**Volume 19:  
Three Carbon–Heteroatom Bonds:  
Nitriles, Isocyanides, and Derivatives**

	<b>Preface</b> .....	V
	<b>Table of Contents</b> .....	IX
	<b>Introduction</b>	
	S.-I. Murahashi .....	1
<b>19.1</b>	<b>Product Class 1: Nitrile Oxides, Sulfides, and Selenides</b>	
	S. Kanemasa .....	17
<b>19.2</b>	<b>Product Class 2: Nitrile Imines</b>	
	S. Kanemasa .....	41
<b>19.3</b>	<b>Product Class 3: Nitrilium Salts</b>	
	S. Kanemasa .....	53
<b>19.4</b>	<b>Product Class 4: Nitrile Ylides</b>	
	S. Kanemasa .....	67
<b>19.5</b>	<b>Product Class 5: Nitriles</b>	
	L. R. Subramanian .....	79
<b>19.5.1</b>	<b>Construction of the Cyano Group by Functional-Group Transformation from a Nitrogen-Free Starting Material</b>	
	L. R. Subramanian .....	95
<b>19.5.2</b>	<b>Construction of the Cyano Group by Functional-Group Transformation from a Nitrogen-Containing Starting Material</b>	
	L. R. Subramanian .....	109
<b>19.5.3</b>	<b>Introduction of the Cyano Group by Substitution of Hydrogen</b>	
	A. Schmidt .....	133
<b>19.5.4</b>	<b>Introduction of the Cyano Group by Substitution of Metals</b>	
	L. R. Subramanian .....	163
<b>19.5.5</b>	<b>Introduction of the Cyano Group by Substitution of a Halogen</b>	
	L. R. Subramanian .....	173
<b>19.5.6</b>	<b>Introduction of the Cyano Group by Substitution of Oxygen Functions</b>	
	L. R. Subramanian .....	197

---

<b>19.5.7</b>	<b>Introduction of the Cyano Group by Substitution of Sulfur Functions</b> L. R. Subramanian .....	215
<b>19.5.8</b>	<b>Introduction of the Cyano Group by Substitution of Nitrogen Functions</b> L. R. Subramanian .....	217
<b>19.5.9</b>	<b>Introduction of the Cyano Group by Addition to a Carbonyl Group</b> M. North .....	235
<b>19.5.10</b>	<b>Introduction of the Cyano Group by Addition to an Imino Group</b> M. North .....	285
<b>19.5.11</b>	<b>Introduction of the Cyano Group by Conjugate Addition</b> J. Podlech .....	311
<b>19.5.12</b>	<b>Introduction of the Cyano Group by Addition to Alkynes</b> J. Podlech .....	325
<b>19.5.13</b>	<b>Introduction of the Cyano Group by Addition to Alkenes</b> J. Podlech .....	333
<b>19.5.14</b>	<b>Synthesis from Nitriles with Retention of the Cyano Group</b> S.-I. Murahashi .....	345
<b>19.5.15</b>	<b>Applications of Nitriles as Reagents for Organic Synthesis with Loss of the Nitrile Functionality (Including Cycloaddition Reactions)</b> S. J. Collier and P. Langer .....	403
<b>19.6</b>	<b>Product Class 6: Phosphaalkynes (Alkylidynephosphines)</b> U. Bergsträßer .....	427
<b>19.7</b>	<b>Product Class 7: Isocyanides and Related Compounds</b> M. Suginome and Y. Ito .....	445
	<b>Keyword Index</b> .....	531
	<b>Author Index</b> .....	557
	<b>Abbreviations</b> .....	589

