Introduction

J. G. de Vries

Introduction	1
---------------------------	---

2.1 Reduction of Aldehydes

N. Steinfeldt and K. Junge

2.1 Reduction of Aldehydes	7
2.1.1 Heterogeneous Catalytic Reduction	7
2.1.1.1 Reduction of Aldehydes by Molecular Hydrogen	7
2.1.1.1.1 Reduction of Aldehydes Using Ligand- and Polymer-Stabilized Nanoparticles and Clusters	7
2.1.1.1.2 Reduction of Aldehydes Using Supported Noble Metals	13
2.1.1.1.3 Reduction of Aldehydes Using Supported Non-Noble Metals and Metal Alloys	19
2.1.1.2 Reduction of Aldehydes by Transfer Hydrogenation	21
2.1.1.2.1 Reduction of Aldehydes Using Noble Metals	21
2.1.1.2.2 Reduction of Aldehydes Using Non-Noble Metals	25
2.1.2 Homogeneous Catalytic Reduction	28
2.1.2.1 Reduction of Aldehydes Using Noble Metals	28
2.1.2.2 Reduction of Aldehydes Using Non-Noble Metals	35
2.1.2.3 Reduction of Aldehydes by Transfer Hydrogenation	36

2.2 Transfer Hydrogenation of Ketones to Alcohols

A. Matsunami, Y. Kayaki, and T. Ikariya

2.2 Transfer Hydrogenation of Ketones to Alcohols	47
2.2.1 Transfer Hydrogenation of Ketones Using Nonchiral Catalysts	47
2.2.2 Asymmetric Transfer Hydrogenation of Simple Ketones	53
2.2.2.1 Asymmetric Transfer Hydrogenation of Aromatic Ketones Using Propan-2-ol	55
2.2.2.2 Asymmetric Transfer Hydrogenation of Aromatic Ketones Using Formic Acid or Formate Salts	57
2.2.2.2.1 Asymmetric Transfer Hydrogenation of Aromatic Ketones Using Formic Acid	57
2.2.2.2.2 Asymmetric Transfer Hydrogenation of Aromatic Ketones in Water Using Formate Salts	59
2.2.2.3 Asymmetric Transfer Hydrogenation of Alkynyl Ketones	60
2.2.2.4 Asymmetric Transfer Hydrogenation of Alkenyl Ketones	62
2.2.2.5 Asymmetric Transfer Hydrogenation of Aliphatic Ketones	64

2.2.3	Asymmetric Transfer Hydrogenation of Functionalized Ketones	66
2.2.3.1	Asymmetric Transfer Hydrogenation of α -Halo Ketones	66
2.2.3.2	Asymmetric Transfer Hydrogenation of Other α -Functionalized Ketones	69
2.2.3.3	Asymmetric Transfer Hydrogenation of Diketones	71
2.2.3.4	Asymmetric Transfer Hydrogenation of Oxo Esters and Oxo Amides	72
2.2.4	Dynamic Kinetic Resolution Involving Hydrogen Transfer	75
2.2.4.1	Asymmetric Transfer Hydrogenation of α -Substituted β -Oxo Carbonyl Compounds	76
2.2.4.1.1	Asymmetric Transfer Hydrogenation of α -Amino- β -oxo Esters	76
2.2.4.1.2	Asymmetric Transfer Hydrogenation of α -Alkoxy- β -oxo Esters	78
2.2.4.1.3	Asymmetric Transfer Hydrogenation of α -Substituted β -Oxo Amides	79
2.2.4.1.4	Asymmetric Transfer Hydrogenation of 2-Substituted 1,3-Diketones	80
2.2.4.1.5	Asymmetric Transfer Hydrogenation of β -Oxo Phosphonates and β -Oxo Sulfones	82
2.2.4.2	Asymmetric Transfer Hydrogenation of α -Substituted Ketones	84
2.2.4.2.1	Asymmetric Transfer Hydrogenation of β -Substituted α -Oxo Esters and Related Phosphonates	84
2.2.4.2.2	Asymmetric Transfer Hydrogenation of α -Substituted Cyclic Ketones	86
2.2.4.3	Asymmetric Transfer Hydrogenation of β -Substituted Ketones	87
2.2.5	Transfer Hydrogenation of Esters	88
2.3	Catalytic Hydrogenation of Ketones Q. Llopis, T. Ayad, P. Phansavath, and V. Ratovelomanana-Vidal	
2.3	Catalytic Hydrogenation of Ketones	93
2.3.1	Racemic Hydrogenation of Ketones	93
2.3.1.1	Hydrogenation of Aryl and Hetaryl Ketones	93
2.3.1.2	Hydrogenation of α,β -Unsaturated Ketones	98
2.3.1.3	Hydrogenation of Dialkyl Ketones	100
2.3.2	Enantioselective Hydrogenation of Ketones	101
2.3.2.1	Hydrogenation of α,β -Unsaturated Ketones	101
2.3.2.2	Hydrogenation of Simple Alkyl Ketones	107
2.3.2.3	Hydrogenation of Functionalized Ketones	109
2.3.2.3.1	Reduction of α -Amino Ketone Derivatives	109
2.3.2.3.2	Reduction of α -Hydroxy Ketone Derivatives	113
2.3.2.3.3	Reduction of α -Oxo Phosphonates	115
2.3.2.3.4	Dynamic Kinetic Resolution of Configurationally Labile Ketones	116
2.3.2.3.4.1	Reduction of α,α -Disubstituted Ketones	116

