

## Table of Contents

### Volume 5: Compounds of Group 14 (Ge, Sn, Pb)

5.2	<b>Product Class 2: Tin Compounds</b>		
5.2.1	<b>Product Subclass 1: Tin Hydrides</b>		2013
	K. Tchabanenko		
5.2.1	<b>Product Subclass 1: Tin Hydrides</b>	.....	1
	Synthesis of Product Subclass 1	.....	3
5.2.1.1	Method 1: Reduction of Tin Halides	.....	3
5.2.1.1.1	Variation 1: Reduction of Tin Halides with Lithium Aluminum Hydride	...	3
5.2.1.1.2	Variation 2: Reduction of Tin Halides with Sodium Borohydride	.....	5
5.2.1.2	Method 2: Synthesis from Organotin Oxides, Alkoxides, or Amides by Reduction	.....	6
5.2.1.3	Method 3: Synthesis from Organotin Lithium, Sodium, Potassium, or Magnesium Compounds by Reactions with Electrophiles	....	7
	Applications of Product Subclass 1 in Organic Synthesis	.....	8
5.2.1.4	Tin-Mediated Radical Chain Reactions Not Involving Rearrangement of Intermediate Radicals	.....	8
5.2.1.4.1	Method 1: Reduction of Carbon—Heteroatom Bonds	.....	12
5.2.1.4.1.1	Variation 1: Reduction of Carbon—Halogen Bonds	.....	12
5.2.1.4.1.2	Variation 2: Reduction of C—O Bonds	.....	16
5.2.1.4.1.3	Variation 3: Reduction of C—N Bonds	.....	19
5.2.1.4.2	Method 2: Formation of C—C Bonds by Radical Additions to Alkenes	...	21
5.2.1.4.2.1	Variation 1: Formation of C—C Bonds by Intermolecular Reactions with Alkenes	.....	22
5.2.1.4.2.2	Variation 2: Formation of C—C Bonds by Intramolecular Addition of Carbon Radicals to Double Bonds	.....	26
5.2.1.4.3	Method 3: Formation of C—N Bonds by Reactions of Nitrogen-Centered Radicals	.....	39
5.2.1.5	Tin-Mediated Radical Reactions That Proceed with Rearrangement of Intermediate Radicals	.....	43
5.2.1.5.1	Method 1: Radical Reactions That Proceed with Opening of Small Rings	·	43
5.2.1.5.2	Method 2: Radical Reactions That Proceed with 1,2- and 1,4-Group Transfer	.....	46
5.2.1.5.3	Method 3: Radical Translocation through Intramolecular Hydrogen Abstraction	.....	51
5.2.1.6	Hydrostannylation	.....	55
5.2.1.6.1	Method 1: Hydrostannylation of Alkynes	.....	55
5.2.1.6.1.1	Variation 1: Radical Hydrostannylation of Terminal Alkynes	.....	55

5.2.1.6.1.2	Variation 2:	Transition-Metal-Catalyzed Hydrostannylation of Terminal Alkynes .....	57
5.2.1.6.1.3	Variation 3:	Palladium-Catalyzed Sequential Hydrostannylation and Stille Cross Coupling of Terminal Alkynes .....	60
5.2.1.6.1.4	Variation 4:	Radical Hydrostannylation of Internal Alkynes .....	61
5.2.1.6.1.5	Variation 5:	Transition-Metal-Catalyzed Hydrostannylation of Internal Alkynes .....	63
5.2.1.6.2	Method 2:	Hydrostannylation of C=C, C=O, and C=N Bonds .....	67
5.2.1.6.2.1	Variation 1:	Hydrostannylation of Alkenes .....	67
5.2.1.6.2.2	Variation 2:	Addition Reactions of Tin Hydrides to C=O Bonds .....	70
5.2.1.6.2.3	Variation 3:	Additions of Tin Hydrides to C=N Bonds .....	72

## Volume 7: Compounds of Groups 13 and 2 (Al, Ga, In, Tl, Be...Ba)

7.6	<b>Product Class 6: Magnesium Compounds</b>		
7.6.11.21	<b>Grignard Reagents with Transition Metals</b>		2013
	Z. Song and T. Takahashi		
7.6.11.21	<b>Grignard Reagents with Transition Metals</b> .....		79
7.6.11.21.1	Method 1:	Mercury-Catalyzed Addition of Grignard Reagents to Aldehydes .....	80
7.6.11.21.2	Method 2:	Nickel-Catalyzed Cross Coupling of Grignard Reagents .....	81
7.6.11.21.2.1	Variation 1:	Reaction with Alkyl Halides .....	81
7.6.11.21.2.2	Variation 2:	Reaction with Organosulfur Compounds .....	82
7.6.11.21.2.3	Variation 3:	Reaction with Aryl Fluorides under Microwave Irradiation .....	84
7.6.11.21.3	Method 3:	Palladium-Catalyzed Cross Coupling of Grignard Reagents .....	85
7.6.11.21.3.1	Variation 1:	Reaction with Aryl Halides .....	85
7.6.11.21.3.2	Variation 2:	Reaction with Aryl Fluorides under Microwave Irradiation .....	86
7.6.11.21.3.3	Variation 3:	Reaction with Aryl Halides Promoted by Zinc(II) Bromide .....	87
7.6.11.21.3.4	Variation 4:	Reaction with Hetaryl Sulfonates .....	89
7.6.11.21.4	Method 4:	Copper-Catalyzed Reactions of Grignard Reagents .....	90
7.6.11.21.4.1	Variation 1:	Cross Coupling with Hetaryl Halides .....	90
7.6.11.21.4.2	Variation 2:	Carbometalation of Propargylic Alcohols .....	91
7.6.11.21.4.3	Variation 3:	Reaction with $\alpha,\beta$ -Unsaturated Carbonyl Compounds .....	93
7.6.11.21.4.4	Variation 4:	Allylic Substitution Reactions .....	94
7.6.11.21.4.5	Variation 5:	Ring Opening of Chiral Epoxides .....	96
7.6.11.21.4.6	Variation 6:	Cross Coupling with Allylic Chlorides .....	98
7.6.11.21.5	Method 5:	Iron-Catalyzed Cross Coupling of Grignard Reagents .....	99
7.6.11.21.5.1	Variation 1:	Reaction with Aryl Halides .....	99
7.6.11.21.5.2	Variation 2:	Reaction with Alkynyloxiranes .....	101
7.6.11.21.5.3	Variation 3:	Reaction with Primary and Secondary Alkyl Halides .....	102
7.6.11.21.6	Method 6:	Iron-Catalyzed Reduction of Organic Halides .....	105
7.6.11.21.7	Method 7:	Iridium-Catalyzed Allylic Substitution Reactions .....	106
7.6.11.21.8	Method 8:	Titanium-Catalyzed Cross Coupling of Grignard Reagents .....	107

