

Volume 18:
Four Carbon–Heteroatom Bonds:
 $X-C\equiv X$, $X=C=X$, $X_2C=X$, CX_4

	Preface	V
	Volume Editor's Preface	VII
	Table of Contents	XI
	Introduction	
	J. G. Knight	1
18.1	Product Class 1: Cyanogen Halides, Cyanates and Their Sulfur, Selenium, and Tellurium Analogues, Sulfinyl and Sulfonyl Cyanides, Cyanamides, and Phosphaalkynes	
	Y.-Q. Wu	17
18.2	Product Class 2: Carbon Dioxide, Carbonyl Sulfide, Carbon Disulfide, Isocyanates, Isothiocyanates, Carbodiimides, and Their Selenium, Tellurium, and Phosphorus Analogues	
	S. Braverman, M. Cherkinsky, and M. L. Birsa	65
18.3	Product Class 3: Carbonic Acid Halides	
	J.-P. G. Senet	321
18.4	Product Class 4: Acyclic and Cyclic Carbonic Acids and Esters, and Their Sulfur, Selenium, and Tellurium Analogues	
	K. W. Jung and A. S. Nagle	379
18.5	Product Class 5: Polymeric Carbonic Acids and Esters, and Their Sulfur Analogues	
	S. C. Moratti and Y. C. Charalambides	451
18.6	Product Class 6: Acyclic and Cyclic Carbamic Acids and Esters, and Their Sulfur, Selenium, Tellurium, and Phosphorus Analogues	
	L. Rossi	461
18.7	Product Class 7: Polymeric Carbamic Acids and Esters, and Their Sulfur Analogues	
	S. C. Moratti and Y. C. Charalambides	649
18.8	Product Class 8: Acyclic and Cyclic Ureas	
	G. Sartori and R. Maggi	665
18.9	Product Class 9: Polymeric Ureas and Their Phosphorus Analogues	
	G. Guichard	759

18.10	Product Class 10: Thiocarbonic Acids and Derivatives S. Sato and N. Furukawa	821
18.11	Product Class 11: Seleno- and Tellurocarbonic Acids and Derivatives J. Schmidt and L. A. Silks	969
18.12	Product Class 12: Imidic Acids and Derivatives, Isooureas and Derivatives, Sulfur and Selenium Equivalents, and Analogously Substituted Methylenephosphines T. L. Gilchrist	1001
18.13	Product Class 13: Guanidine Derivatives R. G. S. Berlinck, M. H. Kossuga, and A. M. Nascimento	1077
18.14	Product Class 14: Phosphorus Analogues of Guanidine T. L. Gilchrist	1117
18.15	Product Class 15: Tetraheterosubstituted Methanes with a Carbon—Halogen Bond A. Y. Il'chenko	1135
18.16	Product Class 16: Other Tetraheterosubstituted Methanes C. M. Diaper	1203
	Keyword Index	1283
	Author Index	1335
	Abbreviations	1399

Table of Contents

Introduction

J. G. Knight

	Introduction	1
18.1	Product Class 1: Cyanogen Halides, Cyanates and Their Sulfur, Selenium, and Tellurium Analogues, Sulfinyl and Sulfonyl Cyanides, Cyanamides, and Phosphaalkynes Y.-Q. Wu	
18.1	Product Class 1: Cyanogen Halides, Cyanates and Their Sulfur, Selenium, and Tellurium Analogues, Sulfinyl and Sulfonyl Cyanides, Cyanamides, and Phosphaalkynes	17
18.1.1	Product Subclass 1: Cyanogen Halides	17
18.1.1.1	Synthesis of Product Subclass 1	17
18.1.1.1.1	Method 1: By Halogenation of Cyanides	17
18.1.1.1.2	Method 2: Cyanogen Fluoride by Pyrolysis of 2,4,6-Trifluoro-1,3,5-triazine	18
18.1.1.2	Applications of Product Subclass 1 in Organic Synthesis	19
18.1.1.2.1	Method 1: Cleavage of Carbon–Heteroatom Bonds	19
18.1.1.2.2	Method 2: Formation of Heterocyclic Rings	20
18.1.1.2.3	Method 3: As Cyanating Reagents	21
18.1.2	Product Subclass 2: Cyanates and Their Sulfur, Selenium, and Tellurium Analogues	22
18.1.2.1	Synthesis of Product Subclass 2	22
18.1.2.1.1	Method 1: By Nucleophilic Reactions from Cyanate Salts	22
18.1.2.1.2	Method 2: By Cyanation	24
18.1.2.1.2.1	Variation 1: Of Alcohols, Phenols, and Related Compounds with Cyanogen Halides	24
18.1.2.1.2.2	Variation 2: Of Halogenated Precursors with Cyanides	25
18.1.2.1.2.3	Variation 3: Thiocyanates from Sodium Sulfinates or Sulfonyl Chlorides	26
18.1.2.1.3	Method 3: Thiocyanates and Selenocyanates from Trimethylsilyl Isothiocyanates and Isoselenocyanates	27
18.1.2.1.4	Method 4: Thiocyanates and Selenocyanates from Thiocyanogen and Selenocyanogen	28
18.1.2.2	Applications of Product Subclass 2 in Organic Synthesis	30
18.1.2.2.1	Method 1: Formation of Heterocyclic Compounds	30
18.1.2.2.2	Method 2: Cyanates and Thiocyanates as Cyanating Reagents	30
18.1.2.2.3	Method 3: Addition of Thiocyanates or Selenocyanates to Aldehydes and Alkene Double Bonds	31

18.1.3	Product Subclass 3: Sulfinyl and Sulfonyl Cyanides	33
18.1.3.1	Synthesis of Product Subclass 3	33
18.1.3.1.1	Method 1: By Oxidation of Thiocyanates	33
18.1.3.1.2	Method 2: By Cyanation of Sulfinates and Sulfonyl Chlorides	34
18.1.3.2	Applications of Product Subclass 3 in Organic Synthesis	34
18.1.3.2.1	Method 1: Sulfonyl Cyanides as Cyanating Reagents	34
18.1.3.2.2	Method 2: Formation of Heterocyclic Compounds from Sulfonyl Cyanides	35
18.1.4	Product Subclass 4: Cyanamides and Their Derivatives	36
18.1.4.1	Synthesis of Product Subclass 4	37
18.1.4.1.1	Method 1: By Alkylation of Cyanamide	37
18.1.4.1.2	Method 2: By Cyanation of Amines	38
18.1.4.1.2.1	Variation 1: With Cyanogen Halides	38
18.1.4.1.2.2	Variation 2: With Other Cyanating Reagents	38
18.1.4.1.2.3	Variation 3: By Cyanation of Halo Amines with Cyanides	39
18.1.4.1.3	Method 3: By Elimination from Ureas and Thioureas	40
18.1.4.1.4	Method 4: By Rearrangement Reactions	40
18.1.4.1.4.1	Variation 1: From Amidoximes by a Modified Tiemann Rearrangement ...	41
18.1.4.1.4.2	Variation 2: From <i>N,N</i> -Disubstituted Formamides by a Curtius-like Rearrangement	42
18.1.4.1.4.3	Variation 3: By Palladium-Catalyzed Coupling of Isocyanides, Allyl Carbonate, and Trimethylsilyl Azide through a Curtius-like Rearrangement	42
18.1.4.1.5	Method 5: By Decomposition of Heterocyclic Compounds	43
18.1.4.1.6	Method 6: Palladium-Catalyzed Formation of <i>N,N</i> -Diallyl Cyanamides ...	45
18.1.4.1.7	Method 7: Lewis Acid Catalyzed Reactions of Carbonyl Groups with <i>N,N'</i> -Bis(trimethylsilyl)carbodiimide	46
18.1.4.2	Applications of Product Subclass 4 in Organic Synthesis	46
18.1.4.2.1	Method 1: Formation of Heterocyclic Compounds	46
18.1.4.2.2	Method 2: Nucleophilic and Electrophilic Additions of Cyanamides	47
18.1.4.2.3	Method 3: The Cyanamide Group as a Protected Amine Group	49
18.1.5	Product Subclass 5: Cyanophosphines and Cyanophosphonates and Their Derivatives	50
18.1.5.1	Synthesis of Product Subclass 5	50
18.1.5.1.1	Method 1: By Cyanation	50
18.1.5.1.1.1	Variation 1: Of Phosphines and Phosphites with Cyanogen Halides	50
18.1.5.1.1.2	Variation 2: Of Halophosphorus Precursors with Cyanides	51
18.1.5.1.1.3	Variation 3: Of Halophosphorus Precursors with Trimethylsilyl Cyanide ...	52
18.1.5.1.1.4	Variation 4: Of Pyrophosphites with Alkyl Thiocyanates	52
18.1.5.2	Applications of Product Subclass 5 in Organic Synthesis	53
18.1.5.2.1	Method 1: Diethyl Cyanophosphonate as a Coupling Reagent in Acylation Reactions	53
18.1.5.2.1.1	Variation 1: Formation of Amides, Esters, and Thioesters	53

18.1.5.2.1.2	Variation 2: C-Acylation of Active Methylene Compounds	54
18.1.5.2.2	Method 2: Phosphorylation of Phenols	55
18.1.5.2.3	Method 3: Cyanation By Diethyl Cyanophosphonate	56
18.1.6	Product Subclass 6: Heterosubstituted Phosphaalkynes	57
18.1.6.1	Synthesis of Product Subclass 6	57
18.1.6.1.1	Method 1: By Elimination	57
18.1.6.1.1.1	Variation 1: α -Halide Elimination from a Phosphaalkene	58
18.1.6.1.1.2	Variation 2: α,β -Elimination from Alkylphosphines	58
18.1.6.2	Applications of Product Subclass 6 in Organic Synthesis	59
18.1.6.2.1	Method 1: Formation of Phosphorus-Containing Heterocycles by Cycloaddition	59
18.2	Product Class 2: Carbon Dioxide, Carbonyl Sulfide, Carbon Disulfide, Isocyanates, Isothiocyanates, Carbodiimides, and Their Selenium, Tellurium, and Phosphorus Analogues S. Braverman, M. Cherkinsky, and M. L. Birsa	
18.2	Product Class 2: Carbon Dioxide, Carbonyl Sulfide, Carbon Disulfide, Isocyanates, Isothiocyanates, Carbodiimides, and Their Selenium, Tellurium, and Phosphorus Analogues	65
18.2.1	Product Subclass 1: Carbon Dioxide	65
18.2.1.1	Applications of Product Subclass 1 in Organic Synthesis	65
18.2.1.1.1	Method 1: Supercritical Carbon Dioxide as a Reaction Medium for Chemical Syntheses	65
18.2.1.1.2	Method 2: Reduction of Carbon Dioxide	66
18.2.1.1.3	Method 3: Reactions with Oxygen Nucleophiles	67
18.2.1.1.3.1	Variation 1: Synthesis of Organic Carbonates	67
18.2.1.1.3.2	Variation 2: Synthesis of Polycarbonates	68
18.2.1.1.4	Method 4: Reactions with Nitrogen Nucleophiles	68
18.2.1.1.4.1	Variation 1: Synthesis of Carbamic Acid Derivatives	68
18.2.1.1.4.2	Variation 2: Synthesis of Urea Derivatives	69
18.2.1.1.4.3	Variation 3: Synthesis of Isocyanates	70
18.2.1.1.4.4	Variation 4: Synthesis of Heterocycles	70
18.2.1.1.5	Method 5: Reactions with Carbon Nucleophiles	70
18.2.1.1.5.1	Variation 1: Carboxylation of Organometallic Derivatives	70
18.2.1.1.5.2	Variation 2: Carboxylation of Other Carbanions	72
18.2.1.1.6	Method 6: Carbon Dioxide as Protecting and Activating Group	72
18.2.1.1.7	Method 7: Reaction of Carbon Dioxide with Butadiene	73
18.2.1.1.8	Method 8: Carbon Dioxide in Aza-Wittig-Type Reactions	74
18.2.1.1.9	Methods 9: Additional Applications	74
18.2.2	Product Subclass 2: Carbonyl Sulfide	75
18.2.2.1	Synthesis of Product Subclass 2	75
18.2.2.1.1	Method 1: Via Thiocyanates	75

18.2.2.1.2	Method 2:	Via Phosphorus Pentasulfide	76
18.2.2.1.3	Method 3:	Via Carbonyl Selenide	76
18.2.2.2	Applications of Product Subclass 2 in Organic Synthesis		77
18.2.2.2.1	Method 1:	Synthesis of Thiocarbonates	77
18.2.2.2.2	Method 2:	Synthesis of Thiocarbamates	77
18.2.2.2.3	Method 3:	Synthesis of Thiocarboxylic Acids and Derivatives	78
18.2.2.2.4	Methods 4:	Additional Applications	79
18.2.3	Product Subclass 3: Carbonyl Selenide		79
18.2.3.1	Synthesis of Product Subclass 3		80
18.2.3.1.1	Method 1:	Acidification of Tetrahydrofuran Solutions of Ammonium Selenocarbamates	80
18.2.3.2	Applications of Product Subclass 3 in Organic Synthesis		80
18.2.3.2.1	Method 1:	Synthesis of Carbonates and Their Acyclic and Cyclic Derivatives	80
18.2.3.2.2	Method 2:	Synthesis of Ureas and Their Acyclic and Cyclic Derivatives	81
18.2.3.2.3	Method 3:	Synthesis of Selenol Esters	82
18.2.3.2.4	Method 4:	Synthesis of Selenoamides	82
18.2.3.2.5	Method 5:	Synthesis of 2 <i>H</i> -1-Benzopyran-2-one Derivatives	83
18.2.3.2.6	Method 6:	Carbonyl Selenide as a Reducing Agent	83
18.2.4	Product Subclass 4: Isocyanates		83
18.2.4.1	Synthesis of Product Subclass 4		84
18.2.4.1.1	Method 1:	Carbonylation of Primary Amines with Phosgene	84
18.2.4.1.2	Method 2:	Carbonylation of Amines with Carbon Dioxide	88
18.2.4.1.2.1	Variation 1:	Isocyanates from Primary Amines and Carbon Dioxide; Dehydration of Carbamate Anions	89
18.2.4.1.2.2	Variation 2:	Isocyanates from Primary Amines and Carbon Dioxide Using Mitsunobu Chemistry	90
18.2.4.1.3	Method 3:	Carbonylation of Primary Amines with Other Carbonyl Transfer Agents	91
18.2.4.1.3.1	Variation 1:	Carbonylation by Bis(trichloromethyl) Carbonate	91
18.2.4.1.3.2	Variation 2:	Carbonylation by Di- <i>tert</i> -butyl Dicarboxylate	92
18.2.4.1.3.3	Variation 3:	Carbonylation by Trichloromethyl Chloroformate	94
18.2.4.1.3.4	Variation 4:	Carbonylation by 1,1'-Carbonyldiimidazole	96
18.2.4.1.3.5	Variation 5:	Carbonylation by Oxalyl Chloride	96
18.2.4.1.4	Method 4:	Carbonylation of Amine Derivatives	98
18.2.4.1.4.1	Variation 1:	Carbonylation of Iminophosphoranes	98
18.2.4.1.4.2	Variation 2:	Carbonylation of <i>N</i> -Silylamines	99
18.2.4.1.4.3	Variation 3:	Carbonylation of Ureas	101
18.2.4.1.4.4	Variation 4:	Carbonylation of Sulfonamides	103
18.2.4.1.4.5	Variation 5:	Carbonylation of Imino Compounds	104
18.2.4.1.4.6	Variation 6:	Carbonylation of <i>N</i> -Sulfinylamines	105
18.2.4.1.5	Method 5:	Reductive Carbonylation of Nitro Aromatic Compounds	106
18.2.4.1.6	Method 6:	From Organic Halides and Sulfates	107
18.2.4.1.6.1	Variation 1:	By the Reaction of Organic Halides with Cyanate Anion	108

18.2.4.1.6.2	Variation 2:	By Reaction with Metal Nitrocyanamides	109
18.2.4.1.7	Method 7:	From Carbamates	110
18.2.4.1.7.1	Variation 1:	Thermal Decomposition of Carbamates	110
18.2.4.1.7.2	Variation 2:	Silane-Induced Cleavage of Carbamates	111
18.2.4.1.7.3	Variation 3:	Cleavage of Carbamates with Boron Derivatives	113
18.2.4.1.7.4	Variations 4:	Additional Variations	114
18.2.4.1.8	Method 8:	From Thiocarbamates	115
18.2.4.1.8.1	Variation 1:	From <i>S</i> -Alkyl Thiocarbamates	115
18.2.4.1.8.2	Variation 2:	From <i>O</i> -Alkyl Thiocarbamates	117
18.2.4.1.9	Method 9:	Thermolysis of Ureas	117
18.2.4.1.10	Method 10:	By Cleavage of Nitrogen Heterocycles	118
18.2.4.1.10.1	Variation 1:	From Three-Membered Nitrogen Heterocycles	118
18.2.4.1.10.2	Variation 2:	From Four-Membered Nitrogen Heterocycles	119
18.2.4.1.10.3	Variation 3:	From Five-Membered Nitrogen Heterocycles	120
18.2.4.1.11	Method 11:	From <i>N</i> -Substituted Trihaloacetamides	122
18.2.4.1.12	Method 12:	By the Addition of Isocyanic Acid and Its Derivatives to Alkenes	122
18.2.4.1.12.1	Variation 1:	Addition of Isocyanic Acid	122
18.2.4.1.12.2	Variation 2:	Addition of Iodine Isocyanate	123
18.2.4.1.13	Method 13:	Curtius Rearrangement	124
18.2.4.1.13.1	Variation 1:	Using Sodium Azide	125
18.2.4.1.13.2	Variation 2:	Using Trimethylsilyl Azide	130
18.2.4.1.13.3	Variation 3:	Using Diphenyl Azidophosphate	131
18.2.4.1.14	Method 14:	Hofmann Rearrangement	132
18.2.4.1.15	Method 15:	Lossen Rearrangement	133
18.2.4.1.16	Method 16:	From Aminimides	135
18.2.4.1.17	Method 17:	Sigmatropic Rearrangements	135
18.2.4.1.18	Method 18:	By Oxidation	138
18.2.4.1.19	Method 19:	Via Isomerization of Nitrile Oxides	140
18.2.4.1.20	Method 20:	Preparation of Functionalized Isocyanates from Other Isocyanates	141
18.2.4.1.20.1	Variation 1:	By Substitution Reactions	141
18.2.4.1.20.2	Variation 2:	By Addition to a Double Bond	144
18.2.4.1.20.3	Variation 3:	Trimethylsilyl Isocyanate in the Synthesis of Isocyanates	144
18.2.4.1.20.4	Variation 4:	Chlorocarbonyl Isocyanate	146
18.2.4.1.20.5	Variation 5:	Sulfonyl Isocyanates	147
18.2.4.2	Applications of Product Subclass 4 in Organic Synthesis		148
18.2.4.2.1	Method 1:	Nucleophilic Additions	149
18.2.4.2.1.1	Variation 1:	Reactions with Heteroatom Nucleophiles	149
18.2.4.2.1.2	Variation 2:	Reactions with Carbon Nucleophiles	150
18.2.4.2.2	Method 2:	Cycloaddition Reactions	154
18.2.4.2.2.1	Variation 1:	[2+2]-Cycloaddition Reactions	154
18.2.4.2.2.2	Variation 2:	[2+4]-Cycloaddition Reactions	156
18.2.4.2.2.3	Variation 3:	[2+3]-Cycloaddition Reactions	158
18.2.4.2.2.4	Variation 4:	Cyclodimerization and Cyclotrimerization of Isocyanates	160
18.2.4.2.3	Method 3:	Reactions of Isocyanates with Iminophosphoranes	161