## Table of Contents

### Introduction

S.-I. Murahashi

---

<b>Introduction</b> .....	1
---------------------------	---

### 19.1 Product Class 1: Nitrile Oxides, Sulfides, and Selenides

S. Kanemasa

---

<b>19.1 Product Class 1: Nitrile Oxides, Sulfides, and Selenides</b> .....	17
<b>19.1.1 Product Subclass 1: Nitrile Oxides</b> .....	17
<b>19.1.1.1</b> Synthesis of Product Subclass 1 .....	19
<b>19.1.1.1.1</b> Method 1: Dehydrohalogenation of Hydroximoyl Halides .....	19
<b>19.1.1.1.2</b> Method 2: Dehydration of Activated Nitroalkanes and Nitroalkenes .....	22
<b>19.1.1.1.3</b> Method 3: Halogenation/Dehydrohalogenation of Aldoximes .....	24
<b>19.1.1.1.4</b> Method 4: Dehydration of Nitroalkanes (The Mukaiyama Reaction) .....	25
<b>19.1.1.1.5</b> Method 5: Oxidation of Aldoximes .....	28
<b>19.1.1.1.6</b> Method 6: Thermolysis of 1,2,5-Oxadiazole 2-Oxides (Furoxans) .....	31
<b>19.1.1.1.7</b> Methods 7: Miscellaneous Methods .....	31
<b>19.1.2 Product Subclass 2: Nitrile Sulfides</b> .....	34
<b>19.1.2.1</b> Synthesis of Product Subclass 2 .....	34
<b>19.1.2.1.1</b> Method 1: Thermolysis of 1,3,4-Oxathiazol-2-ones .....	34
<b>19.1.2.1.1.1</b> Variation 1: Thermolysis of 1,3,4-Oxathiazoles .....	36
<b>19.1.3 Product Subclass 3: Nitrile Selenides</b> .....	37

### 19.2 Product Class 2: Nitrile Imines

S. Kanemasa

---

<b>19.2 Product Class 2: Nitrile Imines</b> .....	41
<b>19.2.1</b> Synthesis of Product Class 2 .....	41
<b>19.2.1.1</b> Method 1: Dehydrohalogenation of Hydrazonoyl Halides .....	41
<b>19.2.1.2</b> Method 2: Oxidation of Hydrazones .....	46
<b>19.2.1.3</b> Methods 3: Miscellaneous Methods .....	48
<b>19.2.1.3.1</b> Variation 1: From a Lithiated Diazomethane .....	48
<b>19.2.1.3.2</b> Variation 2: Thermolysis or Photolysis of Heterocycles .....	49

<b>19.3</b>	<b>Product Class 3: Nitrilium Salts</b> S. Kanemasa	
<hr/>		
<b>19.3</b>	<b>Product Class 3: Nitrilium Salts</b> .....	53
<b>19.3.1</b>	Synthesis of Product Class 3 .....	53
<b>19.3.1.1</b>	Method 1: Dehydration of Oximes .....	53
<b>19.3.1.2</b>	Method 2: N-Alkylation of Nitriles .....	55
<b>19.3.1.3</b>	Method 3: Generation of Nitrilium Salts in Ring-Closure and Rearrangement Reactions Leading to Heterocycles .....	59
<b>19.3.1.4</b>	Method 4: Synthesis from Triazenyl Chlorides and Dialkylcyanamides ....	63
<b>19.4</b>	<b>Product Class 4: Nitrile Ylides</b> S. Kanemasa	
<hr/>		
<b>19.4</b>	<b>Product Class 4: Nitrile Ylides</b> .....	67
<b>19.4.1</b>	Synthesis of Product Class 4 .....	67
<b>19.4.1.1</b>	Method 1: Dehydrochlorination of Imidoyl Chlorides .....	67
<b>19.4.1.2</b>	Method 2: Preparation of Nitrile Ylide Equivalents .....	71
<b>19.4.1.3</b>	Method 3: Reaction of Nitriles with Carbenes .....	73
<b>19.4.1.4</b>	Method 4: Photolysis of Azirines .....	74
<b>19.4.1.5</b>	Methods 5: Miscellaneous Methods .....	76
<b>19.5</b>	<b>Product Class 5: Nitriles</b> L. R. Subramanian	
<hr/>		
<b>19.5</b>	<b>Product Class 5: Nitriles</b> .....	79
<b>19.5.1</b>	<b>Construction of the Cyano Group by Functional-Group Transformation from a Nitrogen-Free Starting Material</b> L. R. Subramanian	
<hr/>		
<b>19.5.1</b>	<b>Construction of the Cyano Group by Functional-Group Transformation from a Nitrogen-Free Starting Material</b> .....	95
<b>19.5.1.1</b>	Transformation of an Aldehyde Group .....	95
<b>19.5.1.1.1</b>	Method 1: One-Pot Reactions Involving Intermediate Aldimines .....	95
<b>19.5.1.1.1.1</b>	Variation 1: By Copper-Catalyzed Oxidation .....	95
<b>19.5.1.1.1.2</b>	Variation 2: By Nickel-Catalyzed Oxidation .....	96
<b>19.5.1.1.1.3</b>	Variation 3: By Oxidation with Manganese(IV) Oxide .....	96
<b>19.5.1.1.1.4</b>	Variation 4: By Oxidation with Ammonium Cerium(IV) Nitrate .....	97
<b>19.5.1.1.1.5</b>	Variation 5: By Oxidation with Iodine .....	98
<b>19.5.1.1.1.6</b>	Variation 6: By Oxidation with Hydrogen Peroxide .....	98
<b>19.5.1.1.2</b>	Method 2: Reactions Involving Intermediate Oximes .....	99
<b>19.5.1.1.2.1</b>	Variation 1: Using Boron Trifluoride–Diethyl Ether Complex .....	99