7.6.11.21.8.1	Variation 1: Reaction with Aryl Fluorides .....	107
7.6.11.21.8.2	Variation 2: Reaction with <i>O,N</i> -Acetals .....	108
7.6.11.21.9	Method 9: Zirconium-Catalyzed Reaction with Alkynes .....	109
7.7	<b>Product Class 7: Calcium Compounds</b> .....	<b>2013</b>
	M. Hatano	
<hr/>		
7.7	<b>Product Class 7: Calcium Compounds</b> .....	113
7.7.1	<b>Product Subclass 1: Organocalcium Hydrides</b> .....	113
	Synthesis of Product Subclass 1 .....	113
7.7.1.1	Method 1: Synthesis of Phenylcalcium Hydride from Calcium Metal .....	113
	Applications of Product Subclass 1 in Organic Synthesis .....	114
7.7.1.2	Method 2: Reaction of Phenylcalcium Hydride with Electrophiles .....	114
7.7.2	<b>Product Subclass 2: Heterobimetallic Calcium Compounds</b> .....	115
	Synthesis of Product Subclass 2 .....	115
7.7.2.1	Method 1: Synthesis of Heterobimetallic Calcium Compounds with Alkaline Earth and Transition Metals .....	115
7.7.2.2	Method 2: Synthesis of Calcium Borates .....	116
	Applications of Product Subclass 2 in Organic Synthesis .....	117
7.7.2.3	Method 3: Intramolecular Hydroamination of Amino-Substituted Alkenes .....	117
7.7.2.4	Method 4: Baeyer–Villiger Oxidation of Ketones .....	118
7.7.3	<b>Product Subclass 3: Organocalcium Halides</b> .....	121
	Synthesis of Product Subclass 3 .....	121
7.7.3.1	Method 1: Synthesis of Methylcalcium Iodide from Calcium Metal .....	121
	Applications of Product Subclass 3 in Organic Synthesis .....	122
7.7.3.2	Method 2: Reaction of Organocalcium Halides with Electrophiles .....	122
7.7.4	<b>Product Subclass 4: Calcium Alkoxides</b> .....	123
	Synthesis of Product Subclass 4 .....	123
7.7.4.1	Method 1: Synthesis of Calcium Alkoxides from Calcium Metal .....	123
7.7.4.2	Method 2: Synthesis of Calcium Alkoxides from Calcium(II) Compounds .....	124
	Applications of Product Subclass 4 in Organic Synthesis .....	125
7.7.4.3	Method 3: Asymmetric Baylis–Hillman Reactions .....	125
7.7.4.4	Method 4: Asymmetric Aldol Reactions .....	125
7.7.4.5	Method 5: Asymmetric 1,4-Addition Reactions .....	126
7.7.4.6	Method 6: Asymmetric Epoxidation Reactions .....	127
7.7.5	<b>Product Subclass 5: Calcium Phosphates</b> .....	128
	Synthesis of Product Subclass 5 .....	128

7.7.5.1	Method 1: Synthesis of Chiral Calcium Phosphates from Calcium(II) Compounds	128
	Applications of Product Subclass 5 in Organic Synthesis	130
7.7.5.2	Method 2: Asymmetric Mannich Reactions of Aldimines	130
7.7.5.2.1	Variation 1: Reaction with Acyclic Nucleophiles	130
7.7.5.2.2	Variation 2: Reaction with Cyclic Nucleophiles	132
7.7.5.3	Method 3: Asymmetric Reactions of Indolin-2-ones	133
7.7.5.3.1	Variation 1: Oxidation of 3-Arylindolin-2-ones	133
7.7.5.3.2	Variation 2: Chlorination of 3-Arylindolin-2-ones	134
7.7.5.4	Method 4: Asymmetric Amination of Enamines	135
7.7.5.5	Method 5: Asymmetric Carbonyl-Ene Reactions	138
7.7.5.6	Method 6: Asymmetric Friedel–Crafts Alkylation	139
7.7.6	<b>Product Subclass 6: Calcium Amides</b>	140
	Synthesis of Product Subclass 6	140
7.7.6.1	Method 1: Synthesis of Calcium–Bis(4,5-dihydrooxazole) Complexes from Calcium(II) Compounds	140
	Applications of Product Subclass 6 in Organic Synthesis	141
7.7.6.2	Method 2: Asymmetric 1,4-Addition Reactions with $\alpha,\beta$ -Unsaturated Carbonyl Derivatives	141
7.7.6.3	Method 3: Asymmetric [3 + 2]-Cycloaddition Reactions	143
7.7.6.4	Method 4: Asymmetric 1,4-Addition/Protonation Reactions	144
7.7.6.5	Method 5: Asymmetric 1,4-Addition Reactions of Oxazolones	146
7.7.6.6	Method 6: Asymmetric 1,4-Addition Reactions to Nitroalkenes	146
7.7.6.7	Method 7: Asymmetric Hydroamination Reactions	148
7.7.6.8	Method 8: Friedel–Crafts Addition to Arenes	149
7.7.7	<b>Product Subclass 7: Diorganocalcium Compounds</b>	150
	Synthesis of Product Subclass 7	150
7.7.7.1	Method 1: Synthesis of Bis(phenylethynyl)calcium from Calcium Metal	150
7.7.7.2	Method 2: Synthesis of Diallylcalcium from Calcium Iodide	151
7.7.7.3	Method 3: Synthesis of Calcium Metallocenes	152
7.7.7.4	Method 4: Synthesis of Dibenzylcalcium Complexes	152
	Applications of Product Subclass 7 in Organic Synthesis	153
7.7.7.5	Method 5: Hydrogenation of Alkenes	153
7.7.7.6	Method 6: Hydrosilylation of Ketones	154

