

**Volume 20b:  
Three Carbon–Heteroatom Bonds:  
Esters and Lactones; Peroxy Acids and R(CO)OX  
Compounds; R(CO)X, X = S, Se, Te**

	<b>Preface</b> .....	V
	<b>Volume Editor's Preface</b> .....	VII
	<b>Table of Contents</b> .....	XI
<b>20.5</b>	<b>Product Class 5: Carboxylic Acid Esters</b>	
<b>20.5.1</b>	<b>Product Subclass 1: Alkyl Alkanoates</b> M. Yus, C. Nájera, and R. Chinchilla .....	643
<b>20.5.1.1</b>	<b>Synthesis from Carbonic Acid Derivatives</b> S. J. Collier .....	665
<b>20.5.1.2</b>	<b>Synthesis from Carboxylic Acids and Derivatives</b> N. F. Jain and C. E. Masse .....	711
<b>20.5.1.3</b>	<b>Synthesis from Aldehydes, Ketones, and Derivatives (Including Enol Ethers)</b> L. Yan, S. Lin, and P. Liu .....	725
<b>20.5.1.4</b>	<b>Synthesis from Organometallic Compounds, Alkyl Halides, Primary Alcohols, or Ethers (Excluding Reactions with Carboxylic Acid Derivatives)</b> M. Yus, C. Nájera, and R. Chinchilla .....	777
<b>20.5.1.5</b>	<b>Synthesis from Alkenes (Excluding Reactions with Carboxylic Acid Derivatives)</b> G. Evano .....	795
<b>20.5.1.6</b>	<b>Synthesis by Rearrangement</b> A. J. Phillips and C. E. Love .....	827
<b>20.5.1.7</b>	<b>Synthesis with Retention of the Functional Group</b> M. Zhang and P. R. Hanson .....	863
<b>20.5.2</b>	<b>Product Subclass 2: Arenedicarboxylic Acid Esters</b> L. R. Subramanian .....	947
<b>20.5.3</b>	<b>Product Subclass 3: Butenedioic and Butynedioic Acid Esters</b> C. E. Masse .....	957
<b>20.5.4</b>	<b>Product Subclass 4: Alkanedioic Acid Esters</b> C. E. Masse .....	987
<b>20.5.5</b>	<b>Product Subclass 5: Alkynyl Alkanoates</b> S. G. Nelson .....	1047

<b>20.5.6</b>	<b>Product Subclass 6: Aryl Alkanoates</b> S. G. Nelson .....	1051
<b>20.5.7</b>	<b>Product Subclass 7: Alkenyl Alkanoates</b> S. G. Nelson .....	1065
<b>20.5.8</b>	<b>Product Subclass 8: 2-Oxo- and 2-Imino-Substituted Alkanoic Acid Esters, and Related Compounds</b> J. A. Westbrook and S. E. Schaus .....	1091
<b>20.5.9</b>	<b>Product Subclass 9: 2,2-Diheteroatom-Substituted Alkanoic Acid Esters</b> J. A. Westbrook and S. E. Schaus .....	1115
<b>20.5.10</b>	<b>Product Subclass 10: 2-Aminoalkanoic Acid Esters (<math>\alpha</math>-Amino Acid Esters)</b> R. M. Garbaccio and S. E. Wolkenberg .....	1131
<b>20.5.11</b>	<b>Product Subclass 11: 2-Heteroatom-Substituted Alkanoic Acid Esters</b> S. R. Chemler and T. P. Zabawa .....	1203
<b>20.5.12</b>	<b>Product Subclass 12: Alk-2-ynoic Acid Esters</b> G. Evano .....	1243
<b>20.5.13</b>	<b>Product Subclass 13: Arenecarboxylic Acid Esters</b> T. P. Yoon and E. N. Jacobsen .....	1285
<b>20.5.14</b>	<b>Product Subclass 14: Alk-2-enoic Acid Esters</b> C. D. Vanderwal and E. N. Jacobsen .....	1305
<b>20.5.15</b>	<b>Product Subclass 15: 3-Oxo- and 3,3-Diheteroatom-Substituted Alkanoic Acid Esters</b> J. Beignet .....	1341
<b>20.5.16</b>	<b>Product Subclass 16: 3-Heteroatom-Substituted Alkanoic Acid Esters</b> G. Sartori and R. Maggi .....	1375
<b>20.6</b>	<b>Product Class 6: Lactones</b> M. E. Maier .....	1421
<b>20.7</b>	<b>Product Class 7: Peroxy Acids and Derivatives</b> S. Mitra, S. R. Gurralla, and R. S. Coleman .....	1553
<b>20.8</b>	<b>Product Class 8: Thiocarboxylic S-Acids, Selenocarboxylic Se-Acids, Tellurocarboxylic Te-Acids, and Derivatives</b> S. J. Collier .....	1597
	<b>Keyword Index</b> .....	1691
	<b>Author Index</b> .....	1741
	<b>Abbreviations</b> .....	1801

## Table of Contents

<b>20.5</b>	<b>Product Class 5: Carboxylic Acid Esters</b>	
<b>20.5.1</b>	<b>Product Subclass 1: Alkyl Alkanoates</b> M. Yus, C. Nájera, and R. Chinchilla	
<b>20.5.1</b>	<b>Product Subclass 1: Alkyl Alkanoates</b> .....	643
<b>20.5.1.1</b>	<b>Synthesis from Carbonic Acid Derivatives</b> S. J. Collier	
<b>20.5.1.1</b>	<b>Synthesis from Carbonic Acid Derivatives</b> .....	665
<b>20.5.1.1.1</b>	Method 1: Use of Carbonic Acid Diesters .....	665
<b>20.5.1.1.1.1</b>	Variation 1: Reactions with Enolates .....	665
<b>20.5.1.1.1.2</b>	Variation 2: Reactions with Carbanions without Stabilizing Electron-Withdrawing $\alpha$ -Heteroatom Groups .....	670
<b>20.5.1.1.1.3</b>	Variation 3: Reaction with $\alpha$ -Heteroatom-Stabilized Carbanions .....	673
<b>20.5.1.1.1.4</b>	Variation 4: Intramolecular Rearrangements .....	675
<b>20.5.1.1.2</b>	Method 2: Use of Haloformates .....	678
<b>20.5.1.1.2.1</b>	Variation 1: Reactions with Enolates .....	679
<b>20.5.1.1.2.2</b>	Variation 2: Reaction with Carbanions without Stabilizing Electron-Withdrawing $\alpha$ -Heteroatom Groups .....	683
<b>20.5.1.1.2.3</b>	Variation 3: Reaction with $\alpha$ -Heteroatom-Stabilized Carbanions .....	688
<b>20.5.1.1.2.4</b>	Variation 4: Other Syntheses .....	691
<b>20.5.1.1.3</b>	Method 3: Use of Cyanofornate Esters .....	693
<b>20.5.1.1.3.1</b>	Variation 1: Reaction with Enolates .....	694
<b>20.5.1.1.3.2</b>	Variation 2: Using Other Carbon Nucleophiles .....	698
<b>20.5.1.1.3.3</b>	Variation 3: Novel Reactions .....	700
<b>20.5.1.1.4</b>	Method 4: Use of Di- <i>tert</i> -butyl Dicarboxate .....	702
<b>20.5.1.2</b>	<b>Synthesis from Carboxylic Acids and Derivatives</b> N. F. Jain and C. E. Masse	
<b>20.5.1.2</b>	<b>Synthesis from Carboxylic Acids and Derivatives</b> .....	711
<b>20.5.1.2.1</b>	Method 1: Synthesis from Carboxylic Acids .....	711
<b>20.5.1.2.1.1</b>	Variation 1: Phosphorus Activation of Alcohols (Mitsunobu Reaction) ....	711
<b>20.5.1.2.1.2</b>	Variation 2: Dicyclohexylcarbodiimide Activation of Acids .....	712
<b>20.5.1.2.1.3</b>	Variation 3: Direct Condensation of Acids and Alcohols Catalyzed by a Lewis Acid .....	713
<b>20.5.1.2.1.4</b>	Variation 4: Direct Condensation of Acids and Alcohols Using Ammonium Salts .....	714
<b>20.5.1.2.2</b>	Method 2: Synthesis from Acid Halides .....	715
<b>20.5.1.2.3</b>	Method 3: Synthesis from Acid Anhydrides .....	715
<b>20.5.1.2.4</b>	Method 4: Synthesis from Amides .....	717
<b>20.5.1.2.5</b>	Method 5: Synthesis from 2-Alkyl-4,5-dihydrooxazoles .....	717

20.5.1.2.6	Method 6: Synthesis from Nitriles .....	718
20.5.1.2.7	Method 7: Synthesis from Ketenes .....	719
20.5.1.2.7.1	Variation 1: Nucleophilic Addition of Alcohols .....	719
20.5.1.2.7.2	Variation 2: Asymmetric Chlorination .....	722
20.5.1.3	<b>Synthesis from Aldehydes, Ketones, and Derivatives (Including Enol Ethers)</b> L. Yan, S. Lin, and P. Liu	
20.5.1.3	<b>Synthesis from Aldehydes, Ketones, and Derivatives (Including Enol Ethers)</b> .....	725
20.5.1.3.1	Synthesis from Aldehydes .....	725
20.5.1.3.1.1	Oxidative Processes .....	725
20.5.1.3.1.1.1	Method 1: Using Manganese(IV) Oxide and Sodium Cyanide .....	725
20.5.1.3.1.1.2	Method 2: Using Bromine .....	727
20.5.1.3.1.1.2.1	Variation 1: Using Pyridinium Tribromide .....	729
20.5.1.3.1.1.3	Method 3: Using Iodine .....	730
20.5.1.3.1.1.4	Method 4: Using Pyridinium Dichromate .....	731
20.5.1.3.1.1.5	Method 5: Using Sodium or Calcium Hypochlorites .....	732
20.5.1.3.1.1.6	Method 6: Using <i>N</i> -Bromosuccinimide .....	734
20.5.1.3.1.1.6.1	Variation 1: Using <i>N</i> -Bromosuccinimide and Alkoxytrimethylsilanes or Alkoxytrialkylstannanes .....	734
20.5.1.3.1.1.7	Method 7: Using <i>N</i> -Iodosuccinimide .....	735
20.5.1.3.1.1.8	Method 8: Using Caro's Acid .....	736
20.5.1.3.1.1.9	Method 9: Using Oxone .....	736
20.5.1.3.1.1.10	Method 10: Using Trichloroisocyanuric Acid .....	737
20.5.1.3.1.1.11	Method 11: Using Transition-Metal Catalysts .....	738
20.5.1.3.1.1.12	Method 12: Using Electrochemical Oxidation .....	739
20.5.1.3.1.1.13	Method 13: Using Ozone .....	741
20.5.1.3.1.1.14	Method 14: Using Hydrogen Peroxide .....	742
20.5.1.3.1.2	Oxidation/Reduction Processes .....	743
20.5.1.3.1.2.1	Method 1: Using the Tishchenko Reaction .....	743
20.5.1.3.1.2.1.1	Variation 1: Using the Homo Aldol–Tishchenko Reaction .....	745
20.5.1.3.1.2.1.2	Variation 2: Using the Hetero Aldol–Tishchenko Reaction .....	745
20.5.1.3.1.2.1.3	Variation 3: Using the Evans–Tishchenko Reaction .....	747
20.5.1.3.1.2.2	Method 2: Intramolecular Hydroacylation Reactions .....	749
20.5.1.3.2	Synthesis from Ketones via the Baeyer–Villiger Reaction .....	750
20.5.1.3.2.1	Method 1: Using Pertrifluoroacetic Acid .....	751
20.5.1.3.2.2	Method 2: Using Peroxybenzoic Acids .....	752
20.5.1.3.2.3	Method 3: Using Hydrogen Peroxide .....	753
20.5.1.3.2.4	Method 4: Using Bis(trimethylsilyl) Peroxide .....	754
20.5.1.3.2.5	Method 5: Using Enzymes .....	755
20.5.1.3.3	Synthesis from Acetals .....	755
20.5.1.3.3.1	Method 1: Using Ozone .....	755
20.5.1.3.3.2	Method 2: Using Hypochlorous Acid .....	757

