Product names
Product names which are registered trademarks may not have been specifically designated as such in every case. In cases where a product has been referred to by its registered trademark it cannot be concluded that the name used in the public domain. The same applies to labels, names or other signs.

Manuscripts
For details regarding manuscript submission please refer to "Instructions for Authors": http://www.thieme.de/pharmacopsychiatry/authors-26953.htm. In principle only papers will be accepted which have not been published previously, domestically or abroad. Furthermore, manuscripts may not be offered to other publications at the same time as they are under consideration for this journal. The corresponding author will receive a PDF-file for private use. Authors may choose to allow, for a fee, free general access to their papers online. For details, please contact pharmaco.impressum@thieme.de

Personal rates available upon request, please contact customerservice@thieme.com

Illustrations
Unfortunately, we cannot accept images already published in books, journals, or electronic products of other publishers. The reason: It is almost impossible to obtain the necessary rights of use even with payment of licensing fees. Therefore, please do not pay any licensing fees (e.g. to "RightsLink"/Copyright Clearance Center). Standard license contracts from “Creative Commons” are unfortunately also insufficient for our purposes. Contact us with any questions regarding the use of images.

Important note
Medicine is an ever-changing science undergoing continual development. Research and clinical experience are continually expanding our knowledge, in particular our knowledge of appropriate treatment and drug therapy. Insofar as this journal mentions any dosage or application, readers may rest assured that the authors, editors and publishers have made reasonable effort to ensure that such references are in accordance with the state of knowledge at the time of production of the journal. Nevertheless this does not involve, imply or express any guarantee or responsibility on the part of the publishers in respect of any dosage instructions and forms of application stated in the journal. Every user is requested to examine carefully the manufacturers’ leaflets accompanying each drug and to check, if necessary in consultation with a physician or specialist, whether the dosage schedules mentioned therein or the contraindications stated by the manufacturers differ from the statements made in the present journal. Such examination is particularly important with drugs that are either rarely used or have been newly released on the market. Every dosage schedule or every form of application used is entirely at the user’s own risk and responsibility. The authors and publishers request every user to report to the publishers any discrepancies or inaccuracies noticed.