## Volume 9: Fully Unsaturated Small Ring Heterocycles and Monocyclic Five-Membered Heteroarenes with One Heteroatom

### 9.13 Product Class 13: 1*H*-Pyrroles

#### 9.13.5 1*H*-Pyrroles

2013

W. D. Lubell, D. J. St-Cyr, J. Dufour-Gallant, R. Hopewell, N. Boutard, T. Kassem,  
A. Dörr, and R. Zelli

9.13.5	<b>1<i>H</i>-Pyrroles</b> .....	157
9.13.5.1	Synthesis by Ring-Closure Reactions .....	158
9.13.5.1.1	By Formation of Two N—C and Two C—C Bonds .....	158
9.13.5.1.1.1	Fragments N, C—C, and Two C Fragments .....	158
9.13.5.1.1.1.1	Method 1: Reaction of Nitroalkanes, Aldehydes, 1,3-Dicarbonyl Com- pounds, and Amines .....	158
9.13.5.1.1.1.2	Method 2: Solid-Phase Synthesis of Pyrrole-3-carboxamides from Enami- nones and Nitroalkenes .....	159
9.13.5.1.1.1.3	Method 3: Combination of an Alkyl Propynoate, Aldehyde, and an Amine	160
9.13.5.1.1.1.4	Method 4: Samarium-Catalyzed Three-Component Coupling Reaction ..	161
9.13.5.1.1.1.5	Method 5: Titanium-Catalyzed Three-Component Coupling Reaction ..	162
9.13.5.1.2	By Formation of Two N—C Bonds and One C—C Bond .....	162
9.13.5.1.2.1	Fragment N and Two C—C Fragments .....	162
9.13.5.1.2.1.1	Method 1: Reaction of Amines and Two Carbonyl Compounds .....	162
9.13.5.1.2.1.2	Method 2: Reaction of Amines, 1,3-Dicarbonyl Compounds, and Alkenes or Alkynes .....	166
9.13.5.1.2.1.3	Method 3: Reaction of Amines, Carbonyl Compounds, and Alkenes or Alkynes .....	168
9.13.5.1.2.1.4	Method 4: Reaction of Amines and Combinations of Alkanes, Alkenes, and Alkynes .....	170
9.13.5.1.2.2	Fragments N, C—C—C, and C .....	173
9.13.5.1.2.2.1	Method 1: Reaction of Amines, $\alpha,\beta$ -Unsaturated Carbonyl Compounds, and Carbon Nucleophiles .....	173
9.13.5.1.2.2.1.1	Variation 1: Reactions with Aldehydes and Acylsilanes as Umpolung Nu- cleophiles under Stetter Conditions .....	173
9.13.5.1.2.2.1.2	Variation 2: Reactions with Nitroalkanes as Nucleophiles for Conjugate Addition .....	175
9.13.5.1.2.2.2	Method 2: Reaction of Amines, 1,3-Diketones, and Aldehydes .....	176
9.13.5.1.3	By Formation of One N—C Bond and Two C—C Bonds .....	177
9.13.5.1.3.1	Fragments N—C, C—C, and C .....	177
9.13.5.1.3.1.1	Method 1: Reaction of Imines, Acid Chlorides, and Alkynes .....	177