18.2.4.2.4	Method 4: Friedel–Crafts Reactions of Isocyanates	162
18.2.5	Product Subclass 5: 1-Oxa-3-phosphapropadienes and 1-Phospha-3-thiapropanadienes	164
18.2.5.1	Synthesis of Product Subclass 5	164
18.2.5.1.1	Method 1: Phosgenation and Thiophosgenation of Disilylated Phosphines	164
18.2.5.2	Applications of Product Subclass 5 in Organic Synthesis	166
18.2.5.2.1	Method 1: Synthesis of 1-Phosphapropadiene by a Wittig-Type Reaction	167
18.2.5.2.2	Method 2: Synthesis of Polyphosphadienes	167
18.2.5.2.3	Method 3: Photochemical and Metal-Catalyzed Decarbonylation of 1-Oxa-3-phosphapropadiene	168
18.2.6	Product Subclass 6: Carbon Disulfide	169
18.2.6.1	Applications of Product Subclass 6 in Organic Synthesis	170
18.2.6.1.1	Method 1: Reactions with Oxygen Nucleophiles	170
18.2.6.1.1.1	Variation 1: Synthesis of Orthocarbonic Acid Derivatives	170
18.2.6.1.1.2	Variation 2: Synthesis of Dithiocarbonates	170
18.2.6.1.1.3	Variations 3: Additional Variations	171
18.2.6.1.2	Method 2: Reactions with Sulfur Nucleophiles	172
18.2.6.1.2.1	Variation 1: Synthesis of Trithiocarbonates	172
18.2.6.1.2.2	Variation 2: Synthesis of Tetrathiomalonic Acid Derivatives	173
18.2.6.1.3	Method 3: Reactions with Nitrogen Nucleophiles	174
18.2.6.1.3.1	Variation 1: Synthesis of Dithiocarbamates	174
18.2.6.1.3.2	Variation 2: Synthesis of Thioureas	175
18.2.6.1.3.3	Variation 3: Synthesis of Isothiocyanates	176
18.2.6.1.3.4	Variation 4: Synthesis of Heterocycles via Amine Derivatives Bearing an Additional Nucleophilic Group	177
18.2.6.1.4	Method 4: Reactions with Carbon Nucleophiles	177
18.2.6.1.4.1	Variation 1: Synthesis of Thiocarboxylic Acid Derivatives	177
18.2.6.1.4.2	Variation 2: Synthesis of Dithiocarboxylic Acid Derivatives	178
18.2.6.1.4.3	Variation 3: Synthesis of Ketene Dithioacetals	179
18.2.6.1.4.4	Variation 4: Synthesis of Thiocarbamates	181
18.2.6.1.4.5	Variation 5: Synthesis of Thioamides	182
18.2.6.1.5	Method 5: Reactions with Organosilicon Compounds	183
18.2.6.1.6	Method 6: Carbon Disulfide in Cycloaddition Reactions	183
18.2.6.1.7	Method 7: Carbon Disulfide in Aza-Wittig-Type Reactions	185
18.2.6.1.8	Method 8: Carbon Disulfide as a Protecting Group	186
18.2.6.1.9	Method 9: Carbon Disulfide as a Reducing Agent	186
18.2.6.1.10	Methods 10: Additional Applications	187
18.2.7	Product Subclass 7: Carbon Sulfide Selenide	187
18.2.7.1	Synthesis of Product Subclass 7	187
18.2.7.1.1	Method 1: Via <i>N,N</i> -Dimethylselenothiocarbamates	187
18.2.8	Product Subclass 8: Isothiocyanates	188
18.2.8.1	Synthesis of Product Subclass 8	189

18.2.8.1.1	Method 1:	By Thiocarbonylation of Primary Amines with Thiophosgene	189
18.2.8.1.1.1	Variation 1:	In Biphasic Systems	189
18.2.8.1.1.2	Variation 2:	In Organic Solvents	190
18.2.8.1.2	Method 2:	By Thiocarbonylation of Primary Amines with Carbon Disulfide via Cleavage of Dithiocarbamate Salts or Esters	191
18.2.8.1.2.1	Variation 1:	Cleavage with Heavy Metal Salts	191
18.2.8.1.2.2	Variation 2:	Cleavage under Oxidative Conditions	192
18.2.8.1.2.3	Variation 3:	Cleavage by Phosphorus Derivatives	193
18.2.8.1.2.4	Variation 4:	Cleavage by Alkyl Chloroformates	195
18.2.8.1.2.5	Variation 5:	Cleavage with Carbodiimides	196
18.2.8.1.2.6	Variation 6:	Cleavage of Alkyl Esters of Dithiocarbamates	198
18.2.8.1.2.7	Variations 7:	Additional Variations	199
18.2.8.1.3	Method 3:	Thiocarbonylation of Primary Amines with Other Thiocarbonyl Transfer Agents	200
18.2.8.1.4	Method 4:	Thiocarbonylation of Amine Derivatives	201
18.2.8.1.4.1	Variation 1:	Thiocarbonylation of Amide Anions	202
18.2.8.1.4.2	Variation 2:	Thiocarbonylation of Iminophosphanes	203
18.2.8.1.5	Method 5:	By Nucleophilic Substitution of Organic Halides with Thiocyanate Anion	204
18.2.8.1.5.1	Variation 1:	Alkyl and Aryl Isothiocyanates	205
18.2.8.1.5.2	Variation 2:	Acy, Thioacyl, and Imidoyl Thiocyanates	208
18.2.8.1.5.3	Variation 3:	Sugar Isothiocyanates	210
18.2.8.1.5.4	Variation 4:	Allyl and Allenyl Isothiocyanates	211
18.2.8.1.5.5	Variation 5:	Solid-Phase Synthesis	213
18.2.8.1.5.6	Variation 6:	Silyl Isothiocyanates	214
18.2.8.1.6	Method 6:	By the Addition of Thiocyanic Acid and Its Derivatives to Alkenes and Alkynes	215
18.2.8.1.6.1	Variation 1:	Addition of Thiocyanic Acid and Its Derivatives to Alkenes	215
18.2.8.1.6.2	Variation 2:	Addition of Iodine Thiocyanate and Selenyl Thiocyanates to Alkenes	217
18.2.8.1.6.3	Variation 3:	Addition of Thiocyanic Acid and Its Derivatives to Alkynes	218
18.2.8.1.7	Method 7:	By Cleavage of Nitrogen and Sulfur Containing Heterocycles	219
18.2.8.1.8	Method 8:	By Cleavage of Nitrogen-Containing Heterocycles	222
18.2.8.1.9	Method 9:	By Direct Sulfurization of Isocyanides	224
18.2.8.1.10	Method 10:	Isothiocyanates from Aldehydes and Ketones	225
18.2.8.1.11	Method 11:	Preparation of Functionalized Isothiocyanates from Other Isothiocyanates	226
18.2.8.1.11.1	Variation 1:	Isothiocyanates by Substitution Reactions of Isothiocyanates	226
18.2.8.1.11.2	Variation 2:	Alkenyl Isothiocyanates by Elimination Reactions of Isothiocyanates	228
18.2.8.1.11.3	Variation 3:	Addition Reactions of Alkenyl Isothiocyanates	229
18.2.8.1.12	Methods 12:	Additional Methods	230
18.2.8.2		Applications of Product Subclass 8 in Organic Synthesis	232
18.2.8.2.1	Method 1:	Nucleophilic Additions	232
18.2.8.2.1.1	Variation 1:	Reactions with Heteroatom Nucleophiles	232
18.2.8.2.1.2	Variation 2:	Reactions with Carbon Nucleophiles	232

18.2.8.2.2	Method 2:	Cycloaddition Reactions	235
18.2.8.2.2.1	Variation 1:	[2 + 2]-Cycloaddition Reactions	235
18.2.8.2.2.2	Variation 2:	[2 + 4]-Cycloaddition Reactions	236
18.2.8.2.2.3	Variation 3:	[2 + 3]-Cycloaddition Reactions	238
18.2.8.2.3	Method 3:	Synthesis of Carbodiimides by Reaction with Iminophosphoranes	239
18.2.8.2.4	Method 4:	Synthesis of Thioamides by Friedel–Crafts Reaction	240
18.2.8.2.5	Method 5:	Reduction of Isothiocyanates	242
18.2.9	Product Subclass 9: Carbon Diselenide		243
18.2.9.1	Synthesis of Product Subclass 9		243
18.2.9.1.1	Method 1:	Reaction of Selenium with Dichloromethane	243
18.2.9.2	Applications of Product Subclass 9 in Organic Synthesis		244
18.2.9.2.1	Method 1:	Synthesis of Diselenocarbonates	244
18.2.9.2.2	Method 2:	Synthesis of Triselenocarbonates	244
18.2.9.2.3	Method 3:	Synthesis of Diselenocarbamates	245
18.2.9.2.4	Method 4:	Synthesis of Isoselenocyanates	245
18.2.9.2.5	Method 5:	Synthesis of Selenoureas	246
18.2.9.2.6	Method 6:	Synthesis of Ketene Diselenoacetals	246
18.2.9.2.7	Method 7:	Cycloaddition Reactions Involving Carbon Diselenide	246
18.2.9.2.8	Method 8:	Polymerization of Carbon Diselenide	247
18.2.9.2.9	Methods 9:	Additional Applications	247
18.2.10	Product Subclass 10: Isoselenocyanates		248
18.2.10.1	Synthesis of Product Subclass 10		249
18.2.10.1.1	Method 1:	By Nucleophilic Substitution of Organic Halides with Selenocyanate Anion	249
18.2.10.1.1.1	Variation 1:	Alkyl Isoselenocyanates	249
18.2.10.1.1.2	Variation 2:	Acyl and Imidoyl Isoselenocyanates	250
18.2.10.1.1.3	Variation 3:	Isoselenocyanates by Isomerization of Selenocyanates	251
18.2.10.1.1.4	Variation 4:	Silyl Isoselenocyanates	252
18.2.10.1.2	Method 2:	By Addition Reactions of Isocyanides with Elemental Selenium	252
18.2.10.1.2.1	Variation 1:	Reaction of Preformed Isocyanides with Elemental Selenium	252
18.2.10.1.2.2	Variation 2:	Via “In Situ” Formation of Isocyanides	253
18.2.10.1.3	Method 3:	From Primary Amines and Carbon Diselenide via Diselenocarbamates	254
18.2.10.1.4	Method 4:	From Imidoyl Dihalides	255
18.2.10.1.5	Methods 5:	Additional Methods	256
18.2.10.2	Applications of Product Subclass 10 in Organic Synthesis		257
18.2.10.2.1	Method 1:	Reactions with Nucleophiles	257
18.2.10.2.1.1	Variation 1:	Reactions with Heteroatom Nucleophiles	257
18.2.10.2.1.2	Variation 2:	Reactions with Carbon Nucleophiles	258
18.2.10.2.2	Method 2:	Cycloaddition Reactions of Isoselenocyanates	259
18.2.11	Product Subclass 11: Isotellurocyanates		261
18.2.12	Product Subclass 12: Carbodiimides		261

18.2.12.1	Synthesis of Product Subclass 12	262
18.2.12.1.1	Method 1: Via Imidoyl Dihalides	262
18.2.12.1.2	Method 2: Via N,N'-Disubstituted Ureas, Thioureas, and Selenoureas	263
18.2.12.1.2.1	Variation 1: Using Phosphorus Reagents	263
18.2.12.1.2.2	Variation 2: Using Oxidative Reagents	264
18.2.12.1.2.3	Variation 3: Using Sulfonyl Chlorides	265
18.2.12.1.2.4	Variation 4: Using Acid Chlorides	265
18.2.12.1.2.5	Variation 5: Using Pyridine and Pyrimidine Derivatives	266
18.2.12.1.2.6	Variation 6: Using Bases and Organometallic Compounds	266
18.2.12.1.2.7	Variation 7: Using (Dichloromethylene)dimethylammonium Chloride	267
18.2.12.1.3	Method 3: Via Iminophosphoranes	268
18.2.12.1.3.1	Variation 1: Aza-Wittig-Type Reaction of Iminophosphoranes with Heterocumulenes	268
18.2.12.1.3.2	Variation 2: Synthesis Using Di- <i>tert</i> -butyl Dicarboxylate	268
18.2.12.1.4	Method 4: Via Isocyanates	269
18.2.12.1.4.1	Variation 1: Reaction of Isocyanates with Phosphoramidates and Metal Organosilanolates	269
18.2.12.1.4.2	Variation 2: Catalytic Condensation of Isocyanates	270
18.2.12.1.5	Method 5: Via Isocyanides	270
18.2.12.1.6	Method 6: Via Rearrangements	271
18.2.12.1.6.1	Variation 1: Photochemical Rearrangement of Nitrilimines	271
18.2.12.1.6.2	Variation 2: Rearrangements of Azides	271
18.2.12.1.6.3	Variation 3: Tiemann Rearrangements of Amidoximes	272
18.2.12.1.7	Method 7: Synthesis of Organometallic Carbodiimides	273
18.2.12.1.7.1	Variation 1: Synthesis of Silylcarbodiimides	273
18.2.12.1.7.2	Variation 2: Synthesis of Germylcarbodiimides	273
18.2.12.1.7.3	Variation 3: Synthesis of Stannylcarbodiimides	274
18.2.12.1.8	Methods 8: Additional Methods	275
18.2.12.2	Applications of Product Subclass 12 in Organic Synthesis	275
18.2.12.2.1	Method 1: Reactions of Carbodiimides with Nucleophiles	275
18.2.12.2.2	Method 2: Carbodiimides in Cycloaddition Reactions	276
18.2.13	Product Subclass 13: 1-Aza-3-phosphapropadienes	277
18.2.13.1	Synthesis of Product Subclass 13	278
18.2.13.1.1	Method 1: Hexaalkyldisiloxane Elimination from Phosphaurea Derivatives	278
18.2.13.1.2	Method 2: Peterson Alkenation Using Isocyanates	278
18.2.13.2	Applications of Product Subclass 13 in Organic Synthesis	279
18.2.13.2.1	Method 1: Hydrolysis of 1-Aza-3-phosphapropadienes	279
18.2.13.2.2	Method 2: 1-Aza-3-phosphapropadienes in Cycloaddition Reactions	280
18.2.14	Product Subclass 14: 1λ⁵,3λ⁵-Diphosphapropadienes (Carbodiphosphoranes)	282
18.2.14.1	Synthesis of Product Subclass 14	283
18.2.14.1.1	Method 1: Reaction of Phosphines with Carbon Tetrachloride	283

18.2.14.1.2	Method 2: Dehydrohalogenation of Phosponium Salts	284
18.2.14.2	Applications of Product Subclass 14 in Organic Synthesis	286
18.2.15	Product Subclass 15: 1,3-Diphosphapropadienes	286
18.2.15.1	Synthesis of Product Subclass 15	286
18.2.15.1.1	Method 1: Trialkylsilanolate Elimination from 1,3-Diphosphapropene	287
18.2.15.1.2	Method 2: Dehydrohalogenation of Halo-1,3-diphosphapropenes	287
18.2.15.1.3	Method 3: Dehalogenation of <i>gem</i> -Dihalodiphosphiranes	288
18.2.15.2	Applications of Product Subclass 15 in Organic Synthesis	289
18.2.15.2.1	Method 1: Synthesis of Sulfur-Containing Diphosphetanes and Diphospholanes	289
18.2.15.2.2	Methods 2: Additional Applications	290
18.3	Product Class 3: Carbonic Acid Halides J.-P. G. Senet	
18.3	Product Class 3: Carbonic Acid Halides	321
18.3.1	Product Subclass 1: Carbonic Dihalides	330
18.3.1.1	Synthesis of Product Subclass 1	331
18.3.1.1.1	Method 1: By Halogen Exchange	331
18.3.1.1.2	Method 2: Through Decomposition of Perhalogenated Carbonates	332
18.3.2	Product Subclass 2: Haloformate Esters	334
18.3.2.1	Synthesis of Product Subclass 2	334
18.3.2.1.1	Method 1: By Halogen Exchange	334
18.3.2.1.1.1	Variation 1: Chlorine–Fluorine Exchange	334
18.3.2.1.1.2	Variation 2: Chlorine–Bromine Exchange	335
18.3.2.1.2	Method 2: From α -C-Metalated Aldehydes and Ketones	336
18.3.2.1.3	Method 3: From Hydroxylic Compounds	339
18.3.2.1.3.1	Variation 1: By the Reaction of Carbonyl Difluoride	339
18.3.2.1.3.2	Variation 2: By the Reaction of Phosgene (Carbonic Dichloride)	340
18.3.2.1.3.3	Variation 3: By the Reaction of Bis(trichloromethyl) Carbonate	341
18.3.2.1.4	Method 4: From 1-Haloalkyl Carbonates by Elimination Reactions	343
18.3.2.1.5	Method 5: From Oxiranes by Phosgene Addition	344
18.3.2.1.6	Method 6: From Carbonyl Compounds by Addition Reactions	345
18.3.2.1.6.1	Variation 1: Reaction of Phosgene with Aldehydes	346
18.3.2.1.6.2	Variation 2: Reaction of Bis(trichloromethyl) Carbonate with Aldehydes	348
18.3.2.1.6.3	Variation 3: Zinc-Mediated Reaction of Phosgene with Carbonyl Compounds	349
18.3.2.1.7	Method 7: Synthesis with Retention of the Haloformic Acid Groups	351
18.3.2.1.7.1	Variation 1: By Radical Chlorination of Alkyl Chloroformate Esters	351
18.3.2.1.7.2	Variation 2: By Zinc-Induced Boord Elimination of Chlorine	353
18.3.2.1.7.3	Variation 3: Rearrangement of 1-Chloroprop-2-enyl Chloroformates	354
18.3.2.1.8	Method 8: From O,S-Disubstituted Thiocarbonates by Chlorination with Sulfuryl Chloride	354