20.5.1.3.3.3	Method 3:	Using <i>N</i> -Bromosuccinimide .....	758
20.5.1.3.3.4	Method 4:	Using Peroxy Acids .....	759
20.5.1.3.3.5	Method 5:	Using Oxone .....	760
20.5.1.3.3.6	Method 6:	Using Caro's Acid .....	761
20.5.1.3.3.7	Method 7:	Using <i>tert</i> -Butyl Hydroperoxide and a Catalyst .....	762
20.5.1.3.3.8	Method 8:	Photochemical Oxidation .....	763
20.5.1.3.3.9	Method 9:	Using Potassium Permanganate .....	763
20.5.1.3.4	Synthesis from Enol Ethers .....		764
20.5.1.3.4.1	Method 1:	Using Ozone .....	764
20.5.1.3.4.2	Method 2:	Using 3-Chloroperoxybenzoic Acid .....	765
20.5.1.3.4.3	Method 3:	Using Chromium(VI) Oxide .....	766
20.5.1.3.4.4	Method 4:	Using Pyridinium Chlorochromate .....	767
20.5.1.3.5	Synthesis from $\alpha$ -Hydroxy Carbonyl Compounds and 1,2-Diones .....		768
20.5.1.3.5.1	Method 1:	Using Lead(IV) Acetate .....	768
20.5.1.3.5.2	Method 2:	Using Oxone or Potassium Peroxymonosulfate .....	769
20.5.1.3.5.3	Method 3:	Using Dioxygen .....	771
20.5.1.3.5.4	Method 4:	Using Electrochemistry .....	772
20.5.1.4	<b>Synthesis from Organometallic Compounds, Alkyl Halides, Primary Alcohols, or Ethers (Excluding Reactions with Carboxylic Acid Derivatives)</b> M. Yus, C. Nájera, and R. Chinchilla		
20.5.1.4	<b>Synthesis from Organometallic Compounds, Alkyl Halides, Primary Alcohols, or Ethers (Excluding Reactions with Carboxylic Acid Derivatives)</b> 777		
20.5.1.4.1	Alkoxyacylation of Organometallic Compounds .....		777
20.5.1.4.1.1	Method 1:	Alkoxyacylation of Organolithium Compounds .....	777
20.5.1.4.1.2	Method 2:	Alkoxyacylation of Organomagnesium Compounds .....	778
20.5.1.4.1.3	Method 3:	Alkoxyacylation of Organotransition-Metal Compounds .....	779
20.5.1.4.2	Alkoxyacylation of Alkyl Halides .....		781
20.5.1.4.2.1	Method 1:	Alkoxyacylation of Alkyl Halides Promoted by Acids .....	781
20.5.1.4.2.2	Method 2:	Alkoxyacylation of Alkyl Halides Promoted by Transition-Metal Catalysts .....	782
20.5.1.4.2.3	Method 3:	Alkoxyacylation of Alkyl Iodides Promoted by Photolysis .....	784
20.5.1.4.3	Oxidation of Primary Alcohols .....		784
20.5.1.4.3.1	Method 1:	Oxidation by Halonium-Generating Combinations .....	785
20.5.1.4.3.2	Method 2:	Oxidation by Chromium(IV) Oxide .....	786
20.5.1.4.3.3	Method 3:	Transition-Metal-Catalyzed Oxidations .....	786
20.5.1.4.4	Oxidation of Ethers, Silyl Ethers, or Stannyl Ethers .....		787
20.5.1.4.4.1	Method 1:	Oxidation of Ethers .....	788
20.5.1.4.4.1.1	Variation 1:	Oxidation by Halonium-Generating Combinations .....	788
20.5.1.4.4.1.2	Variation 2:	Oxidation by Stoichiometric Transition-Metal Reagents .....	788
20.5.1.4.4.1.3	Variation 3:	Transition-Metal-Catalyzed Oxidation .....	789
20.5.1.4.4.2	Method 2:	Oxidation of Silyl and Stannyl Ethers Using <i>N</i> -Bromosuccinimide .....	790

<b>20.5.1.5</b>	<b>Synthesis from Alkenes (Excluding Reactions with Carboxylic Acid Derivatives)</b> G. Evano	
<hr/>		
<b>20.5.1.5</b>	<b>Synthesis from Alkenes (Excluding Reactions with Carboxylic Acid Derivatives)</b> .....	795
<b>20.5.1.5.1</b>	Method 1: Oxidative C=C Bond Cleavage .....	795
<b>20.5.1.5.2</b>	Method 2: Hydroesterification with Carbon Monoxide (Rupe Carbonylation) .....	797
<b>20.5.1.5.3</b>	Method 3: Hydroesterification with Formate Esters .....	802
<b>20.5.1.5.4</b>	Method 4: Cross Metathesis with Conjugated Esters .....	806
<b>20.5.1.5.5</b>	Method 5: Synthesis via Hydroboration with Two-Carbon Homologation	808
<b>20.5.1.5.6</b>	Method 6: Addition of Acetate Esters to Alkenes .....	811
<b>20.5.1.5.7</b>	Method 7: Hydroacyloxylation .....	813
<b>20.5.1.5.7.1</b>	Variation 1: Markovnikov Hydroacyloxylation Using Carboxylic Acids .....	814
<b>20.5.1.5.7.2</b>	Variation 2: Anti-Markovnikov Hydroacyloxylation via Hydroboration .....	818
<b>20.5.1.5.8</b>	Method 8: Allylic Acyloxylation .....	818
<b>20.5.1.5.8.1</b>	Variation 1: Allylic Acyloxylation without Double-Bond Migration .....	818
<b>20.5.1.5.8.2</b>	Variation 2: Allylic Acyloxylation with Double-Bond Migration .....	821
<b>20.5.1.5.9</b>	Method 9: The Prévost Reaction .....	822
<b>20.5.1.6</b>	<b>Synthesis by Rearrangement</b> A. J. Phillips and C. E. Love	
<hr/>		
<b>20.5.1.6</b>	<b>Synthesis by Rearrangement</b> .....	827
<b>20.5.1.6.1</b>	Method 1: Baeyer–Villiger Oxidation .....	827
<b>20.5.1.6.2</b>	Method 2: Cope Rearrangement .....	831
<b>20.5.1.6.2.1</b>	Variation 1: Cope Rearrangement of Silyl Cyanohydrins .....	831
<b>20.5.1.6.2.2</b>	Variation 2: Cope Rearrangement of Divinylcyclopropanes .....	833
<b>20.5.1.6.3</b>	Method 3: Rearrangement of Vinylcyclopropanes .....	836
<b>20.5.1.6.4</b>	Method 4: Rearrangement of Ketene Acetals .....	839
<b>20.5.1.6.4.1</b>	Variation 1: Rearrangement of Ketene Acetals Derived from Ortho Esters (The Johnson Protocol) .....	840
<b>20.5.1.6.4.2</b>	Variation 2: Rearrangement of Ketene Acetals Derived from Selenoxides	843
<b>20.5.1.6.5</b>	Method 5: [2,3]-Wittig Rearrangement of $\alpha$ -(Alkenyloxy) Esters .....	845
<b>20.5.1.6.5.1</b>	Variation 1: Via Lithium Enolates .....	845
<b>20.5.1.6.5.2</b>	Variation 2: Via Tin, Titanium, and Zirconium Enolates .....	848
<b>20.5.1.6.6</b>	Method 6: [3,3] Rearrangements of Allylic Esters .....	849
<b>20.5.1.6.7</b>	Method 7: The Pummerer Rearrangement .....	852
<b>20.5.1.6.8</b>	Method 8: Palladium-Catalyzed Carbonylation with Rearrangement .....	854
<b>20.5.1.6.9</b>	Method 9: Favorskii Rearrangement .....	855
<b>20.5.1.6.10</b>	Method 10: Arndt–Eistert and Related Reactions .....	857

<b>20.5.1.7</b>	<b>Synthesis with Retention of the Functional Group</b> M. Zhang and P. R. Hanson	
<b>20.5.1.7</b>	<b>Synthesis with Retention of the Functional Group</b> .....	863
<b>20.5.1.7.1</b>	Conjugate Addition of $\alpha,\beta$ -Unsaturated Esters .....	863
<b>20.5.1.7.1.1</b>	Method 1: Addition of Organocopper Reagents .....	863
<b>20.5.1.7.1.2</b>	Method 2: Addition of Organoborane Reagents .....	865
<b>20.5.1.7.1.3</b>	Method 3: Addition of Nitroalkanes .....	868
<b>20.5.1.7.1.4</b>	Method 4: Hydrohalogenation Reactions of Substituted Allenates .....	869
<b>20.5.1.7.1.5</b>	Method 5: Addition of Alkyl Radicals .....	870
<b>20.5.1.7.1.6</b>	Method 6: Addition of Organomanganese(II) Reagents .....	871
<b>20.5.1.7.1.7</b>	Method 7: Addition of Grignard Reagents .....	871
<b>20.5.1.7.1.8</b>	Method 8: Nickel(0)-Catalyzed Conjugate Additions .....	872
<b>20.5.1.7.1.9</b>	Method 9: Reductive C—C Bond Formation of $\alpha,\beta$ -Unsaturated Esters .....	873
<b>20.5.1.7.1.10</b>	Method 10: Addition of Allyltrimethylsilane .....	874
<b>20.5.1.7.2</b>	Alkylations of Alkyl Alkanoates .....	875
<b>20.5.1.7.2.1</b>	Method 1: $\alpha$ -Alkylation .....	875
<b>20.5.1.7.2.1.1</b>	Variation 1: Alkylation with Strong Base and an Alkylating Agent .....	875
<b>20.5.1.7.2.1.2</b>	Variation 2: Metal-Complex-Catalyzed $\alpha$ -Alkylation .....	877
<b>20.5.1.7.2.1.3</b>	Variation 3: Michael Addition of Ester Enolates .....	878
<b>20.5.1.7.2.2</b>	Method 2: Deconjugate Alkylation .....	879
<b>20.5.1.7.2.3</b>	Method 3: Reductive Alkylation .....	880
<b>20.5.1.7.2.4</b>	Method 4: Ene Reaction .....	881
<b>20.5.1.7.2.5</b>	Method 5: Asymmetric Alkylation .....	882
<b>20.5.1.7.3</b>	Cross-Coupling Reactions Catalyzed by Transition-Metal Complexes .....	883
<b>20.5.1.7.3.1</b>	Method 1: Sonogashira Coupling .....	883
<b>20.5.1.7.3.2</b>	Method 2: Hydrovinylation .....	884
<b>20.5.1.7.3.3</b>	Method 3: Hydroformylation .....	885
<b>20.5.1.7.3.4</b>	Method 4: Other Palladium-Complex-Catalyzed Cross Couplings .....	886
<b>20.5.1.7.4</b>	Cleavage Reactions .....	889
<b>20.5.1.7.4.1</b>	Method 1: Cleavage of Oxalates .....	889
<b>20.5.1.7.4.2</b>	Method 2: Cleavage of Malonates by Decarboxylation .....	890
<b>20.5.1.7.4.3</b>	Method 3: Cleavage of $\alpha$ -Cyano Esters by Decyanation .....	891
<b>20.5.1.7.4.4</b>	Method 4: Cleavage of $\beta$ -Oxo Esters .....	893
<b>20.5.1.7.5</b>	Oxidation Reactions .....	894
<b>20.5.1.7.5.1</b>	Method 1: Ozonolysis .....	894
<b>20.5.1.7.5.2</b>	Method 2: Photooxygenation .....	895
<b>20.5.1.7.6</b>	Conjugate Reduction of $\alpha,\beta$ -Unsaturated Esters .....	895
<b>20.5.1.7.6.1</b>	Method 1: Use of Aluminum Hydride Reducing Agents .....	896
<b>20.5.1.7.6.2</b>	Method 2: Use of Borohydride Reducing Agents .....	896
<b>20.5.1.7.6.3</b>	Method 3: Reduction Using Samarium(II) Iodide .....	898
<b>20.5.1.7.6.4</b>	Method 4: Use of Metals in Protic Solvents as Reducing Agents .....	899
<b>20.5.1.7.6.5</b>	Method 5: Hydrostannation .....	900
<b>20.5.1.7.6.6</b>	Method 6: Use of Hydrosilane Reducing Agents .....	900