9.13.5.1.3.1.2	Method 2:	Synthesis of Pyrrole-3,4-dicarboxylates by Multicomponent Reactions Involving Dimethyl Acetylenedicarboxylate	181
9.13.5.1.3.1.2.1	Variation 1:	Reaction of Dimethyl Acetylenedicarboxylate with Amino Acids and Acid Chlorides	182
9.13.5.1.3.1.2.2	Variation 2:	Reaction of Dimethyl Acetylenedicarboxylate with Imines and Diazoacetonitrile or an Isocyanide	182
9.13.5.1.3.1.3	Method 3:	Synthesis of N—C2 Benzo-Fused Pyrroles from Isoquinolines, Quinolines, or Pyridines	183
9.13.5.1.3.1.4	Method 4:	Reactions of Aryl and Alkyl Acetylenes in Stoichiometric Metal-Mediated Pyrrole Syntheses	184
9.13.5.1.3.1.5	Method 5:	Pyrrol-2-amine Synthesis from Nitriles, Aldehydes, and $\alpha$ -(Tosylamino)acetophenones	185
9.13.5.1.4	By Formation of Three C—C Bonds		186
9.13.5.1.4.1	Fragments C—N—C and Two C Fragments		186
9.13.5.1.4.1.1	Method 1:	By Transformation of Benzylic Alcohols, Nitroalkanes, and <i>tert</i> -Butyl Isocynoacetate Using Solid-Supported Reagents	186
9.13.5.1.4.1.2	Method 2:	Reaction of Aldehydes, Ethyl (Diethoxyphosphoryl)acetate, and Tosylmethyl Isocyanide	187
9.13.5.1.5	By Formation of Two N—C Bonds		188
9.13.5.1.5.1	Fragments N and C—C—C		188
9.13.5.1.5.1.1	Method 1:	Paal–Knorr Reaction	188
9.13.5.1.5.1.2	Method 2:	Reaction of Amines with $\gamma$ -Modified Carbonyl Compounds as 1,4-Dicarbonyl Equivalents	196
9.13.5.1.5.1.3	Method 3:	Reaction of Alka-2,3-dienyl Carbonyl Compounds and Cyclopropyl Ketones with Amines	199
9.13.5.1.5.1.4	Method 4:	Reaction of Alk-3-ynyl Carbonyl Compounds with Amines	201
9.13.5.1.5.1.5	Method 5:	Reaction of Buta-1,3-dienes and Related Compounds with Amines	203
9.13.5.1.5.1.6	Method 6:	Reactions of 1,3-, 1,4-, and 1,5-Diynes with Amines	204
9.13.5.1.5.1.7	Method 7:	Reaction of 1-En-3-yne Analogues and Amines	206
9.13.5.1.5.1.8	Method 8:	Reaction of Enynol Analogues and Amine Derivatives	208
9.13.5.1.5.1.9	Method 9:	Reaction of ( <i>Z</i> )-1,4-Dichlorobut-2-ene with Amines	210
9.13.5.1.5.1.10	Method 10:	Reaction of 2-Allylbuta-2,3-dienoates with Sodium Azide	211
9.13.5.1.5.1.11	Method 11:	Reactions of 1,6-Dicarbonyl-2,4-diene Equivalents with Amines	212
9.13.5.1.6	By Formation of One N—C and One C—C Bond		213
9.13.5.1.6.1	Fragments N—C—C and C		213
9.13.5.1.6.1.1	Method 1:	Phosphine-Mediated Reaction of $\alpha,\beta$ -Unsaturated Imines with Acid Chlorides	213
9.13.5.1.6.1.2	Method 2:	Rhodium(I)-Catalyzed [4 + 1]-Cycloaddition Reactions of $\alpha,\beta$ -Unsaturated Imines with Terminal Alkynes	213
9.13.5.1.6.1.3	Method 3:	Reaction of $\alpha,\beta$ -Unsaturated Imines with Isocyanides or Carbenes	214
9.13.5.1.6.1.4	Method 4:	Reaction of Acid Chlorides with Propargylamines and Sodium Iodide	215
9.13.5.1.6.2	Fragments N—C—C and C—C		216

9.13.5.1.6.2.1	Method 1:	Reactions of 2 <i>H</i> -Azirines and 1,3-Dicarbonyl Compounds	216
9.13.5.1.6.2.1.1	Variation 1:	Reaction of Vinyl Azides with 1,3-Dicarbonyl Compounds	216
9.13.5.1.6.2.1.2	Variation 2:	Reaction of Isolated 2 <i>H</i> -Azirines with 1,3-Dicarbonyl Compounds	218
9.13.5.1.6.2.2	Method 2:	Knorr-Type Reaction of Oximes and 1,3-Dicarbonyl Compounds	218
9.13.5.1.6.2.3	Method 3:	Reaction of Enamines and Alkynes	219
9.13.5.1.6.2.4	Method 4:	Reactions of 1,2-Diazabuta-1,3-dienes and Enol Derivatives	221
9.13.5.1.6.2.5	Method 5:	Reactions of Imines and Alkenes	222
9.13.5.1.6.2.6	Method 6:	Rearrangement Mechanisms	224
9.13.5.1.6.3		Fragments N—C and C—C—C	225
9.13.5.1.6.3.1	Method 1:	Reaction of Amines with 1,3-Dicarbonyl Compounds and Equivalents	225
9.13.5.1.6.3.2	Method 2:	Reactions of Imine Derivatives with $\alpha$ -Functionalized Alkenes and Alkynes	229
9.13.5.1.6.3.3	Method 3:	Reactions of Substrates such as Cyclopropenes, Nitriles, Amino Chromium Carbenes, and $\alpha,\beta$ -Unsaturated Carbonyl Compounds and Derivatives	232
9.13.5.1.7		By Formation of Two C—C Bonds	234
9.13.5.1.7.1		Fragments C—N—C—C and C	234
9.13.5.1.7.1.1	Method 1:	Reaction of $\alpha$ -Amido Ketones with Ynolates	234
9.13.5.1.7.1.2	Method 2:	Reaction of 4-(Trifluoroacetyl)münchnones with Wittig Reagents	234
9.13.5.1.7.2		Fragments C—N—C and C—C	235
9.13.5.1.7.2.1	Method 1:	Reactions of $\alpha$ -Functionalized Isocyanides and Alkenes or Alkynes	236
9.13.5.1.7.2.1.1	Variation 1:	Tosylmethyl Isocyanide and Alkenes	236
9.13.5.1.7.2.1.2	Variation 2:	$\alpha$ -Substituted Tosylmethyl Isocyanides and Alkenes	236
9.13.5.1.7.2.1.3	Variation 3:	Active Methylene Isocyanides and Alkynes	238
9.13.5.1.7.2.1.4	Variation 4:	Active Methylene Isocyanides and Alkynes under Phosphine Catalysis with Reversal of Regioselectivity	239
9.13.5.1.7.2.1.5	Variation 5:	Reactions with Alkenes Possessing Leaving Group Substituents	240
9.13.5.1.7.2.2	Method 2:	Cycloaddition of Azomethine Ylides and Alkenes or Alkynes	242
9.13.5.1.7.2.2.1	Variation 1:	N- $\alpha$ -Functionalized Amides (Thioamides), or N- $\alpha$ -Active Methylene Imines as Azomethine Ylide Precursors	242
9.13.5.1.7.2.2.2	Variation 2:	N-Acylamino Acids as Azomethine Ylide Precursors in the Form of Münchnones	245
9.13.5.1.8		By Formation of One N—C Bond	249
9.13.5.1.8.1		Fragment N—C—C—C—C	249
9.13.5.1.8.1.1	Method 1:	Paal–Knorr-Type Cyclizative Condensation	249
9.13.5.1.8.1.2	Method 2:	5- <i>endo</i> -Cyclization Reactions	254
9.13.5.1.8.1.2.1	Variation 1:	Cyclization of Alk-3-ynylamines and Homopropargyl Azides	254
9.13.5.1.8.1.2.2	Variation 2:	$\alpha$ -Alkynyl Imine Isomerization and Cyclization	257
9.13.5.1.8.1.2.3	Variation 3:	Cyclization of Dienyl Azides and Dienyl Amines	257