18.3.3	Product Subclass 3: Chlorothioformate S-Esters	355
18.3.3.1	Synthesis of Product Subclass 3	356
18.3.3.1.1	Method 1: By Catalytic Decomposition of Alkoxydichloromethylsulfanyl Chlorides	356
18.3.3.1.2	Method 2: From Sulfanyl Compounds	356
18.3.4	Product Subclass 4: Haloselenoformic Se-Acids	357
18.3.5	Product Subclass 5: Carbamoyl Halides	358
18.3.5.1	Synthesis of Product Subclass 5	358
18.3.5.1.1	Method 1: By Halogen Exchange	358
18.3.5.1.2	Method 2: From N,N-Bis(C-substituted) Nitrogen Compounds	359
18.3.5.1.2.1	Variation 1: By the Reaction of Phosgene with Secondary Amines	359
18.3.5.1.2.2	Variation 2: By the Reaction of Bis(trichloromethyl) Carbonate with Secondary Amines	360
18.3.5.1.2.3	Variation 3: By the Reaction of Phosgene with Imines	361
18.3.5.1.2.4	Variation 4: By the Reaction of Phosgene with Formamidines	362
18.3.5.1.2.5	Variation 5: By the Reaction of Phosgene with N-Carbonyl Compounds ..	363
18.3.5.1.2.6	Variation 6: By the Reaction of Bis(trichloromethyl) Carbonate with N-Carbonyl Compounds	364
18.3.5.1.3	Method 3: By the Reaction of Phosgene with Hydroxylamines	365
18.3.5.1.4	Method 4: By N-Dealkylation of Tertiary Amines	366
18.3.5.1.5	Method 5: By Chlorination of N,N-Disubstituted Carbamic Acid Derivatives	368
18.3.5.1.5.1	Variation 1: From Carbamates Generated from Secondary Amines and Carbon Dioxide in the Presence of a Tertiary Amine Base	368
18.3.5.1.5.2	Variation 2: From N,N-Dialkylcarbamic Acid Silyl Esters Generated from N-Silyl Secondary Amines and Carbon Dioxide	369
18.3.5.1.5.3	Variation 3: From N,N-Dialkylcarbamic Acid Alkyl Esters	370
18.3.5.1.6	Method 6: From (Carbamoyl)palladium(II) Complexes Using Carbon Monoxide and Chlorine	370
18.3.5.1.7	Method 7: From 1-Haloalkyl Carbamates by Elimination Reactions	371
18.3.6	Product Subclass 6: P-Halocarbonyl Organophosphorus Compounds	372
18.3.6.1	Synthesis of Product Subclass 6	372
18.3.6.1.1	Method 1: From Primary and Secondary Phosphines with Phosgene	372
18.3.6.1.2	Method 2: From Trialkyl Phosphites with Phosgene [or Bis(trichloro- methyl) Carbonate] by the Arbuzov Reaction	373
18.4	Product Class 4: Acyclic and Cyclic Carbonic Acids and Esters, and Their Sulfur, Selenium, and Tellurium Analogues K. W. Jung and A. S. Nagle	
18.4	Product Class 4: Acyclic and Cyclic Carbonic Acids and Esters, and Their Sulfur, Selenium, and Tellurium Analogues	379
18.4.1	Product Subclass 1: Carbonic Acid Monoesters	380
18.4.1.1	Synthesis of Product Subclass 1	380

18.4.2	Product Subclass 2: Organometallic Derivatives and Metal Salts of Carbonic Acid Monoesters	380
18.4.2.1	Synthesis of Product Subclass 2	380
18.4.2.1.1	Method 1: Addition of Metal Alkoxides to Carbon Dioxide	380
18.4.2.2	Applications of Product Subclass 2 in Organic Synthesis	382
18.4.2.2.1	Method 1: Carboxylations Using Magnesium Methyl Carbonate	382
18.4.3	Product Subclass 3: Acyclic Carbonate Diesters	383
18.4.3.1	Synthesis of Product Subclass 3	383
18.4.3.1.1	Method 1: Addition of Alcohols to Formate Derivatives	383
18.4.3.1.1.1	Variation 1: Addition of Aldehydes or Ketones	384
18.4.3.1.1.2	Variation 2: Synthesis Using Dialkyl Azodicarboxylates	387
18.4.3.1.2	Method 2: Transfer of the Carbonyl Group to Alcohols	387
18.4.3.1.2.1	Variation 1: Coupling Using 1,1'-Carbonyldiimidazole	388
18.4.3.1.2.2	Variation 2: Transcarbonylation Using Dimethyl or Diethyl Carbonate	389
18.4.3.1.3	Method 3: Addition to Carbon Dioxide	390
18.4.3.1.3.1	Variation 1: Synthesis Using Diethyl Azodicarboxylate	392
18.4.3.1.4	Method 4: Addition to Carbon Monoxide	392
18.4.3.1.5	Method 5: Alkylative Self-Condensation	393
18.4.3.1.6	Method 6: Coupling Using Urea as a Carbonyl Source	393
18.4.3.1.7	Method 7: Enzyme-Catalyzed Transcarbonylation	394
18.4.4	Product Subclass 4: Cyclic Carbonate Diesters	395
18.4.4.1	Synthesis of Product Subclass 4	396
18.4.4.1.1	Method 1: Transfer of the Carbonyl Group to Diols	396
18.4.4.1.1.1	Variation 1: Coupling Using 1,1'-Carbonyldiimidazole	397
18.4.4.1.1.2	Variation 2: Transcarbonylation Using Dimethyl or Diethyl Carbonate	398
18.4.4.1.2	Method 2: Addition to Carbon Dioxide	399
18.4.4.1.2.1	Variation 1: Reaction with Halohydrins	399
18.4.4.1.2.2	Variation 2: Iodolactonization	400
18.4.4.1.2.3	Variation 3: Reaction with Propargylic Alcohols	400
18.4.4.1.2.4	Variation 4: Reaction with Oxiranes	401
18.4.4.1.3	Method 3: Addition to Carbon Monoxide	402
18.4.4.2	Applications of Product Subclass 4 in Organic Synthesis	402
18.4.4.2.1	Method 1: Oxidation of Cyclic Carbonate Diesters to Unsaturated Analogues	402
18.4.5	Product Subclass 5: Bis(trihaloalkyl) Carbonates	403
18.4.5.1	Synthesis of Product Subclass 5	403
18.4.6	Product Subclass 6: Acyclic Carbonic Carboxylic Anhydrides	404
18.4.6.1	Synthesis of Product Subclass 6	404
18.4.6.1.1	Method 1: Addition of Acids to Formate Derivatives	404
18.4.6.1.2	Method 2: Addition of Carbonates to Acid Chlorides	404
18.4.7	Product Subclass 7: Cyclic Carbonic Carboxylic Anhydrides	405
18.4.7.1	Synthesis of Product Subclass 7	405

18.4.8	Product Subclass 8: Halocarbonate Monoesters	406
18.4.8.1	Synthesis of Product Subclass 8	406
18.4.9	Product Subclass 9: Dicarboxate Diesters	407
18.4.9.1	Synthesis of Product Subclass 9	407
18.4.10	Product Subclass 10: Tricarboxate Diesters	407
18.4.10.1	Synthesis of Product Subclass 10	407
18.4.11	Product Subclass 11: Dithiocarbonate S,S-Diesters	408
18.4.11.1	Synthesis of Product Subclass 11	408
18.4.12	Product Subclass 12: Carbamic Carbonic Anhydride O,N-Diesters	408
18.4.12.1	Synthesis of Product Subclass 12	408
18.4.13	Product Subclass 13: Monoperoxydicarbonic Acid O-Monoesters, Monoperoxydicarbonate Diesters, and Peroxydicarbonate Diesters	408
18.4.13.1	Synthesis of Product Subclass 13	409
18.4.14	Product Subclass 14: Carbonic Sulfonic Anhydride Esters	410
18.4.14.1	Synthesis of Product Subclass 14	410
18.4.14.1.1	Method 1: Addition of Sulfonic Acids to Formate Derivatives	410
18.4.14.1.2	Method 2: Oxidation and Rearrangement of Thiocarbonates	411
18.4.15	Product Subclass 15: O-Amino Carbonate Derivatives	411
18.4.15.1	Synthesis of Product Subclass 15	411
18.4.15.1.1	Method 1: Addition of Alcohols to Formate Derivatives	411
18.4.15.1.2	Method 2: Transfer of the Carbonyl Group to Hydroxylamines	413
18.4.16	Product Subclass 16: Metal Salts of Thiocarbonic Acid O-Monoesters and S-Monoesters	413
18.4.16.1	Synthesis of Product Subclass 16	413
18.4.16.2	Applications of Product Subclass 16 in Organic Synthesis	414
18.4.16.2.1	Method 1: Synthesis of Bis(alkoxycarbonyl) Disulfides and Trisulfides ...	414
18.4.17	Product Subclass 17: Acyclic Thiocarbonate O,S-Diesters	414
18.4.17.1	Synthesis of Product Subclass 17	415
18.4.17.1.1	Method 1: Addition of Thiols or Alcohols to Formate Derivatives	415
18.4.17.1.1.1	Variation 1: Addition of Metal Enolates	416
18.4.17.1.2	Method 2: Oxidation of Dithiocarbonate O,S-Diesters	416
18.4.17.1.3	Method 3: Rearrangement of O,O-Diaryl Thiocarbonates	417
18.4.18	Product Subclass 18: Cyclic Thiocarbonate O,S-Diesters	417
18.4.18.1	Synthesis of Product Subclass 18	417
18.4.18.1.1	Method 1: Addition to Carbonyl Equivalents	417
18.4.18.1.1.1	Variation 1: Coupling Using 1,1'-Carbonyldiimidazole	418
18.4.18.1.1.2	Variation 2: Hydrolysis of Ammonium Salts	419
18.4.18.1.2	Method 2: Addition to Carbon Monoxide	420

18.4.18.1.3	Method 3: Rearrangements	420
18.4.18.1.3.1	Variation 1: Isomerization of Thiocarbonate <i>O,O</i> -Diesters	421
18.4.19	Product Subclass 19: Thiocarbonate <i>O,S</i>-Diester <i>S</i>-Oxides and <i>S,S</i>-Dioxides	421
18.4.19.1	Synthesis of Product Subclass 19	421
18.4.20	Product Subclass 20: Carboxylic Thiocarbonic Anhydride <i>S</i>-Esters	422
18.4.20.1	Synthesis of Product Subclass 20	422
18.4.20.1.1	Method 1: Addition of Acids to Chlorothioformate <i>S</i> -Esters	422
18.4.20.1.2	Method 2: Addition of <i>O</i> -Metal Thiocarbonate <i>S</i> -Esters to Acid Chlorides	423
18.4.20.2	Applications of Product Subclass 20 in Organic Synthesis	423
18.4.20.2.1	Method 1: Macrolactonization of Hydroxy Acids	423
18.4.21	Product Subclass 21: Carbamic Thiocarbonic Anhydride <i>S</i>-Esters	424
18.4.21.1	Synthesis of Product Subclass 21	424
18.4.22	Product Subclass 22: <i>O</i>-Amino Thiocarbonate <i>S</i>-Esters	424
18.4.22.1	Synthesis of Product Subclass 22	424
18.4.23	Product Subclass 23: <i>S</i>-Acyl Thiocarbonate <i>O</i>-Esters	425
18.4.23.1	Synthesis of Product Subclass 23	425
18.4.24	Product Subclass 24: Bis(alkoxycarbonyl) Sulfides	425
18.4.24.1	Synthesis of Product Subclass 24	425
18.4.25	Product Subclass 25: <i>S</i>-(Imidocarbonyl) Thiocarbonate <i>O</i>-Esters	426
18.4.25.1	Synthesis of Product Subclass 25	426
18.4.26	Product Subclass 26: Alkoxycarbonyl Thiocyanates	426
18.4.26.1	Synthesis of Product Subclass 26	426
18.4.27	Product Subclass 27: <i>S</i>-Halo Thiocarbonate <i>O</i>-Esters	427
18.4.27.1	Synthesis of Product Subclass 27	427
18.4.27.1.1	Method 1: Addition of Alcohols to Thioformate Derivatives	427
18.4.27.1.2	Method 2: Halogenation of <i>S</i> -Acyl Thiocarbonate <i>O</i> -Esters	427
18.4.27.2	Applications of Product Subclass 27 in Organic Synthesis	428
18.4.27.2.1	Method 1: Nucleophilic Displacement of Thiol Derivatives	428
18.4.28	Product Subclass 28: <i>S</i>-Sulfanyl Derivatives of Thiocarbonate <i>O</i>-Esters	429
18.4.28.1	Synthesis of Product Subclass 28	429
18.4.28.1.1	Method 1: Disulfides and Trisulfides by Addition to <i>S</i> -Substituted Chlorothioformates	429
18.4.28.1.2	Method 2: Addition of Sodium Thiosulfate to Chloroformates	430
18.4.28.1.3	Method 3: Oxidation of Alkoxycarbonyl Alkyl Disulfides	430
18.4.28.1.4	Method 4: Rearrangements	431
18.4.29	Product Subclass 29: <i>S</i>-Amino Thiocarbonate <i>O</i>-Esters	432
18.4.29.1	Synthesis of Product Subclass 29	432

18.4.30	Product Subclass 30: Acyclic Dithiocarbonate S,S-Diesters	432
18.4.30.1	Synthesis of Product Subclass 30	432
18.4.30.1.1	Method 1: Addition of Thiols to Chlorothioformate S-Esters	432
18.4.30.1.2	Method 2: Activation of O-Metal Thiocarbonate S-Esters	433
18.4.30.1.3	Method 3: Rearrangement of Dithiocarbonate O,S-Diesters	433
18.4.30.1.3.1	Variation 1: Isomerization Using Acids	434
18.4.30.1.3.2	Variation 2: Isomerization Using Bases	434
18.4.30.1.3.3	Variation 3: [3,3]-Sigmatropic Rearrangement	434
18.4.31	Product Subclass 31: Cyclic Dithiocarbonate S,S-Diesters	435
18.4.31.1	Synthesis of Product Subclass 31	435
18.4.31.1.1	Method 1: Addition of Dithiols/Dithiones to the Carbonyl Group	435
18.4.31.1.2	Method 2: Oxidation of Cyclic Trithiocarbonates	436
18.4.31.1.2.1	Variation 1: Conversion of Thiones into Carbonyl Compounds Using Oxiranes	436
18.4.31.1.3	Method 3: Halocyclization of S-Allyl Dithiocarbonate O-Esters	436
18.4.31.1.4	Method 4: Acid-Catalyzed Cyclization of O-Alkyl S-(2-Oxoalkyl) Dithiocarbonates	437
18.4.31.1.5	Method 5: Cycloaddition of Dithiocarbonate O,S-Diesters with Alkynes ..	438
18.4.31.1.6	Method 6: Isomerization of Dithiocarbonate O,S-Diesters	438
18.4.32	Product Subclass 32: Dithiocarbonate S,S-Diester S-Oxides	438
18.4.32.1	Synthesis of Product Subclass 32	438
18.4.33	Product Subclass 33: S-Acyl Dithiocarbonate S-Esters	439
18.4.33.1	Synthesis of Product Subclass 33	439
18.4.34	Product Subclass 34: S,S-Bis[(dialkylamino)thiocarbonyl] Dithiocarbonates	439
18.4.34.1	Synthesis of Product Subclass 34	439
18.4.35	Product Subclass 35: (Alkylsulfanyl)carbonyl Thiocyanates	440
18.4.35.1	Synthesis of Product Subclass 35	440
18.4.36	Product Subclass 36: S-Sulfanyl Derivatives of Dithiocarbonate S-Esters ..	440
18.4.36.1	Synthesis of Product Subclass 36	440
18.4.37	Product Subclass 37: Acyclic Selenocarbonate O,Se-Diesters	441
18.4.37.1	Synthesis of Product Subclass 37	441
18.4.37.1.1	Method 1: Selenation of Tellurocarbonate O,Te-Diesters	441
18.4.37.1.2	Method 2: Addition of Selenols to Chloroformates	441
18.4.37.1.2.1	Variation 1: Reaction with (Arylselanyl)magnesium Bromides	442
18.4.37.1.2.2	Variation 2: Synthesis from Diselenides	442
18.4.37.1.2.3	Variation 3: Synthesis Using 1,1'-Carbonyldiimidazole	442
18.4.37.1.3	Method 3: Palladium-Catalyzed Coupling of Selenides with Chloroformates	443
18.4.37.2	Applications of Product Subclass 37 in Organic Synthesis	443
18.4.37.2.1	Method 1: Formation of γ - and δ -Lactones	443

18.4.38	Product Subclass 38: Cyclic Selenocarbonate O,Se-Diesters	444
18.4.38.1	Synthesis of Product Subclass 38	444
18.4.39	Product Subclass 39: Bis(alkoxycarbonyl) Selenides	445
18.4.39.1	Synthesis of Product Subclass 39	445
18.4.40	Product Subclass 40: Cyclic Selenothiocarbonate S,Se-Diesters	445
18.4.40.1	Synthesis of Product Subclass 40	445
18.4.41	Product Subclass 41: Acyclic Diselenocarbonate Se,Se-Diesters	445
18.4.41.1	Synthesis of Product Subclass 41	445
18.4.42	Product Subclass 42: Cyclic Diselenocarbonate Se,Se-Diesters	446
18.4.42.1	Synthesis of Product Subclass 42	446
18.4.43	Product Subclass 43: Acyclic Tellurocarbonate O,Te-Diesters	446
18.4.43.1	Synthesis of Product Subclass 43	446
18.4.44	Product Subclass 44: Bis(alkoxycarbonyl) Tellurides	446
18.4.44.1	Synthesis of Product Subclass 44	446
18.5	Product Class 5: Polymeric Carbonic Acids and Esters, and Their Sulfur Analogues	
	S. C. Moratti and Y. C. Charalambides	
<hr/>		
18.5	Product Class 5: Polymeric Carbonic Acids and Esters, and Their Sulfur Analogues	451
18.5.1	Product Subclass 1: Polycarbonates	451
18.5.1.1	Synthesis of Product Subclass 1	452
18.5.1.1.1	Method 1: Diol Addition to Carbonic Acid Derivatives	452
18.5.1.1.1.1	Variation 1: Condensation of Phosgene and Diphenols	452
18.5.1.1.1.2	Variation 2: Condensation of Diols with Diaryl and Dialkyl Carbonates ...	453
18.5.1.1.1.3	Variation 3: Direct Condensation of Diols with Carbon Dioxide	453
18.5.1.1.1.4	Variation 4: Copolymerization of Epoxides with Carbon Dioxide	454
18.5.1.1.2	Method 2: Ring-Opening Polymerization	455
18.5.1.1.2.1	Variation 1: Ring-Opening Polymerization of Cyclic Carbonates	455
18.5.1.1.2.2	Variation 2: Ring-Opening Polymerization of Cyclic Spiroorthocarbonates	456
18.5.1.1.3	Method 3: Coupling of Diphenols with Carbon Monoxide	456
18.5.2	Product Subclass 2: Polythiocarbonates	457
18.5.2.1	Synthesis of Product Subclass 2	457
18.5.2.1.1	Method 1: Condensation of Phosgene with Dithiols	457
18.5.2.1.2	Method 2: Ring-Opening Polymerization	458