19.5.1.1.2.2	Variation 2:	Using 4-Toluenesulfonic Acid	100
19.5.1.1.2.3	Variation 3:	Using Acetic Anhydride	100
19.5.1.1.2.4	Variation 4:	Using Phthalic Anhydride	100
19.5.1.1.2.5	Variation 5:	Using 1-Methylpyrrolidin-2-one	101
19.5.1.1.2.6	Variation 6:	Using Pyridine/Formamide	101
19.5.1.1.2.7	Variation 7:	Using Sodium Iodide	102
19.5.1.1.2.8	Variation 8:	By Dehydration with Triphosgene	102
19.5.1.1.2.9	Variation 9:	By Treatment with Iron(II) Chloride Modified Montmorillonite K 10	102
19.5.1.1.2.10	Variation 10:	Using Dry Alumina	103
19.5.1.1.2.11	Variation 11:	By Using Microwaves	103
19.5.1.1.3	Methods 3:	Miscellaneous Methods	105
19.5.1.1.3.1	Variation 1:	Using <i>S,S</i> -Dimethylsulfurdiimide as Iminating Agent	105
19.5.1.1.3.2	Variation 2:	Using Sodium Azide/Aluminum Trichloride	105
19.5.1.2		Transformation of a Carboxylic Acid or Derivatives	105
19.5.1.2.1	Method 1:	Transformation of Carboxy Groups	105
19.5.1.2.2	Method 2:	Transformation of Carboxylic Ester Groups	106
19.5.1.2.3	Method 3:	Transformation of Carboxylic Acid Halides	107

## 19.5.2 Construction of the Cyano Group by Functional-Group Transformation from a Nitrogen-Containing Starting Material

L. R. Subramanian

19.5.2		<b>Construction of the Cyano Group by Functional-Group Transformation from a Nitrogen-Containing Starting Material</b>	109
19.5.2.1	Method 1:	Synthesis from Hydrazones	109
19.5.2.1.1	Variation 1:	By Alkylation Followed by Basic Cleavage	109
19.5.2.1.2	Variation 2:	By Oxidation Reactions	110
19.5.2.1.3	Variation 3:	By Microwave-Assisted Oxidation with Oxone	111
19.5.2.2	Method 2:	Synthesis from Aldoximes	111
19.5.2.2.1	Variation 1:	By Microbial Dehydration of Aldoximes	112
19.5.2.2.2	Variation 2:	By Chemical Dehydration at Room Temperature	112
19.5.2.2.3	Variation 3:	By Thermal Dehydration with Suitable Reagents	114
19.5.2.2.4	Variation 4:	By Microwave Irradiation	118
19.5.2.3	Method 3:	Synthesis from <i>O</i> -Substituted Aldoximes	118
19.5.2.4	Method 4:	Synthesis from Primary Carboxamides and Thioamides	121
19.5.2.5	Method 5:	From Miscellaneous Nitrogen-Containing Carbonyl and Carboxy Derivatives	127