9.13.5.1.8.1.3	Method 3:	5- <i>exo</i> -Cyclization Reactions	258
9.13.5.1.8.1.3.1	Variation 1:	Cyclization of ( <i>Z</i> )-(Alk-2-en-4-ynyl)amines and Analogues	258
9.13.5.1.8.1.3.2	Variation 2:	Cyclization of ( <i>Z</i> )-Alk-2-en-4-ynyl Imines	261
9.13.5.1.8.1.3.3	Variation 3:	Cyclization of Alk-4-ynyl and Alk-4-enyl Imines	263
9.13.5.1.9		By Formation of One C—C Bond	266
9.13.5.1.9.1		Fragment C—N—C—C—C	266
9.13.5.1.9.1.1	Method 1:	Reaction Involving Cyclization of Functionalized Ketene <i>N,S</i> -Acetals	266
9.13.5.1.9.1.2	Method 2:	Metalation of Allyl Isothiocyanate	266
9.13.5.1.9.1.3	Method 3:	Decarboxylative Cyclization of $\beta$ -Enaminones	266
9.13.5.1.9.1.4	Method 4:	Enamine Cyclization	267
9.13.5.1.9.2		Fragment C—C—N—C—C	268
9.13.5.1.9.2.1	Method 1:	Lewis Acid Catalyzed Ring Closure	268
9.13.5.1.9.2.2	Method 2:	Palladium-Catalyzed Synthesis from Enamines	269
9.13.5.1.9.2.3	Method 3:	Synthesis from <i>N</i> -Propargyl $\beta$ -Enaminones	269
9.13.5.1.9.2.4	Method 4:	Synthesis Based on a Staudinger/Aza-Wittig Reaction	270
9.13.5.1.9.2.5	Method 5:	Ring Closure To Give 3,4-Bis(lithiomethyl)dihydropyrroles and Subsequent Functionalization	270
9.13.5.1.9.2.6	Method 6:	Metathesis-Based Approaches	271
9.13.5.2		Synthesis by Ring Transformation	272
9.13.5.2.1		By Ring Enlargement	272
9.13.5.2.1.1	Method 1:	Aziridine Ring Expansion	272
9.13.5.2.1.2	Method 2:	Azetidine, $\beta$ -Lactam, and Cyclopropane Ring Expansions	274
9.13.5.2.2		By Ring Contraction	276
9.13.5.2.2.1	Method 1:	Nitrogen Extrusion from Pyridazines	276
9.13.5.2.2.2	Method 2:	Sulfur Extrusion from <i>N,S</i> -Heterocycles	277
9.13.5.3		Synthesis by Aromatization	278
9.13.5.3.1		By Elimination	278
9.13.5.3.1.1	Method 1:	Dihydropyrrolol Dehydration by Stoichiometric Copper(II)	278
9.13.5.3.2		By Dehydrogenation	279
9.13.5.3.2.1	Method 1:	Dihydropyrrole Oxidation Using 2,3-Dichloro-5,6-dicyanobenzo-1,4-quinone	279
9.13.5.3.2.2	Method 2:	Photochemical Dihydropyrrole Dehydrogenation	279
9.13.5.3.3		By Combinations of Elimination, Dehydrogenation, Isomerization, Ring Substitution, and Substituent Modification Reactions	280
9.13.5.3.3.1	Method 1:	Elimination in Conjunction with Dehydrogenation	280
9.13.5.3.3.2	Method 2:	Elimination in Conjunction with Isomerization	280
9.13.5.3.3.3	Method 3:	Dihydropyrrole Dehydrogenation in Conjunction with Cross Coupling	281
9.13.5.3.3.4	Method 4:	Elimination from Pyrrolidin-4-ones in Conjunction with Isomerization and 4-Amination	281