18.6	Product Class 6: Acyclic and Cyclic Carbamic Acids and Esters, and Their Sulfur, Selenium, Tellurium, and Phosphorus Analogues L. Rossi	
18.6	Product Class 6: Acyclic and Cyclic Carbamic Acids and Esters, and Their Sulfur, Selenium, Tellurium, and Phosphorus Analogues	461
18.6.1	Product Subclass 1: Carbamic Acids and Derivatives	461
18.6.1.1	Synthesis of Product Subclass 1	462
18.6.1.1.1	Synthesis of Ammonium Carbamates and Derivatives	462
18.6.1.1.1.1	Method 1: Reaction of Amines with Carbon Dioxide	462
18.6.1.1.2	Synthesis of Metal Carbamates	462
18.6.1.1.2.1	Method 1: Reaction of Ammonium Carbamates with Alkali Metals	463
18.6.1.2	Applications of Product Subclass 1 in Organic Synthesis	463
18.6.1.2.1	Method 1: Synthesis of Amides from Alkylammonium Carbamates	463
18.6.2	Product Subclass 2: Linear Carbamic Acid Esters	464
18.6.2.1	Synthesis of Product Subclass 2	465
18.6.2.1.1	Synthesis from Amines	466
18.6.2.1.1.1	Method 1: Reaction with Alcohols Using Phosgene	466
18.6.2.1.1.2	Method 2: Reaction with Carbonates	468
18.6.2.1.1.2.1	Variation 1: With Organic Carbonates	468
18.6.2.1.1.2.2	Variation 2: With Alkyl and Aryl Isopropenyl and α -Methoxyvinyl Carbonates	469
18.6.2.1.1.2.3	Variation 3: Other Nuncatalyzed Reactions with Organic Carbonates	470
18.6.2.1.1.2.4	Variation 4: Reaction of Aromatic Amines with Organic Carbonates	472
18.6.2.1.1.2.5	Variation 5: Reaction with Inorganic Carbonates	474
18.6.2.1.1.2.6	Variation 6: Reaction with Ammonium Carbonates and Ammonium Hydrogen Carbonates	475
18.6.2.1.1.2.7	Variation 7: Reaction with Organic Dicarbonates	476
18.6.2.1.1.2.8	Variation 8: Enzyme-Catalyzed Reactions with Organic Carbonates	478
18.6.2.1.1.2.9	Variation 9: Solid-Phase Reaction of Amines with Organic Carbonates	479
18.6.2.1.1.3	Method 3: Reaction with Haloformates	480
18.6.2.1.1.3.1	Variation 1: Reaction with In Situ Generated Haloformates	483
18.6.2.1.1.3.2	Variation 2: Reaction of Tertiary Amines with Haloformates	483
18.6.2.1.1.4	Method 4: Reaction with Carbon Dioxide	485
18.6.2.1.1.4.1	Variation 1: Base-Catalyzed Reaction with Carbon Dioxide	486
18.6.2.1.1.4.2	Variation 2: Base-Catalyzed Reaction with Carbon Dioxide on a Solid Phase	489
18.6.2.1.1.4.3	Variation 3: Metal-Catalyzed Reaction with Carbon Dioxide	489
18.6.2.1.1.4.4	Variation 4: Via Ammonium Carbamates by Reaction of Amines and Carbon Dioxide	490
18.6.2.1.1.4.5	Variation 5: Reaction with Supercritical Carbon Dioxide	492
18.6.2.1.1.5	Method 5: Reaction with Carbonyl Sulfide	493
18.6.2.1.1.6	Method 6: Reaction with Ureas and Alcohols	494
18.6.2.1.1.7	Method 7: Metal-Catalyzed Carbonylation Using Carbon Monoxide	495

18.6.2.1.1.8	Method 8:	Oxidative Alkoxy carbonylation of Amines	496
18.6.2.1.1.8.1	Variation 1:	Homogeneous Oxidative Alkoxy carbonylation	496
18.6.2.1.1.8.2	Variation 2:	Heterogeneous Oxidative Alkoxy carbonylation	497
18.6.2.1.1.8.3	Variation 3:	Oxidative Alkoxy carbonylation of Tertiary Amines	500
18.6.2.1.1.9	Method 9:	Reaction with Alkoxy carbonylazoles and Alkoxy carbonyltriazoles	500
18.6.2.1.1.9.1	Variation 1:	Selective Reaction of 1,1'-Carbonyldiimidazole with Amines and Alcohols	502
18.6.2.1.1.10	Method 10:	Reaction of Carbamoylimidazolium Salts with Phenols or Alcohols	503
18.6.2.1.2	Synthesis from Ureas		504
18.6.2.1.2.1	Method 1:	Reaction with Alcohols	504
18.6.2.1.2.1.1	Variation 1:	Metal-Catalyzed Reaction with Alcohols	505
18.6.2.1.2.1.2	Variation 2:	Acid- and Base-Catalyzed Reaction with Alcohols	506
18.6.2.1.2.2	Method 2:	Reaction with Carbon Monoxide	508
18.6.2.1.2.3	Method 3:	Reaction with Organic Carbonates	509
18.6.2.1.2.4	Method 4:	Reaction with Oxiranes	510
18.6.2.1.3	Synthesis from Cyanates and Isocyanates		511
18.6.2.1.3.1	Method 1:	Reaction of Isocyanates with Alcohols	511
18.6.2.1.3.1.1	Variation 1:	Synthesis of Unsubstituted Carbamates by Reaction of Trichloroacetyl Isocyanates with Alcohols	514
18.6.2.1.3.1.2	Variation 2:	Reaction of Inorganic Cyanates with Alcohols	515
18.6.2.1.3.1.3	Variation 3:	Reaction of Triethylammonium Isocyanate with Alcohols	515
18.6.2.1.3.1.4	Variation 4:	Reaction of Inorganic Cyanates with Alcohols and Alkyl Halides	516
18.6.2.1.3.1.5	Variation 5:	Reaction of Chlorosulfonyl Isocyanate with Allyl Ethers	518
18.6.2.1.4	Synthesis from Carbamoyl Halides		518
18.6.2.1.4.1	Method 1:	Reaction with Alcohols and Derivatives	518
18.6.2.1.5	Synthesis from Azides		520
18.6.2.1.5.1	Method 1:	Reaction with Organic Carbonates and Dicarbonates	520
18.6.2.1.5.1.1	Variation 1:	Reductive Transformation of Azides to (<i>tert</i> -Butoxycarbonyl)carbamates	520
18.6.2.1.5.1.2	Variation 2:	Modified Staudinger Reaction of Azides	521
18.6.2.1.5.2	Method 2:	Reaction with Haloformates	522
18.6.2.1.6	Synthesis from Amides		523
18.6.2.1.6.1	Method 1:	Reaction of Aromatic Amides with Organic Carbonates	523
18.6.2.1.6.2	Method 2:	Hofmann Rearrangement of Carboxamides	524
18.6.2.1.6.2.1	Variation 1:	Hofmann Rearrangement of Carboxamides Mediated by Bromonium Ion Equivalents	524
18.6.2.1.6.2.2	Variation 2:	Hofmann Rearrangement of Carboxamides Mediated by Other Systems	526
18.6.2.1.6.2.3	Variation 3:	Electrochemically Induced Hofmann Rearrangement of Carboxamides	528

18.6.2.1.7	Synthesis from Carbamates	529
18.6.2.1.7.1	Method 1: By Transesterification	529
18.6.2.1.7.1.1	Variation 1: Reaction with Alcohols	529
18.6.2.1.7.1.2	Variation 2: Reaction via Silyl Carbamates	532
18.6.2.1.7.1.3	Variation 3: Transesterification on a Solid Phase	533
18.6.2.1.7.2	Method 2: By N-Alkylation	534
18.6.2.1.7.2.1	Variation 1: Reaction with Alkyl Halides and Base	534
18.6.2.1.7.2.2	Variation 2: Reaction with Amines	535
18.6.2.1.7.2.3	Variation 3: Reaction with Alkenes	536
18.6.2.1.7.2.4	Variation 4: Reaction with Aldehydes and Aromatic Compounds	537
18.6.2.1.8	Synthesis by Other Methods	538
18.6.2.1.8.1	Method 1: Curtius Rearrangement of Carboxylic Acids and Derivatives	538
18.6.2.1.8.2	Method 2: Reductive Carbonylation of Aromatic Nitro Compounds	539
18.6.2.1.8.2.1	Variation 1: Metal-Catalyzed Reductive Carbonylation of Aromatic Nitro Compounds	539
18.6.2.1.8.2.2	Variation 2: Selenium-Catalyzed Carbonylation of Aromatic Nitro Compounds	543
18.6.2.1.8.2.3	Variation 3: Palladium-Catalyzed Reductive Carbonylation of Nitrosobenzene	544
18.6.2.1.8.3	Method 3: Reaction of Cyanogen Chloride with Alcohols	545
18.6.2.1.8.4	Method 4: Ene Reaction of Alkenes with Diethyl Azodicarboxylate	546
18.6.2.1.8.5	Method 5: Carbamates from O-Alkyl and S-Alkyl Thiocarbamates	547
18.6.2.2	Applications of Product Subclass 2 in Organic Synthesis	549
18.6.2.2.1	Method 1: Synthesis of Isocyanates	549
18.6.2.2.2	Method 2: Reaction of Carbamates with Carbonyl Compounds and Derivatives	550
18.6.2.2.3	Method 3: Synthesis of Amines from Carbamates	551
18.6.2.2.4	Method 4: Synthesis of Ureas from Carbamates	553
18.6.2.2.4.1	Variation 1: Diiodosilane-Mediated Synthesis of Ureas from Carbamates	553
18.6.3	Product Subclass 3: Cyclic Carbamates	554
18.6.3.1	Synthesis of Product Subclass 3	555
18.6.3.1.1	Synthesis from Amino Alcohols	555
18.6.3.1.1.1	Method 1: Reaction with Phosgene, Trichloromethyl Chloroformate, and Bis(trichloromethyl) Carbonate	555
18.6.3.1.1.2	Method 2: Reaction with Organic Carbonates	559
18.6.3.1.1.2.1	Variation 1: Reaction with Alkylammonium Carbonates	560
18.6.3.1.1.2.2	Variation 2: Reaction with Organic Dicarbonates	561
18.6.3.1.1.2.3	Variation 3: Reaction with Polymer-Supported Carbonate	562
18.6.3.1.1.3	Method 3: Reaction with Ureas	563
18.6.3.1.1.4	Method 4: Reaction with Carbon Dioxide	563
18.6.3.1.1.4.1	Variation 1: Electrochemical Reaction with Carbon Dioxide	564
18.6.3.1.1.5	Method 5: Reaction with Carbon Monoxide	565
18.6.3.1.1.6	Method 6: Reaction with Trihaloacetic Acid Derivatives	566
18.6.3.1.1.7	Method 7: Reaction with Isocyanates	567

18.6.3.1.1.8	Method 8: Reaction with 1,1'-Carbonyldiimidazole	568
18.6.3.1.2	Synthesis from Cyclic Carbonates	569
18.6.3.1.2.1	Method 1: Reaction with Isocyanates	569
18.6.3.1.2.2	Method 2: Reaction with Aromatic Amines	570
18.6.3.1.2.3	Method 3: Reaction with Formamide and with Ammonium Carbonate and Potassium Cyanide	571
18.6.3.1.3	Synthesis from Oxiranes	571
18.6.3.1.3.1	Method 1: Reaction with Isocyanates	571
18.6.3.1.3.1.1	Variation 1: Reaction with 1,3,5-Triazinane-2,4,6-trione	573
18.6.3.1.3.1.2	Variation 2: Reaction with Isothiocyanates	574
18.6.3.1.3.2	Method 2: Reaction with Carbamates	575
18.6.3.1.3.3	Method 3: Reaction of 2-(Aminomethyl)oxiranes with Carbon Dioxide ..	575
18.6.3.1.4	Synthesis from Carbamates	576
18.6.3.1.4.1	Method 1: Cyclization of Carbamates	576
18.6.3.1.4.1.1	Variation 1: Pyrolytic Cyclization of Carbamates	576
18.6.3.1.4.1.2	Variation 2: Cyclization of Hydroxycarbamates and Derivatives	577
18.6.3.1.4.1.3	Variation 3: 4-Toluenesulfonyl Chloride Mediated Cyclization of <i>N</i> - <i>tert</i> -Butoxycarbonyl Derivatives of β -Amino Alcohols	578
18.6.3.1.4.1.4	Variation 4: Cyclization of <i>N</i> -Substituted β -Chloroethyl Carbamates	579
18.6.3.1.4.1.5	Variation 5: Cyclization via Silyl Carbamates	580
18.6.3.1.4.1.6	Variation 6: Cyclization of Unsaturated Carbamates	581
18.6.3.1.4.2	Method 2: Reaction with Alkenes	582
18.6.3.1.4.3	Method 3: Reaction with α -Halo Carbonyl Compounds	582
18.6.3.1.5	Synthesis from Unsaturated Compounds	583
18.6.3.1.5.1	Method 1: Reaction of Terminal Alkynyl Alcohols with Isocyanates	583
18.6.3.1.5.2	Method 2: Reaction of Terminal Alkynyl Alcohols with Amines and Carbon Dioxide	584
18.6.3.1.5.3	Method 3: Reaction of Unsaturated Amines with Carbon Dioxide	585
18.6.3.1.5.3.1	Variation 1: Reaction of Allylamines and Homoallylamines with Carbon Dioxide	585
18.6.3.1.5.3.2	Variation 2: Reaction of Propargylamines with Carbon Dioxide	586
18.6.3.1.6	Synthesis from Aziridines	587
18.6.3.1.6.1	Method 1: Reaction with Carbon Dioxide	587
18.6.3.1.6.2	Method 2: Reaction with Organic Dicarbonates	588
18.6.3.1.7	Synthesis by Other Methods	589
18.6.3.1.7.1	Method 1: One-Pot Synthesis of Oxazolidin-2-ones from Amino Acids ..	589
18.6.3.1.7.2	Method 2: Hofmann-Type Rearrangement of Hydroxy Amides	592
18.6.3.1.7.3	Method 3: Curtius Rearrangement of β -Hydroxy Acids	593
18.6.3.1.7.4	Method 4: Reaction of β -Aminoalkylsulfuric Acids with Inorganic Carbonates	593
18.6.3.1.7.5	Method 5: Synthesis of 1,3-Oxazetidin-2-ones	594
18.6.3.1.7.5.1	Variation 1: Reaction of Halo Ketones with Isocyanates	594
18.6.3.1.7.5.2	Variation 2: Hydrolysis of Halo Isocyanates	595

18.6.3.1.7.6	Method 6: Oxidation of Oxazolidine-2-thiones	595
18.6.3.1.7.7	Method 7: Reaction of Oximes with Dimethyl Carbonate	596
18.6.3.1.7.8	Method 8: Intramolecular Iron-Catalyzed Chloroamination of Unsaturated Alkoxy carbonyl Azides	597
18.6.3.2	Applications of Product Subclass 3 in Organic Synthesis	598
18.6.3.2.1	Method 1: Synthesis of <i>N</i> -Acyl oxazolidin-2-ones	598
18.6.4	Product Subclass 4: Thiocarbamic Acids and Salts	599
18.6.4.1	Synthesis of Product Subclass 4	599
18.6.4.1.1	Method 1: Reaction of Amines with Carbon Monoxide and Sulfur or with Carbonyl Sulfide	599
18.6.4.2	Applications of Product Subclass 4 in Organic Synthesis	600
18.6.4.2.1	Method 1: Synthesis of Ureas from Ammonium Thiocarbamates	600
18.6.5	Product Subclass 5: Linear Thiocarbamic Acid Esters	601
18.6.5.1	Synthesis of Product Subclass 5	601
18.6.5.1.1	Synthesis from Amines	601
18.6.5.1.1.1	Method 1: Reaction with Carbon Monoxide and Elemental Sulfur	601
18.6.5.1.1.1.1	Variation 1: Reaction of Carbamoyllithium Reagents with Elemental Sulfur	602
18.6.5.1.1.1.2	Variation 2: Selenium-Mediated Reaction of Amines with Carbon Monoxide and Alkyl Halides	603
18.6.5.1.1.1.3	Variation 3: Reaction with Carbon Monoxide and Organic Disulfides	604
18.6.5.1.1.2	Method 2: Reaction with Carbonyl Sulfide and Alkylating Reagents	605
18.6.5.1.1.3	Method 3: Reaction with <i>S</i> -Alkyl Chlorothioformates	606
18.6.5.1.1.4	Method 4: Reaction with Thiocarbonates	608
18.6.5.1.2	Synthesis by Other Methods	608
18.6.5.1.2.1	Method 1: Reaction of Alkyl carbamoyl Chlorides with Thiols	608
18.6.5.1.2.1.1	Variation 1: Reaction of Alkyl carbamoyl Chlorides with Potassium <i>O</i> -Alkyl Dithiocarbonates	610
18.6.5.1.2.2	Method 2: Palladium-Catalyzed Reaction of Sulfenamides with Carbon Monoxide	611
18.6.5.1.2.3	Method 3: Transesterification of Thiocarbamates	611
18.6.5.1.2.4	Method 4: Reaction of Thiols with Isocyanates and Derivatives	612
18.6.5.1.2.4.1	Variation 1: Hydrolysis of Thiocyanates	613
18.6.5.1.2.5	Method 5: Isomerization of Thiocarbamates	614
18.6.5.1.2.5.1	Variation 1: Thermal Isomerization of <i>O</i> -Aryl Thiocarbamates	614
18.6.5.1.2.5.2	Variation 2: Isomerization of <i>O</i> -Alkyl Thiocarbamates	615
18.6.5.1.2.6	Method 6: Curtius Rearrangement of Dienoic Acids	617
18.6.5.1.2.7	Method 7: Reaction of Imidazolium Salts with Thiols	617
18.6.5.2	Applications of Product Subclass 5 in Organic Synthesis	618
18.6.5.2.1	Method 1: Synthesis of Isocyanates	618
18.6.5.2.2	Method 2: Synthesis of Ureas	619
18.6.6	Product Subclass 6: Cyclic Thiocarbamates	619
18.6.6.1	Synthesis of Product Subclass 6	619

