.5.1.3	Method 3: Reactions of $\alpha$ -Chloro Ketones with Aldehydes	197
7.9.5.2	Applications of Barium Hydride in Organic Synthesis	198
7.9.5.2.1	Method 1: Homocoupling of Enones	198
7.9.5.2.1.1	Variation 1: Cross Coupling of Enones	199
7.9.5.3	Applications of Barium Alkoxides in Organic Synthesis	200
7.9.5.3.1	Method 1: Reactions of Ketones with Aldehydes	200
7.9.5.3.1.1	Variation 1: Reactions of Ketones with Enones	201
7.9.5.3.2	Method 2: Aldol Reactions	202
7.9.5.3.3	Method 3: Mannich-Type Reactions	204
7.9.5.3.4	Method 4: Diels–Alder-Type Reactions	206

## Volume 8: Compounds of Group 1 (Li...Cs)

### 8.1 Product Class 1: Lithium Compounds

8.1.28	<b>The Catalytic Use of Lithium Compounds for Bond Formation</b>	New
	S. Matsunaga	
8.1.28	<b>The Catalytic Use of Lithium Compounds for Bond Formation</b>	209
8.1.28.1	Lithium Acetate and Related Compounds as Lewis Base Catalysts	209
8.1.28.1.1	Method 1: Catalytic C–C Bond Formation of Silyl Enolates	209
8.1.28.2	Use of Lithium Aryloxides as Brønsted Base Catalysts	211
8.1.28.2.1	Method 1: Catalytic C–C Bond Formation via In Situ Enolate Generation	211
8.1.28.3	Use of Lithium Binaphtholates as Chiral Catalysts	213

2010 Updated Section · 2010 Completely Revised Contributions · New New Contributions

8.1.28.3.1	Method 1:	Catalytic Asymmetric Cyanation Reactions	213
8.1.28.3.2	Method 2:	Catalytic Asymmetric Mannich-Type Reactions	215
8.1.28.3.3	Method 3:	Catalytic Asymmetric 1,4-Addition Reactions	216
8.1.28.3.4	Method 4:	Catalytic Asymmetric Synthesis of 2,2-Disubstituted Epoxides and Oxetanes	219
8.1.28.3.5	Method 5:	Catalytic Asymmetric Aldol Reaction	221

## 8.2 Product Class 2: Sodium Compounds

8.2.16	<b>The Catalytic Use of Sodium Compounds for Bond Formation</b>		<b>New</b>
	T. Arai		
8.2.16	<b>The Catalytic Use of Sodium Compounds for Bond Formation</b>		223
8.2.16.1	Method 1:	Lewis Base Catalysis	224
8.2.16.1.1	Variation 1:	Sodium Methoxide Catalysis of the Mukaiyama Aldol Reaction	224
8.2.16.1.2	Variation 2:	Sodium Acetate Catalysis of Michael Reactions	224
8.2.16.1.3	Variation 3:	Sodium–Phosphine Oxide for the Activation of a Trimethylsilyl Enolate	225
8.2.16.1.4	Variation 4:	Sodium Formate for the Synthesis of Trimethylsilyl-Protected (Trichloromethyl)carbinols	226
8.2.16.1.5	Variation 5:	Sodium Salt of L-Phenylglycine for the Cyanosilylation of Ketones	227
8.2.16.2	Method 2:	Lewis Acid Catalysis	227
8.2.16.2.1	Variation 1:	Use of Sodium Tetrafluoroborate	228
8.2.16.3	Method 3:	Acid–Base Catalysis	228
8.2.16.3.1	Variation 1:	Sodium Tetramethoxyborate for Michael Reaction	228
8.2.16.3.2	Variation 2:	Lanthanum Trisodium Tris(binaphtholate) Complex for Michael Reaction	229
8.2.16.3.3	Variation 3:	Gallium Sodium Bis(binaphtholate)/Sodium <i>tert</i> -Butoxide Combination for Michael Reaction	230
8.2.16.3.4	Variation 4:	Aluminum Lithium Bis(binaphtholate)/Sodium <i>tert</i> -Butoxide for Michael Reaction	231
8.2.16.3.5	Variation 5:	Samarium Trisodium Tris(binaphtholate) for Michael Reaction–Protonation	232
8.2.16.3.6	Variation 6:	Lanthanum Trilithium Tris(biphenoxide)/Sodium Iodide for Cyclopropanation of Enones	233
8.2.16.3.7	Variation 7:	Neodymium/Sodium–Amidophenol Complex for <i>anti</i> -Selective Henry Reaction	234