9.13.5.3.3.5	Method 5:	Decarboxylative Oxidation in Conjunction with Elimination/ Isomerization and Ring Substitution .....	284
9.13.5.3.3.5.1	Variation 1:	5-Halogenated and 2,4-Diformylated Pyrroles from 5-Oxopyr- rolidine-2-carboxylates .....	284
9.13.5.3.3.5.2	Variation 2:	1-(2-Oxo-1,3-dihydroindol-3-yl)pyrrole from 4-Hydroxypyrro- lidine-2-carboxylate .....	284
9.13.5.4	Synthesis by Substituent Modification .....		285
9.13.5.4.1	Substitution of Existing Substituents .....		285
9.13.5.4.1.1	Substitution of C-Hydrogen, Halogens, and Other Heteroatoms .....		285
9.13.5.4.1.1.1	C-Acylation and C-Formylation .....		286
9.13.5.4.1.1.1.1	Method 1:	Formylation under Vilsmeier Conditions .....	286
9.13.5.4.1.1.1.2	Method 2:	Formylation via Metalated Pyrrole Intermediates .....	287
9.13.5.4.1.1.1.3	Method 3:	Electrophilic Pyrrole Acylation .....	288
9.13.5.4.1.1.2	C-Alkylation .....		291
9.13.5.4.1.1.2.1	Method 1:	Pyrrole Alkylation with Electrophilic Alkanes .....	291
9.13.5.4.1.1.2.2	Method 2:	Pyrrole Alkylation with Alkenes .....	294
9.13.5.4.1.1.2.2.1	Variation 1:	Intermolecular Alkylation with Electrophilic Alkenes .....	294
9.13.5.4.1.1.2.2.2	Variation 2:	Intramolecular Alkylation with Nonactivated Alkenes .....	298
9.13.5.4.1.1.2.3	Method 3:	Pyrrole Alkylation with Imines .....	299
9.13.5.4.1.1.2.4	Method 4:	Pyrrole Alkylation with Aldehydes and Ketones .....	300
9.13.5.4.1.1.3	C-Alkenylation .....		301
9.13.5.4.1.1.3.1	Method 1:	Reaction of Halopyrroles with Alkenes under Heck Conditions	301
9.13.5.4.1.1.3.2	Method 2:	Reaction of Pyrroles with Alkenes under Oxidative Heck Con- ditions .....	301
9.13.5.4.1.1.3.3	Method 3:	Reaction of Pyrroles with Alkynes and Equivalents .....	303
9.13.5.4.1.1.4	C-Alkynylation .....		305
9.13.5.4.1.1.4.1	Method 1:	Sonogashira Reaction of Halopyrroles with Alkynes .....	305
9.13.5.4.1.1.4.2	Method 2:	Reaction of 1-Halogenated Alkynes with Pyrroles .....	306
9.13.5.4.1.1.5	C-Arylation .....		306
9.13.5.4.1.1.5.1	Method 1:	Cross Coupling of Aryl Halides with Pyrrolylboronates, or Aryl- boronic Acids with Halopyrroles .....	307
9.13.5.4.1.1.5.2	Method 2:	Cross Coupling at Pyrrole CH with Aryl Halides and Arylbo- ronic Acids .....	309
9.13.5.4.1.1.5.3	Method 3:	Decarboxylative Arylation of Pyrrole C-Carboxylates .....	315
9.13.5.4.1.1.6	C-Cyanation .....		316
9.13.5.4.1.1.6.1	Method 1:	Oxidative $\alpha$ -Cyanation with Hypervalent Iodine(III) .....	316
9.13.5.4.1.1.6.2	Method 2:	Oxidative Vilsmeier Cyanation .....	317
9.13.5.4.1.1.6.3	Method 3:	Anodic Cyanation of 1-Aryl-1H-pyrroles .....	318
9.13.5.4.1.1.7	C-Trifluoromethylation .....		318
9.13.5.4.1.1.8	C-Halogenation .....		319
9.13.5.4.1.1.8.1	Method 1:	Direct Substitution of Pyrrole CH by Halogen .....	319
9.13.5.4.1.1.8.1.1	Variation 1:	Electrophilic Mono CH Substitution .....	319

9.13.5.4.1.1.8.1.2	Variation 2:	Multiple Electrophilic CH Substitutions	324
9.13.5.4.1.1.8.2	Method 2:	Halogenation via Metalated Pyrrole Intermediates	326
9.13.5.4.1.1.8.3	Method 3:	Electrophilic Substitution of Pyrrole C-Carboxylate by Halogen	328
9.13.5.4.1.1.8.4	Method 4:	Electrophilic Substitution of C-Trimethylsilyl Groups by Halogen	329
9.13.5.4.1.1.9		Functionalization with Nitrogen-Based Groups	330
9.13.5.4.1.1.9.1	Method 1:	Electrophilic Nitration of Pyrroles	330
9.13.5.4.1.1.9.2	Method 2:	Electrophilic Nitrosation of Pyrroles	332
9.13.5.4.1.1.9.3	Method 3:	Reactions of Pyrroles with Arenediazonium Salts	333
9.13.5.4.1.1.9.4	Method 4:	Azidation of Halo- and Aminopyrroles	334
9.13.5.4.1.1.9.5	Method 5:	Amination and Amidation of Halopyrroles by Metal-Catalyzed Cross Coupling and Nucleophilic Aromatic Substitution	335
9.13.5.4.1.1.9.6	Method 6:	Aryl- and Fluoroalkylsulfonamidation of Pyrroles	336
9.13.5.4.1.1.10		Functionalization with Silicon-Based Groups	337
9.13.5.4.1.1.10.1	Method 1:	Pyrrole C-Silylation	337
9.13.5.4.1.1.11		Functionalization with Phosphorus-Based Groups	340
9.13.5.4.1.1.11.1	Method 1:	Pyrrole Phosphorylation and Phosphinylation with Electrophilic Halophosphorus Reagents	340
9.13.5.4.1.1.11.2	Method 2:	Pyrrole Phosphorylation and Phosphinylation via Lithiopyrrole Generation	342
9.13.5.4.1.1.12		Functionalization with Sulfur- and Selenium-Based Groups	343
9.13.5.4.1.1.12.1	Method 1:	Electrophilic Pyrrolesulfonate Synthesis	343
9.13.5.4.1.1.12.2	Method 2:	Chlorosulfonylation of Pyrroles with Chlorosulfonic Acid	344
9.13.5.4.1.1.12.3	Method 3:	Pyrrolyl Sulfone Synthesis from Sulfonyl Chlorides	344
9.13.5.4.1.1.12.4	Method 4:	Pyrrolyl Sulfoxide Synthesis	345
9.13.5.4.1.1.12.5	Method 5:	Pyrrolylsulfonium Salt Synthesis	345
9.13.5.4.1.1.12.6	Method 6:	Sulfanylpyrrole Synthesis	346
9.13.5.4.1.1.12.6.1	Variation 1:	Synthesis of Sulfanylpyrroles Using Electrophilic Sulfenylation	346
9.13.5.4.1.1.12.6.2	Variation 2:	Sulfanylpyrroles from Reactions of Metalated Pyrroles with Sulfur Sources	350
9.13.5.4.1.1.12.6.3	Variation 3:	Sulfanylpyrroles from Nucleophilic Aromatic Substitution	351
9.13.5.4.1.1.12.6.4	Variation 4:	Thiocyanation of Pyrroles	351
9.13.5.4.1.1.12.6.5	Variation 5:	Dipyrrolyl Sulfide Synthesis	352
9.13.5.4.1.1.12.6.6	Variation 6:	Preparation of Pyrroles with Multiple Sulfur Substituents	353
9.13.5.4.1.1.12.7	Method 7:	Selanylpyrrole Synthesis	355
9.13.5.4.1.2		Substitution of N-Hydrogen	356
9.13.5.4.1.2.1	Method 1:	N-Acylation	356
9.13.5.4.1.2.2	Method 2:	N-Alkylation and -Allylation	356
9.13.5.4.1.2.3	Method 3:	N-Alkenylation	358
9.13.5.4.1.2.4	Method 4:	N-Arylation	359
9.13.5.4.1.2.5	Method 5:	N-Amination and -Phosphinylation	360
9.13.5.4.2		Modification of Substituents	361
9.13.5.4.2.1		Modification of C-Acyl Substituents	362