18.6.6.1.1	Synthesis from Amino Thiols and Derivatives	619
18.6.6.1.1.1	Method 1: Reaction with Phosgene and Derivatives	619
18.6.6.1.1.2	Method 2: Reaction with Carbon Monoxide	620
18.6.6.1.1.2.1	Variation 1: Rhodium(I)-Catalyzed Carbonylation of Thiazolidines	621
18.6.6.1.1.3	Method 3: Reaction of Amino Thiols and 1,3-Thiazolidines with Ureas	622
18.6.6.1.1.4	Method 4: Reaction with 1,1'-Carbonyldiimidazole	623
18.6.6.1.2	Synthesis by Other Methods	624
18.6.6.1.2.1	Method 1: Reaction of Amines with Carbonyl Sulfide	624
18.6.6.1.2.1.1	Variation 1: Reaction of Halo Amines with Carbonyl Sulfide	624
18.6.6.1.2.1.2	Variation 2: Reaction of Amino oxiranes with Carbonyl Sulfide	624
18.6.6.1.2.2	Method 2: Reaction of Amines with α -(Methoxycarbonyl)sulfonylated Carbonyl Compounds	625
18.6.6.1.2.2.1	Variation 1: Cyclization of Amino Thiocarbonates and Dithiocarbonates	625
18.6.6.1.2.3	Method 3: Synthesis from Chloro(oxo)methanesulfonyl Chloride	626
18.6.6.1.2.4	Method 4: Palladium-Catalyzed Reaction of 2-Vinylthiiranes with Isocyanates	627
18.6.7	Product Subclass 7: Selenocarbamic Acid and Salts	628
18.6.7.1	Synthesis of Product Subclass 7	628
18.6.8	Product Subclass 8: Linear Selenocarbamates	628
18.6.8.1	Synthesis of Product Subclass 8	628
18.6.8.1.1	Synthesis from Amines	628
18.6.8.1.1.1	Method 1: Reaction with Bis(trichloromethyl) Carbonate and Selenols	628
18.6.8.1.1.2	Method 2: Reaction with Carbon Monoxide and Elemental Selenium	628
18.6.8.1.2	Synthesis from Alkylcarbamoyl Chlorides	629
18.6.8.1.2.1	Method 1: Reaction with Dialkyl Diselenides	629
18.6.8.1.2.2	Method 2: Reaction with Alkyl Halides and Elemental Selenium	631
18.6.8.1.2.2.1	Variation 1: Reaction of Alkylcarbamoyl Chlorides with Lithium Butaneselenolate	631
18.6.8.1.3	Synthesis by Other Methods	632
18.6.8.1.3.1	Method 1: Schmidt Rearrangement of Acyl Chlorides in the Presence of Selenols	632
18.6.8.1.3.2	Method 2: Reaction of Isocyanates with Lithium Aluminum Hydride Hydroselenide and Alkyl Halides	632
18.6.8.2	Applications of Product Subclass 8 in Organic Synthesis	633
18.6.8.2.1	Method 1: Synthesis of Isocyanides from Selenocarbamates	633
18.6.8.2.2	Method 2: Radical Cyclization of Selenocarbamates to Lactams	634
18.6.9	Product Subclass 9: Cyclic Selenocarbamates	634
18.6.9.1	Synthesis of Product Subclass 9	634
18.6.9.1.1	Method 1: Reaction of Selenocysteine with 1,1'-Carbonyldiimidazole	634
18.6.10	Product Subclass 10: Linear and Cyclic Tellurocarbamates	635
18.6.10.1	Synthesis of Product Subclass 10	635

18.6.10.1.1	Method 1: Reaction of Alkylcarbamoyl Chlorides with Alkylolithium Compounds and Elemental Tellurium	635
18.6.10.1.2	Method 2: Reduction of Bis(<i>N,N</i> -dimethylcarbamoyl) Ditellurides	635
18.6.10.2	Applications of Product Subclass 10 in Organic Synthesis	636
18.6.10.2.1	Method 1: Synthesis of Functionalized Amides	636
18.6.11	Product Subclass 11: Phosphinecarboxylates	637
18.6.11.1	Synthesis of Product Subclass 11	637
18.6.11.1.1	Method 1: Reaction of Arylphosphines with Alkyl Chloroformates	637
18.6.11.1.2	Method 2: Reaction of Alkali Metal Salts of Diphenylphosphines with Carbon Dioxide	637
18.7	Product Class 7: Polymeric Carbamic Acids and Esters, and Their Sulfur Analogues S. C. Moratti and Y. C. Charalambides	
18.7	Product Class 7: Polymeric Carbamic Acids and Esters, and Their Sulfur Analogues	649
18.7.1	Product Subclass 1: Polycarbamates (Polyurethanes)	650
18.7.1.1	Synthesis of Product Subclass 1	650
18.7.1.1.1	Method 1: Alcohol Addition to Isocyanates	650
18.7.1.1.1.1	Variation 1: From Alcohols and Nitrile Carbonates	651
18.7.1.1.1.2	Variation 2: From Alcohols and 1,3-Bis(4-isocyanatoaryl)-1,3-diazetidene-2,4-diones	652
18.7.1.1.1.3	Variation 3: From Latent Monomers	653
18.7.1.1.1.4	Variation 4: Through the Decomposition of Acyl Azides	653
18.7.1.1.1.5	Variation 5: Polymerization of Isocyanato Alcohols	654
18.7.1.1.2	Method 2: From Amines and Carbonate Derivatives	655
18.7.1.1.2.1	Variation 1: By Addition of Amines to Chloroformates	656
18.7.1.1.2.2	Variation 2: From Amines and Trichloroacetates	656
18.7.1.1.3	Method 3: From Alcohols and Carbamic Esters	657
18.7.1.1.4	Method 4: Condensation of Alkyl Halides with Cyanates and Diols	658
18.7.1.1.5	Method 5: From Aziridines and Carbon Dioxide	659
18.7.1.1.6	Method 6: From Iminocarbonates and Alcohols	659
18.7.1.1.7	Method 7: From Iminocarbonates and Acids	661
18.7.2	Product Subclass 2: Polythiocarbamates	661
18.7.2.1	Synthesis of Product Subclass 2	662
18.7.2.1.1	Method 1: Addition of Thiols to Isocyanates	662
18.7.2.1.2	Method 2: From Bis(chlorothioformates) and Diamines	662

18.8	Product Class 8: Acyclic and Cyclic Ureas G. Sartori and R. Maggi	
18.8	Product Class 8: Acyclic and Cyclic Ureas	665
18.8.1	Product Subclass 1: Unfunctionalized Ureas	665
18.8.1.1	Synthesis of Product Subclass 1	666
18.8.1.1.1	Method 1: From Phosgene	666
18.8.1.1.2	Method 2: From Ureas and Thioureas	667
18.8.1.1.2.1	Variation 1: From Cyclic Ureas by N-Alkylation	668
18.8.1.1.2.2	Variation 2: From <i>N</i> -(ω -Functionalized) Ureas	668
18.8.1.1.2.3	Variation 3: Transamidation of Ureas	670
18.8.1.1.2.4	Variation 4: By Reaction with Bifunctional Compounds	671
18.8.1.1.2.5	Variation 5: Reductive N-Alkylation of Ureas	672
18.8.1.1.2.6	Variation 6: By Three-Component Reaction with Aldehydes and β -Dicarbonyl Compounds (Biginelli Reaction)	673
18.8.1.1.2.7	Variation 7: Transformation of Thioureas	675
18.8.1.1.3	Method 3: From Isooureas by Isomerization	675
18.8.1.1.4	Method 4: From Isocyanates	676
18.8.1.1.4.1	Variation 1: By Reaction with Amines or Imines	677
18.8.1.1.4.2	Variation 2: By Reaction with Azirines and Aziridines	681
18.8.1.1.4.3	Variations 3: Miscellaneous Reactions	681
18.8.1.1.5	Method 5: From Carbon Dioxide	683
18.8.1.1.6	Method 6: From Carbon Monoxide	685
18.8.1.1.7	Method 7: From Alkyl Carbonates and Dithiocarbonates	689
18.8.1.1.7.1	Variation 1: Reaction of Amines with Dimethyl Carbonate, Diethyl Carbonate, and Bis(4-nitrophenyl) Carbonate	689
18.8.1.1.7.2	Variation 2: Reaction of Amines with Di- <i>tert</i> -butyl Dicarbonate	690
18.8.1.1.7.3	Variation 3: Reaction of Amines with Bis(trichloromethyl) Carbonate (Triphosgene)	691
18.8.1.1.7.4	Variation 4: Reaction of Amines with Dithiocarbonates	694
18.8.1.1.8	Method 8: From Carbamates or Thiocarbamates	695
18.8.1.1.8.1	Variation 1: By Reaction with Amines	695
18.8.1.1.8.2	Variation 2: By Reaction with Imines	699
18.8.1.1.8.3	Variations 3: Miscellaneous Reactions	700
18.8.1.1.9	Method 9: From <i>o</i> -Aminoarene-carboxylic Acid Derivatives	701
18.8.1.1.10	Methods 10: Miscellaneous Reactions	702
18.8.2	Product Subclass 2: <i>N</i>-Haloureas	706
18.8.2.1	Synthesis of Product Subclass 2	706
18.8.3	Product Subclass 3: <i>N</i>-Hydroxyureas	707
18.8.3.1	Synthesis of Product Subclass 3	707
18.8.3.1.1	Method 1: By Reaction of Phenyl (Phenoxy-carbonyloxy)carbamates with Ammonia	707
18.8.3.1.2	Method 2: From Isocyanates and Hydroxylamine Derivatives	708

18.8.4	Product Subclass 4: <i>N</i>-Sulfanyl-, <i>N</i>-Sulfonyl-, <i>N</i>-Acyl-<i>N'</i>-sulfonyl-, and <i>N,N'</i>-Disulfonylureas	709
18.8.4.1	Synthesis of Product Subclass 4	709
18.8.4.1.1	Method 1: From Carbamates	709
18.8.4.1.2	Method 2: From Isocyanates	710
18.8.4.1.3	Methods 3: Miscellaneous Reactions	712
18.8.5	Product Subclass 5: Carbamoyl Azides	713
18.8.5.1	Synthesis of Product Subclass 5	713
18.8.6	Product Subclass 6: Carbamoylazo, Carbazone, and Carbodiazone Compounds	714
18.8.6.1	Synthesis of Product Subclass 6	714
18.8.7	Product Subclass 7: <i>N</i>-Nitroureas	715
18.8.7.1	Synthesis of Product Subclass 7	715
18.8.8	Product Subclass 8: Carbonohydrazides	716
18.8.8.1	Synthesis of Product Subclass 8	716
18.8.8.1.1	Method 1: From Carbamoylazo Compounds	716
18.8.8.1.2	Method 2: From Isocyanates	720
18.8.8.1.3	Methods 3: Miscellaneous Reactions	720
18.8.9	Product Subclass 9: <i>N</i>-Phosphorylureas	722
18.8.9.1	Synthesis of Product Subclass 9	722
18.8.10	Product Subclass 10: <i>N</i>-(Alkoxyalkyl)ureas	723
18.8.10.1	Synthesis of Product Subclass 10	723
18.8.11	Product Subclass 11: Biurets	723
18.8.11.1	Synthesis of Product Subclass 11	723
18.8.12	Product Subclass 12: Triurets	724
18.8.12.1	Synthesis of Product Subclass 12	724
18.8.13	Product Subclass 13: <i>N</i>-Acyl-, <i>N,N</i>-Diacyl-, and <i>N,N'</i>-Diacylureas	726
18.8.13.1	Synthesis of Product Subclass 13	726
18.8.13.1.1	Method 1: From Ureas	726
18.8.13.1.1.1	Variation 1: By Acylation with Carboxylic Acid Derivatives	726
18.8.13.1.1.2	Variation 2: Oxidation of Pyrrolidine- and Piperidine-1-carboxamides	728
18.8.13.1.2	Method 2: From Isocyanates	729
18.8.13.1.3	Methods 3: Miscellaneous Reactions	730
18.8.14	Product Subclass 14: <i>N</i>-Organooxythiocarbonyl Ureas	732
18.8.14.1	Synthesis of Product Subclass 14	732
18.8.15	Product Subclass 15: <i>N</i>-Cyanoureas	733
18.8.15.1	Synthesis of Product Subclass 15	733

18.8.16	Product Subclass 16: <i>N</i>-Carbamimidoylureas	734
18.8.16.1	Synthesis of Product Subclass 16	734
18.8.17	Product Subclass 17: <i>N</i>-(Iminomethyl)ureas	735
18.8.17.1	Synthesis of Product Subclass 17	735
18.8.18	Product Subclass 18: 1,2,4-Oxadiazolidin-3-ones, 1,2,4-Thiadiazolidin-3-ones, 1,2,4-Triazolidinones, and 1,2,4-Triazolones	736
18.8.18.1	Synthesis of Product Subclass 18	736
18.8.19	Product Subclass 19: 1,3,5-Oxadiazin-4-ones, 1,3,5-Thiadiazin-4-ones, 1,3,5-Triazin-2-ones, and 1,2,4-Triazin-3-ones	741
18.8.19.1	Synthesis of Product Subclass 19	741
18.8.20	Product Subclass 20: 1,3,5-Oxadiazine-4,6-diones, 1,3,5-Thiadiazine-4,6-diones, 1,3,5-Triazine-4,6-diones, 1,2,4-Triazine-3,5-diones, and 1,2,4-Triazine-3,6-diones	747
18.8.20.1	Synthesis of Product Subclass 20	747
18.8.21	Product Subclass 21: Tetrazinones	751
18.8.21.1	Synthesis of Product Subclass 21	751
18.9	Product Class 9: Polymeric Ureas and Their Phosphorus Analogues G. Guichard	
<hr/>		
18.9	Product Class 9: Polymeric Ureas and Their Phosphorus Analogues	759
18.9.1	Product Subclass 1: Polyisocyanates (1-Nylons)	760
18.9.1.1	Synthesis of Product Subclass 1	760
18.9.1.1.1	Method 1: By Anionic Polymerization of Monoisocyanates	760
18.9.1.1.1.1	Variation 1: Living Anionic Polymerization	764
18.9.1.1.2	Method 2: By Living Polymerization Using Organotitanium(IV) Catalysts	765
18.9.1.1.3	Method 3: By Anionic Cyclopolymerization of Diisocyanates and Triisocyanates	767
18.9.1.1.3.1	Variation 1: Through Organotitanium(IV)-Catalyzed Cyclopolymerization of 1,2-Diisocyanates	769
18.9.2	Product Subclass 2: Polyisocyanurates	770
18.9.2.1	Synthesis of Product Subclass 2	771
18.9.2.1.1	Method 1: Isocyanatoisocyanurates by Partial Trimerization of Polyisocyanates	771
18.9.2.1.1.1	Variation 1: Poly(urethane isocyanurate) Foams from Diisocyanates and Polyols	773
18.9.3	Product Subclass 3: Polyurylenes, Polysemicarbazides, and Polybiurets ..	774
18.9.3.1	Synthesis of Product Subclass 3	774
18.9.3.1.1	Method 1: Polyurylenes: Reaction of Diisocyanates with Hydrazine	774

18.9.3.1.1.1	Variation 1:	Reaction of a Diisocyanate or a Diisothiocyanate with Piperazine-1,4-diamine: Polysemicarbazides and Polythiosemicarbazides	774
18.9.3.1.2	Method 2:	Polybiurets: Reaction of Diisocyanates with Primary Amines or <i>O</i> -Benzylhydroxylamine	775
18.9.3.1.2.1	Variation 1:	Reaction of Polyisocyanates with Polyalkylene Polyureas	776
18.9.4	Product Subclass 4: Poly[4(5)-iminoimidazolidine-2,5(4)-diones] and Poly(imidazolidine-2,4,5-triones)		777
18.9.4.1	Synthesis of Product Subclass 4		777
18.9.4.1.1	Method 1:	Poly(iminoimidazolidinediones) and Poly(imidazolidine-2,4,5-triones) from Diisocyanates and Hydrogen Cyanide ...	777
18.9.4.1.1.1	Variation 1:	From Diisocyanates and Bis[(cyanocarbonyl)amino] Derivatives	780
18.9.4.1.2	Method 2:	Poly(imidazolidine-2,4,5-triones) from Diisocyanates and (Arylenediimino)bis(oxoacetate) Diesters	781
18.9.4.1.3	Method 3:	From Polycarbodiimides and Oxalyl Chloride	782
18.9.4.1.4	Method 4:	From Polyureas and Oxalyl Chloride	783
18.9.5	Product Subclass 5: Polyhydantoins and Poly(iminoimidazolidinones) ...		783
18.9.5.1	Synthesis of Product Subclass 5		784
18.9.5.1.1	Method 1:	From Diisocyanates and Bis(alkyl glycinates)	784
18.9.5.1.1.1	Variation 1:	Poly(iminoimidazolidinones) from <i>N,N'</i> -Bis(1-cyanocycloalkyl) Diamines and Diisocyanates	786
18.9.5.1.2	Method 2:	From Bishydantoins and Formaldehyde	787
18.9.6	Product Subclass 6: Polyhydrouracils and Poly(quinazolinediones)		788
18.9.6.1	Synthesis of Product Subclass 6		788
18.9.6.1.1	Method 1:	Polyhydrouracils by Cyclization of 2-(Methoxycarbonyl)ethyl-Substituted Polyureas	788
18.9.6.1.2	Method 2:	Poly(quinazolinediones) from Aromatic Diisocyanates and Bisanthranilic Acids	789
18.9.7	Product Subclass 7: Urea-Formaldehyde Resins		790
18.9.7.1	Synthesis of Product Subclass 7		791
18.9.7.1.1	Method 1:	By Reaction of Urea with Formaldehyde	791
18.9.8	Product Subclass 8: Polyureas and Copolyureas		793
18.9.8.1	Synthesis of Product Subclass 8		794
18.9.8.1.1	Method 1:	By Polyaddition of Diamines and Diisocyanates	794
18.9.8.1.1.1	Variation 1:	Hyperbranched Polymers from Diaminophenyl Isocyanate Monomers	797
18.9.8.1.2	Method 2:	By Reaction of Diamines with Carbon Dioxide	798
18.9.8.1.2.1	Variation 1:	By Reaction of Diamines with Phosgene	799
18.9.8.1.2.2	Variation 2:	By Reaction of Diamines with Urea	800
18.9.8.1.2.3	Variation 3:	By Reaction of Diamines with Dicarbonates	801
18.9.8.1.2.4	Variation 4:	By Reaction of Diamines with Diurethanes	802

18.9.8.1.3	Method 3:	By Reaction of Polyisocyanates with Water	802
18.9.8.1.4	Method 4:	By Cationic Ring-Opening Polymerization of Polycyclic Pseudoureas	803
18.9.8.1.5	Method 5:	Poly(<i>N,N'</i> -diacylureas) by Polyaddition of Diamides to Bis(<i>N</i> -acyl isocyanates)	805
18.9.8.2		Applications of Product Subclass 8 in Organic Synthesis	806
18.9.8.2.1	Method 1:	Hydrogenation and Hydrogen-Transfer Reduction	806
18.9.8.2.2	Method 2:	Polyurea-Encapsulated Palladium as a Catalyst	807
18.9.9		Product Subclass 9: Short-Chain Oligomers	808
18.9.9.1		Synthesis of Product Subclass 9	808
18.9.9.1.1	Method 1:	<i>N,N'</i> -Linked Oligoureas: Sequential Reaction of 1-Substituted 2-Phthalimidoethyl Isocyanates	808
18.9.9.1.1.1	Variation 1:	Sequential Reaction of Activated Carbamates Derived from Monoprotected Diamines	810
18.9.9.1.1.2	Variation 2:	Sequential Reaction of <i>N</i> -(2-Nitrobenzenesulfonyl)-imidazolidinone	811
18.9.9.1.2	Method 2:	Azatides: Sequential Reaction of Activated <i>N</i> -Protected <i>N</i> -Alkylhydrazines	812
18.9.10		Product Subclass 10: Organophosphorus Polymers	814
18.9.10.1		Synthesis of Product Subclass 10	814
18.9.10.1.1	Method 1:	Condensation Reaction between Diisocyanates and Substituted Phosphines and Phosphine Oxides	814
18.10		Product Class 10: Thiocarbonic Acids and Derivatives S. Sato and N. Furukawa	
18.10		Product Class 10: Thiocarbonic Acids and Derivatives	821
18.10.1		Product Subclass 1: Thiocarbonyl Dihalides	821
18.10.1.1		Synthesis of Product Subclass 1	821
18.10.1.1.1	Method 1:	Synthesis of Thiocarbonyl Difluoride	821
18.10.1.1.2	Method 2:	Synthesis of Thiophosgene	822
18.10.1.1.3	Method 3:	Synthesis of Thiocarbonyl Dibromide	823
18.10.1.1.4	Method 4:	Synthesis of Thiocarbonyl Diiodide	824
18.10.1.1.5	Method 5:	Synthesis of Thiocarbonyl Chloride Fluoride	824
18.10.1.1.6	Method 6:	Synthesis of Thiocarbonyl Bromide Fluoride	825
18.10.1.2		Applications of Product Subclass 1 in Organic Synthesis	825
18.10.2		Product Subclass 2: Dihalosulfines (Thiocarbonyl Dihalide <i>S</i>-Oxides)	826
18.10.2.1		Synthesis of Product Subclass 2	826
18.10.2.1.1	Method 1:	Synthesis of Difluorosulfine	826
18.10.2.1.2	Method 2:	Synthesis of Dichlorosulfine	826
18.10.2.1.3	Method 3:	Synthesis of Dibromosulfine	827
18.10.2.1.4	Method 4:	Synthesis of Chlorofluorosulfine	827