**2010** Updated Section · **2010** Completely Revised Contributions · **New** New Contributions

## Volume 16: Six-Membered Heteroarenes with Two Identical Hetero- atoms

16.8	<b>Product Class 8: Pyridazines</b>	
16.8.5	<b>Pyridazines</b>	2010
	J. Zhang	
16.8.5	<b>Pyridazines</b> .....	237
16.8.5.1	Synthesis by Ring-Closure Reactions .....	239
16.8.5.1.1	By Formation of Two N—C Bonds .....	239
16.8.5.1.1.1	Fragments C—C—C and N—N .....	239
16.8.5.1.1.1.1	Method 1: Condensation of 1,4-Diketones with Hydrazine .....	239
16.8.5.1.1.1.2	Method 2: Condensation of 4-Oxoalkanoic Acid Derivatives with Hydra- zine .....	241
16.8.5.1.1.1.3	Method 3: Condensation of Maleic Anhydrides with Hydrazine .....	241
16.8.5.1.1.1.4	Method 4: Condensation of 4-Oxo Acids with Hydrazine, with Subse- quent Oxidation by Copper(II) Salts .....	242
16.8.5.1.1.1.5	Method 5: Isomerization of Alk-2-yne-1,4-diols Followed by Condensa- tion with Hydrazine .....	243
16.8.5.1.1.1.6	Method 6: Reaction of $\alpha$ -Oxo Acids with Aryl Methyl Ketones To Give 4-Oxobut-2-enoic Acids, Followed by Condensation with Hy- drazine .....	244
16.8.5.1.1.1.7	Method 7: Synthesis from Methyl 3,3,3-Trifluoro-2-oxopropanoate and Hydrazine .....	244
16.8.5.1.1.1.8	Method 8: Synthesis from Pyran-2-one and Hydrazine, with Subsequent Oxidation .....	245
16.8.5.1.2	By Formation of One N—C and One C—C Bond .....	246
16.8.5.1.2.1	Fragments N—N—C—C and C—C .....	246
16.8.5.1.2.1.1	Method 1: Michael-Type Addition/Heterocyclization of Active Methylene Compounds to 1,2-Diazabuta-1,3-dienes .....	246
16.8.5.1.2.1.2	Method 2: Synthesis from Sodium 1,2-Dihydroxyethane-1,2-disulfonate ·	248
16.8.5.2	Synthesis by Ring Transformation .....	249
16.8.5.2.1	Formal Exchange of Ring Members with Retention of Ring Size .....	249
16.8.5.2.1.1	Method 1: Diels–Alder Reaction of 1,2,4,5-Tetrazine and Ketene Acetals ·	249
16.8.5.2.1.2	Method 2: Diels–Alder Reaction of 1,2,4,5-Tetrazines and Ketones ····	250
16.8.5.2.1.3	Method 3: Diels–Alder Reaction of 1,2,4,5-Tetrazines and Alkynylboronic Esters .....	251
16.8.5.2.1.4	Method 4: Diels–Alder Reaction of Nitrogen Heterocycle Substituted Tetrazines and Alkynyltrifluoroborates .....	252
16.8.5.2.1.5	Method 5: Diels–Alder Reaction of 1,2,4,5-Tetrazines and Enol Ethers or Alkenes .....	254
16.8.5.3	Synthesis by Substituent Modification .....	256

2010 Updated Section · 2010 Completely Revised Contributions · New New Contributions

16.8.5.3.1	Substitution of Existing Substituents	256
16.8.5.3.1.1	Method 1: Synthesis from Chloropyridazines or Chloropyridazinones via Palladium-Mediated Suzuki Coupling	256
16.8.5.3.1.2	Method 2: Synthesis from Chloropyridazines or Chloropyridazin-3(2 <i>H</i> )-ones via Palladium-Mediated Stille Coupling	264
16.8.5.3.1.3	Method 3: Synthesis from Chloropyridazines or Chloropyridazin-3(2 <i>H</i> )-ones via Palladium-Mediated Sonogashira Coupling	266
16.8.5.3.1.4	Method 4: Synthesis from Halopyridazines or Halopyridazin-3(2 <i>H</i> )-ones via Palladium-Mediated Heck Coupling	268
16.8.5.3.1.5	Method 5: Palladium-Catalyzed Cross-Coupling Reactions of Pyridazine <i>N</i> -Oxides with Aryl Chlorides, Bromides, and Iodides	268
16.8.5.3.1.6	Method 6: Other Nucleophilic Substitutions	270