2.3.2.3.4.2	Reduction of α -Amino- β -Oxo Esters and Phosphonates	118
2.3.2.3.4.3	Reduction of α, α' -Disubstituted Cyclic Ketones	121
2.3.2.3.5	Reduction of β -Substituted Ketones	122
2.3.2.3.5.1	Reduction of β -Amino Ketones	122
2.3.2.3.5.2	Reduction of β -Oxo Esters	124
2.3.2.3.5.3	Reduction of β -Oxo Sulfones, Sulfonamides, and Phosphonates	128
2.3.2.3.6	Miscellaneous Ketone Reductions	131
2.3.2.4	Hydrogenation of Aryl and Hetaryl Ketones	136
2.3.2.4.1	Ruthenium-Catalyzed Hydrogenation of Aryl and Hetaryl Ketones	136
2.3.2.4.1.1	Using Ruthenium/Bisphosphine/Diamine Complexes	136
2.3.2.4.1.2	Using Tethered Ruthenium Complexes	142
2.3.2.4.1.3	Using Ruthenium Complexes Bearing Monodentate Phosphoramidite Ligands	143
2.3.2.4.1.4	Using Ruthenium Complexes Featuring Metallocenyl Ligands	144
2.3.2.4.2	Iron-Catalyzed Hydrogenation of Aryl and Hetaryl Ketones	147
2.3.2.4.3	Iridium-Catalyzed Hydrogenation of Aryl and Hetaryl Ketones	149
2.3.2.4.4	Copper-Catalyzed Hydrogenation of Aryl and Hetaryl Ketones	154
2.3.2.4.5	Rhodium-Catalyzed Hydrogenation of Aryl and Hetaryl Ketones	156
2.3.2.4.6	Osmium-Catalyzed Hydrogenation of Aryl and Hetaryl Ketones	157
2.4	Hydrogenolysis of Aryl Ketones and Aldehydes, Benzylic Alcohols and Amines, and Their Derivatives B. Ciszek and I. Fleischer	
2.4	Hydrogenolysis of Aryl Ketones and Aldehydes, Benzylic Alcohols and Amines, and Their Derivatives	163
2.4.1	Hydrogenolysis of C=O Bonds	164
2.4.1.1	Hydrogenolysis of Aromatic Aldehydes and Ketones	164
2.4.2	Hydrogenolysis of C–O Bonds	168
2.4.2.1	Hydrogenolysis of Benzylic Alcohols	168
2.4.2.1.1	Hydrogenolysis of Benzylic Alcohols Using Hydrogen Gas as Reductant	169
2.4.2.1.2	Transfer Hydrogenolysis of Benzylic Alcohols	170
2.4.2.1.2.1	Raney Metal Catalyzed Transfer Hydrogenolysis Using Propan-2-ol as Reductant	170
2.4.2.1.2.2	Palladium on Carbon Catalyzed Transfer Hydrogenolysis Using Formic Acid as Reductant	172
2.4.2.2	Hydrogenolysis of Benzylic <i>O,O</i> - and <i>N,O</i> -Acetals	174
2.4.2.3	Hydrogenolysis of Benzylic Ethers	175
2.4.2.3.1	Hydrogenolysis of Acyclic Benzylic Ethers	175
2.4.2.3.2	Hydrogenolysis of Cyclic Benzylic Ethers	177