9.13.5.4.2.1.1	Method 1:	Reduction of 2- or 3-Acylpyrroles to 2- or 3-Alkylpyrroles with Hydrides, Zinc, or Hydrazine as Reductant	362
9.13.5.4.2.1.2	Method 2:	Addition and Condensation Reactions of Acyl Groups	366
9.13.5.4.2.1.3	Method 3:	Rearrangement of Acyl Groups	369
9.13.5.4.2.2		Modification of C-Alkyl Substituents	371
9.13.5.4.2.2.1	Method 1:	Substitution Reactions of Mannich Bases	371
9.13.5.4.2.2.2	Method 2:	Alkylation of $\alpha$ -Methylene Substituents	372
9.13.5.4.2.2.3	Method 3:	Oxidation of $\alpha$ -Methylene Substituents	376
9.13.5.4.2.3		Modification of C-Vinyl Substituents	379
9.13.5.4.2.3.1	Method 1:	Arylation by Heck Reaction	379
9.13.5.4.2.3.2	Method 2:	Pyrrolecarbaldehyde Synthesis via Osmium(VIII) Oxide Oxidation	380
9.13.5.4.2.4		Modification of C-Nitropyrroles by Reductive Acylation	381
9.13.5.4.2.4.1	Method 1:	Synthesis of 2- and 3-(Acylamino)-1 <i>H</i> -pyrroles from 2- and 3-Nitro-1 <i>H</i> -pyrroles and Acid Anhydrides	381
9.13.5.4.2.5		Modification of N-Substituents	383
9.13.5.4.2.5.1	Method 1:	Synthesis of 1-(Hydroxymethyl)pyrrole Derivatives by Nucleophilic Addition to 1-Acylpyrroles	383
9.13.5.4.2.5.2	Method 2:	Conjugate Addition to $\alpha,\beta$ -Unsaturated 1-Acylpyrroles	383
9.13.5.4.2.5.2.1	Variation 1:	Chiral Epoxide Synthesis	383
9.13.5.4.2.5.2.2	Variation 2:	Enantioselective Addition of Carbon Nucleophiles	385
9.13.5.4.2.5.3	Method 3:	Hydroformylation of 1-Allylpyrrole	388

## Volume 16: Six-Membered Hetarenes with Two Identical Heteroatoms

16.9	<b>Product Class 9: Cinnolines</b>		
16.9.5	<b>Cinnolines</b>		2013
	R. Krishnamoorthy		
16.9.5	<b>Cinnolines</b>		409
16.9.5.1	Synthesis by Ring-Closure Reactions		410
16.9.5.1.1	By Annulation to an Arene		410
16.9.5.1.1.1	By Formation of Two N—C Bonds		410
16.9.5.1.1.1.1	Fragments Arene—C—C and N—N		410
16.9.5.1.1.1.1.1	Method 1:	Condensation of Quinones with Hydrazine	410
16.9.5.1.1.1.1.2	Method 2:	Condensation of 1-Acyl-8-nitronaphthalenes with Hydrazine	412
16.9.5.1.1.1.1.3	Method 3:	Cinnolin-3-amines via a Diels–Alder–Ene Sequence	412
16.9.5.1.1.2	By Formation of One N—C and One C—C Bond		414
16.9.5.1.1.2.1	Fragments Arene—N—N and C—C		414

