

Thieme eOtolaryngology

The premier online resource for
otolaryngology–head and neck surgery

E-BOOKS • PROCEDURES • CASES • IMAGES & VIDEOS • E-JOURNALS

Thieme's entire otolaryngology

Thieme eOtolaryngology

is a unique online resource that gives you unprecedented access to Thieme's entire otolaryngology collection. This powerful platform enables you to search for procedures you want to brush up on, research topics in Thieme's E-Books, find visuals for your presentations, and much more! From the publisher you trust, *Thieme eOtolaryngology* will be your key reference for otolaryngology content and will revolutionize the way you obtain clinical information - making it easier, faster, and more efficient than ever before.

Thieme eOtolaryngology is a continuously growing resource with new content being added monthly.

Features

- ▶ With the click of a mouse, search Thieme's entire otolaryngology collection, including:
 - Over 100 illustrated procedures provide step-by-step instruction on core techniques and approaches
 - Access to Thieme's otolaryngology E-Book library – over 35,000 pages of material at initial release!
 - Over 60 clinical cases available at initial release
 - More than 54,000 downloadable images, with legends and links to original sources, for easy integration into presentations and teaching materials
 - Almost 600 procedural technique videos
 - Simultaneous search across the otolaryngology titles in Thieme's E-Journal platform
 - Concurrent journals search in PubMed, with results given to the abstract level
- ▶ Optimized for mobile device compatibility

The screenshot displays the Thieme eOtolaryngology website interface. At the top, there is a navigation bar with tabs for Home, E-Books, Procedures, Cases, Images & Videos, and E-Journals. Below the navigation bar is a search bar with a magnifying glass icon and a 'Go' button. The main content area is divided into several sections, each with a red circular callout number:

- 2 E-BOOKS:** This section lists two e-books. The first is 'Transnasal Endoscopic Skull Base and Brain Surgery [2011]' by Stamm, with a 'Show details' link. The second is 'Rhinology [2012]' by Kennedy/Hwang, also with a 'Show details' link. A 'more' link is at the bottom right.
- 3 PROCEDURES:** This section lists two procedures. The first is 'Biopsy of the Nasopharynx [2011]' by Juergen Theising, with a 'more' link. The second is 'Abscesses of the Floor of the Mouth [2011]' by Juergen Theising, also with a 'more' link.
- 4 CASES:** This section is titled 'Cases' and lists 'Esthesioneuroblastoma' by Aaron I. Bresco and Allen H. Seder. It includes a sub-navigation bar for 'Clinical Presentation and Diagnosis', 'Management', 'Follow-up', 'Questions', 'Suggested Readings', and 'Source'. Below this are three small images representing the case. A 'more' link is at the bottom right.
- 5 IMAGES & VIDEOS:** This section displays a grid of image and video thumbnails. Some thumbnails have a play button icon and the word 'VIDEO' below them. A 'more' link is at the bottom right.
- 6 JOURNALS:** This section lists two journal articles. The first is 'Pathologic Fractures in Bisphosphonate-Related Osteonecrosis of the Jaw—Review of the Literature and Review of Our Own Cases' by Otto / Paulke / Halber / Hesse / Reichardt / Maat / Ehrenfeld / Cornelius, published in 'Craniomaxillofacial Trauma and Reconstruction' 2013; issue: 03. The second is 'Frontal Sinus Fractures: A Conservative Shift' by Weathers / Wollwinkol / Hatof / Lee / Brown / Hollier, also published in 'Craniomaxillofacial Trauma and Reconstruction' 2013; issue: 03. A 'more' link is at the bottom right.

Library collection made searchable!

Search and search across all content in E-Books, procedures, cases, images & videos, E-Journals, and PubMed

1. Get a Thieme E-Book on your specialty

Search within the book

View in PDF or HTML

Switch to HTML viewer

Click to view video content

Print page

The screenshot shows a digital book page with a search bar at the top. A red box highlights the search bar with the text "Search within the book". Another red box highlights a "View in PDF or HTML" button with the text "View in PDF or HTML". A third red box highlights a "Switch to HTML viewer" button with the text "Switch to HTML viewer". At the bottom of the page, there are icons for "Click to view video content" and "Print page", both highlighted with red boxes and labels. The main content area features a large anatomical illustration of a human face with a surgical incision, and text describing the procedure.

3. Review a procedure before heading into the OR

Clickable images for detailed viewing

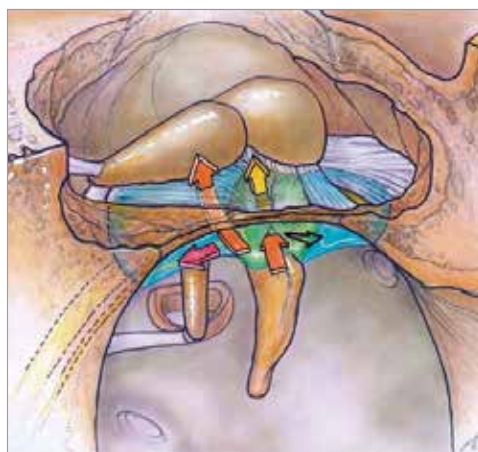

Zoom in to see details of images

The screenshot shows a procedure page titled "Cochlear Implantation" by Florian Hoppe. It includes sections for "Introduction and Background", "Operative Detail and Preparation", and "Outcomes and Results". There are several small thumbnail images of the procedure. A red box highlights one of these images with the text "Clickable images for detailed viewing". Below the thumbnails, there is a larger, detailed anatomical diagram of the cochlea and the implantation site. A red box highlights this diagram with the text "Zoom in to see details of images". The diagram is labeled with "Cochlea", "Round window", and "1 mm diamond burr for cochleostomy".

4. Review cases to prepare for oral and written exams

The screenshot shows a case report page for "Neuroblastoma" by Jessica and Allen M. Seiden. It includes sections for "Clinical Presentation and Diagnosis", "Management", and "Follow-up". There are several small images of the patient's face and medical scans. The text describes a 3-year-old man with a 3-month history of recurrent nosebleeds and weight loss.

5. Select a stunning image for your presentation

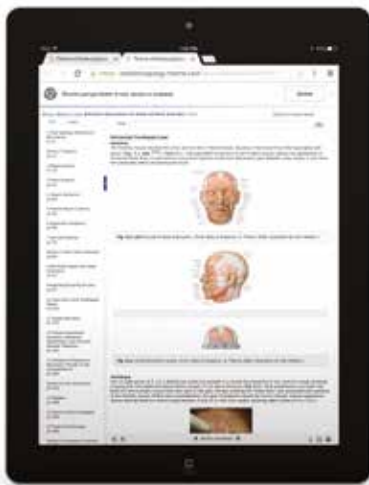

6. Check references, simultaneously search E-Journals, & search across all journals in PubMed

The screenshot shows a journal article page for "Optic Nerve Monitoring" by Paul Schumacher, David L. Hirsch, and David L. Hirsch. It includes sections for "Abstract", "Further Information", and "Full Text". The abstract discusses the use of intraoperative monitoring of the visual pathway in orbital and anterior skull base surgery.
