

MedOne ComSci

**Unsurpassed audiology and
speech language pathology resources**

MedOne. Empower Yourself.

Thieme

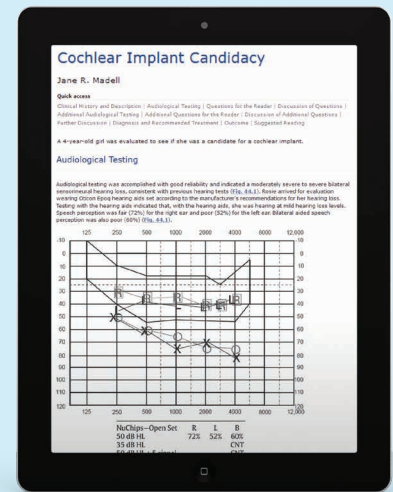

E-Journals

The e-journal page collects full articles from Thieme's communication science journals and suggests hits from the PubMed database, so students and instructors can browse hot topics in audiology and speech-language pathology, use articles to research paper topics, or delve into the archives for in-depth reading. For continuing learners and self-guided studiers, all the journals on MedOne ComSci offer CEUs.

Media

The databank of images, videos, and audio clips on MedOne ComSci lets students and instructors expand their access to quality resources. Before a lecture or presentation, users can search for images, download one or more at a time, and create course materials complete with legends and sources. For at-home studying or in-class examples, users can compare audiometric testing or listen to verbal drills.

Online-First Cases

With online-first cases, users can stay ahead of the curve!

MedOne@Home

Students and instructors need access to audiology and speech language pathology information anytime, whether they're creating lesson plans, studying for exams, or preparing for clinic. With MedOne@Home, onsite users can set up a login to get full offsite access. After that, all they need is internet access to create notes, highlight text, and bookmark content.

Search

When users need guidance, MedOne's contemporary, intuitive search algorithms show the way. Searches within a content set or a book automatically eliminate unwanted materials, but searches from the homepage include all the platform's breathtaking content. Between auto-filled results and quick filtering, searching MedOne is effective and easy.

MedOne App

Anyone with limited internet access can rejoice—the MedOne app is the ideal solution. Available for Android or Apple devices, the app lets users browse the platform online or download content for offline reading. Students and instructors alike can carry every article, book, or case on whichever device they use.