20.5.1.7.6.7	Method 7: Use of Sodium Dithionite Reducing Agents .....	902
20.5.1.7.6.8	Method 8: Asymmetric Conjugate Reduction .....	902
20.5.1.7.7	Selective Reduction of Distant Multiple Bonds in Unsaturated Esters .....	903
20.5.1.7.7.1	Method 1: Reduction of Triple Bonds .....	904
20.5.1.7.7.2	Method 2: Reduction of Double Bonds .....	905
20.5.1.7.8	Chemoselective Hydrogenations .....	905
20.5.1.7.8.1	Method 1: Heterogeneous Hydrogenations .....	906
20.5.1.7.8.2	Method 2: Homogeneous Hydrogenations .....	907
20.5.1.7.8.3	Method 3: Asymmetric Hydrogenations .....	909
20.5.1.7.9	Synthesis from Lactones by Ring Opening .....	911
20.5.1.7.9.1	Method 1: Ring Opening under Basic Conditions .....	911
20.5.1.7.9.2	Method 2: Ring Opening under Acidic Conditions .....	912
20.5.1.7.9.3	Method 3: Enzyme-Catalyzed Ring Opening .....	913
20.5.1.7.10	Synthesis from Alkyl Formates .....	914
20.5.1.7.10.1	Method 1: Hydroesterifications Catalyzed by Transition-Metal Complexes .....	914
20.5.1.7.10.2	Method 2: Free-Radical Addition .....	915
20.5.1.7.10.3	Method 3: Palladium-Catalyzed Reaction with Nitrobenzene .....	916
20.5.1.7.10.4	Method 4: Carbonylation Reactions of Formates with Organic Halides ...	917
20.5.1.7.11	Isomerizations .....	917
20.5.1.7.11.1	Method 1: Deconjugation .....	917
20.5.1.7.11.2	Method 2: Other Isomerizations .....	919
20.5.1.7.12	Alkene Metathesis .....	920
20.5.1.7.12.1	Method 1: Metathesis with Tungsten-Based Catalysts .....	920
20.5.1.7.12.2	Method 2: Metathesis with Molybdenum-Based Catalysts .....	921
20.5.1.7.12.3	Method 3: Metathesis with Ruthenium-Based Catalysts .....	923
20.5.1.7.12.4	Method 4: Metathesis with Rhenium-Based Catalysts .....	925
20.5.1.7.13	Transesterification .....	926
20.5.1.7.13.1	Method 1: Transesterification without Catalysis .....	926
20.5.1.7.13.2	Method 2: Transesterification with Chemical Catalysis .....	927
20.5.1.7.13.2.1	Variation 1: By Brønsted Acids .....	927
20.5.1.7.13.2.2	Variation 2: By Lewis Acids .....	928
20.5.1.7.13.2.3	Variation 3: By Solid Acids .....	930
20.5.1.7.13.2.4	Variation 4: By Bases .....	931
20.5.1.7.13.3	Method 3: Transesterification with Enzymes .....	932
20.5.1.7.14	Kinetic Resolution .....	934
20.5.1.7.14.1	Method 1: Resolution with Enzymatic Catalysis .....	934
20.5.1.7.14.2	Method 2: Non-Enzymatic Resolution .....	936
20.5.2	<b>Product Subclass 2: Arenedicarboxylic Acid Esters</b> L. R. Subramanian	
20.5.2	<b>Product Subclass 2: Arenedicarboxylic Acid Esters</b> .....	947
20.5.2.1	Synthesis of Product Subclass 2 .....	947

20.5.2.1.1	Method 1:	Direct Esterification of Arenedicarboxylic Acids Using Alkyl Halides	947
20.5.2.1.2	Method 2:	Direct Esterification of Arenedicarboxylic Acids and Anhydrides Using Alcohols	948
20.5.2.1.2.1	Variation 1:	Using a Morpholinium Salt as Catalyst	948
20.5.2.1.2.2	Variation 2:	Using Heteropolyacids as Catalysts	949
20.5.2.1.3	Method 3:	Direct Esterification of Arenedicarboxylic Acids Using Pentafluorophenol and <i>N,N'</i> -Dicyclohexylcarbodiimide	950
20.5.2.1.4	Method 4:	Synthesis of Arene-1,2-dicarboxylic Acid Esters by Diels–Alder Reaction Followed by Aromatization	950
20.5.2.1.4.1	Variation 1:	From 2 <i>H</i> -Pyran-2-ones	950
20.5.2.1.4.2	Variation 2:	From 4-Nitrostyrene	952
20.5.2.1.4.3	Variation 3:	From Substituted Benzo[ <i>c</i> ]furan	953
20.5.2.1.5	Methods 5:	Miscellaneous Methods	953

### 20.5.3 Product Subclass 3: Butenedioic and Butynedioic Acid Esters

C. E. Masse

20.5.3	<b>Product Subclass 3: Butenedioic and Butynedioic Acid Esters</b>	957	
20.5.3.1	Synthesis of Product Subclass 3	957	
20.5.3.1.1	Method 1:	Anhydride Cleavage	957
20.5.3.1.1.1	Variation 1:	Solvolysis of Maleic Anhydride	957
20.5.3.1.1.2	Variation 2:	Using Lactam Acetals	958
20.5.3.1.2	Method 2:	Carbenoid Dimerization	959
20.5.3.1.2.1	Variation 1:	Ruthenium-Mediated Reactions	959
20.5.3.1.2.2	Variation 2:	Rhodium-Mediated Reactions	961
20.5.3.1.2.3	Variation 3:	Copper-Mediated Reactions	961
20.5.3.1.3	Method 3:	Phosphorus-Based Alkenations	962
20.5.3.1.3.1	Variation 1:	From Thiiranes	962
20.5.3.1.3.2	Variation 2:	From Lithiophosphoranes	964
20.5.3.1.4	Method 4:	1,4-Addition of Alcohols	965
20.5.3.1.4.1	Variation 1:	Organic Base Mediated Reactions	965
20.5.3.1.4.2	Variation 2:	Titanium-Mediated Reactions	965
20.5.3.1.4.3	Variation 3:	Lead-Mediated Reactions	966
20.5.3.1.4.4	Variation 4:	Silver-Mediated Reactions	967
20.5.3.1.5	Method 5:	Elimination Protocols	968
20.5.3.1.5.1	Variation 1:	From Aspartate Esters	968
20.5.3.1.5.2	Variation 2:	From Monohalosuccinic Acid Esters	969
20.5.3.1.5.3	Variation 3:	From Hydroxysuccinic Acid Esters	970
20.5.3.1.5.4	Variation 4:	From Dibromosuccinic Acid Esters with Dimethylformamide	970
20.5.3.1.5.5	Variation 5:	From Tartrates via Phosphinate Activation	971
20.5.3.1.5.6	Variation 6:	From Tartrates via Cyclic Sulfates	972
20.5.3.1.5.7	Variation 7:	From Bromosuccinic Acid Esters	973
20.5.3.1.5.8	Variation 8:	From Dibromosuccinates with Sodium Dithionite	974
20.5.3.1.5.9	Variation 9:	From <i>vic</i> -Diols via 1,3-Dioxolanes	975
20.5.3.1.5.10	Variation 10:	From <i>vic</i> -Diols via Phosphonium Sulfates	976
20.5.3.1.5.11	Variation 11:	From <i>vic</i> -Diols with Sodium Sulfide	978

20.5.3.1.5.12	Variation 12:	From <i>vic</i> -Diols via Thermal Elimination	978
20.5.3.1.6	Method 6:	Semihydrogenation	979
20.5.3.1.6.1	Variation 1:	Using Homogeneous Palladium Catalysts	979
20.5.3.1.6.2	Variation 2:	Using Hydrosilane Reagents	980
20.5.3.1.6.3	Variation 3:	Using Nickel Boride Catalysts	981
20.5.3.1.6.4	Variation 4:	Using a Polymer-Supported Palladium Catalyst	982
20.5.3.1.6.5	Variation 5:	Using a Rhodium Hydride Complex	982
20.5.3.1.6.6	Variation 6:	Using an Indium Hydride Complex	983
20.5.3.1.7	Methods 7:	Other Methods	984
20.5.3.1.7.1	Variation 1:	Phosphine Additions to Butynedioates	984
20.5.3.1.7.2	Variation 2:	Carbene Additions to Maleic Anhydride Derivatives	985
<b>20.5.4</b>	<b>Product Subclass 4: Alkanedioic Acid Esters</b>		
	C. E. Masse		
<hr/>			
<b>20.5.4</b>	<b>Product Subclass 4: Alkanedioic Acid Esters</b>		987
20.5.4.1	Synthesis of Product Subclass 4		987
20.5.4.1.1	Method 1:	Esterification of Oxalic Acid by the Fischer Method	987
20.5.4.1.2	Method 2:	Oxalate Esters by Nucleophilic Acyl Substitution on Activated Oxalyl Derivatives	988
20.5.4.1.2.1	Variation 1:	From Oxalyl Chloride	988
20.5.4.1.2.2	Variation 2:	From Ethyl Cyano(oxo)acetate	988
20.5.4.1.3	Method 3:	Oxalate Esters by Oxidative Methods	989
20.5.4.1.3.1	Variation 1:	Palladium-Mediated Oxidative Coupling of Carbon Monoxide	989
20.5.4.1.3.2	Variation 2:	Oxidative Cleavage of 2-Chlorobuta-1,3-diene	990
20.5.4.1.4	Method 4:	Esterification of Malonic Acids	990
20.5.4.1.4.1	Variation 1:	Using Isobutene	990
20.5.4.1.4.2	Variation 2:	Via the Monoacid Chloride	991
20.5.4.1.4.3	Variation 3:	Via Mixed Carbonic Anhydrides	992
20.5.4.1.5	Method 5:	Malonate Esters by Alkylation of Malonate Derivatives	993
20.5.4.1.5.1	Variation 1:	Via Monoalkylation of Malonate Diesters	993
20.5.4.1.5.2	Variation 2:	Phase-Transfer-Catalyzed Dialkylation of Malonates	994
20.5.4.1.5.3	Variation 3:	Intramolecular Cyclization of $\omega$ -(Bromoalkyl)malonates	995
20.5.4.1.5.4	Variation 4:	Transition-Metal-Mediated Alkylations	996
20.5.4.1.5.5	Variation 5:	Alkylation–Decarboxylation of Methanetricarboxylates	996
20.5.4.1.5.6	Variation 6:	Via Alkylation of Meldrum's Acid	997
20.5.4.1.6	Method 6:	Malonate Esters by Acylation of Malonate Derivatives	998
20.5.4.1.6.1	Variation 1:	Via Ethoxymagnesium Malonates	998
20.5.4.1.6.2	Variation 2:	C-Acylation Using Magnesium Oxide	999
20.5.4.1.6.3	Variation 3:	C-Acylation Using Soft Enolization	1000
20.5.4.1.7	Method 7:	Malonate Esters by Conjugate Additions to Malonate Derivatives	1001
20.5.4.1.7.1	Variation 1:	Reduction of Alkylidenemalonates with Sodium Cyanoborohydride	1001
20.5.4.1.7.2	Variation 2:	Grignard Additions to Alkylidenemalonates	1001
20.5.4.1.7.3	Variation 3:	Phase-Transfer-Catalyzed Michael Addition of Malonate Enolates	1002