<b>19.5.3</b>	<b>Introduction of the Cyano Group by Substitution of Hydrogen</b> A. Schmidt	
<hr/>		
<b>19.5.3</b>	<b>Introduction of the Cyano Group by Substitution of Hydrogen</b> .....	133
<b>19.5.3.1</b>	Synthesis of Heteroaromatic and Aromatic Cyanides .....	133
<b>19.5.3.1.1</b>	Method 1: Using Cyanogen Bromide .....	133
<b>19.5.3.1.2</b>	Method 2: Using Tosyl Cyanide .....	134
<b>19.5.3.1.2.1</b>	Variation 1: By Modified Reissert Reactions .....	135
<b>19.5.3.1.3</b>	Method 3: Using Trimethylsilyl Cyanide .....	136
<b>19.5.3.1.3.1</b>	Variation 1: By Modified Reissert–Henze Reaction .....	138
<b>19.5.3.1.3.2</b>	Variation 2: By Catalytic Asymmetric Reissert-Type Reactions .....	139
<b>19.5.3.1.4</b>	Method 4: Using Trichloroacetonitrile .....	140
<b>19.5.3.1.5</b>	Method 5: Using Chlorosulfonyl Isocyanate .....	141
<b>19.5.3.1.6</b>	Method 6: Using Ethyl (Triphenylphosphoranylidene)carbamate/ Boron Trifluoride .....	142
<b>19.5.3.1.7</b>	Method 7: Using Triphenylphosphine/Thiocyanogen .....	143
<b>19.5.3.1.8</b>	Method 8: Using Acetone Cyanohydrin .....	144
<b>19.5.3.1.9</b>	Method 9: Using Diethyl Cyanophosphonate .....	144
<b>19.5.3.1.10</b>	Method 10: Using Tetranitromethane .....	145
<b>19.5.3.1.11</b>	Method 11: Using Viehe’s Reagent .....	146
<b>19.5.3.1.12</b>	Method 12: By Anodic Substitution .....	146
<b>19.5.3.1.13</b>	Method 13: By Modified Vilsmeier–Haack Reactions .....	147
<b>19.5.3.1.14</b>	Method 14: Oxidative Cyanation of Quinoline 1-Oxides with Potassium Cyanide in the Presence of Potassium Hexacyanoferrate(III) .	147
<b>19.5.3.1.15</b>	Method 15: By Nucleophilic Aromatic Substitution of Hydrogen with Cyanides .....	148
<b>19.5.3.2</b>	Synthesis of Acetylenic Nitriles .....	148
<b>19.5.3.2.1</b>	Method 1: Using Copper(I) Cyanide .....	148
<b>19.5.3.2.1.1</b>	Variation 1: In the Presence of Chlorotrimethylsilane .....	148
<b>19.5.3.2.1.2</b>	Variation 2: In the Presence of Bis(trimethylsilyl) Peroxide .....	149
<b>19.5.3.2.2</b>	Method 2: Using Tosyl Cyanide and Zinc(II) Iodide .....	149
<b>19.5.3.2.3</b>	Method 3: Using Phenyl Cyanate .....	149
<b>19.5.3.2.4</b>	Method 4: Using 1 <i>H</i> -Imidazole-1-carbonitrile .....	150
<b>19.5.3.3</b>	Synthesis of Vinyl Nitriles .....	151
<b>19.5.3.3.1</b>	Method 1: Using Cyanogen Bromide and Cyanogen Chloride .....	151
<b>19.5.3.3.2</b>	Method 2: Using Tosyl Cyanide .....	151
<b>19.5.3.3.3</b>	Method 3: Using Phenyl Cyanates .....	152
<b>19.5.3.3.4</b>	Method 4: Using Triphenylphosphine/Thiocyanogen .....	152
<b>19.5.3.4</b>	Synthesis of Aliphatic Nitriles .....	152
<b>19.5.3.4.1</b>	Method 1: Using 2,3-Dichloro-5,6-dicyanobenzo-1,4-quinone and Trimethylsilyl Cyanide .....	152
<b>19.5.3.4.2</b>	Method 2: By Aerobic Ruthenium-Catalyzed Oxidative Cyanation with Sodium Cyanide .....	154
<b>19.5.3.4.3</b>	Method 3: Using Chlorine Dioxide and Sodium Cyanide .....	154