2.4.2.4	Hydrogenolysis of O-Benzyl Esters	179
2.4.3	Hydrogenolysis of C—N Bonds	182
2.4.3.1	Hydrogenolysis of Benzylic Amines	182
2.5	Reduction of Carboxylic Acids and Derivatives to Aldehydes and Alcohols	
<hr/>		
2.5.1	Homogeneous Catalytic Hydrogenation of Carboxylic Acids, Anhydrides, Esters, Amides, and Acid Chlorides	
	Y. Shi, D. J. Cole-Hamilton, and P. C. J. Kamer	
<hr/>		
2.5.1	Homogeneous Catalytic Hydrogenation of Carboxylic Acids, Anhydrides, Esters, Amides, and Acid Chlorides	187
2.5.1.1	Reduction of Esters	188
2.5.1.1.1	Hydrogenation of Aliphatic, Aromatic, and Difunctional Esters and Lactones	188
2.5.1.1.1.1	Hydrogenation of Esters Using Triphos Ligands	188
2.5.1.1.1.2	Hydrogenation of Esters Using Pincer Ligands	192
2.5.1.1.1.3	Hydrogenation of Esters Using Other Ligands	197
2.5.1.1.2	Hydrogenation of Optically Active Esters	200
2.5.1.1.3	Hydrogenation of Fatty Acid Esters	204
2.5.1.1.4	Hydrogenation of Esters Using Iron Catalysts	205
2.5.1.1.5	Hydrogenation of Esters with Manganese Catalysts	208
2.5.1.2	Reduction of Carboxylic Acids	211
2.5.1.3	Reduction of Anhydrides	221
2.5.1.3.1	Hydrogenation of Anhydrides to Acids, Esters, and Lactones	221
2.5.1.3.1.1	Hydrogenation of Aliphatic and Aromatic Anhydrides	221
2.5.1.3.1.2	Enantioselective Hydrogenation of Anhydrides	225
2.5.1.3.2	Hydrogenation of Anhydrides to Alcohols	227
2.5.1.4	Reduction of Amides	228
2.5.1.4.1	C—N Bond Cleavage	228
2.5.1.4.1.1	Earth-Abundant Metal Complexes for Amide Hydrogenation	233
2.5.1.4.2	C—O Bond Cleavage	239
2.5.1.5	Reduction of Acid Chlorides	249
2.5.1.6	Conclusions	250