18.10.3	Product Subclass 3: Halothioformate O-Esters (Carbonhalidothioate O-Esters)	828
18.10.3.1	Synthesis of Product Subclass 3	829
18.10.3.1.1	Method 1: From Thiocarbonyl Dihalides and Alcohols and Phenols	829
18.10.3.1.2	Method 2: From Bis(alkoxythiocarbonyl) Disulfide and Sulfuryl Chloride or Chlorine	832
18.10.3.1.3	Methods 3: Miscellaneous Methods	833
18.10.3.2	Applications of Product Subclass 3 in Organic Synthesis	834
18.10.4	Product Subclass 4: Halodithioformates and Halothioselenoformate Se-Esters	834
18.10.4.1	Synthesis of Product Subclass 4	835
18.10.4.1.1	Method 1: From Alkali Metal Chlorodithioformates and Alkyl Iodides	835
18.10.4.1.2	Method 2: Halogen Substitution of Thiocarbonyl Dihalides with Thiolates and Selenolates	836
18.10.4.1.3	Method 3: From Carbon Disulfide	838
18.10.4.1.4	Method 4: By Halogen Exchange	839
18.10.5	Product Subclass 5: Thiocarbonate O,O-Diesters	839
18.10.5.1	Synthesis of Product Subclass 5	840
18.10.5.1.1	Method 1: From Thiophosgene and Alcohols and Phenols	840
18.10.5.1.1.1	Variation 1: Synthesis of Thiocarbonate O,O-Esters of Sugars	842
18.10.5.1.1.2	Variation 2: By Macrocyclization	844
18.10.5.1.2	Method 2: From Carbon Disulfide	845
18.10.5.1.3	Method 3: From Chlorothioformate O-Esters	846
18.10.5.1.4	Method 4: From 1,1'-Thiocarbonylbisdiazoles	849
18.10.5.1.4.1	Variation 1: Synthesis of Thiocarbonate O,O-Esters of Sugars and Nucleosides	852
18.10.5.1.5	Methods 5: Miscellaneous Methods	853
18.10.5.2	Applications of Product Subclass 5 in Organic Synthesis	854
18.10.5.2.1	Method 1: Intramolecular Elimination	855
18.10.5.2.2	Method 2: Application to Selected Organic Syntheses	856
18.10.6	Product Subclass 6: Dithiocarbonate O,S-Esters	858
18.10.6.1	Synthesis of Product Subclass 6	859
18.10.6.1.1	Method 1: From Carbon Disulfide, Alcohols, and Alkyl Halides	859
18.10.6.1.1.1	Variation 1: From Carbon Disulfide and Complex Hydroxy Compounds	861
18.10.6.1.1.2	Variation 2: Insertion Reactions of Carbon Disulfide	864
18.10.6.1.2	Method 2: From Sodium or Potassium O-Alkyl Dithiocarbonates, Alkyl Halides (or Sulfonates), and Arenediazonium Salts	865
18.10.6.1.2.2	Variation 2: Synthesis of Arenethiols By Diazotization of Aromatic Amines	867
18.10.6.1.3	Method 3: From Thiophosgene, Chlorothioformate O-Esters, Chlorodithioformates, or 1,1'-Thiocarbonyldiimidazole	869
18.10.6.1.4	Method 4: From Organometallic Reagents and Sodium or Potassium O-Alkyl Dithiocarbonates	871

18.10.6.1.5	Method 5: Photochemical and Radical-Initiated Addition of Dithiocarbonates O,S-Esters to Terminal Alkenes	871
18.10.6.2	Applications of Product Subclass 6 in Organic Synthesis	874
18.10.7	Product Subclass 7: Trithiocarbonates	874
18.10.7.1	Synthesis of Product Subclass 7	875
18.10.7.1.1	Method 1: From Carbon Disulfide and Hydrogen Sulfide or Thiols with Alkyl Halides	875
18.10.7.1.1.1	Variation 1: Cyclization of Oxiranes, Thiiranes, and Acetylenic Compounds with Carbon Disulfide	877
18.10.7.1.1.2	Variation 2: Poly-1,3-dithiole-2-thione	879
18.10.7.1.2	Method 2: From Salts of Trithiocarbonic Acid and Monoesters of Trithiocarbonic Acid	880
18.10.7.1.3	Method 3: From Thiophosgene or 1,1'-Thiocarbonyldiimidazole	882
18.10.7.1.4	Method 4: From Chlorodithioformates	884
18.10.7.1.5	Methods 5: Miscellaneous Methods	885
18.10.7.1.5.1	Variation 1: Thiocarbonyl as Functional Group	887
18.10.7.2	Applications of Product Subclass 7 in Organic Synthesis	887
18.10.7.2.1	Method 1: From 2-Thioxo-1,3-dithiole-4,5-dithiolate and Its Zinc Complex	888
18.10.8	Product Subclass 8: Thioureas	891
18.10.8.1	Synthesis of Product Subclass 8	892
18.10.8.1.1	Method 1: From Urea	892
18.10.8.1.2	Method 2: From Thiophosgene or Carbon Disulfide	895
18.10.8.1.3	Method 3: From Isothiocyanates	898
18.10.8.1.4	Method 4: From Thiocarbamoyl Chloride	903
18.10.8.1.5	Method 5: From Carbodiimides	904
18.10.8.1.6	Method 6: From Thiocarbonyl Transfer Reagents	905
18.10.8.1.7	Methods 7: Miscellaneous Methods	909
18.10.9	Product Subclass 9: Thiosemicarbazides	909
18.10.9.1	Synthesis of Product Subclass 9	910
18.10.9.1.1	Method 1: Using Isothiocyanates and Hydrazine Derivatives	910
18.10.9.1.1.1	Variation 1: [3 + 2]-Cycloaddition Reactions	912
18.10.9.1.1.2	Variation 2: Intramolecular Cyclization Reactions	913
18.10.9.1.2	Method 2: From Compounds Containing the Thiocarbamoyl Moiety	914
18.10.9.1.3	Methods 3: Miscellaneous Methods	915
18.10.9.2	Applications of Product Subclass 9 in Organic Synthesis	918
18.10.9.2.1	Method 1: Cyclization of 1-Acylthiosemicarbazides	918
18.10.10	Product Subclass 10: Thiocarbonohydrazides	920
18.10.10.1	Synthesis of Product Subclass 10	920
18.10.10.1.1	Method 1: From Carbon Disulfide	920
18.10.10.1.2	Method 2: From Thiophosgene	922

18.10.11	Product Subclass 11: Thiocarbamate O-Esters	923
18.10.11.1	Synthesis of Product Subclass 11	923
18.10.11.1.1	Method 1: From Isothiocyanates	923
18.10.11.1.2	Method 2: From Chlorothioformate O-Esters	926
18.10.11.1.3	Method 3: From N,N-Disubstituted Thiocarbamoyl Chlorides	928
18.10.11.1.4	Method 4: From 1,1'-Thiocarbonyldiimidazole and Related Compounds ..	931
18.10.11.1.5	Method 5: From Amino Alcohols and Carbon Disulfide and Related Methods	932
18.10.12	Product Subclass 12: Dithiocarbamic Acid Esters	933
18.10.12.1	Synthesis of Product Subclass 12	934
18.10.12.1.1	Method 1: From Sodium Dithiocarbamates	934
18.10.12.1.2	Method 2: From Carbon Disulfide	937
18.10.12.1.3	Method 3: From Isothiocyanates	942
18.10.12.1.4	Method 4: From Thiocarbamoyl Chlorides	945
18.10.12.1.5	Method 5: From Thiuram Disulfides	946
18.10.13	Product Subclass 13: Thiocarbamoyl Chlorides	949
18.10.13.1	Synthesis of Product Subclass 13	949
18.10.13.1.1	Method 1: From Thiophosgene and Primary or Secondary Amines	949
18.10.13.1.2	Method 2: From Thiuram Disulfides	950
18.10.13.1.3	Method 3: From Thioformamides	951
18.10.14	Product Subclass 14: Phosphinecarbothioamides	952
18.10.14.1	Synthesis of Product Subclass 14	952
18.10.14.1.1	Method 1: From Isothiocyanates	952
18.10.14.1.2	Method 2: From Halothioamides	953
18.10.14.1.3	Method 3: Thiophosphorylidithioformate	954
18.10.14.1.4	Methods 4: Miscellaneous Methods	955
18.11	Product Class 11: Seleno- and Tellurocarbonic Acids and Derivatives J. Schmidt and L. A. Silks	
18.11	Product Class 11: Seleno- and Tellurocarbonic Acids and Derivatives	969
18.11.1	Product Subclass 1: Selenocarbonyl Dihalides	971
18.11.1.1	Synthesis of Product Subclass 1	971
18.11.1.1.1	Method 1: Selenocarbonyl Difluoride from Bis(trifluoromethylselanyl)mercury(II)	971
18.11.1.1.2	Method 2: Selenocarbonyl Difluoride from Trimethyl[(trifluoromethyl)selanyl]stannane	972
18.11.1.1.3	Method 3: Selenocarbonyl Difluoride by Controlled Decomposition of Tris[(trifluoromethyl)selanyl]borane	972
18.11.1.1.4	Method 4: Selenocarbonyl Dichloride by Vacuum Pyrolysis of 2,2,4,4-Tetrachloro-1,3-diselenetane	973

18.11.2	Product Subclass 2: Selenocarbonates	973
18.11.2.1	Synthesis of Product Subclass 2	973
18.11.2.1.1	Method 1: From Viehe's Salt and Sodium Hydrogen Selenide	973
18.11.2.1.2	Method 2: Selenocarbonyls from the Reaction of Acetal Derivatives with Bis(dimethylaluminum) Selenide	974
18.11.2.1.3	Method 3: Selenocarbonates from Carbon Diselenide	975
18.11.2.1.4	Method 4: Selenocarbonates from Substitution Reactions with Sodium Hydrogen Selenide and Hydrogen Selenide	975
18.11.3	Product Subclass 3: Selenocarbamates	976
18.11.3.1	Synthesis of Product Subclass 3	977
18.11.3.1.1	Method 1: Synthesis of Cyclic Selenocarbamates from Metalation Reactions	977
18.11.3.1.2	Method 2: From Addition Reactions to Isoselenocyanates	979
18.11.3.1.3	Method 3: By Addition of Alkoxides to Isoselenocyanates	979
18.11.3.1.4	Method 4: Substitution Reactions with Sodium Hydrogen Selenide or Hydrogen Selenide	980
18.11.3.1.5	Method 5: Addition of Carbon Diselenide to 1,2-Amino Alcohols	981
18.11.3.1.6	Method 6: From Lithium Aluminum Hydride Hydroselenide and Viehe's Salt	982
18.11.3.1.7	Method 7: <i>Te</i> -Alkyl Selenotellurocarbamates from Organoselenocyanates	983
18.11.3.2	Applications of Product Subclass 3 in Organic Synthesis	984
18.11.3.2.1	Method 1: As an Analytical Tool for the Discrimination of Remotely Disposed Chiral Centers	984
18.11.3.2.2	Method 2: Stereoselective C—C Bond Formation via Chiral Selone Promoted Aldol Reactions	986
18.11.4	Product Subclass 4: Selenosemicarbazides and Selenosemicarbazones ...	986
18.11.4.1	Synthesis of Product Subclass 4	986
18.11.4.1.1	Method 1: Synthesis from Isoselenocyanates and Hydrazine	986
18.11.5	Product Subclass 5: Selenoureas	987
18.11.5.1	Synthesis of Product Subclass 5	988
18.11.5.1.1	Method 1: From Metalation Reactions	988
18.11.5.1.2	Method 2: From Carbon Diselenide	989
18.11.5.1.3	Method 3: From Substitution Reactions with Sodium Hydrogen Selenide or Hydrogen Selenide	990
18.11.5.1.4	Method 4: From Addition Reactions to Isoselenocyanates	991
18.11.5.1.5	Method 5: From Carbene Reactions with Selenium	991
18.11.5.1.6	Method 6: From Addition of Potassium Selenocyanate to Primary Ammonium Salts or Amines	992
18.11.5.1.7	Method 7: From Cyanamide and Phosphorus Pentaselenide	993
18.11.5.1.8	Method 8: From the Woollins Reagent	993

18.11.6	Product Subclass 6: Phosphorus-Substituted Selenocarbonyl Derivatives	994
18.11.6.1	Synthesis of Product Subclass 6	994
18.11.6.1.1	Method 1: From Addition Reactions to Carbon Diselenide	994
18.11.7	Product Subclass 7: Tellurocarbonyl Dihalides	994
18.11.7.1	Synthesis of Product Subclass 7	995
18.11.7.1.1	Method 1: Tellurocarbonyl Dihalides from Trimethyl[(trifluoromethyl)tellanyl]stannane	995
18.11.8	Product Subclass 8: Telluroureas	995
18.11.8.1	Synthesis of Product Subclass 8	995
18.11.8.1.1	Method 1: From Carbene Insertion Reactions with Tellurium	995
18.11.8.1.2	Method 2: Starting from Stable Carbenes	996
18.11.9	Product Subclass 9: Ditellurocarbonic and Ditellurocarbamic Acids and Their Metal Complexes	997
18.11.9.1	Synthesis of Product Subclass 9	997
18.11.9.1.1	Method 1: By the Uchida Method	997
18.12	Product Class 12: Imidic Acids and Derivatives, Isooureas and Derivatives, Sulfur and Selenium Equivalents, and Analogously Substituted Methylenephosphines T. L. Gilchrist	
18.12	Product Class 12: Imidic Acids and Derivatives, Isooureas and Derivatives, Sulfur and Selenium Equivalents, and Analogously Substituted Methylenephosphines	1001
18.12.1	Product Subclass 1: Carbonimidic Dihalides	1001
18.12.1.1	Synthesis of Product Subclass 1	1002
18.12.1.1.1	Method 1: From Glyoxylic Acid Derivatives and Halogens	1002
18.12.1.1.2	Method 2: By Halogenation of Formanilides and Isocyanates	1002
18.12.1.1.3	Method 3: By Halogenation of Isothiocyanates and Related Compounds	1003
18.12.1.1.3.1	Variation 1: By Halogenation of Isothiocyanates	1003
18.12.1.1.3.2	Variation 2: From Dithiocarbamates and Carbonimidodithioates	1004
18.12.1.1.3.3	Variation 3: Dihaloiminium Salts from Dithiocarbamates and Dithiurams	1005
18.12.1.1.4	Method 4: By Chlorination of <i>N</i> -Methylamides	1006
18.12.1.1.5	Method 5: By Reactions Involving Dichlorocarbene	1007
18.12.1.1.6	Method 6: From Tetrahalomethanes and Aromatic Amines	1008
18.12.1.1.7	Method 7: From Trihalomethylamines by Elimination	1008
18.12.1.1.8	Method 8: By Addition of Halogens to Isocyanides	1009
18.12.1.1.9	Method 9: By Addition to Cyanogen Chloride	1010
18.12.1.1.10	Method 10: From Other Carbonimidic Dihalides by Exchange of a Halogen Atom Bonded to Carbon	1011
18.12.1.1.11	Method 11: From Other Carbonimidic Dihalides by Exchange or Modification of the Nitrogen Substituent	1012

18.12.1.2	Applications of Product Subclass 1 in Organic Synthesis	1013
18.12.2	Product Subclass 2: Carbonohalidimidic Acid Derivatives	1014
18.12.2.1	Synthesis of Product Subclass 2	1014
18.12.2.1.1	Method 1: From Carbonimidic Dihalides and Oxygen Nucleophiles	1014
18.12.2.1.2	Method 2: By Chlorination of Carbamates	1015
18.12.2.1.3	Method 3: By Addition to Aryl Cyanates	1015
18.12.3	Product Subclass 3: Carbonohalidimidothioates	1016
18.12.3.1	Synthesis of Product Subclass 3	1016
18.12.3.1.1	Method 1: From Carbonimidic Dichlorides and Sulfur Nucleophiles	1016
18.12.3.1.2	Method 2: By Chlorination of Isothiocyanates and Related Compounds	1017
18.12.3.1.2.1	Variation 1: By the Addition of Chlorine to Isothiocyanates	1017
18.12.3.1.2.2	Variation 2: By Chlorination of Thiocarbamates and Dithiocarbamates	1018
18.12.3.1.2.3	Variation 3: From Carbonimidodithioates	1018
18.12.3.1.3	Method 3: By Addition of Sulfenyl Chlorides to Isocyanides	1019
18.12.3.1.4	Method 4: By Electrophilic Additions to Nitriles	1019
18.12.3.1.4.1	Variation 1: From Thiocyanates and Electrophiles	1019
18.12.3.1.4.2	Variation 2: From Sulfonyl Cyanides and Electrophiles	1020
18.12.3.2	Applications of Product Subclass 3 in Organic Synthesis	1020
18.12.4	Product Subclass 4: Carbamimidic Halides	1021
18.12.4.1	Synthesis of Product Subclass 4	1021
18.12.4.1.1	Method 1: From Carbonimidic Dihalides and Amines	1021
18.12.4.1.2	Method 2: From Dichloroiminium Salts and Nitrogen Nucleophiles	1022
18.12.4.1.3	Method 3: By Chlorination of Ureas and Thioureas	1023
18.12.4.1.4	Method 4: By Addition of Acid Chlorides to Carbodiimides	1023
18.12.4.1.5	Method 5: By Electrophilic Addition to Cyanamides	1024
18.12.4.1.6	Method 6: From Isocyanides and 1-Chlorobenzotriazole	1025
18.12.5	Product Subclass 5: Carbonimidic Halides Bearing a Phosphorus Substituent	1025
18.12.5.1	Synthesis of Product Subclass 5	1025
18.12.5.1.1	Method 1: From (Dialkoxyphosphoryl)- α -haloacetaldehydes or from [Bis(dialkylamino)phosphoryl]- α -haloacetaldehydes by Diazo Coupling or Nitrosation	1025
18.12.5.1.1.1	Variation 1: Arylhydrazones by Diazo Coupling	1026
18.12.5.1.1.2	Variation 2: Oximes by Nitrosation	1026
18.12.5.1.2	Method 2: From Dihalo(dichlorophosphoryl)methyl Isocyanates and Alcohols	1027
18.12.6	Product Subclass 6: Carbonimidic Diesters	1028
18.12.6.1	Synthesis of Product Subclass 6	1028
18.12.6.1.1	Method 1: From Carbonimidic Dihalides and Oxygen Nucleophiles	1028
18.12.6.1.2	Method 2: From Tetraethyl Orthocarbonate and Related Compounds with Amino Compounds	1029
18.12.6.1.3	Method 3: By the O-Alkylation of Carbamates	1029