19.5.3.4.4	Method 4:	By Anodic Cyanation	155
19.5.3.4.5	Method 5:	Using 2-Chlorobenzyl Thiocyanate	155
19.5.3.4.6	Method 6:	Using Sulfonyl Cyanides	156
19.5.3.4.7	Method 7:	Using 1,2-Benziodoxole-1-carbonitriles	157
19.5.3.4.8	Method 8:	Using Phenyl Cyanate	157
19.5.3.4.9	Method 9:	Starting from <i>N</i> -Oxides of Tertiary Amines with Trifluoroacetic Acid Anhydride and Cyanide	158
19.5.4	<b>Introduction of the Cyano Group by Substitution of Metals</b>		
	L. R. Subramanian		
19.5.4	<b>Introduction of the Cyano Group by Substitution of Metals</b> 163		
19.5.4.1	Method 1:	From Organozinc Compounds	163
19.5.4.2	Method 2:	From Organocopper Compounds	165
19.5.4.3	Method 3:	From Organomagnesium Compounds	165
19.5.4.4	Method 4:	From Organolithium Compounds	167
19.5.4.5	Method 5:	From Other Organometallic Compounds	169
19.5.5	<b>Introduction of the Cyano Group by Substitution of a Halogen</b>		
	L. R. Subramanian		
19.5.5	<b>Introduction of the Cyano Group by Substitution of a Halogen</b> 173		
19.5.5.1	Method 1:	From Aliphatic and Alicyclic Halides	173
19.5.5.2	Method 2:	From Vinyl and Alkynyl Halides	177
19.5.5.3	Method 3:	From Aryl Halides	179
19.5.5.3.1	Variation 1:	Using Copper(I) Cyanide	180
19.5.5.3.2	Variation 2:	Using Alkali Metal Cyanides	182
19.5.5.3.3	Variation 3:	By Palladium- and Nickel-Catalyzed Substitutions	184
19.5.5.3.4	Variation 4:	By Microwave-Assisted Cyanations	189
19.5.5.3.5	Variation 5:	By Electrophilic Cyanation	190
19.5.5.4	Method 4:	From Heterocyclic Halides	191
19.5.6	<b>Introduction of the Cyano Group by Substitution of Oxygen Functions</b>		
	L. R. Subramanian		
19.5.6	<b>Introduction of the Cyano Group by Substitution of Oxygen Functions</b> 197		
19.5.6.1	Method 1:	Substitution of a Hydroxy Group in a One-Pot Procedure	197
19.5.6.2	Method 2:	Substitution of Hydroxy Derivatives	202
19.5.6.2.1	Variation 1:	Displacement of Alkyl Sulfonates	202
19.5.6.2.2	Variation 2:	Displacement of Alkenyl Sulfonates	203
19.5.6.2.3	Variation 3:	Displacement of Aryl Sulfonates	204
19.5.6.3	Method 3:	Substitution of a Carbonyl Group by Direct Displacement	208

<b>19.5.7</b>	<b>Introduction of the Cyano Group by Substitution of Sulfur Functions</b> L. R. Subramanian	
<hr/>		
<b>19.5.7</b>	<b>Introduction of the Cyano Group by Substitution of Sulfur Functions</b> . . . .	215
<b>19.5.7.1</b>	Method 1: Displacement of a Sulfanyl Group . . . . .	215
<b>19.5.7.2</b>	Method 2: Displacement of a Sulfonyl Group . . . . .	215
<b>19.5.8</b>	<b>Introduction of the Cyano Group by Substitution of Nitrogen Functions</b> L. R. Subramanian	
<hr/>		
<b>19.5.8</b>	<b>Introduction of the Cyano Group by Substitution of Nitrogen Functions</b> .	217
<b>19.5.8.1</b>	Method 1: By Replacement of Amines . . . . .	217
<b>19.5.8.1.1</b>	Variation 1: From Aliphatic and Alicyclic Amines . . . . .	217
<b>19.5.8.1.2</b>	Variation 2: From Aromatic Amines . . . . .	221
<b>19.5.8.2</b>	Method 2: By Replacement of a Nitro Group . . . . .	223
<b>19.5.8.3</b>	Method 3: By Fragmentation and Rearrangement Reactions . . . . .	225
<b>19.5.8.3.1</b>	Variation 1: From Beckmann Fragmentation of Oximes and Derivatives . .	225
<b>19.5.8.3.2</b>	Variation 2: Miscellaneous Reactions . . . . .	230
<b>19.5.9</b>	<b>Introduction of the Cyano Group by Addition to a Carbonyl Group</b> M. North	
<hr/>		
<b>19.5.9</b>	<b>Introduction of the Cyano Group by Addition to a Carbonyl Group</b> . . . . .	235
<b>19.5.9.1</b>	Cyanohydrins Derived from Aldehydes . . . . .	235
<b>19.5.9.1.1</b>	Method 1: Addition without External Stereocontrol . . . . .	235
<b>19.5.9.1.2</b>	Method 2: Addition to Achiral Substrates in the Presence of a Chiral Catalyst . . . . .	243
<b>19.5.9.1.2.1</b>	Variation 1: Use of (R)-Oxynitrilase Enzymes . . . . .	244
<b>19.5.9.1.2.2</b>	Variation 2: Use of (S)-Oxynitrilase Enzymes . . . . .	247
<b>19.5.9.1.2.3</b>	Variation 3: Use of Cyclic Dipeptides as Catalysts . . . . .	249
<b>19.5.9.1.2.4</b>	Variation 4: Use of Chiral Titanium Complexes as Catalysts . . . . .	251
<b>19.5.9.1.2.5</b>	Variation 5: Use of Chiral Aluminum Complexes as Catalysts . . . . .	260
<b>19.5.9.1.2.6</b>	Variation 6: Use of Other Chiral Metal Complexes as Catalysts . . . . .	262
<b>19.5.9.2</b>	Cyanohydrins Derived from Ketones . . . . .	266
<b>19.5.9.2.1</b>	Method 1: Addition without External Stereocontrol . . . . .	266
<b>19.5.9.2.2</b>	Method 2: Addition to Achiral Substrates in the Presence of a Chiral Catalyst . . . . .	272
<b>19.5.9.2.2.1</b>	Variation 1: Use of Oxynitrilase Enzymes . . . . .	272
<b>19.5.9.2.2.2</b>	Variation 2: Use of Metal-Based Catalysts . . . . .	275
<b>19.5.9.2.2.3</b>	Variation 3: Use of Chiral Lewis Bases . . . . .	277