20.5.4.1.8	Method 8:	Malonate Esters by Knoevenagel Condensation of Malonates	1003
20.5.4.1.8.1	Variation 1:	With Acetaldehyde and Acetic Anhydride	1003
20.5.4.1.8.2	Variation 2:	With Paraformaldehyde and Copper(II) Acetate	1003
20.5.4.1.8.3	Variation 3:	From Pyrolysis of Malonate Diels–Alder Adducts	1004
20.5.4.1.9	Method 9:	Malonate Esters by Claisen Condensations with Oxalic Acid Esters	1005
20.5.4.1.10	Method 10:	Malonate Esters by Arylation of Malonate Derivatives	1006
20.5.4.1.10.1	Variation 1:	Via Electrophilic Aromatic Substitution	1006
20.5.4.1.10.2	Variation 2:	Via Nucleophilic Aromatic Substitution on Malonyl–Iron–Arene Complexes	1008
20.5.4.1.11	Method 11:	Malonate Esters by Addition of Allylsilanes to Activated Cyclopropanes	1008
20.5.4.1.12	Method 12:	Malonate Esters by Dichlorination of Malonates with Trifluoromethanesulfonyl Chloride	1009
20.5.4.1.13	Method 13:	Esterification of Succinic Acid	1010
20.5.4.1.14	Method 14:	Succinate Esters by Reduction of Butenedioates	1010
20.5.4.1.14.1	Variation 1:	Lewis Acid Mediated Reduction of Maleates	1010
20.5.4.1.14.2	Variation 2:	Ruthenium-Mediated Hydrogenation of 2-Methylenesuccinate Esters	1011
20.5.4.1.14.3	Variation 3:	Rhodium-Mediated Hydrogenation of 2-Methylenesuccinate Esters	1012
20.5.4.1.15	Method 15:	Succinate Esters by Alkene Dimerization	1013
20.5.4.1.15.1	Variation 1:	Radical-Based Methods	1013
20.5.4.1.15.2	Variation 2:	Oxidative Dimerization of Titanium Enolates	1014
20.5.4.1.15.3	Variation 3:	Oxidative Dimerization of Organocuprates	1015
20.5.4.1.16	Method 16:	Succinate Esters by Rearrangement Reactions	1016
20.5.4.1.16.1	Variation 1:	Ring Opening of Cyclopropanes	1016
20.5.4.1.16.2	Variation 2:	Malonate Displacements	1017
20.5.4.1.16.3	Variation 3:	Allylmalonate Rearrangement	1018
20.5.4.1.17	Method 17:	Succinate Esters by Carbonylation	1019
20.5.4.1.17.1	Variation 1:	Dicarbonylation of But-2-enes	1019
20.5.4.1.17.2	Variation 2:	Dicarbonylation of Terminal Alkenes and Cycloalkenes	1020
20.5.4.1.17.3	Variation 3:	Monocarbonylation of Acrylates	1022
20.5.4.1.17.4	Variation 4:	From Allylic Carbonates	1023
20.5.4.1.18	Method 18:	Succinate Esters by Conjugate Additions	1023
20.5.4.1.18.1	Variation 1:	Reaction of Thiols with Butenedioates	1023
20.5.4.1.18.2	Variation 2:	Reaction of Enamines with Nitroalkenes	1024
20.5.4.1.18.3	Variation 3:	Reaction of Cyanohydrins with Butenedioates	1025
20.5.4.1.19	Method 19:	Succinate Esters by Stobbe Condensations	1026
20.5.4.1.20	Method 20:	Succinate Esters by $\alpha$ -Alkylation of Succinoyl Derivatives	1027
20.5.4.1.20.1	Variation 1:	Using an Organometallic Auxiliary	1027
20.5.4.1.20.2	Variation 2:	Using Malate Esters	1028
20.5.4.1.21	Method 21:	Succinate Esters by Asymmetric Nucleophilic Addition Using a Chiral Ketone Auxiliary	1029
20.5.4.1.22	Method 22:	Succinate Esters by Stereoselective [2,3]-Wittig Rearrangement	1030
20.5.4.1.23	Method 23:	Succinate Esters by Asymmetric Alkylation Using <i>N</i> -Acyloxazolidinones (Evans Asymmetric Alkylation)	1031

20.5.4.1.23.1	Variation 1:	Application to the Synthesis of a Pharmaceutical Agent . . . . .	1032
20.5.4.1.24	Method 24:	Succinate Esters by Aldol Approaches . . . . .	1033
20.5.4.1.24.1	Variation 1:	Using Chiral Imines . . . . .	1033
20.5.4.1.24.2	Variation 2:	2-Substituted 2-Hydroxysuccinates Using a Stoichiometric Chiral Tin Lewis Acid . . . . .	1034
20.5.4.1.24.3	Variation 3:	2,3-Disubstituted 2-Hydroxysuccinates Using a Stoichiometric Chiral Tin Lewis Acid . . . . .	1035
20.5.4.1.24.4	Variation 4:	Using Chiral <i>N</i> -Acylhydrazones . . . . .	1036
20.5.4.1.24.5	Variation 5:	Using a Catalytic Chiral Titanium Lewis Acid . . . . .	1037
20.5.4.1.24.6	Variation 6:	Using a Catalytic Chiral Copper Lewis Acid . . . . .	1038
20.5.4.1.24.7	Variation 7:	Use of a Fluorous Lewis Acid Catalyst . . . . .	1039
20.5.4.1.24.8	Variation 8:	Use of a Catalytic Tin Lewis Acid . . . . .	1041
20.5.4.1.24.9	Variation 9:	Application of a Chiral Tin Lewis Acid in Total Synthesis . . . . .	1042
20.5.4.1.24.10	Variation 10:	Use of a Cationic Scandium Lewis Acid . . . . .	1043
<b>20.5.5</b>	<b>Product Subclass 5: Alkynyl Alkanoates</b>

20.5.10.1.1	$\alpha,\beta$ -Didehydroamino Acid Esters		1131
20.5.10.1.1.1	Synthesis of $\alpha,\beta$ -Didehydroamino Acid Esters through Palladium(0)-Catalyzed Cross-Coupling Reactions		1131
20.5.10.1.1.1.1	Method 1:	Suzuki Coupling of $\beta$ -Bromoamidoacrylates with Aryl- and Vinylboronic Acids	1131
20.5.10.1.1.1.2	Method 2:	Heck Coupling of Amidoacrylates with Aryl and Vinyl Halides	1132
20.5.10.1.1.2	Synthesis of $\alpha,\beta$ -Didehydroamino Esters through Elimination		1133
20.5.10.1.1.2.1	Method 1:	Erlenmeyer Condensation	1133
20.5.10.1.1.2.2	Method 2:	Horner–Emmons Condensation	1134
20.5.10.1.2	2-Aminoalkanoic Acid Esters		1135
20.5.10.1.2.1	Introduction of the Side Chain: Alkylation of Glycine and Related Chiral Enolates		1136
20.5.10.1.2.1.1	Method 1:	Alkylation of Chiral Cyclic Enolates	1136
20.5.10.1.2.1.1.1	Variation 1:	Alkylation of Chiral Bis-lactim Ethers	1136
20.5.10.1.2.1.1.2	Variation 2:	Alkylation of Chiral Oxazinones	1138
20.5.10.1.2.1.2	Method 2:	Alkylation of Chiral Acyclic Schiff Bases	1139
20.5.10.1.2.1.3	Method 3:	Alkylation Utilizing Chiral Phase-Transfer Reagents	1141
20.5.10.1.2.1.4	Method 4:	Metal-Mediated Glycine Enolate Alkylation	1143
20.5.10.1.2.1.4.1	Variation 1:	Palladium-Catalyzed Allylation of Glycine Derivatives	1143
20.5.10.1.2.1.4.2	Variation 2:	Gold-Catalyzed Aldol Reactions	1146
20.5.10.1.2.1.4.3	Variation 3:	Titanium-Mediated Aldol Reactions	1147
20.5.10.1.2.1.4.4	Variation 4:	Aluminum–Salen-Catalyzed Aldol Reactions of 5-Alkoxyoxazoles	1149
20.5.10.1.2.2	Introduction of the $\alpha$ -Amino Group: Nucleophilic Amination		1150

20.5.10.1.2.2.1	Method 1:	Intermolecular Nucleophilic Addition to Chiral Epoxides	1150
20.5.10.1.2.2.2	Method 2:	Intramolecular Nucleophilic Addition to Epoxides	1151
20.5.10.1.2.2.3	Method 3:	Nucleophilic Displacement of Halides	1153
20.5.10.1.2.2.4	Method 4:	Nucleophilic Displacement of Sulfonic Esters and Cyclic Sulfates	1154
20.5.10.1.2.2.4.1	Variation 1:	Displacement of Trifluoromethanesulfonates	1154
20.5.10.1.2.2.4.2	Variation 2:	Opening Cyclic Sulfates	1155
20.5.10.1.2.2.5	Method 5:	Mitsunobu Displacement of an $\alpha$ -Hydroxy Group	1156
20.5.10.1.2.2.6	Method 6:	Nucleophilic Addition to $\pi$ -Allylpalladium Intermediates	1156
20.5.10.1.2.3		Introduction of the $\alpha$ -Amino Group: Electrophilic Amination of Enolates	1158
20.5.10.1.2.3.1	Method 1:	Proline Organocatalysis	1158
20.5.10.1.2.4		Introduction of the $\alpha$ -Hydrogen: Asymmetric Hydrogenation of $\alpha,\beta$ -Didehydroamino Acid Esters	1159
20.5.10.1.2.4.1	Method 1:	Homogeneous Catalysis	1159
20.5.10.1.2.4.1.1	Variation 1:	Cationic Rhodium Complexes of Chiral $C_2$ -Symmetric Bisphosphines	1162
20.5.10.1.2.4.1.2	Variation 2:	Cationic Rhodium Complexes of Chiral $C_2$ -Symmetric Bisphosphinites	1163
20.5.10.1.2.4.1.3	Variation 3:	Cationic Rhodium Complexes of P-Chirogenic Phosphines	1164
20.5.10.1.2.5		Introduction of the $\alpha$ -Hydrogen: Asymmetric Michael Addition	1164
20.5.10.1.2.5.1	Method 1:	Enantioselective Michael Addition–Hydrogen Atom Transfer	1164
20.5.10.1.2.5.2	Method 2:	Diastereoselective Organocuprate Michael Addition to Chiral Piperazine-2,5-dione Acceptors	1165
20.5.10.1.2.6		Introduction of Carboxylate: Asymmetric Addition of Nitriles to Imines (Strecker Synthesis)	1167
20.5.10.1.2.6.1	Method 1:	Chiral Binuclear Zirconium-Complex-Catalyzed Strecker Synthesis	1167
20.5.10.1.2.6.2	Method 2:	Chiral Aluminum–Salen Complex Catalyzed Strecker Synthesis	1168
20.5.10.1.2.7		Introduction of the Side Chain: Asymmetric Addition to Imino Esters	1170
20.5.10.1.2.7.1	Method 1:	Proline-Catalyzed Mannich Additions to Imino Esters	1170
20.5.10.1.2.7.2	Method 2:	Copper-Catalyzed Alkylations of Imino Esters	1171
20.5.10.1.2.7.3	Method 3:	Catalytic Asymmetric Mannich Additions to Imino Esters	1171
20.5.10.1.2.7.4	Method 4:	Catalytic Asymmetric Aza-Henry Addition to Imino Esters	1172
20.5.10.1.2.7.5	Method 5:	Palladium-Catalyzed Silyl Enol Ether Additions of Imino Esters	1174
20.5.10.1.2.7.6	Method 6:	Catalytic Asymmetric Aromatic Additions to Imino Esters	1175
20.5.10.1.2.7.7	Method 7:	Organometallic Additions to Chiral Imino Esters	1176
20.5.10.1.2.7.8	Method 8:	Mannich-Type Reaction of Electron-Rich Aromatic Compounds with Chiral Imino Lactones	1177
20.5.10.1.2.7.9	Method 9:	Rhodium-Catalyzed Addition of Arylboronic Acids to <i>N</i> -( <i>tert</i> -Butylsulfinyl)imino Esters	1178
20.5.10.1.2.8		Introduction of the Side Chain: Diels–Alder Cycloaddition Reactions	1180
20.5.10.1.2.8.1	Method 1:	Catalytic Asymmetric Diels–Alder Addition to Chiral Imino Esters	1180