18.12.6.1.4	Method 4: By the Addition of Alcohols to Cyanogen Halides and Cyanates	1030
18.12.6.1.5	Method 5: From Other Carbonimidate Esters by Substitution on Nitrogen	1031
18.12.7	Product Subclass 7: Carbonimidothioate Diesters	1031
18.12.7.1	Synthesis of Product Subclass 7	1032
18.12.7.1.1	Method 1: From Carbonimidic Halides by Displacement of Halide Ion ..	1032
18.12.7.1.2	Method 2: By Nucleophilic Additions to Cyanates or Thiocyanates	1032
18.12.7.1.3	Method 3: By the S-Alkylation of O-Alkyl Thiocarbamates and Related Compounds	1033
18.12.7.1.3.1	Variation 1: By the S-Alkylation of O-Alkyl Thiocarbamates	1033
18.12.7.1.3.2	Variation 2: From Isothiocyanates, Alcohols, and Alkylating Agents	1034
18.12.7.1.4	Method 4: From Other Carbonimidothioates by Substitution on Nitrogen	1035
18.12.8	Product Subclass 8: Carbonimidoseleonic Diesters	1036
18.12.8.1	Synthesis of Product Subclass 8	1036
18.12.9	Product Subclass 9: Carbamimidic Esters (Isoureas)	1037
18.12.9.1	Synthesis of Product Subclass 9	1037
18.12.9.1.1	Method 1: From Carbamimidic Chlorides and Oxygen Nucleophiles ..	1037
18.12.9.1.2	Method 2: From Carbonimidic Diesters and Amines	1038
18.12.9.1.3	Method 3: By Addition of Alcohols to Carbodiimides	1039
18.12.9.1.4	Method 4: By Addition of Alcohols to Cyanamides	1039
18.12.9.1.5	Method 5: By Addition of Amines to Cyanates	1040
18.12.9.1.6	Method 6: By the O-Alkylation of Ureas	1040
18.12.9.1.7	Method 7: From Other Isoureas by Substitution on Nitrogen	1041
18.12.9.2	Applications of Product Subclass 9 in Organic Synthesis	1041
18.12.10	Product Subclass 10: Imides with an Oxygen and a Phosphorus Substituent	1041
18.12.10.1	Synthesis of Product Subclass 10	1041
18.12.10.1.1	Method 1: By the Displacement of Halides from Imidoyl Halides by Oxygen Nucleophiles	1041
18.12.10.1.2	Method 2: From (Trimethylsiloxy)phosphorus(III) Compounds and Isocyanates	1042
18.12.11	Product Subclass 11: Carbonimidodithioic Diesters	1042
18.12.11.1	Synthesis of Product Subclass 11	1042
18.12.11.1.1	Method 1: From Carbonimidic Halides and Sulfur Nucleophiles	1043
18.12.11.1.2	Method 2: By Addition of Thiols to Thiocyanates	1044
18.12.11.1.3	Method 3: By the Alkylation of Dithiocarbamates	1044
18.12.11.1.4	Method 4: From Other Carbonimidodithioates by Substitution on Nitrogen	1046
18.12.11.1.5	Method 5: λ^6 -Sulfur Derivatives by S-Oxidation	1046

18.12.12	Product Subclass 12: Carbonimidoselethioic Diesters	1047
18.12.12.1	Synthesis of Product Subclass 12	1047
18.12.12.1.1	Method 1: 1,3-Thiaselenol-2-imines from 1,3-Thiaselenole-2-thiones and Azides	1047
18.12.12.1.2	Method 2: From Alkynethiolates or Alkyneselenolates	1047
18.12.13	Product Subclass 13: Carbamimidothioic Esters (Isothioureas)	1048
18.12.13.1	Synthesis of Product Subclass 13	1048
18.12.13.1.1	Method 1: From Carbonimidic Halides by Nucleophilic Displacement of Halide Ion	1048
18.12.13.1.2	Method 2: From Carbonimidodithioate Diesters and Nitrogen Nucleophiles	1049
18.12.13.1.3	Method 3: By Addition of Thiols to Carbodiimides	1050
18.12.13.1.4	Method 4: By the S-Alkylation of Thioureas	1051
18.12.13.1.5	Method 5: By the Cycloaddition of Arenesulfonyl Isocyanates to Dithiocarbamates	1052
18.12.13.1.6	Method 6: From Other Isothioureas by N-Acylation	1052
18.12.14	Product Subclass 14: Imides with a Sulfur and a Phosphorus Substituent	1053
18.12.14.1	Synthesis of Product Subclass 14	1053
18.12.14.1.1	Method 1: From Carbonimidic Halides by Nucleophilic Displacement of a Halide Ion	1053
18.12.14.1.2	Method 2: By Addition of Phosphorus Nucleophiles to Isothiocyanates and Related Procedures	1054
18.12.15	Product Subclass 15: Carbonimidodiselenoic Diesters	1055
18.12.15.1	Synthesis of Product Subclass 15	1055
18.12.16	Product Subclass 16: Carbamimidoseleenoic Esters (Isoselenoureas)	1056
18.12.16.1	Synthesis of Product Subclass 16	1056
18.12.16.1.1	Method 1: Se-Alkylation of Selenoureas	1056
18.12.17	Product Subclass 17: (Dihalomethylene)phosphines (Dihalophosphaalkenes)	1057
18.12.17.1	Synthesis of Product Subclass 17	1058
18.12.17.1.1	Method 1: From Di- and Trihalomethylphosphines by Elimination	1058
18.12.17.1.1.1	Variation 1: From Dichlorophosphines and Trihalomethanes	1059
18.12.17.1.1.2	Variation 2: From Dichlorophosphines and Tetrahalomethanes	1060
18.12.17.1.1.3	Variation 3: From Monosubstituted Phosphines and Tetrachloromethane	1060
18.12.17.1.2	Method 2: From Diaryldiphosphenes and Tetrahalomethanes	1061
18.12.17.2	Applications of Product Subclass 17 in Organic Synthesis	1061
18.12.18	Product Subclass 18: [Alkoxy(halo)methylene]phosphines [Alkoxy(halo)phosphaalkenes]	1061
18.12.18.1	Synthesis of Product Subclass 18	1061
18.12.19	Product Subclass 19: [Arylsulfanyl(halo)methylene]phosphines [Arylsulfanyl(halo)phosphaalkenes]	1062
18.12.19.1	Synthesis of Product Subclass 19	1062

18.12.20	Product Subclass 20: [Dialkylamino(halo)methylene]phosphines [Dialkylamino(halo)phosphaalkenes]	1062
18.12.20.1	Synthesis of Product Subclass 20	1063
18.12.21	Product Subclass 21: (Halomethylene)phosphines [(Halo)phosphaalkenes] Bearing a Phosphorus Substituent	1063
18.12.21.1	Synthesis of Product Subclass 21	1063
18.12.22	Product Subclass 22: Dioxymethylenephosphines (Dialkoxyphosphaalkenes)	1064
18.12.22.1	Synthesis of Product Subclass 22	1064
18.12.23	Product Subclass 23: [(Amino)(oxy)methylene]phosphines [Alkoxy(amino)phosphaalkenes]	1065
18.12.23.1	Synthesis of Product Subclass 23	1065
18.12.24	Product Subclass 24: Methylenephosphines (Phosphaalkenes) with an Oxygen and a Phosphorus Substituent	1065
18.12.24.1	Synthesis of Product Subclass 24	1065
18.12.25	Product Subclass 25: Disulfanylmethylenephosphines (Disulfanylphosphaalkenes)	1066
18.12.25.1	Synthesis of Product Subclass 25	1066
18.13	Product Class 13: Guanidine Derivatives R. G. S. Berlinck, M. H. Kossuga, and A. M. Nascimento	
18.13	Product Class 13: Guanidine Derivatives	1077
18.13.1	Product Subclass 1: Substituted Guanidines	1077
18.13.1.1	Synthesis of Product Subclass 1	1078
18.13.1.1.1	Method 1: Reaction of Amines with Cyanamides	1078
18.13.1.1.1.1	Variation 1: Reaction of Amines with Cyanogen Bromide	1078
18.13.1.1.1.2	Variation 2: Reaction of Amines with Carbodiimides	1080
18.13.1.1.2	Method 2: Reaction of Amines with Substituted Thioureas	1083
18.13.1.1.2.1	Variation 1: Reaction of Amines with Acylthioureas	1087
18.13.1.1.2.2	Variation 2: Solid-Phase Reaction of Amines with Thioureas	1089
18.13.1.1.3	Method 3: Reaction of Amines with 2-Chloro-4,5-dihydro- 1 <i>H</i> -imidazol-3-ium Chlorides	1092
18.13.1.1.4	Method 4: Reaction of Amines with Chloroformimidamides	1093
18.13.1.1.5	Method 5: Reaction of Primary Amines with <i>O</i> -Methylisoureas	1094
18.13.1.1.6	Method 6: Reaction of Amines with 2-Methylisothioureas	1095
18.13.1.1.6.1	Variation 1: Solid-Phase Synthesis of Amines with Methylisothioureas ..	1097
18.13.1.1.7	Method 7: Reaction of Primary Amines with Alkylamino(imino)- methanesulfonic Acids	1099
18.13.1.1.8	Method 8: Reaction of Primary Amines with (Trifluoromethylsulfonyl)guanidines	1100

18.13.1.1.9	Method 9:	Reaction of Primary Amines with 1 <i>H</i> -Pyrazole-1-carboximidamides	1101
18.13.1.1.9.1	Variation 1:	Reaction of Amines with Di-1 <i>H</i> -benzotriazol-1-ylmethan- imines and with Di-1 <i>H</i> -imidazol-1-ylmethanimine	1104
18.13.1.1.10	Method 10:	Reaction of Guanidines with Alkyl and Aryl Halides	1105
18.13.1.1.11	Method 11:	Reaction of Guanidines with Alcohols or Activated Alcohols	1106
18.13.1.1.12	Method 12:	Addition of Guanidine to Aldehydes, Ketones, and Esters To Give Cyclic Guanidinium Salts	1107
18.13.1.1.13	Method 13:	Addition of 2-Methylisoureas to Aldehydes and Ketones	1109
18.13.1.1.14	Method 14:	Addition of Guanidine to α,β -Unsaturated Aldehydes, Ketones, and Esters	1110
18.14	Product Class 14: Phosphorus Analogues of Guanidine T. L. Gilchrist		
18.14	Product Class 14: Phosphorus Analogues of Guanidine		1117
18.14.1	Product Subclass 1: Imines with One Nitrogen and One Phosphorus Substituent		1117
18.14.1.1	Synthesis of Product Subclass 1		1117
18.14.1.1.1	Method 1:	Substitution of Hydrogen on Imines	1117
18.14.1.1.2	Method 2:	Displacement of a Halogen from Phosphorus-Substituted Imidoyl Halides by Nitrogen	1118
18.14.1.1.3	Method 3:	Displacement of Chlorine from a Chloroformamidinium Salt by Phosphorus	1119
18.14.1.1.4	Method 4:	Addition of Phosphorus Compounds to Carbodiimides	1120
18.14.1.1.4.1	Variation 1:	Addition of Phosphines	1120
18.14.1.1.4.2	Variation 2:	Addition of Phosphites and Related Compounds	1121
18.14.1.1.5	Method 5:	Addition to Isocyanates	1121
18.14.2	Product Subclass 2: Imines with Two Phosphorus Substituents		1122
18.14.2.1	Synthesis of Product Subclass 2		1122
18.14.2.1.1	Method 1:	Displacement of Chlorine from Carbonimidic Dichlorides by Phosphorus	1122
18.14.3	Product Subclass 3: Alkylidenephosphines with Two Nitrogen Substituents		1123
18.14.3.1	Synthesis of Product Subclass 3		1123
18.14.3.1.1	Method 1:	Elimination of Cyanide from Dicyanophosphines	1124
18.14.3.1.2	Method 2:	Addition of Phosphines to Bis(dialkylamino)difluoromethanes	1124
18.14.3.1.3	Method 3:	Addition of Phosphines to Tetramethylisouronium and Tetramethylisothiouronium Salts	1124
18.14.3.1.4	Method 4:	Addition of Phosphines to Bis(dialkylamino)carbenes	1125
18.14.3.1.5	Method 5:	Exchange of Substituents on Phosphorus	1126

18.14.4	Product Subclass 4: Alkylidenephosphines with One Nitrogen and One Phosphorus Substituent	1127
18.14.4.1	Synthesis of Product Subclass 4	1127
18.14.4.1.1	Method 1: Substitution of Carbonimidic Dichlorides Using Bis(trimethylsilyl)phosphines	1127
18.14.4.1.2	Method 2: Addition Reactions of Alkylidynephosphines	1128
18.14.4.1.3	Method 3: Rearrangement Reactions	1129
18.14.5	Product Subclass 5: Alkylidenephosphines with Two Phosphorus Substituents	1130
18.14.5.1	Synthesis of Product Subclass 5	1130
18.15	Product Class 15: Tetraheterosubstituted Methanes with a Carbon–Halogen Bond A. Y. Il'chenko	
<hr/>		
18.15	Product Class 15: Tetraheterosubstituted Methanes with a Carbon–Halogen Bond	1135
18.15.1	Product Subclass 1: Tetrahalomethanes	1135
18.15.1.1	Synthesis of Product Subclass 1	1136
18.15.1.1.1	Method 1: Carbon Tetrafluoride	1136
18.15.1.1.2	Method 2: Chlorotrifluoromethane, Bromotrifluoromethane, and Trifluoroiodomethane	1137
18.15.1.1.3	Method 3: Tetrahalomethanes Containing Zero to Two Fluorides	1138
18.15.1.2	Applications of Product Subclass 1 in Organic Synthesis	1140
18.15.1.2.1	Method 1: (Trifluoromethyl)metal Reagents	1140
18.15.1.2.2	Method 2: Addition to Alkenes and Alkynes	1141
18.15.1.2.3	Method 3: Trifluoromethylation of Arenes and Hetarenes	1142
18.15.1.2.4	Method 4: Synthesis of Trimethyl(trifluoromethyl)silane (Ruppert's Reagent)	1143
18.15.2	Product Subclass 2: Compounds with Carbon–Halogen and Carbon–Oxygen Bonds	1144
18.15.2.1	Synthesis of Product Subclass 2	1145
18.15.2.1.1	Method 1: Trichloromethoxy Derivatives	1145
18.15.2.1.2	Method 2: (Trifluoromethoxy)benzenes from the Corresponding (Trichloromethoxy)benzenes	1145
18.15.2.1.3	Method 3: Trifluoromethoxy Derivatives from the Corresponding Alcohols	1146
18.15.2.1.4	Method 4: Trifluoromethyl Hypofluorite, Trifluoromethyl Hypochlorite, and Difluoromethylene Dihypofluorite	1147
18.15.2.1.5	Method 5: Trifluoromethyl Peroxides	1148
18.15.2.2	Applications of Product Subclass 2 in Organic Synthesis	1148
18.15.2.2.1	Method 1: Addition of Trifluoromethyl Hypofluorite or Hypochlorite or Chloroperoxytrifluoromethane to Alkenes and Alkynes	1148

18.15.2.2.2	Method 2: Fluorination by Trifluoromethyl Hypofluorite and Hypochlorite	1150
18.15.3	Product Subclass 3: Compounds with Carbon–Halogen and Carbon–Sulfur Bonds	1152
18.15.3.1	Synthesis of Product Subclass 3	1152
18.15.3.1.1	Method 1: Trifluoromethanethiol from Bis(trifluoromethylsulfanyl)-mercury(II) and Hydrogen Chloride or Bis(trifluoromethyl) Disulfide and Hydrogen Sulfide	1152
18.15.3.1.2	Method 2: Trifluoromethyl Sulfides from the Corresponding Trichloromethyl Sulfides and Antimony(III) Fluoride	1153
18.15.3.1.3	Method 3: Trichloromethyl Sulfides by Chlorination of the Corresponding Methyl Sulfides	1154
18.15.3.1.4	Method 4: Phenyl Trihalomethyl Sulfides by Trihalomethylation of Benzenethiols or Benzenethiolates	1155
18.15.3.1.5	Method 5: Aryl or Methyl Trifluoromethyl Sulfides by Cross-Coupling Reactions between Iodoarenes or Iodomethane and (Trifluoromethylsulfanyl)metal Reagents	1155
18.15.3.1.6	Method 6: Bis-, Tris-, and Tetrakis(trifluoromethylsulfanyl)methanes and Halotris(trifluoromethylsulfanyl)methanes	1156
18.15.3.1.7	Method 7: Trifluoro- and Trichloromethanesulfonyl Halides	1157
18.15.3.1.8	Method 8: Mono- and Bis(trifluoromethylsulfanyl)amines from Trifluoromethanesulfonyl Chloride and Ammonia	1159
18.15.3.1.9	Method 9: Bis(trifluoromethyl) Sulfide, Disulfide, and Trisulfide	1159
18.15.3.1.10	Method 10: (Trifluoromethyl)sulfur Trifluoride, Bis(trifluoromethyl)sulfur Difluoride, and Difluorobis(trifluoro- λ^4 -sulfanyl)methane	1160
18.15.3.1.11	Method 11: Trifluoromethanesulfonyl Fluoride and Chloride and Difluoromethanedisulfonyl Fluoride	1161
18.15.3.1.12	Method 12: Trifluoromethyl Sulfoxides	1162
18.15.3.1.13	Method 13: (Trifluoromethyl)sulfur Pentafluoride and (Trifluoromethyl)sulfur Chloride Tetrafluoride	1163
18.15.3.1.14	Method 14: Trifluoromethanesulfinic Acid, Metal Trifluoromethanesulfinates, and Difluoromethanedisulfinic Acid	1164
18.15.3.1.15	Method 15: Trifluoromethanesulfonyl Fluoride from Alkanesulfonic Acid Halides or Esters	1165
18.15.3.1.16	Method 16: Difluorohalomethanesulfonyl Fluorides by Photolytic Decarbonylation of the Corresponding Difluoro(halo-carbonyl)methanesulfonyl Fluorides	1165
18.15.3.1.17	Method 17: Dihalomethanedisulfonyl Difluorides by Halogenation of Methanedisulfonyl Difluoride	1165
18.15.3.1.18	Method 18: Halomethanetrissulfonyl Trifluorides from Methanetrissulfonyl Trifluoride	1166
18.15.3.1.19	Method 19: Trifluoromethanesulfonyl Chloride	1166
18.15.3.1.20	Method 20: Trichloromethanesulfonyl Chloride by Oxidation of Trichloromethanesulfonyl Chloride	1167
18.15.3.1.21	Method 21: Trifluoromethyl Trifluoromethanesulfonate from Trifluoromethanesulfonic Anhydride	1167