<b>19.5.10</b>	<b>Introduction of the Cyano Group by Addition to an Imino Group</b> M. North	
<b>19.5.10</b>	<b>Introduction of the Cyano Group by Addition to an Imino Group</b> .....	285
<b>19.5.10.1</b>	$\alpha$ -Aminonitriles Derived from Aldimines .....	285
<b>19.5.10.1.1</b>	Method 1: Addition without Stereocontrol .....	285
<b>19.5.10.1.1.1</b>	Variation 1: Strecker Reactions under Aqueous Conditions .....	286
<b>19.5.10.1.1.2</b>	Variation 2: Strecker Reactions under Nonaqueous Conditions .....	287
<b>19.5.10.1.1.3</b>	Variation 3: Using Trimethylsilyl Cyanide .....	289
<b>19.5.10.1.1.4</b>	Variation 4: Addition of Cyanide to Aldimines Derived from Chiral Aldehydes .....	290
<b>19.5.10.1.2</b>	Method 2: Addition to Substrates Containing a Chiral Auxiliary on the Nitrogen Atom .....	291
<b>19.5.10.1.2.1</b>	Variation 1: Use of (1-Phenylethyl)amine .....	291
<b>19.5.10.1.2.2</b>	Variation 2: Use of 2-Phenylglycinol .....	292
<b>19.5.10.1.2.3</b>	Variation 3: Use of Phenylglycinamide .....	293
<b>19.5.10.1.2.4</b>	Variation 4: Use of Sugar-Derived Auxiliaries .....	293
<b>19.5.10.1.2.5</b>	Variation 5: Use of an $\alpha$ -Aminonitrile as a Chiral Auxiliary .....	294
<b>19.5.10.1.3</b>	Method 3: Addition to Achiral Substrates in the Presence of a Chiral Catalyst .....	295
<b>19.5.10.1.3.1</b>	Variation 1: Use of Nonmetallic Catalysts .....	295
<b>19.5.10.1.3.2</b>	Variation 2: Catalysis by Aluminum Complexes .....	297
<b>19.5.10.1.3.3</b>	Variation 3: Catalysis by First-Row Transition-Metal Complexes .....	299
<b>19.5.10.1.3.4</b>	Variation 4: Catalysis by Zirconium Complexes .....	300
<b>19.5.10.2</b>	$\alpha$ -Aminonitriles Derived from Ketimines .....	301
<b>19.5.10.2.1</b>	Method 1: Addition without Stereocontrol .....	301
<b>19.5.10.2.1.1</b>	Variation 1: Use of Ultrasound .....	301
<b>19.5.10.2.1.2</b>	Variation 2: Using Trimethylsilyl Cyanide .....	301
<b>19.5.10.2.1.3</b>	Variation 3: Other Addition Reactions .....	302
<b>19.5.10.2.2</b>	Method 2: Addition to Substrates Containing a Chiral Auxiliary on the Nitrogen Atom .....	303
<b>19.5.10.3</b>	Products Derived from Other Compounds Containing a C=N Bond .....	303
<b>19.5.10.3.1</b>	Method 1: Products Derived from Hydrazones .....	303
<b>19.5.10.3.1.1</b>	Variation 1: Processes Using Trimethylsilyl Cyanide .....	303
<b>19.5.10.3.1.2</b>	Variation 2: Reaction under Phase-Transfer Conditions .....	304
<b>19.5.10.3.2</b>	Method 2: Products Derived from Nitrones .....	305
<b>19.5.10.3.3</b>	Method 3: Products Derived from Sulfinimines .....	306