2.5.2	Heterogeneous Catalytic Hydrogenation of Carboxylic Acids, Anhydrides, Esters, Amino Acids, and Amides M. Besson and C. Pinel	
<hr/>		
2.5.2	Heterogeneous Catalytic Hydrogenation of Carboxylic Acids, Anhydrides, Esters, Amino Acids, and Amides	255
2.5.2.1	Hydrogenation of Carboxylic Acids to Aldehydes	255
2.5.2.1.1	Hydrogenation of Aromatic Acids to Aldehydes	256
2.5.2.1.2	Hydrogenation of Aliphatic Acids to Aldehydes	257
2.5.2.2	Hydrogenation of Acid Anhydrides	258
2.5.2.3	Hydrogenation of Esters to Alcohols	260
2.5.2.3.1	Hydrogenation of Ethyl Acetate to Ethanol	261
2.5.2.3.2	Hydrogenation of Saturated Fatty Esters to Fatty Alcohols	261
2.5.2.3.3	Hydrogenation of Unsaturated Esters to Unsaturated Alcohols	262
2.5.2.4	Hydrogenation of Diesters to Diols	263
2.5.2.5	Hydrogenation of Unfunctionalized Carboxylic Acids to Alcohols	265
2.5.2.5.1	Hydrogenation of Short-Chain Monocarboxylic Acids	265
2.5.2.5.2	Hydrogenation of Fatty Carboxylic Acids to Fatty Alcohols	266
2.5.2.6	Hydrogenation of Biomass-Derived Functionalized (Di)Carboxylic Acids	268
2.5.2.6.1	Hydrogenation of Lactic Acid to Propane-1,2-diol	268
2.5.2.6.2	Hydrogenation of Arabinonic Acid to Arabitol	269
2.5.2.6.3	Hydrogenation of Succinic Acid	270
2.5.2.6.3.1	Hydrogenation of Succinic Acid to γ -Butyrolactone	270
2.5.2.6.3.2	Hydrogenation of Succinic Acid to Butane-1,4-diol	271
2.5.2.6.3.3	Hydrogenation of Succinic Acid to Tetrahydrofuran	272
2.5.2.6.4	Hydrogenation of Other Biobased Polyacids	273
2.5.2.6.5	Hydrogenation of Levulinic Acid	274
2.5.2.7	Hydrogenation of Amino Acids to Amino Alcohols	278
2.5.2.8	Hydrogenation of Amides to Amines	279
2.5.2.8.1	Hydrogenation of Primary Amides	279
2.5.2.8.2	Hydrogenation of Secondary Amides	281
2.5.2.8.3	Hydrogenation of Tertiary Amides	281

2.6	Reduction of Imines and Reductive Amination of Aldehydes and Ketones C. Claver, I. Peñafiel, M. Urrutigoity, and P. Kalck	
<hr/>		
2.6	Reduction of Imines and Reductive Amination of Aldehydes and Ketones	287
2.6.1	Reduction of Imines	290
2.6.1.1	Asymmetric Hydrogenation of Acyclic Imines	290
2.6.1.1.1	Using Iridium Catalysts	290
2.6.1.1.1.1	Iridium Catalysts with P,P-Ligands	291
2.6.1.1.1.2	Iridium Catalysts with P,N- or N,N-Ligands	294
2.6.1.1.1.3	Iridium Catalysts with Monodentate Phosphorus Ligands	298
2.6.1.1.2	Using Ruthenium Catalysts	300
2.6.1.1.3	Using Rhodium Catalysts	300
2.6.1.1.4	Using Palladium Catalysts	302
2.6.1.2	Asymmetric Hydrogenation of Cyclic Imines	303
2.6.1.3	Asymmetric Transfer Hydrogenation of Imines	304
2.6.1.3.1	Using Ruthenium Catalysts	305
2.6.1.3.2	Using Iridium and Rhodium Catalysts	310
2.6.1.3.3	Using Iron Catalysts	311
2.6.2	Reductive Amination of Aldehydes and Ketones	313
2.6.2.1	Reductive Amination Using Heterogeneous Catalysis	313
2.6.2.2	Reductive Amination Using Homogeneous Catalysis	318
2.6.2.3	Progress in Diastereoselective and Enantioselective Reductive Amination	321
2.6.2.4	Reductive Amination by Transfer Hydrogenation	324
2.6.2.5	Reductive Amination via a Nonclassical Approach	326
2.6.3	Conclusions	326
2.7	Reduction of Nitro Compounds to Amines, Azo Compounds, Hydroxylamines, and Oximes, and Reduction of N-Oxides to Amines P. Puylaert, A. Savini, and S. Hinze	
<hr/>		
2.7	Reduction of Nitro Compounds to Amines, Azo Compounds, Hydroxylamines, and Oximes, and Reduction of N-Oxides to Amines	331
2.7.1	Reduction of Nitro Compounds	331
2.7.1.1	Reduction of Nitro Compounds to Amines	331
2.7.1.1.1	Direct Catalytic Hydrogenation	332
2.7.1.1.1.1	Selective Catalytic Hydrogenation with Heterogeneous Catalysts	333
2.7.1.1.1.2	Selective Catalytic Hydrogenation with Homogeneous Catalysts	336
2.7.1.1.2	Transfer Hydrogenation	338