16.9.5.1.1.2.1.1	Method 1:	Synthesis of Cinnoline-3-carboxylates .....	414
16.9.5.1.1.2.1.2	Method 2:	Synthesis of Pyridazincinnolines .....	414
16.9.5.1.1.3	By Formation of One N—N Bond .....		415
16.9.5.1.1.3.1	Fragment N—Arene—Arene—N .....		415
16.9.5.1.1.3.1.1	Method 1:	Condensation of Substituted Biaryls .....	415
16.9.5.1.1.3.1.1.1	Variation 1:	Condensation of 2-Amino-2'-Nitrobiaryls .....	415
16.9.5.1.1.3.1.1.2	Variation 2:	Cyclization of 2-Amino-3-(2-nitroaryl)quinolines .....	417
16.9.5.1.1.3.1.2	Method 2:	Cyclization of 2,2'-Dinitrobiaryls .....	418
16.9.5.1.1.3.1.2.1	Variation 1:	Reductive Cyclization of 2,2'-Dinitrobiaryls .....	419
16.9.5.1.1.3.1.2.2	Variation 2:	Base-Catalyzed Cyclization of 2,2'-Dinitrobiphenyls .....	422
16.9.5.1.1.3.1.3	Method 3:	Photooxidation of 3-(2-Aminophenyl)quinolin-2-amines .....	423
16.9.5.1.1.3.2	Fragment N—Arene—C—C—N .....		423
16.9.5.1.1.3.2.1	Method 1:	Synthesis of Cinnoline Betaines .....	423
16.9.5.1.1.3.2.2	Method 2:	Cyclization of 2-(Dinitrophenyl)alk-1-ene-1,1-diamines .....	424
16.9.5.1.1.4	By Formation of One N—C Bond .....		425
16.9.5.1.1.4.1	Fragment N—N—Arene—C—C .....		425
16.9.5.1.1.4.1.1	Method 1:	Cyclization of Diazotized Anilines .....	425
16.9.5.1.1.4.1.1.1	Variation 1:	Cyclization of Diazotized 2-Arylanilines .....	425
16.9.5.1.1.4.1.1.2	Variation 2:	Cyclization of 2-(2,2-Difluorovinyl)anilines .....	427
16.9.5.1.1.4.1.2	Method 2:	Cyclization of Diazotized 2-Acylanilines .....	428
16.9.5.1.1.4.1.3	Method 3:	Cyclization of Diazotized Aryldifurylmethanes .....	429
16.9.5.1.1.4.1.4	Method 4:	Cyclization of Alkynylanilines .....	430
16.9.5.1.1.4.1.4.1	Variation 1:	Cyclization of Diazotized 2-Alkynylanilines .....	430
16.9.5.1.1.4.1.4.2	Variation 2:	Cyclization of Diazotized 2-Diynylanilines .....	432
16.9.5.1.1.4.1.5	Method 5:	Cyclization of (2-Alkynylaryl)- or (2-Acylaryl)triazenes .....	434
16.9.5.1.1.4.1.5.1	Variation 1:	Cyclization of (2-Alkynylaryl)triazenes .....	434
16.9.5.1.1.4.1.5.2	Variation 2:	Cyclization of (2-Acylaryl)triazenes .....	439
16.9.5.1.1.4.1.6	Method 6:	Cyclization of (6-Oxocyclohexa-2,4-dienylidene)malononitrile Hydrazones .....	440
16.9.5.1.1.4.2	Fragment N—N—C—C—Arene .....		441
16.9.5.1.1.4.2.1	Method 1:	Cyclization of Aryl-Substituted Heterocyclic Amines .....	441
16.9.5.1.1.4.2.1.1	Variation 1:	Cyclization of Diazotized 3-Aminothiophenes .....	441
16.9.5.1.1.4.2.1.2	Variation 2:	Cyclization of Diazotized 5-Amino-4-arylpyrazoles .....	443
16.9.5.1.1.4.2.1.3	Variation 3:	Cyclization of Diazotized 3-Amino-4-arylmaimides .....	444
16.9.5.1.1.4.2.2	Method 2:	Cyclization of 2-Diazo-3-(haloaryl)-3-hydroxypropanoates .....	444
16.9.5.1.1.5	By Formation of One C—C Bond .....		445
16.9.5.1.1.5.1	Fragment Arene—N—N—C—C .....		445
16.9.5.1.1.5.1.1	Method 1:	Cyclization of Phenylhydrazones .....	445
16.9.5.1.1.5.1.1.1	Variation 1:	Cyclization of Oxomalonic Acid Derivatives .....	446
16.9.5.1.1.5.1.1.2	Variation 2:	Synthesis of 3-Aroyl- or 4-Arylcinnolines .....	447
16.9.5.1.1.5.1.1.3	Variation 3:	Synthesis of 3-Azolylcinnolines from Chloromethyl Ketones .....	450
16.9.5.1.1.5.1.1.4	Variation 4:	Synthesis of 4-Alkyl-Substituted Cinnolines .....	451
16.9.5.2	Synthesis by Ring Transformation .....		452

16.9.5.2.1	Method 1: From 2 <i>H</i> -Indazole Ring Enlargement	452
16.9.5.3	Synthesis by Aromatization	452
16.9.5.3.1	Method 1: Aromatization of Dihydrocinnolines	452
16.9.5.4	Synthesis by Substituent Modification	453
16.9.5.4.1	Substitution of Existing Substituents	453
16.9.5.4.1.1	Of Hydrogen	453
16.9.5.4.1.1.1	Method 1: By Lithiation	453
16.9.5.4.1.2	Of Heteroatoms	454
16.9.5.4.1.2.1	Method 1: By Metal–Halogen Exchange	454
16.9.5.4.1.2.2	Method 2: By Carbon Substituents via Cross-Coupling Reactions	455
16.9.5.4.1.2.3	Method 3: By Heteroatom Nucleophiles via Nucleophilic Substitution	458
16.9.5.4.1.2.3.1	Variation 1: Substitution of a Hydroxy Group by a Halogen	458
16.9.5.4.1.2.3.2	Variation 2: Introduction of Chalcogen Substituents	458
16.9.5.4.1.2.3.3	Variation 3: Introduction of Nitrogen Substituents	461
16.9.5.4.2	Modification of Existing Substituents	463
16.9.5.4.2.1	Of Carbon Substituents	463
16.9.5.4.2.1.1	Method 1: Of Carboxylic Acids and Derivatives	463
16.9.5.4.2.1.2	Method 2: Of Ketones, Aldehydes, and Derivatives	464
16.9.5.4.2.2	Of Heteroatom Substituents	466
16.9.5.4.2.2.1	Method 1: Of Sulfur-Containing Groups	466
16.9.5.4.2.2.2	Method 2: Of Amines	467
16.9.5.4.3	Addition Reactions	469
16.9.5.4.3.1	Method 1: Addition of Organic Groups	469
16.9.5.4.3.2	Method 2: Addition of Heteroatoms	470

## 16.23 Product Class 23: Diphosphinines

16.23.4	<b>Diphosphinines</b>	<b>2013</b>
	J. W. Lippert, III	
16.23.4	<b>Diphosphinines</b>	475
16.23.4.1	1,2-Diphosphinines	475
16.23.4.1.1	Method 1: Synthesis of a 1,2-Dihydro-1,2-diphosphinine Derivative by Dimerization	475
16.23.4.1.2	Method 2: Synthesis of a 1,2-Dihydro-1,2-diphosphinine Chelate Complex with Palladium(II) Chloride	476
16.23.4.2	1,3-Diphosphinines	478
16.23.4.3	1,4-Diphosphinines	478
	<b>Author Index</b>	481
	<b>Abbreviations</b>	511