20.5.10.1.2.8.2	Method 2:	Asymmetric Diels–Alder Addition to Chiral Imino Esters; Chiral Menthyl Derivatives .....	1181
20.5.10.1.2.8.3	Method 3:	Asymmetric Diels–Alder Addition to Chiral Imino Esters; Chiral 1-Phenylethylamine Derivatives .....	1181
20.5.10.1.2.9	Introduction of the $\alpha$ -Nitrogen: Sigmatropic Rearrangements .....		1182
20.5.10.1.2.9.1	Method 1:	Rearrangement of Allylic Trichloroacetimidates .....	1182
20.5.10.1.2.9.1.1	Variation 1:	Thermal Rearrangement of Chiral Allylic Trichloro- acetimidates .....	1183
20.5.10.1.2.9.1.2	Variation 2:	Enantioselective Palladium-Catalyzed Rearrangement of Prochiral Allylic Trichloroacetimidates .....	1184
20.5.10.1.2.10	Addition of the Carboxylate Group: Rearrangements .....		1185
20.5.10.1.2.10.1	Method 1:	Photolysis of Chromium–Carbene Complexes .....	1185
20.5.10.1.3	$\alpha$ -Alkyl- $\alpha$ -aminoalkanoic Acid Esters .....		1186
20.5.10.1.3.1	Introduction of the Side Chain: Alkylation of Chiral Amino Acid Enolates ....		1187
20.5.10.1.3.1.1	Method 1:	Alkylation of Bis-lactim Ethers .....	1187
20.5.10.1.3.1.2	Method 2:	Alkylation of Schiff Bases .....	1188
20.5.10.1.3.1.2.1	Variation 1:	Alkylation of Galactodialdehyde Aldimines .....	1188
20.5.10.1.3.1.2.2	Variation 2:	Alkylation of Camphor-Derived Sultams .....	1189
20.5.10.1.3.1.3	Method 3:	Transition-Metal-Catalyzed Asymmetric Allylic Alkylation of Azlactones .....	1190
20.5.10.1.3.1.3.1	Variation 1:	Palladium-Catalyzed Asymmetric Allylic Alkylation of Azlactones .....	1191
20.5.10.1.3.1.3.2	Variation 2:	Molybdenum-Catalyzed Asymmetric Allylic Alkylation of Azlactones .....	1192
20.5.10.1.3.2	Introduction of the Side Chain: Rearrangements .....		1193
20.5.10.1.3.2.1	Method 1:	Rearrangement of O-Acylated Azlactones .....	1193
20.5.10.1.3.3	Introduction of the $\alpha$ -Amino Group: Rearrangement of $\alpha,\alpha$ -Dialkyl- $\beta$ -carbonyl Carboxylic Acid Esters .....		1194
20.5.10.1.3.3.1	Method 1:	Curtius Rearrangement of $\alpha,\alpha$ -Dialkyl $\beta$ -Ester Carboxylic Acids .....	1195
20.5.10.1.3.3.2	Method 2:	Hofmann Rearrangement of $\alpha,\alpha$ -Dialkyl- $\beta$ -amido Esters ....	1195
20.5.10.1.3.3.3	Method 3:	Schmidt Rearrangement of $\beta$ -Oxo Esters .....	1196
20.5.10.1.3.3.4	Method 4:	Beckmann Rearrangement of $\beta$ -Oxime Esters .....	1197
20.5.11	<b>Product Subclass 11: 2-Heteroatom-Substituted Alkanoic Acid Esters</b> S. R. Chemler and T. P. Zabawa		
20.5.11	<b>Product Subclass 11: 2-Heteroatom-Substituted Alkanoic Acid Esters</b> ...		1203
20.5.11.1	Synthesis of Product Subclass 11 .....		1203
20.5.11.1.1	2-Haloalkanoates .....		1203
20.5.11.1.1.1	2-Fluoroalkanoates .....		1203
20.5.11.1.1.1.1	Method 1:	Electrophilic Fluorination of Alkanoates .....	1204
20.5.11.1.1.1.1.1	Variation 1:	Fluorination with <i>N</i> -Fluorobis(trifluoromethylsulfonyl)amine	1204

20.5.11.1.1.1.1.2	Variation 2:	Fluorination with 2-Fluoro-1,3,2-benzodithiazole 1,1,3,3-Tetraoxide .....	1205
20.5.11.1.1.1.1.3	Variation 3:	Catalytic Asymmetric Fluorination of $\alpha$ -Cyano Esters by Treatment with Chiral Palladium Complexes and <i>N</i> -Fluorobis(phenylsulfonyl)amine .....	1206
20.5.11.1.1.1.1.4	Variation 4:	Catalytic Asymmetric Fluorination of $\beta$ -Oxo Esters .....	1207
20.5.11.1.1.1.2	Method 2:	Kinetic Enzymatic Resolution of Racemic 2-Fluoroalkanoates .....	1207
20.5.11.1.1.2		2-Chloroalkanoates .....	1208
20.5.11.1.1.2.1	Method 1:	Chlorination of Ester Enolates .....	1208
20.5.11.1.1.2.1.1	Variation 1:	Catalytic Asymmetric Chlorination of $\beta$ -Oxo Esters Using Chiral Titanium Lewis Acids .....	1209
20.5.11.1.1.2.1.2	Variation 2:	Tandem Chlorination/Esterification of Acid Halides .....	1209
20.5.11.1.1.2.2	Method 2:	Nucleophilic Displacement of a Hydroxy Group .....	1211
20.5.11.1.1.3		2-Bromoalkanoates .....	1211
20.5.11.1.1.3.1	Method 1:	Electrophilic Bromination of Carbon Nucleophiles .....	1212
20.5.11.1.1.3.1.1	Variation 1:	Catalytic Asymmetric Bromination with Chiral Bis(dihydrooxazole)-Copper(II) Complexes .....	1212
20.5.11.1.1.3.1.2	Variation 2:	Asymmetric Tandem Bromination/Esterification of Acid Chlorides .....	1213
20.5.11.1.1.4		2-Iodoalkanoates .....	1213
20.5.11.1.1.4.1	Method 1:	Formation of 2-Iodoalkanoates with <i>N</i> -Iodosuccinimide under Microwave Conditions .....	1214
20.5.11.1.2		2-Hydroxyalkanoates .....	1214
20.5.11.1.2.1	Method 1:	Catalytic Asymmetric Hydrogenation of 2-Oxoalkanoates ...	1214
20.5.11.1.2.1.1	Variation 1:	Homogeneous Catalytic Asymmetric Hydrogenation of 2-Oxoalkanoates .....	1215
20.5.11.1.2.1.2	Variation 2:	Heterogeneous Catalytic Asymmetric Hydrogenation of 2-Oxoalkanoates .....	1216
20.5.11.1.2.1.3	Variation 3:	Examples of Industrially Important Enantioselective Hydrogenations .....	1217
20.5.11.1.2.2	Method 2:	Catalytic Asymmetric C—C Bond-Forming Reactions .....	1218
20.5.11.1.2.2.1	Variation 1:	Asymmetric Alkylation of 2-Hydroxyacetates .....	1219
20.5.11.1.2.2.2	Variation 2:	Enantioselective Addition of Silyl Enol Ethers to Ethyl Glyoxylate and 2-Oxoalkanoates .....	1220
20.5.11.1.2.3	Method 3:	Asymmetric Oxidations .....	1221
20.5.11.1.2.3.1	Variation 1:	Oxidation of Enolates with Oxaziridines .....	1221
20.5.11.1.2.3.2	Variation 2:	Sharpless Catalytic Asymmetric Dihydroxylation of $\alpha,\beta$ -Unsaturated Esters .....	1222
20.5.11.1.2.3.3	Variation 3:	Synthesis of the Taxol Side Chain Using the Sharpless Catalytic Asymmetric Aminohydroxylation of Cinnamate Esters .....	1224
20.5.11.1.2.4	Method 4:	Resolution .....	1224
20.5.11.1.3		2-Alkoxyalkanoates .....	1226
20.5.11.1.3.1	Method 1:	O-Alkylation of a 2-Hydroxyalkanoate .....	1226
20.5.11.1.3.2	Method 2:	2-Alkoxyalkanoates by C—C Bond-Forming Reactions .....	1226

20.5.11.1.4	2,3-Epoxyalkanoates .....	1227
20.5.11.1.4.1	Method 1: Asymmetric Epoxidation of $\alpha,\beta$ -Unsaturated Esters with Chiral Dioxiranes .....	1228
20.5.11.1.4.2	Method 2: Chiral Manganese(III)–Salen Catalyzed Enantioselective Epoxidation of <i>cis</i> - $\alpha,\beta$ -Unsaturated Esters .....	1229
20.5.11.1.4.3	Method 3: Catalytic Enantioselective Epoxidation of $\alpha,\beta$ -Unsaturated Esters Using a Lanthanide Lewis Acid Catalyst and <i>tert</i> -Butyl Hydroperoxide .....	1229
20.5.11.1.5	2-Sulfanylalkanoates .....	1230
20.5.11.1.5.1	Method 1: Sulfanylation of Enolates .....	1231
20.5.11.1.5.1.1	Variation 1: Sulfanylation of Ester Enolates .....	1231
20.5.11.1.5.1.2	Variation 2: Catalytic Enantioselective Sulfanylation of $\beta$ -Oxo Esters .....	1231
20.5.11.1.5.2	Method 2: Nucleophilic Displacement with Thiolates .....	1232
20.5.11.1.5.2.1	Variation 1: Direct Displacement of a Chiral Methanesulfonate .....	1232
20.5.11.1.5.2.2	Variation 2: Dynamic Resolution of 2-Bromoalkanoic Acid <i>N</i> -Methyl-pseudoephedrine Esters with Triphenylmethanethiol .....	1233
20.5.11.1.6	2-Selanylalkanoates .....	1234
20.5.11.1.6.1	Method 1: Selanylation of Enolates .....	1234
20.5.11.1.6.2	Method 2: Synthesis Using the Selenide Anion .....	1235
20.5.11.1.6.2.1	Variation 1: Opening of Epoxides .....	1235
20.5.11.1.6.2.2	Variation 2: Synthesis of Selenides by Nucleophilic Substitution .....	1235
20.5.11.1.7	2-Tellanylalkanoates .....	1236
20.5.11.1.7.1	Method 1: Synthesis Using the Telluride Anion .....	1236
20.5.11.1.7.2	Method 2: Synthesis from Iodotelluride .....	1237
20.5.12	<b>Product Subclass 12: Alk-2-ynoic Acid Esters</b> G. Evano	
20.5.12	<b>Product Subclass 12: Alk-2-ynoic Acid Esters</b> .....	1243
20.5.12.1	Synthesis of Product Subclass 12 .....	1243
20.5.12.1.1	Method 1: Esterification of Alk-2-ynoic Acids or Derivatives .....	1243
20.5.12.1.1.1	Variation 1: Direct Esterification of Alk-2-ynoic Acids .....	1243
20.5.12.1.1.2	Variation 2: Alkylation of Alk-2-ynoic Acids or Their Salts .....	1249
20.5.12.1.1.3	Variation 3: Alcoholysis of Alk-2-ynoic Acid Derivatives .....	1253
20.5.12.1.2	Method 2: Carboxylation of Alk-1-ynes .....	1255
20.5.12.1.2.1	Variation 1: Carboxylation of Alk-1-ynes by Deprotonation–Carboxylation .....	1255
20.5.12.1.2.2	Variation 2: Carboxylation of Lithium Acetylides Derived from 1,1-Dihaloalkenes Produced from Aldehydes by Corey–Fuchs Alkenation .....	1259
20.5.12.1.2.3	Variation 3: Carboxylation of Lithium Acetylides Derived from 1-Haloalkenes .....	1261
20.5.12.1.2.4	Variation 4: Palladium-Catalyzed Carboxylation of Alk-1-ynes with Chloroformates .....	1261
20.5.12.1.2.5	Variation 5: Palladium-Catalyzed Carboxylation of Alk-1-ynes with Carbon Monoxide and Alcohols .....	1262