**Volume 20:**  
**Three Carbon—Heteroatom Bonds: Acid Halides; Carboxylic Acids and Acid Salts; Esters, and Lactones; Peroxy Acids and R(CO)OX Compounds; R(CO)X, X = S, Se, Te**

20.2	<b>Product Class 2: Carboxylic Acids</b>	
20.2.1.8.13	<b>Synthesis with Retention of the Functional Group (Update 1)</b> G. Landelle and J.-F. Paquin	2010
20.2.1.8.13	<b>Synthesis with Retention of the Functional Group (Update 1)</b>	277
20.2.1.8.13.1	Method 1: Synthesis by Conjugate Addition	277
20.2.1.8.13.1.1	Variation 1: Conjugate Addition of Organometallic Reagents	277
20.2.1.8.13.1.2	Variation 2: Conjugate Addition of Thiols	278
20.2.1.8.13.1.3	Variation 3: Asymmetric Conjugate Addition	279
20.2.1.8.14	<b>Synthesis with Retention of the Functional Group (Update 2)</b> J. L. Gleason and E. A. Tiong	2010
20.2.1.8.14	<b>Synthesis with Retention of the Functional Group (Update 2)</b>	283
20.2.1.8.14.1	Synthesis by Alkylation or Arylation	283
20.2.1.8.14.1.1	Method 1: Direct $\alpha$ -Alkylation or -Arylation of Carboxylic Acids	283
20.2.1.8.14.1.2	Method 2: Diastereoselective Alkylations	284
20.2.1.8.14.1.3	Method 3: Alkylation of Alkenoic Acids	285
20.2.1.8.14.1.4	Method 4: Synthesis via Carboxylic Acid Derivatives	286
20.2.1.8.14.1.4.1	Variation 1: Alkylation and Arylation of Esters	287
20.2.1.8.14.1.4.2	Variation 2: Chiral Auxiliaries: Tertiary Stereocenters	289
20.2.1.8.14.1.4.3	Variation 3: Chiral Auxiliaries: Quaternary Stereocenters	293

21.15	<b>Product Class 15: Polyamides</b>	New
	T. Higashihara and M. Ueda	
21.15	<b>Product Class 15: Polyamides</b> .....	301
21.15.1	<b>Product Subclass 1: Aliphatic Polyamides</b> .....	301
21.15.1.1	Synthesis of Product Subclass 1 .....	301
21.15.1.1.1	Method 1: Interfacial Polymerization .....	301
21.15.1.1.2	Method 2: Ring-Opening Polymerization .....	302
21.15.1.1.3	Method 3: Melt Polymerization .....	303
21.15.2	<b>Product Subclass 2: Aliphatic–Aromatic Polyamides</b> .....	303
21.15.2.1	Synthesis of Product Subclass 2 .....	303
21.15.2.1.1	Method 1: Use of Diacid Dichlorides .....	303
21.15.2.1.2	Method 2: Melt Polymerization .....	304
21.15.3	<b>Product Subclass 3: Aromatic Polyamides</b> .....	305
21.15.3.1	Synthesis of Product Subclass 3 .....	305
21.15.3.1.1	Method 1: Use of Diacid Dichlorides .....	305
21.15.3.1.2	Method 2: Use of Active Esters and Amides .....	306
21.15.3.1.3	Method 3: Direct Polymerization .....	307
21.15.3.1.3.1	Variation 1: Use of Condensation Agents .....	308
21.15.3.1.3.2	Variation 2: By Reaction-Induced Crystallization .....	309
21.15.3.1.3.3	Variation 3: Melt or Solid-State Polymerization .....	310
21.15.3.1.4	Method 4: Transition-Metal-Catalyzed Polymerization .....	312
21.15.3.1.5	Method 5: Condensative Chain-Growth Polymerization .....	313
21.15.3.1.5.1	Variation 1: Aromatic Polyamides with Low Polydispersity .....	313
21.15.3.1.5.2	Variation 2: Block Copolyamides .....	314
21.15.3.1.6	Method 6: Hyperbranched Polymers Using AB <sub>x</sub> Monomers .....	317
21.15.3.1.7	Method 7: Dendrimers by Divergent and Convergent Methods .....	318