2.7.1.1.3	Reduction Using Carbon Monoxide and Water	339
2.7.1.2	Reduction of Nitro Compounds to Azo Compounds	340
2.7.1.2.1	Direct Catalytic Hydrogenative Coupling of Nitro Compounds	340
2.7.1.2.2	Catalytic Hydrogenative Coupling of Nitro Compounds under Transfer-Hydrogenation Conditions	342
2.7.1.3	Reduction of Nitro Compounds to Hydroxylamines	343
2.7.1.3.1	Catalytic Hydrogenation of Aromatic Nitro Compounds to Hydroxylamines	343
2.7.1.3.2	Catalytic Hydrogenation of Aliphatic Nitro Compounds to Hydroxylamines	344
2.7.1.4	Reduction of Nitro Compounds to Oximes	345
2.7.2	Reduction of <i>N</i> -Oxides to Amines	346
2.7.2.1	Molybdenum-Catalyzed Deoxygenation of Aromatic <i>N</i> -Oxides Using Pinacol as Reducing Agent	346
2.8	Reduction of Azides Y. Monguchi and H. Sajiki	
2.8	Reduction of Azides	353
2.8.1	Catalytic Hydrogenation of Azides	353
2.8.2	Catalytic Transfer Hydrogenation of Azides	358
2.8.3	Chemoselective Hydrogenation of Alkynes without Reduction of Azides	360
2.8.4	Continuous Flow Hydrogenation of Azides	361
2.8.5	Reductive Formylation and Alkylation of Azides	363
2.8.6	Asymmetric Transfer Hydrogenation of Azide-Containing Compounds	367
2.8.7	Summary and Conclusions	370
2.9	Catalytic Reduction of Nitriles D. B. Bagal and B. M. Bhanage	
2.9	Catalytic Reduction of Nitriles	375
2.9.1	Reduction of Nitriles to Primary Amines	376
2.9.1.1	Ruthenium-Catalyzed Reduction of Nitriles	376
2.9.1.1.1	Reduction of Benzonitrile Using Amido–Ruthenium Complexes	376
2.9.1.1.2	Reduction of Nitriles Using an In Situ Generated Ruthenium/Phosphine Catalytic System	377
2.9.1.1.3	Ruthenium– <i>N</i> -Heterocyclic Carbene Catalyzed Reduction of Nitriles	379
2.9.1.1.4	Ruthenium–Benzylidene and Ruthenium–Indenylidene Catalyzed Reduction of Nitriles	380
2.9.1.1.5	Ruthenium-Catalyzed Transfer Hydrogenation of Nitriles	381
2.9.1.1.6	Ruthenium–(Imidazolylmethyl)phosphine Catalyzed Reduction of Nitriles	382

2.9.1.1.7	Reduction of Nitriles Using a Nonclassical Ruthenium Hydride Pincer Complex	383
2.9.1.2	Rhodium-Catalyzed Reduction of Nitriles	384
2.9.1.3	Reduction of Nitriles Using Other Transition-Metal Catalysts	385
2.9.1.3.1	Cobalt-Catalyzed Hydrogenation of Nitriles	385
2.9.1.3.2	Selective Catalytic Hydrogenation of Nitriles Using a Manganese Pincer Complex	387
2.9.1.3.3	Hydrogenation of Nitriles Using Iron Complexes	387
2.9.2	Reduction of Nitriles to Secondary and Tertiary Amines	390
2.9.2.1	Platinum-Nanowire-Catalyzed Synthesis of Secondary Amines	390
2.9.2.2	Ruthenium-Catalyzed Transfer Hydrogenation of Nitriles	391
2.9.2.3	Ruthenium–N-Heterocyclic Carbene Catalyzed Reduction of Nitriles to Secondary Amines	393
2.9.3	Reduction of Nitriles over Supported Metal/Heterogeneous Catalysts	394
2.9.3.1	Hydrogenation of Benzonitrile over Palladium Catalysts	395
2.9.3.2	Reduction of Nitriles to Primary Amines in Supercritical Carbon Dioxide	395
2.9.3.3	Palladium-on-Carbon Catalyzed Selective Transfer Hydrogenation of Nitriles	396
2.9.3.4	Cobalt-Catalyzed Selective Reduction of Nitriles to Primary Amines	397
	Keyword Index	401
	Author Index	421