20.5.12.1.2.6	Variation 6:	Copper-Catalyzed Carboxylation of Alk-1-yne with Carbon Dioxide and Alkyl Bromides	1264
20.5.12.1.3	Method 3:	Synthesis from Alk-2-enoic Acid Esters by Bromination–Dehydrobromination	1264
20.5.12.1.4	Method 4:	Using Wittig-Type Reactions	1265
20.5.12.1.4.1	Variation 1:	Reaction of [(Alkoxy carbonyl)methylene]triphenylphosphoranes with Acyl Chlorides, Anhydrides, or Carboxylic Acids	1265
20.5.12.1.4.2	Variation 2:	Reaction of [(Ethoxy carbonyl)iodomethyl]triphenylphosphonium Iodide with Aldehydes	1269
20.5.12.1.5	Method 5:	Modifications of Propynoic Acid Esters or Derivatives	1270
20.5.12.1.5.1	Variation 1:	Coupling of Propynoic Acid Esters	1270
20.5.12.1.5.2	Variation 2:	Coupling of Bromopropynoic Acid Esters	1274
20.5.12.1.5.3	Variation 3:	Addition of Metalated Propynoic Acid Esters to Electrophiles	1275
20.5.12.1.6	Method 6:	Dehydration of $\beta$ -Oxo Esters	1279
20.5.12.1.7	Method 7:	Deaminative Dehydration of $\alpha$ -Diazo- $\beta$ -hydroxy Esters Derived from Aldehydes	1279

### 20.5.13 Product Subclass 13: Arenecarboxylic Acid Esters

T. P. Yoon and E. N. Jacobsen

20.5.13	<b>Product Subclass 13: Arenecarboxylic Acid Esters</b>	1285	
20.5.13.1	Synthesis of Product Subclass 13	1285	
20.5.13.1.1	Method 1:	Friedel–Crafts Acylation	1285
20.5.13.1.2	Method 2:	Oxidation of Benzylic Ethers	1286
20.5.13.1.3	Method 3:	Radical Benzyloxylation	1287
20.5.13.1.4	Method 4:	Metalation/Carbonylation of Arenes	1288
20.5.13.1.4.1	Variation 1:	Direct Metalation	1288
20.5.13.1.4.2	Variation 2:	Reductive Metalation of Haloarenes	1289
20.5.13.1.4.3	Variation 3:	Lithium–Halogen Exchange with Haloarenes	1290
20.5.13.1.4.4	Variation 4:	Metalation of Tricarbonylchromium– $\eta^6$ -Arene Complexes	1291
20.5.13.1.5	Method 5:	Palladium-Mediated C–H Activation and Carbonylation	1292
20.5.13.1.6	Method 6:	Palladium-Catalyzed Carbonylation of Main-Group Arylmetal Species	1293
20.5.13.1.6.1	Variation 1:	Stille Coupling of Alkyl Chloroformates with Arylstannanes	1293
20.5.13.1.6.2	Variation 2:	Carbonylation of Arylboranes with Carbon Monoxide	1294
20.5.13.1.7	Method 7:	Transition-Metal-Catalyzed Carbonylation of Haloarenes	1294
20.5.13.1.8	Method 8:	Construction of the Aromatic Ring by Anionic Methods	1295
20.5.13.1.8.1	Variation 1:	Anionic [3 + 3] Aromatic Ring Formation with Chan’s Diene	1295
20.5.13.1.8.2	Variation 2:	Anionic [4 + 2] Aromatic Ring Formation by Phthalide Annulation	1296
20.5.13.1.8.3	Variation 3:	Anionic [5 + 1] Aromatic Ring Formation by Addition to Pyrylium Salts	1297
20.5.13.1.9	Method 9:	Construction of the Aromatic Ring by Radical Cyclizations of $\beta$ -Oxo Esters	1298
20.5.13.1.10	Method 10:	Construction of the Aromatic Ring by Cycloadditions	1298
20.5.13.1.10.1	Variation 1:	[4 + 2] Diels–Alder Cycloadditions and Aromatization	1298

20.5.13.1.10.2	Variation 2:	Transition-Metal-Catalyzed [2 + 2 + 2] Cyclotrimerization of Alkynes .....	1300
20.5.13.1.11	Method 11:	Construction of the Aromatic Ring by Electrocyclization and Elimination .....	1300
20.5.13.1.12	Method 12:	Oxidative Rearrangement of 2-(Hydroxyaryl) Acylhydrazones	1301
20.5.13.1.13	Method 13:	Lithiation and Alkylation of Benzoate Esters .....	1301
20.5.14	<b>Product Subclass 14: Alk-2-enoic Acid Esters</b>		
	C. D. Vanderwal and E. N. Jacobsen		
20.5.14	<b>Product Subclass 14: Alk-2-enoic Acid Esters</b> .....		1305
20.5.14.1	Synthesis of Product Subclass 14 .....		1305
20.5.14.1.1	Method 1:	Alkoxy carbonylation of Alkenyl Organometallics .....	1305
20.5.14.1.1.1	Variation 1:	Metalation/Alkoxy carbonylation of Alkenyl Ethers, Sulfides, and Enecarbamates .....	1305
20.5.14.1.1.2	Variation 2:	Reductive Metalation/Alkoxy carbonylation of Haloalkenes ..	1306
20.5.14.1.1.3	Variation 3:	Reductive Alkoxy carbonylation of Alkynes .....	1307
20.5.14.1.1.4	Variation 4:	Zirconium-Catalyzed Carboalumination/Alkoxy carbonylation of Alkynes .....	1308
20.5.14.1.1.5	Variation 5:	Palladium-Catalyzed Carbonylation/Alkoxylation of Alkenyl Electrophiles .....	1308
20.5.14.1.2	Method 2:	Elimination Reactions .....	1309
20.5.14.1.2.1	Variation 1:	Oxidative Elimination of Hydrogen from Alkanoic Acid Esters	1309
20.5.14.1.2.2	Variation 2:	Palladium-Mediated Oxidation of Silyl Enol Ethers .....	1310
20.5.14.1.2.3	Variation 3:	Elimination from $\beta$ -Heteroatom-Substituted Alkanoic Acid Esters .....	1311
20.5.14.1.2.4	Variation 4:	Elimination from $\alpha$ -Heteroatom-Substituted Alkanoic Acid Esters .....	1312
20.5.14.1.2.5	Variation 5:	Pericyclic <i>syn</i> -Elimination from $\alpha$ -Acetoxy, $\alpha$ -Sulfinyl, and $\alpha$ -Seleninyl Alkanoic Acid Esters .....	1313
20.5.14.1.2.6	Variation 6:	Reductive Elimination of Vicinal Heteroatom Substituents ..	1314
20.5.14.1.2.7	Variation 7:	Conversion of $\alpha$ -Oxo Esters into 2-Alkoxy- and 2-Aminoalk-2-enoic Acid Esters .....	1315
20.5.14.1.2.8	Variation 8:	Conversion of $\beta$ -Oxo Esters into 3-Alkoxy- and 3-Aminoalk-2-enoic Acid Esters .....	1316
20.5.14.1.3	Method 3:	Aldol-Type Condensations .....	1317
20.5.14.1.3.1	Variation 1:	Knoevenagel and Doebner-Modified Knoevenagel Condensations .....	1317
20.5.14.1.3.2	Variation 2:	Stobbe Condensation .....	1319
20.5.14.1.3.3	Variation 3:	Carbonyl Homologation by Siloxyalkynes and Alkoxyalkynes	1319
20.5.14.1.4	Method 4:	Wittig and Related Alkenylations .....	1320
20.5.14.1.4.1	Variation 1:	Wittig Reaction .....	1321
20.5.14.1.4.2	Variation 2:	Horner–Wittig Reaction .....	1322
20.5.14.1.4.3	Variation 3:	Horner–Wadsworth–Emmons Reaction .....	1322
20.5.14.1.4.4	Variation 4:	The Peterson Alkenation .....	1324
20.5.14.1.4.5	Variation 5:	Alkenation of $\alpha$ -Oxo Esters .....	1325
20.5.14.1.5	Method 5:	Eschenmoser Sulfide Contraction .....	1326

20.5.14.1.6	Method 6:	Semihydrogenation of Alk-2-ynoic Acid Esters .....	1326
20.5.14.1.7	Method 7:	Phosphine-Catalyzed Internal Redox Isomerization of Alk-2-ynoic Acid Esters to Dienoic Acid Esters .....	1328
20.5.14.1.8	Method 8:	Conjugate Addition to Alk-2-ynoic Acid Esters .....	1329
20.5.14.1.9	Method 9:	Cycloadditions of Alk-2-ynoic Acid Esters .....	1330
20.5.14.1.10	Method 10:	$\alpha$ -Alkylation of Preformed Alk-2-enoic Acid Esters .....	1332
20.5.14.1.11	Method 11:	Conjugate Addition–Elimination of 3-Heterosubstituted Alk-2-enoic Acid Esters .....	1333
20.5.14.1.12	Method 12:	Transition-Metal-Catalyzed Cross Couplings of Alk-2-enoic Acid Esters .....	1334
20.5.14.1.13	Method 13:	Heck Reaction .....	1336
20.5.14.1.14	Method 14:	Alkene Metathesis .....	1337
20.5.15	<b>Product Subclass 15: 3-Oxo- and 3,3-Diheteroatom-Substituted Alkanoic Acid Esters</b>		
	J. Beignet		
20.5.15	<b>Product Subclass 15: 3-Oxo- and 3,3-Diheteroatom-Substituted Alkanoic Acid Esters</b> .....		
			1341
20.5.15.1	Synthesis of Product Subclass 15 .....		
			1341
20.5.15.1.1	3-Oxoalkanoic Acid Esters .....		
			1341
20.5.15.1.1.1	Method 1:	Oxidation of 3-Hydroxyalkanoic Acid Esters .....	1341
20.5.15.1.1.2	Method 2:	Addition of Methyl Ketones to Carbonyl Compounds .....	1342
20.5.15.1.1.2.1	Variation 1:	Using Carbonates .....	1342
20.5.15.1.1.2.2	Variation 2:	Using Cyanoformates .....	1342
20.5.15.1.1.2.3	Variation 3:	Using Chloroformates .....	1343
20.5.15.1.1.3	Method 3:	Addition of 2,2-Dimethyl-1,3-dioxane-4,6-dione to Acylating Agents .....	1344
20.5.15.1.1.3.1	Variation 1:	Using Acid Chlorides .....	1344
20.5.15.1.1.3.2	Variation 2:	Using Activated Carboxylic Acids .....	1345
20.5.15.1.1.3.3	Variation 3:	Using Imidates .....	1346
20.5.15.1.1.4	Method 4:	Addition of Nitroalkanes to Ethyl Glyoxalate .....	1346
20.5.15.1.1.5	Method 5:	Addition of the Enolates of Acetates to Carbonyl Compounds .....	1347
20.5.15.1.1.5.1	Variation 1:	Using Acid Chlorides .....	1347
20.5.15.1.1.5.2	Variation 2:	Using Mixed Anhydrides .....	1348
20.5.15.1.1.5.3	Variation 3:	Using 1-Alkanoylimidazoles .....	1349
20.5.15.1.1.5.4	Variation 4:	Using <i>N</i> -Methoxy- <i>N</i> -methylamides .....	1349
20.5.15.1.1.5.5	Variation 5:	Using a Lithium (Trimethylsilyl)acetate and a 1-Acylimidazole .....	1350
20.5.15.1.1.6	Method 6:	Addition of Acetates to Acid Chlorides (via a Titanium Enolate) .....	1351
20.5.15.1.1.7	Method 7:	Addition of Acetates to Carbonyl Compounds (via a Formal Zinc Enolate) .....	1351
20.5.15.1.1.7.1	Variation 1:	Using a Reformatsky Reagent and an Acid Chloride .....	1351
20.5.15.1.1.7.2	Variation 2:	Using a Reformatsky Reagent and a Nitrile .....	1352
20.5.15.1.1.8	Method 8:	Claisen Condensation of Acetates .....	1353
20.5.15.1.1.9	Method 9:	Rearrangement of (Alkanoylsulfanyl)acetates .....	1353
20.5.15.1.1.10	Method 10:	Addition of Ethyl Diazoacetate to Aldehydes .....	1353