## Volume 27: Heteroatom Analogues of Aldehydes and Ketones

27.13	<b>Product Class 13: Nitrones and Cyclic Analogues</b>	
27.13.3	<b>Nitrones and Cyclic Analogues</b>	2010
	P. Merino	
27.13.3	<b>Nitrones and Cyclic Analogues</b> .....	325
27.13.3.1	Synthesis of Nitrones and Cyclic Analogues .....	325

2010 Updated Section · 2010 Completely Revised Contributions · New New Contributions

27.13.3.1.1	Method 1:	Synthesis by Oxidation	325
27.13.3.1.1.1	Variation 1:	Of Secondary Amines	325
27.13.3.1.1.2	Variation 2:	Of Imines	333
27.13.3.1.1.3	Variation 3:	Of Hydroxylamines	336
27.13.3.1.2	Method 2:	Synthesis by Condensation of <i>N</i> -Alkylhydroxylamines	340
27.13.3.1.2.1	Variation 1:	With Aldehydes	340
27.13.3.1.2.2	Variation 2:	With Ketones	345
27.13.3.1.3	Method 3:	Synthesis by <i>N</i> -Alkylation of Oximes	347
27.13.3.1.4	Method 4:	Synthesis by Ring-Closure Reactions	348
27.13.3.1.5	Method 5:	Miscellaneous Methods	354
27.13.3.2		Applications of Nitrones and Cyclic Analogues in Organic Synthesis	360
27.13.3.2.1	Method 1:	1,3-Dipolar Cycloadditions	360
27.13.3.2.1.1	Variation 1:	With Heteroaromatic Multiple Bonds	360
27.13.3.2.1.2	Variation 2:	With Alkynes	363
27.13.3.2.1.3	Variation 3:	With Cumulenes	367
27.13.3.2.1.4	Variation 4:	With Heterocumulenes	369
27.13.3.2.1.5	Variation 5:	With Alkenes	370
27.13.3.2.1.6	Variation 6:	Intramolecular Cyclizations	377
27.13.3.2.1.7	Variation 7:	Enantioselective Catalysis	379
27.13.3.2.2	Method 2:	Nucleophilic Additions	383
27.13.3.2.2.1	Variation 1:	Of <i>sp</i> -Nucleophiles	383
27.13.3.2.2.2	Variation 2:	Of <i>sp</i> <sup>2</sup> -Nucleophiles	384
27.13.3.2.2.3	Variation 3:	Of <i>sp</i> <sup>3</sup> -Nucleophiles	386
27.13.3.2.2.4	Variation 4:	Of Enolates	387
27.13.3.2.2.5	Variation 5:	Allylation	388
27.13.3.2.2.6	Variation 6:	Reduction (Deoxygenation)	389
27.13.3.2.2.7	Variation 7:	Of <i>P</i> -Nucleophiles	390
27.13.3.2.3	Method 3:	Metal Complex Formation	390
27.13.3.2.4	Method 4:	Rearrangements	391
27.13.3.2.5	Method 5:	Spin-Trapping	392
27.13.3.2.6	Method 6:	Miscellaneous Reactions	393

## Volume 40: Amines, Ammonium Salts, Amine *N*-Oxides, Halo- amines, Hydroxylamines and Sulfur Analogues, and Hydrazines

40.1	<b>Product Class 1: Amino Compounds</b>		
40.1.1.1.2	<b>Reductive Amination of Carbonyl Compounds</b>		<b>2010</b>
	P. Margaretha		
40.1.1.1.2	<b>Reductive Amination of Carbonyl Compounds</b>	405	
40.1.1.1.2.1	Alkylamines from Carbonyl Compounds by Direct Reductive Amination	406	
40.1.1.1.2.1.1	Method 1: Direct Reductive Amination by Catalytic Hydrogenation	406	