18.15.3.1.22	Method 22:	Methyl Trifluoromethanesulfonate from Trifluoromethanesulfonic Acid and Dimethyl Sulfate	1168
18.15.3.1.23	Method 23:	Phenyl Trifluoromethanesulfonate from Trifluoromethanesulfonic Anhydride or Trifluoromethanesulfonyl Fluoride	1168
18.15.3.1.24	Method 24:	Trifluoromethanesulfonic Acid	1169
18.15.3.1.25	Method 25:	Chlorodifluoromethanesulfonic Acid and Trichloromethanesulfonic Acid	1169
18.15.3.1.26	Method 26:	Trifluoromethanesulfonic Anhydride from Trifluoromethanesulfonic Acid and Phosphorus Pentoxide	1170
18.15.3.1.27	Method 27:	Trifluoromethyl Sulfones	1170
18.15.3.1.28	Method 28:	Bis- and Tris(trifluoromethylsulfonyl)methanes	1172
18.15.3.1.29	Method 29:	Esters of Trifluoromethanesulfonic S-Acid or Trifluoromethaneselenosulfonic Se-Acid from Metal Trifluoromethanesulfonates and Sulfenyl or Selenenyl Chlorides	1173
18.15.3.1.30	Method 30:	Difluorohalomethanesulfonamides and Difluorohalomethanesulfonyl Azides	1174
18.15.3.2		Applications of Product Subclass 3 in Organic Synthesis	1175
18.15.3.2.1	Method 1:	Addition of Trifluoromethanethiol or Trifluoromethanesulfonyl Fluoride or Chloride to Alkenes and Alkynes	1175
18.15.3.2.2	Method 2:	Applications of Trifluoromethanesulfonic Acid	1177
18.15.3.2.3	Method 3:	Applications of Alkyl Trifluoromethanesulfonates and Trifluoromethanesulfonic Anhydride	1178
18.15.3.2.4	Method 4:	An <i>N</i> -(Trifluoromethylsulfonyl)sulfimide from <i>N,N</i> -Dichlorotrifluoromethanesulfonamide and (Trifluoromethylsulfonyl)-benzene	1180
18.15.4		Product Subclass 4: Compounds with Carbon–Halogen and Carbon–Selenium Bonds	1180
18.15.4.1		Synthesis of Product Subclass 4	1180
18.15.4.1.1	Method 1:	Selenium(II) Compounds	1180
18.15.4.1.2	Method 2:	Selenium(IV) Compounds	1182
18.15.4.1.3	Method 3:	Selenium(VI) Compounds	1182
18.15.4.2		Applications of Product Subclass 4 in Organic Synthesis	1183
18.15.4.2.1	Method 1:	Addition of Trifluoromethaneselenenyl Chloride to Ethene	1183
18.15.5		Product Subclass 5: Compounds with Carbon–Halogen and Carbon–Tellurium Bonds	1183
18.15.5.1		Synthesis of Product Subclass 5	1183
18.15.5.1.1	Method 1:	Bis(trifluoromethyl) Telluride, Bis(trifluoromethyl)tellurium Dihalides, and Tetrakis(trifluoromethyl)- λ^4 -tellane	1183
18.15.5.2		Applications of Product Subclass 5 in Organic Synthesis	1184
18.15.5.2.1	Method 1:	Trifluoromethylations Using Bis(trifluoromethyl) Telluride	1184
18.15.6		Product Subclass 6: Compounds with Carbon–Halogen and Carbon–Nitrogen Bonds	1184
18.15.6.1		Synthesis of Product Subclass 6	1184

18.15.6.1.1	Method 1:	Mono-, Bis-, and Tris(trifluoromethyl)amine	1184
18.15.6.1.2	Method 2:	Dimethyl(trifluoromethyl)amine from Dimethylformamide and Sulfur Tetrafluoride	1185
18.15.6.1.3	Method 3:	<i>N</i> -(Trihalomethyl)anilines	1185
18.15.6.1.4	Method 4:	Dichloro- and Difluoro(trifluoromethyl)amine	1186
18.15.6.1.5	Method 5:	(Trifluoromethyl)imidodisulfurous Difluoride from Cyanuric Fluoride and Sulfur Tetrafluoride	1186
18.15.6.1.6	Method 6:	(Difluoromethylene)(trifluoromethyl)amine from Trifluoro(nitroso)methane and Tetrafluoroethene	1187
18.15.6.1.7	Method 7:	Trifluoro(nitroso)methane, <i>N,N</i> -Bis(trifluoromethyl)hydroxylamine, and the Bis(trifluoromethyl)nitroxide Radical	1187
18.15.6.1.8	Method 8:	Trifluoro(nitro)methane, Difluorodinitromethane, and Fluorotrinitromethane	1188
18.15.6.2	Applications of Product Subclass 6 in Organic Synthesis		1188
18.15.6.2.1	Method 1:	Addition to Alkenes	1188
18.15.7	Product Subclass 7: Compounds with Carbon–Halogen and Carbon–Phosphorus Bonds		1189
18.15.7.1	Synthesis of Product Subclass 7		1189
18.15.7.1.1	Method 1:	Tris(trifluoromethyl)phosphine	1189
18.15.7.1.2	Method 2:	Mono- and Bis(trifluoromethyl)phosphine, Dimethyl(trifluoromethyl)phosphine, Methylbis(trifluoromethyl)phosphine, and Phenylbis(trifluoromethyl)phosphine	1190
18.15.7.1.3	Method 3:	Mono- and Dihalo(trifluoromethyl)phosphines	1191
18.15.7.1.4	Method 4:	Amino(trifluoromethyl)phosphines	1191
18.15.7.1.5	Method 5:	Tetrakis(trifluoromethyl)diphosphine	1192
18.15.7.1.6	Method 6:	Halo(trifluoromethyl)phosphoranes, Tris(trifluoromethyl)phosphine Oxide, and (Trifluoromethyl)phosphonic and (Trifluoromethyl)phosphinic Acids and Derivatives	1192
18.15.7.1.7	Method 7:	(Halomethyl)phosphonium Bromides and Trifluorotris(trifluoromethyl)phosphate	1193
18.15.7.2	Applications of Product Subclass 7 in Organic Synthesis		1194
18.15.7.2.1	Method 1:	Additions of (Trifluoromethyl)phosphines and (Trifluoromethyl)phosphoranes to Alkenes, and Wittig Reactions of (Halomethyl)phosphonium Bromides with Aldehydes or Ketones	1194
18.16	Product Class 16: Other Tetraheterosubstituted Methanes C. M. Diaper		
18.16	Product Class 16: Other Tetraheterosubstituted Methanes		1203
18.16.1	Product Subclass 1: Orthocarbonic Acid Tetraesters (Tetraalkoxymethanes)		1203
18.16.1.1	Synthesis of Product Subclass 1		1204
18.16.1.1.1	Method 1:	Substitution Reactions of Trichloromethane Derivatives with Alcohols or Alkoxides	1204

18.16.1.1.2	Method 2:	Substitution Reactions of Dichloroacetals	1205
18.16.1.1.3	Method 3:	Metal-Mediated Desulfurization of Carbon Disulfide with Alkoxides or Alcohols	1205
18.16.1.1.4	Method 4:	Spiro Orthocarbonates from Epoxides and Cyclic Carbonates by Addition	1206
18.16.1.1.5	Method 5:	Transesterification of Orthocarbonic Acid Tetraesters with Alcohols	1207
18.16.1.2		Applications of Product Subclass 1 in Organic Synthesis	1208
18.16.1.2.1	Method 1:	Generation of Trialkoxycarbenium Salts	1208
18.16.1.2.2	Method 2:	Alkylation Reactions	1208
18.16.1.2.3	Method 3:	Protecting Group Chemistry	1210
18.16.2		Product Subclass 2: Thioorthocarbonic Acid Tetraesters [Trialkoxy(alkylsulfanyl)methanes]	1211
18.16.2.1		Synthesis of Product Subclass 2	1211
18.16.2.1.1	Method 1:	Substitution Reaction of Dichloroacetals with 2-Sulfanylethanol	1211
18.16.2.1.2	Method 2:	Nucleophilic Addition of Alcohols to O,O-Dialkyl Thiocarbonates	1211
18.16.3		Product Subclass 3: Orthocarbamic Acid Triesters	1212
18.16.3.1		Synthesis of Product Subclass 3	1213
18.16.3.1.1	Method 1:	Addition of Alkoxides to Dialkoxyaminocarbenium and Chloroformamidinium Salts	1214
18.16.3.1.2	Method 2:	2,5-Dihydro-1,3,4-oxadiazoles from Ketone Hydrazones by Oxidative Cyclization	1215
18.16.3.1.3	Method 3:	2,2-Diaryloxy- and 2,2-Dialkoxydihydrooxadiazoles from 2-Acetoxy-2-aryloxydihydrooxadiazoles	1215
18.16.3.2		Applications of Product Subclass 3 in Organic Synthesis	1216
18.16.3.2.1	Method 1:	Dihydrooxadiazoles as Precursors of Dialkoxycarbenes	1216
18.16.4		Product Subclass 4: Trialkoxy(phosphino)methanes and Trialkoxy(phosphoryl)methanes	1217
18.16.4.1		Synthesis of Product Subclass 4	1217
18.16.4.1.1	Method 1:	Addition to Trialkoxycarbenium Salts	1217
18.16.4.1.1.1	Variation 1:	Trialkoxy(phosphoryl)methanes by Addition of Sodium Dialkyl Phosphites	1217
18.16.4.1.1.2	Variation 2:	Trialkoxy(phosphino)methanes by Addition of Lithium Dialkylphosphides	1218
18.16.5		Product Subclass 5: Dithioorthocarbonic Acid Tetraesters [Dialkoxybis(alkylsulfanyl)methanes]	1218
18.16.5.1		Synthesis of Product Subclass 5	1218
18.16.5.1.1	Method 1:	Substitution Reactions of Dihaloacetals and Dihalothioacetals	1219
18.16.5.1.2	Method 2:	Transesterification of Orthocarbonates with Dithiols	1219

18.16.6	Product Subclass 6: Orthocarbonic Acid Diester Diamides (Dialkoxydiaminomethanes)	1220
18.16.6.1	Synthesis of Product Subclass 6	1221
18.16.6.1.1	Method 1: Substitution Reactions of Halomethanes	1222
18.16.6.1.1.1	Variation 1: Substitution Reactions of 3-Alkoxy-3-chlorodiazirines with Alkoxides	1222
18.16.6.1.1.2	Variation 2: Unsymmetrical Dioxadiazaspirans by Substitution Reactions of 2,2-Dihaloacetals with Amines	1222
18.16.6.1.2	Method 2: Symmetrical Dioxadiazaspirans by Desulfurization of Carbon Disulfide or <i>N</i> -Alkylthiocarbamates with Amino Alcohols ...	1223
18.16.6.1.3	Method 3: Addition of Alkoxides to Uronium and Formamidinium Salts	1224
18.16.6.1.4	Method 4: Oxidation of Dihydroimidazole <i>N</i> -Oxides	1225
18.16.6.1.5	Method 5: Oxidation of Acetone Semicarbazones	1225
18.16.6.1.6	Method 6: Symmetrical Dioxadiazaspirans from Dialkylcarbodiimides	1226
18.16.6.2	Applications of Product Subclass 6 in Organic Synthesis	1227
18.16.6.2.1	Method 1: Dialkoxydiazirines and Amino(oxy)dihydrooxazoles as Dialkoxycarbene Precursors	1227
18.16.7	Product Subclass 7: Dialkoxybis(phosphino)methanes and Dialkoxybis(phosphoryl)methanes	1228
18.16.7.1	Synthesis of Product Subclass 7	1229
18.16.7.1.1	Method 1: Substitution Reactions of Dichloroacetals with Trialkyl Phosphites	1229
18.16.7.1.2	Method 2: Hydrates of Carbonyldiphosphonates	1230
18.16.8	Product Subclass 8: Trithioorthocarbonic Acid Tetraesters [Alkoxytris(organo-sulfanyl)methanes]	1230
18.16.8.1	Synthesis of Product Subclass 8	1231
18.16.8.1.1	Method 1: Addition of Alkoxide to Sulfanylcarbenium Salts	1231
18.16.8.1.2	Method 2: Cycloaddition of Thiocarbonyl Compounds	1231
18.16.8.1.3	Method 3: Oxatrithiaspirans by Addition of Epoxides to 1,3-Dithiolane-2-thiones	1232
18.16.8.1.4	Method 4: Thermal Decomposition of Bisdithiocarbonates	1233
18.16.9	Product Subclass 9: Alkoxytriaminomethanes and Alkoxytrinitromethanes	1234
18.16.9.1	Synthesis of Product Subclass 9	1234
18.16.9.1.1	Method 1: Addition of Alkoxides to Hexaalkylguanidinium Chlorides ...	1235
18.16.9.1.2	Method 2: Heterocyclic Derivatives by Cycloaddition Reactions	1236
18.16.10	Product Subclass 10: Tetrathioorthocarbonic Acid Tetraesters [Tetrakis(organo-sulfanyl)methanes], Bis(organo-sulfanyl)bis(organo-sulfanyl)methanes, Tris(organo-sulfanyl)(organo-sulfonyl)methanes, and Bis(organo-sulfanyl)bis(organo-sulfonyl)methanes	1237
18.16.10.1	Synthesis of Product Subclass 10	1238
18.16.10.1.1	Method 1: Substitution Reactions of Halomethanes with Thiolates	1238

18.16.10.1.2	Method 2:	Substitution Reactions of Tris(organosulfonyl)methylithium Compounds and Bis(organosulfonyl)methanes	1239
18.16.10.1.2.1	Variation 1:	Substitution Reactions of Tris(organosulfonyl)methylithium Compounds with Diorgano Disulfides	1240
18.16.10.1.2.2	Variation 2:	Reaction of Bis(alkylsulfonyl)methanes with N-(Organosulfonyl)phthalimides	1240
18.16.10.1.3	Method 3:	Addition of Thiols to Sulfonylcarbenium Salts	1241
18.16.10.1.4	Method 4:	Tetrathiaspirans from Dithiolane-2-thione or Carbon Disulfide by Addition Reactions	1242
18.16.10.1.5	Method 5:	Transesterification of Tetrathioorthocarbonic Acid Tetraesters with Dithiols	1243
18.16.11	Product Subclass 11: Trithioorthocarbamic Triesters [Aminotris(organosulfonyl)methanes] and Nitrotris(organosulfonyl)methanes		1243
18.16.11.1	Synthesis of Product Subclass 11		1244
18.16.11.1.1	Method 1:	Addition of Thiolates to Carbamidium Salts and Amines to Sulfonylcarbenium Salts	1245
18.16.11.1.2	Method 2:	Nitration of Tris(organosulfonyl)methanes	1246
18.16.12	Product Subclass 12: Tris(alkylsulfonyl)phosphorylmethanes		1247
18.16.12.1	Synthesis of Product Subclass 12		1247
18.16.12.1.1	Method 1:	Reaction of Phosphoryldithioformates with Organometallics	1247
18.16.13	Product Subclass 13: Dithioorthocarbonic Acid Diamide Diesters [Diaminobis(organosulfonyl)methanes] and Bis(arylsulfonyl)-dinitromethanes		1248
18.16.13.1	Synthesis of Product Subclass 13		1249
18.16.13.1.1	Method 1:	Substitution Reactions of 2,2-Dichloroimidazolidine-4,5-diones with Organothiols	1250
18.16.13.1.2	Method 2:	Ring Closure of Iminodithiocarbonates and Thioureas	1250
18.16.13.1.3	Method 3:	Cycloaddition of Thiocarbonyl Compounds with Nitrilimines	1251
18.16.13.1.4	Method 4:	Reaction of Sulfenyl Halides with Dinitro Ylides	1252
18.16.13.1.5	Method 5:	From Heterocyclic Aminals	1253
18.16.14	Product Subclass 14: Bis(alkylsulfonyl)- and Bis(alkylselanyl)-bis(phosphino)methanes and -bis(phosphoryl)methanes		1254
18.16.14.1	Synthesis of Product Subclass 14		1254
18.16.14.1.1	Method 1:	Reaction of Metalated Phosphines or Phosphorines with Carbon Disulfide	1254
18.16.14.1.2	Method 2:	Dimerization of [Bis(alkylsulfonyl)methylene]phosphines ...	1255
18.16.14.1.3	Method 3:	Sulfenation of Bis(phosphoryl)methanes	1256
18.16.15	Product Subclass 15: Thio- and Selenoorthocarbonic Acid Triamide Esters [Triamino(organosulfonyl)- and Triamino(organoselanyl)methanes] and Trinitro(organosulfonyl)- and Trinitro(organoselanyl)methanes		1257
18.16.15.1	Synthesis of Product Subclass 15		1257
18.16.15.1.1	Method 1:	Addition of Amines to Thioureas or Isothioureas	1257

18.16.15.1.2	Method 2: Cycloaddition of Thioureas and Isothioureas with Isocyanates	1258
18.16.15.1.3	Method 3: Substitution Reactions of Metalated Methanes with Sulfenyl and Selenenyl Halides	1260
18.16.16	Product Subclass 16: Tetraselenoorthocarbonic Acid Tetraesters [Tetrakis(alkylselenanyl)methanes]	1261
18.16.16.1	Synthesis of Product Subclass 16	1261
18.16.16.1.1	Method 1: Substitution Reactions of [Tris(organoselenanyl)methyl]lithium Reagents with Diorganodiselenium Compounds	1261
18.16.17	Product Subclass 17: Orthocarbonic Acid Tetraamides [Tetrakis(dialkylamino)methanes] and Tetranitromethane	1262
18.16.17.1	Synthesis of Product Subclass 17	1263
18.16.17.1.1	Method 1: Substitution of Halomethanes with Amines	1263
18.16.17.1.2	Method 2: Tetrakis(dialkylamino)methanes from Formamidinium Salts by Addition of Metalated Dialkylamines	1265
18.16.17.1.3	Method 3: Tetraaminomethanes from Cycloaddition Reactions	1265
18.16.17.1.4	Method 4: Tetranitromethane from Trinitromethane Derivatives by Nitration	1266
18.16.17.2	Applications of Product Subclass 17 in Organic Synthesis	1267
18.16.17.2.1	Method 1: Nitrations using Tetranitromethane	1267
18.16.18	Product Subclass 18: Aminotris(phosphoryl)methanes	1268
18.16.18.1	Synthesis of Product Subclass 18	1269
18.16.18.1.1	Method 1: Substitution Reactions of (Trihalomethyl)amines with Trialkyl Phosphites	1269
18.16.19	Product Subclass 19: Tetrakis(phosphanyl)methanes, Tetrakis(phosphinoyl)methanes, and Tetrakis(phosphoryl)methanes ...	1270
18.16.19.1	Synthesis of Product Subclass 19	1271
18.16.19.1.1	Method 1: Reactions of Carbon Tetrachloride	1271
18.16.19.1.1.1	Variation 1: With Chlorodimethylphosphine	1271
18.16.19.1.1.2	Variation 2: By [2 + 1] Cyclocondensation with Dipotassium 1,2-Di- <i>tert</i> -butyldiphosphide	1271