20.5.15.1.1.11	Method 11:	Reduction of Ethyl 3-Oxo-2-(triphenylphosphoranyl- idene)alkanoates .....	1354
20.5.15.1.1.12	Method 12:	Elimination of a Heterocyclic Substituent from a 3-Hetaryl-3-hydroxyalkanoate .....	1355
20.5.15.1.1.12.1	Variation 1:	Elimination of Pyrrole from 3-Hydroxy-3-(1 <i>H</i> -pyrrol-1- yl)alkanoates .....	1355
20.5.15.1.1.12.2	Variation 2:	Deprotection of <i>tert</i> -Butyl 3-Hydroxy-3-(1-methyl-1 <i>H</i> - imidazol-2-yl)nonanoate .....	1355
20.5.15.1.1.13	Method 13:	Pyrolysis of 3-Hydroxy-2-(phenylsulfinyl)alkanoic Acid Esters	1356
20.5.15.1.1.14	Method 14:	Acylation of 3-Oxoalkanoic Acid Esters .....	1356
20.5.15.1.1.14.1	Variation 1:	Acylation of Methyl Acetoacetate with Acid Chlorides .....	1356
20.5.15.1.1.14.2	Variation 2:	Acylation of 3-Oxoalkanoic Acid Esters with Nitriles .....	1357
20.5.15.1.1.15	Method 15:	Acylation of Malonates .....	1358
20.5.15.1.1.15.1	Variation 1:	Acylation of Dialkyl Malonates with Acid Chlorides .....	1358
20.5.15.1.1.15.2	Variation 2:	Acylation of Magnesium Methyl Malonate with 1-Acylimidazoles .....	1359
20.5.15.1.1.15.3	Variation 3:	Acylation of Ethyl Hydrogen Malonate .....	1359
20.5.15.1.1.15.4	Variation 4:	Acylation of Methyl Tetrahydro-2 <i>H</i> -pyran-2-yl Malonate .....	1360
20.5.15.1.1.16	Method 16:	Oxidation of Methyl Alk-2-ynoates .....	1360
20.5.15.1.1.17	Method 17:	Oxidation of Alk-2-enoates .....	1361
20.5.15.1.1.17.1	Variation 1:	Wacker Oxidation .....	1361
20.5.15.1.1.17.2	Variation 2:	Epoxidation and Rearrangement of Alk-2-enoic Esters .....	1362
20.5.15.1.1.18	Method 18:	Acetoacetylation of Alcohols Using Diketene .....	1362
20.5.15.1.1.19	Method 19:	Addition of Diketene to Aldehydes or Acetals .....	1363
20.5.15.1.1.19.1	Variation 1:	From Aldehydes .....	1363
20.5.15.1.1.19.2	Variation 2:	From Acetals .....	1364
20.5.15.1.1.20	Method 20:	Transesterification of 1,3-Dioxin-4-ones .....	1365
20.5.15.1.1.21	Method 21:	Alkylation of 3-Oxoalkanoic Acid Esters .....	1367
20.5.15.1.2		3,3-Difluoroalkanoic Acid Esters .....	1368
20.5.15.1.2.1	Method 1:	Fluorination of Ethyl 3-Oxoalkanoates .....	1368
20.5.15.1.2.2	Method 2:	Reaction of Fluorinated Alkenes and Trimethyl Orthoacetate	1368
20.5.15.1.2.3	Method 3:	Transesterification of 3,3-Difluoroalkanoic Acid Esters .....	1369
20.5.15.1.3		3,3-Dioxyalkanoic Acid Esters .....	1369
20.5.15.1.3.1	Method 1:	Addition of a Silyl Ketene Acetal to 2-Ethoxy-2-methyl-1,3- dioxolane .....	1369
20.5.15.1.3.2	Method 2:	Addition of a Silyl Ketene Acetal to a 1,3-Dioxolan-2-ylum Cation .....	1370
20.5.15.1.3.3	Method 3:	Addition of Pyrocatechol to Alkyl Penta-2,3-dienoates .....	1370
20.5.15.1.4		3-Oxy-3-sulfanylalkanoic Acid Esters .....	1371
20.5.15.1.4.1	Method 1:	Addition of 2-Sulfanylphenol to Alkyl Penta-2,3-dienoates ..	1371
20.5.15.1.5		3-Amino-3-oxyalkanoic Acid Esters .....	1371
20.5.15.1.5.1	Method 1:	Addition of the Lithium Enolate of an Ester to 1-Alkanoyl-1 <i>H</i> -pyrroles .....	1371
20.5.15.1.6		3,3-Disulfanylalkanoic Acid Esters .....	1372

20.5.15.1.6.1	Method 1: Addition of 4-Methylbenzene-1,2-dithiol to Methyl Penta-2,3-dienoate .....	1372
20.5.15.1.7	3-Amino-3-sulfanylalkanoic Acid Esters .....	1372
20.5.15.1.7.1	Method 1: Addition of 2-Aminoethanethiol to an Alk-2-ynoic Acid Ester .....	1372
20.5.16	<b>Product Subclass 16: 3-Heteroatom-Substituted Alkanoic Acid Esters</b> G. Sartori and R. Maggi	
20.5.16	<b>Product Subclass 16: 3-Heteroatom-Substituted Alkanoic Acid Esters</b> ...	1375
20.5.16.1	Synthesis of Product Subclass 16 .....	1375
20.5.16.1.1	Haloalkanoic Acid Esters .....	1375
20.5.16.1.1.1	Method 1: C=C Addition Reactions .....	1375
20.5.16.1.1.2	Method 2: Nucleophilic Substitutions .....	1376
20.5.16.1.1.3	Method 3: Cycloaddition Reactions .....	1377
20.5.16.1.1.4	Method 4: Ring Opening .....	1379
20.5.16.1.2	Hydroxy- and Sulfanylalkanoic Acid Esters and Derivatives .....	1380
20.5.16.1.2.1	Method 1: Addition to $\alpha,\beta$ -Unsaturated Esters .....	1380
20.5.16.1.2.1.1	Variation 1: Michael Addition .....	1380
20.5.16.1.2.1.2	Variation 2: Oxidative Addition .....	1381
20.5.16.1.2.2	Method 2: Nucleophilic Substitutions .....	1383
20.5.16.1.2.3	Method 3: Cycloaddition Reactions .....	1386
20.5.16.1.2.3.1	Variation 1: Cyclopropanation of Functionalized Alkenes .....	1386
20.5.16.1.2.3.2	Variation 2: [2 + 2] Cycloaddition .....	1387
20.5.16.1.2.3.3	Variation 3: Diels–Alder Reaction .....	1389
20.5.16.1.2.4	Method 4: Ring Opening of Cyclic Precursors .....	1391
20.5.16.1.2.4.1	Variation 1: Ring Opening of Lactones .....	1391
20.5.16.1.2.4.2	Variation 2: Ring Opening of Epoxides .....	1392
20.5.16.1.2.5	Method 5: Reduction of $\beta$ -Dicarbonyl Compounds .....	1393
20.5.16.1.2.5.1	Variation 1: Selective Reductions of $\beta$ -Oxo Esters .....	1393
20.5.16.1.2.5.2	Variation 2: Monoreduction of Malonates .....	1395
20.5.16.1.2.6	Method 6: Oxidation Reactions .....	1397
20.5.16.1.2.6.1	Variation 1: Oxidation of a Preexisting Alcohol or Aldehyde Function ...	1397
20.5.16.1.2.6.2	Variation 2: “Ex-novo” Oxidative Insertion of the Ester Function .....	1399
20.5.16.1.2.6.3	Variation 3: Oxidative Insertion of the Hydroxy Function .....	1400
20.5.16.1.2.7	Method 7: Carboxylation Reactions .....	1401
20.5.16.1.2.8	Methods 8: Miscellaneous Reactions .....	1402
20.5.16.1.3	Amino- and Phosphorylalkanoic Esters and Derivatives .....	1402
20.5.16.1.3.1	Method 1: Addition to $\alpha,\beta$ -Unsaturated Esters .....	1402
20.5.16.1.3.1.1	Variation 1: Michael Addition .....	1402
20.5.16.1.3.1.2	Variation 2: Oxidative Addition .....	1408
20.5.16.1.3.2	Method 2: Nucleophilic Substitutions .....	1410
20.5.16.1.3.3	Method 3: Cycloaddition Reactions .....	1412
20.5.16.1.3.3.1	Variation 1: Cyclopropanation of Functionalized Alkenes .....	1412
20.5.16.1.3.3.2	Variation 2: [2 + 2] Cycloaddition .....	1413
20.5.16.1.3.4	Method 4: Ring Opening of Cyclic Precursors .....	1415

20.5.16.1.3.4.1	Variation 1:	Ring Opening of Lactams .....	1415
20.5.16.1.3.4.2	Variation 2:	Ring Opening of Epoxides .....	1416
20.5.16.1.3.4.3	Variation 3:	Ring Opening of Isoxazolidines .....	1417
<b>20.6</b>	<b>Product Class 6: Lactones</b>

<b>20.7.2.1.8</b>	Method 8:	Optically Pure Spiro- $\lambda^4$ -sulfanes from Sulfides .....	1566
<b>20.7.2.1.8.1</b>	Variation 1:	Stereospecific Synthesis of Optically Active (Acylamino)(acyloxy)diarylspiro- $\lambda^4$ -sulfanes .....	1567
<b>20.7.2.1.8.2</b>	Variation 2:	Bis(acyloxy)spiro- $\lambda^4$ -sulfanes from Sulfoxides .....	1568