**2010** Updated Section · **2010** Completely Revised Contributions · **New** New Contributions

40.1.1.1.2.1.1.1	Variation 1:	Hydrogenation Using Heterogeneous Metal Catalysts	407
40.1.1.1.2.1.1.2	Variation 2:	Hydrogenation Using Homogeneous Metal Complex Catalysts	407
40.1.1.1.2.1.1.3	Variation 3:	Palladium-Catalyzed Transfer Hydrogenation	409
40.1.1.1.2.1.2	Method 2:	Direct Reductive Amination Using Silanes as a Hydrogen Source	410
40.1.1.1.2.1.2.1	Variation 1:	Using Polymethylhydrosiloxane	410
40.1.1.1.2.1.2.2	Variation 2:	Using Aminohydrosilanes	411
40.1.1.1.2.1.2.3	Variation 3:	Using Triethylsilane	411
40.1.1.1.2.1.2.4	Variation 4:	Using Phenylsilane	412
40.1.1.1.2.1.3	Method 3:	Direct Reductive Amination with Borohydride or Borane Reducing Agents	412
40.1.1.1.2.1.3.1	Variation 1:	Using Sodium Cyanoborohydride	412
40.1.1.1.2.1.3.2	Variation 2:	Using Sodium Borohydride	415
40.1.1.1.2.1.3.3	Variation 3:	Using Zirconium(II) or Copper(I) Borohydrides	417
40.1.1.1.2.1.3.4	Variation 4:	Using Sodium Triacyloxyborohydrides	418
40.1.1.1.2.1.3.5	Variation 5:	Using Aminoboranes	419
40.1.1.1.2.1.3.6	Variation 6:	One-Pot Direct Reductive Amination via Borane Reduction of Imines	420
40.1.1.1.2.2	Primary Alkylamines from Oximes and <i>O</i> -Alkyloximes		421
40.1.1.1.2.2.1	Primary Alkylamines from Oximes		422
40.1.1.1.2.2.1.1	Method 1:	Catalytic Hydrogenation	422
40.1.1.1.2.2.1.2	Method 2:	Catalytic Transfer Hydrogenation	423
40.1.1.1.2.2.1.3	Method 3:	Reduction with Metallic Zinc	424
40.1.1.1.2.2.1.3.1	Variation 1:	Using Zinc in the Presence of Ammonia	424
40.1.1.1.2.2.1.3.2	Variation 2:	Using Zinc in the Presence of a Carboxylic Acid	425
40.1.1.1.2.2.1.4	Method 4:	Reductions with Borane or Borohydrides	426
40.1.1.1.2.2.1.4.1	Variation 1:	Reduction with Borane	426
40.1.1.1.2.2.1.4.2	Variation 2:	Reduction with Borohydrides	426
40.1.1.1.2.2.1.5	Method 5:	Reductions with Aluminum Trihydride or Hydroaluminates	428
40.1.1.1.2.2.2	Primary Alkylamines from <i>O</i> -Alkyloximes		428
40.1.1.1.2.3	Secondary Alkylamines from <i>N</i> -Alkylidenealkylamines by Reduction		430
40.1.1.1.2.3.1	Method 1:	Stereorandom Reduction of <i>N</i> -Alkylidenealkylamines to Secondary Alkylamines	430
40.1.1.1.2.3.1.1	Variation 1:	Via Heterogeneous Hydrogenation	430
40.1.1.1.2.3.1.2	Variation 2:	Via Lewis Acid Catalyzed Hydrogenation	431
40.1.1.1.2.3.1.3	Variation 3:	Via Transfer Hydrogenation	431
40.1.1.1.2.3.1.4	Variation 4:	By Reduction with Hydrides	432
40.1.1.1.2.3.2	Method 2:	Enantioselective Reduction of <i>N</i> -Alkylidenealkylamines to Secondary Alkylamines	434
40.1.1.1.2.4	Tertiary Alkylamines from Enamines by Reduction		435
40.1.1.1.2.4.1	Method 1:	Amines from Enamines by Catalytic Hydrogenation	435
40.1.1.1.2.4.2	Method 2:	Amines from Enamines by Enantioselective (Asymmetric) Catalytic Hydrogenation	437
40.1.1.1.2.4.3	Method 3:	Amines from Enamines Using Other Reducing Agents	438