20.7.2.1.9	Method 9:	Trihalomethanesulfenyl Acetates and Trifluoroacetates from Sulfenyl Chlorides	1568
20.7.2.1.10	Method 10:	( <i>R</i> )-Acetyl 1,1'-Binaphthyl-2,2'-diyl Phosphite	1569
20.7.2.1.11	Method 11:	Carboxyalkyl $\alpha$ -Aminoalkylphosphonic Acid Monoesters from Spirophosphoranes	1570
20.7.2.1.12	Method 12:	A (Benzoyloxy)(benzyl)phenylphosphine–Tungsten Complex via Phospha-Wittig Reaction	1571
20.7.2.1.12.1	Variation 1:	Synthesis of 1,2-Oxaphosphole–Pentacarbonyltungsten Complexes	1571
20.7.2.1.13	Method 13:	Spiro- $\lambda^4$ -selanes from Selenides	1572
20.7.2.1.13.1	Variation 1:	Acyloxy- $\lambda^4$ -selanes from Carboxylic Acids by Chlorination	1573
20.7.2.1.13.2	Variation 2:	Trifluoroacetoxy- $\lambda^4$ -selanes from Selenoxides	1573
20.7.2.1.14	Method 14:	A Phenylselenyl Ester in Roseophilin Synthesis	1573
20.7.2.1.15	Method 15:	Benzeneselenenyl Trifluoroacetate from Benzeneseleninic Anhydride and Diphenyl Diselenide	1574
20.7.2.1.16	Method 16:	Spiro- $\lambda^4$ -tellane Synthesis Using the 2- <i>exo</i> -Hydroxy-10-bornyl Group as a Chiral Ligand	1574
20.7.2.1.17	Method 17:	Macrocyclic Multi- $\lambda^4$ -tellanes by Reaction of a Tellurium Salt with Phthalate Salts	1575
20.7.2.2	Applications of Product Subclass 2 in Organic Synthesis		1576
20.7.2.2.1	Method 1:	Synthesis of Adenosine Derivatives	1576
20.7.2.2.2	Method 2:	Conversion of Cyclobutanone <i>O</i> -Benzoyloximes into Nitriles	1577
20.7.2.2.3	Method 3:	Synthesis of Secondary Amines	1577
20.7.2.2.4	Method 4:	Synthesis of <i>N</i> -Hydroxy Peptides	1578
20.7.2.2.5	Method 5:	Synthesis of the <i>N</i> - <i>tert</i> -Butyl- <i>N</i> -(3,5-dinitrobenzoyl)nitroxyl Radical	1578
20.7.2.2.6	Method 6:	Addition of Trihalomethanesulfenyl Acetates to Alkenes	1579
20.7.2.2.7	Method 7:	Synthesis of Thioacetylated Lactosides	1579
20.7.2.2.8	Method 8:	Reaction of Cyclic Phosphites with $\beta$ -Dicarbonyl Compounds	1580
20.7.2.2.9	Method 9:	Applications of Benzeneselenenyl Trifluoroacetate	1581
20.7.2.2.10	Method 10:	One-Pot Method for Alkene Trifunctionalization	1582
20.7.2.2.11	Method 11:	Transformation of Allylsilanes into Allylamines via Phenyltellurinylation	1584
20.7.2.2.12	Method 12:	Cyclofunctionalization of Alkenyl Carbamates Using Benzenetellurinic Trifluoroacetate	1585
20.7.2.2.13	Method 13:	Diacetoxylation of Dienes by Acetoxytelluration Followed by Acetylation	1585
20.7.3	<b>Product Subclass 3: Acetyl Hypohalites</b>		1587
20.7.3.1	Synthesis of Product Subclass 3		1587
20.7.3.1.1	Method 1:	Synthesis of Acetyl Hypohalites	1587
20.7.3.2	Applications of Product Subclass 3 in Organic Synthesis		1588
20.7.3.2.1	Method 1:	Iodocyclization Using Acetyl Hypoiodite	1588
20.7.3.2.2	Method 2:	Fluorination Using Acetyl Hypofluorite	1589
20.7.3.2.2.1	Variation 1:	Direct Fluorination of Peptides Containing Tyrosine	1589
20.7.3.2.2.2	Variation 2:	Fluorination of 1,3-Dicarbonyl Derivatives	1589
20.7.3.2.2.3	Variation 3:	Fluorination of Nitro Compounds	1590

20.7.3.2.2.4	Variation 4: Synthesis of $\alpha$ -Fluorocarboxylates	1591
20.7.3.2.2.5	Variation 5: Acetoxylation of Nitrogen Heterocycles	1591
20.7.4	<b>Product Subclass 4: Peroxy Esters of Sulfur, Nitrogen, and Phosphorus</b>	1592
20.7.4.1	Synthesis of Product Subclass 4	1592
20.7.4.1.1	Method 1: Pentafluorosulfur Peroxy Esters from Acyl Fluorides and Pentafluoro- $\lambda^6$ -sulfane Hydroperoxide	1592
20.7.4.1.2	Method 2: 1-(Benzoylperoxy)-2,2,6,6-tetramethylpiperidine by Direct Reaction of Dibenzoyl Peroxide	1593
20.7.4.1.3	Method 2: Trifluoroacetyl Peroxynitrate by Nitration of Trifluoroperacetic Acid	1593
20.7.4.2	Applications of Product Subclass 4 in Organic Synthesis	1594
20.7.4.2.1	Method 1: As Radical Initiators Used in the Bulk Polymerization of Styrene	1594
20.8	<b>Product Class 8: Thiocarboxylic S-Acids, Selenocarboxylic Se-Acids, Tellurocarboxylic Te-Acids, and Derivatives</b> S. J. Collier	
20.8	<b>Product Class 8: Thiocarboxylic S-Acids, Selenocarboxylic Se-Acids, Tellurocarboxylic Te-Acids, and Derivatives</b>	1597
20.8.1	<b>Product Subclass 1: Thiocarboxylic S-Acids and Their Salts</b>	1597
20.8.1.1	Synthesis of Product Subclass 1	1598
20.8.1.1.1	Method 1: Acylation of a Sulfur Source	1598
20.8.1.1.2	Method 2: Direct Thiation of Carboxylic Acids	1600
20.8.1.1.3	Methods 3: Miscellaneous Procedures	1601
20.8.2	<b>Product Subclass 2: Thioanhydrides (Diacyl Sulfides)</b>	1603
20.8.2.1	Synthesis of Product Subclass 2	1604
20.8.2.1.1	Method 1: Reaction of an Acylating Agent with a Sulfide Source	1604
20.8.2.1.2	Method 2: Reaction of Thiocarboxylic Acids and an Acylating Agent	1607
20.8.2.1.3	Methods 3: Miscellaneous Procedures	1609
20.8.3	<b>Product Subclass 3: Acyl Sulfones</b>	1610
20.8.3.1	Synthesis of Product Subclass 3	1610
20.8.3.1.1	Method 1: Oxidation of Thiocarboxylic Acid S-Esters	1610
20.8.3.1.2	Methods 2: Miscellaneous Procedures	1611
20.8.4	<b>Product Subclass 4: Thiocarboxylic Acid S-Esters</b>	1611
20.8.4.1	Synthesis of Product Subclass 4	1612
20.8.4.1.1	Method 1: Synthesis from Thiocarboxylic Acids	1612
20.8.4.1.1.1	Variation 1: Alkylation of Thiocarboxylic Acids with Alkyl Halides or Related Compounds	1612
20.8.4.1.1.2	Variation 2: Addition Reactions	1616
20.8.4.1.1.3	Variation 3: Arylation of Thiocarboxylic Acids	1618
20.8.4.1.2	Method 2: Acylation of Thiols	1619
20.8.4.1.2.1	Variation 1: Acylation by Carboxylic Acid Halides	1619

20.8.4.1.2.2	Variation 2:	Acylation by Acid Anhydrides .....	1622
20.8.4.1.2.3	Variation 3:	Acylation by Carboxylic Acids .....	1624
20.8.4.1.2.4	Variation 4:	Acylation by Carboxylic Acid Esters .....	1627
20.8.4.1.3	Method 3:	Carbonylation Reactions .....	1630
20.8.4.1.4	Method 4:	Synthesis by Rearrangement .....	1634
20.8.4.1.5	Method 5:	Synthesis by Modification of the Acyl Group .....	1635
20.8.4.1.6	Method 6:	Synthesis by Modification of the Sulfur Unit .....	1638
20.8.4.1.7	Methods 7:	Miscellaneous Procedures .....	1639
20.8.5	<b>Product Subclass 5: Acylsulfenyl Halides</b> .....		1641
20.8.5.1	Synthesis of Product Subclass 5 .....		1641
20.8.5.1.1	Method 1:	Direct Halogenation of Thiocarboxylic S-Acids or Their Salts	1641
20.8.6	<b>Product Subclass 6: Acylsulfenic Acids and Derivatives</b> .....		1643
20.8.7	<b>Product Subclass 7: Diacyl Disulfides</b> .....		1645
20.8.7.1	Synthesis of Product Subclass 7 .....		1645
20.8.7.1.1	Method 1:	Oxidation of Thiocarboxylic S-Acids .....	1645
20.8.7.1.2	Method 2:	Reaction of Acid Chlorides and a Disulfide Source .....	1646
20.8.7.1.3	Method 3:	Reaction of Thiocarboxylic S-Acids and Electrophilic Acylsulfanyl Donors .....	1647
20.8.7.1.4	Methods 4:	Miscellaneous Procedures .....	1648
20.8.8	<b>Product Subclass 8: Acyl Disulfides (Acyl Dithioperoxides)</b> .....		1649
20.8.8.1	Synthesis of Product Subclass 8 .....		1649
20.8.8.1.1	Method 1:	Synthesis from Thiocarboxylic S-Acids and Electrophilic Sulfur Species .....	1649
20.8.8.1.2	Method 2:	Synthesis from Acylsulfenyl Chlorides and Sulfur Nucleo- philes .....	1650
20.8.8.1.3	Methods 3:	Miscellaneous Procedures .....	1651
20.8.9	<b>Product Subclass 9: S-Acyl Selenothioperoxides and Tellurothioperoxides</b>		1652
20.8.9.1	Synthesis of Product Subclass 9 .....		1653
20.8.9.1.1	Method 1:	Synthesis from a Thiocarboxylic S-Acid and an Electrophilic Selenium or Tellurium Fragment .....	1653
20.8.9.1.2	Method 2:	Synthesis from Acylsulfenyl Halides and Chalcogen Nucleo- philes .....	1654
20.8.9.1.3	Methods 3:	Miscellaneous Procedures .....	1655
20.8.10	<b>Product Subclass 10: Acyl Sulfenamides and Related Compounds</b> .....		1655
20.8.10.1	Synthesis of Product Subclass 10 .....		1656
20.8.10.1.1	Method 1:	Synthesis from Thiocarboxylic S-Acids and Electrophilic Amine Sources .....	1656
20.8.11	<b>Product Subclass 11: Selenocarboxylic Acid Se-Esters and Tellurocarboxylic Acid Te-Esters</b> .....		1658
20.8.11.1	Synthesis of Product Subclass 11 .....		1660
20.8.11.1.1	Method 1:	Selenocarboxylic Acid Se-Esters and Tellurocarboxylic Acid Te-Esters by Alkylation of Chalcogenocarboxylic Acids	1660

20.8.11.1.2	Method 2: Synthesis from Carboxylic Acids .....	1662
20.8.11.1.3	Method 3: Synthesis from Activated Esters .....	1665
20.8.11.1.4	Method 4: Synthesis from Carboxylic Acid Esters .....	1668
20.8.11.1.5	Methods 5: Miscellaneous Procedures .....	1670
20.8.12	<b>Product Subclass 12: Other Acylselenium and Acyltellurium Compounds</b>	1672
20.8.12.1	Synthesis of Product Subclass 12 .....	1673
20.8.12.1.1	Method 1: Synthesis of Selenocarboxylic <i>Se</i> -Acids and Tellurocarboxylic <i>Te</i> -Acids .....	1673
20.8.12.1.2	Method 2: Synthesis of Diacyl Selenides (Selenoanhydrides) and Diacyl Tellurides (Telluroanhydrides) .....	1674
20.8.12.1.3	Method 3: Synthesis of Acyl Diselenides, Acyl Ditellurides, and Mixed Chalcogen Derivatives .....	1674
20.8.12.1.4	Method 4: Synthesis of Diacyl Diselenides and Diacyl Ditellurides .....	1675
20.8.12.1.5	Method 5: Synthesis of Acylselenenyl Halides .....	1675
20.8.12.1.6	Method 6: Synthesis of Acylselenium(IV) and Acyltellurium(IV) Compounds .....	1676
