Table of Contents

Introduction

J. P. Wolfe

Introduction	1
---------------------------	---

2.1 C–N Bond-Forming Reactions

2.1.1 C–N Bond-Forming Reactions of Alkylamines

2.1.1.1 Alkylamines with Aryl and Alkenyl Electrophiles

M. Tomás-Gamasa

2.1.1.1 Alkylamines with Aryl and Alkenyl Electrophiles	9
2.1.1.1.1 Copper-Catalyzed Coupling of Alkylamines with Aryl Halides	9
2.1.1.1.1.1 Using Amino Acids as Ligands	12
2.1.1.1.1.2 Using Ethylene Glycol as a Ligand	12
2.1.1.1.1.3 Using 2-Acylcyclohexanones as Ligands	14
2.1.1.1.1.4 Using 8-Hydroxyquinoline 1-Oxide as a Ligand	15
2.1.1.1.1.5 Room-Temperature Coupling of Amines Promoted by Ionic Organic Bases	16
2.1.1.1.1.6 Environmentally Friendly Ullmann Amination Reactions	17
2.1.1.1.1.6.1 Ligand-Free Copper-Catalyzed N-Arylation Reactions of Amino Acids and Amino Alcohols	17
2.1.1.1.1.6.2 Heterogeneous Coupling of Amines and Aryl Halides Using Copper–Aluminum Hydrotalcite	19
2.1.1.1.1.6.3 Aqueous-Phase Coupling of Amines and Aryl Halides without Ligands or Organic Solvents	19
2.1.1.1.1.7 Synthesis of Primary Anilines by Coupling of Aryl Halides with Aqueous Ammonia	20
2.1.1.1.1.7.1 Using Copper(I) Oxide without Ligands or Base	21
2.1.1.1.1.7.2 Using Copper(I) Iodide Nanoparticles without Ligands or Organic Solvents	22
2.1.1.1.1.8 Copper-Catalyzed Coupling of Alkylamines with Boronic Acid Derivatives (Chan–Lam–Evans Reaction)	23
2.1.1.1.2 Palladium-Catalyzed Coupling of Alkylamines with Aryl and Alkenyl Halides ...	24
2.1.1.1.2.1 Palladium-Catalyzed Coupling of Alkylamines with Aryl Halides	27
2.1.1.1.2.1.1 Using Dialkyl(biaryl)phosphine Ligands	27
2.1.1.1.2.1.2 Using N-Heterocyclic Carbene Ligands	29

2.1.1.1.2.1.3	Using a Multiligand System	30
2.1.1.1.2.1.4	Using a Bisphosphine Ligand	32
2.1.1.1.2.2	Palladium-Catalyzed Coupling of Alkylamines with Alkenyl Halides	33
2.1.1.1.2.3	Synthesis of Aniline Derivatives by Coupling of Ammonia with Aryl Halides ...	34
2.1.1.1.2.3.1	Using a Bisphosphine Ligand	35
2.1.1.1.2.3.2	Using Biarylphosphine Ligands	36
2.1.1.1.2.3.3	Using a P,N-Ligand	37
2.1.1.2	Alkylamines with Hetaryl Electrophiles U. Scholz, W. Dong, J. Feng, and W. Shi	
<hr/>		
2.1.1.2	Alkylamines with Hetaryl Electrophiles	43
2.1.1.2.1	Palladium-Catalyzed Hetaryl Amination	43
2.1.1.2.1.1	Benzimidazole Electrophiles	43
2.1.1.2.1.2	Benzothiophene Electrophiles	44
2.1.1.2.1.3	Benzothiazole Electrophiles	45
2.1.1.2.1.4	Carbazole Electrophiles	47
2.1.1.2.1.5	Furan Electrophiles	48
2.1.1.2.1.6	Indole Electrophiles	50
2.1.1.2.1.7	Isoquinoline Electrophiles	51
2.1.1.2.1.8	Oxazole Electrophiles	52
2.1.1.2.1.9	Phenanthroline Electrophiles	54
2.1.1.2.1.10	Purine Electrophiles	54
2.1.1.2.1.11	Pyrazine Electrophiles	55
2.1.1.2.1.12	Pyrazole Electrophiles	56
2.1.1.2.1.13	Pyridazine Electrophiles	57
2.1.1.2.1.14	Pyridine Electrophiles	58
2.1.1.2.1.14.1	2-Halo- or 2-(Tosyloxy)pyridines	58
2.1.1.2.1.14.1.1	2-Chloropyridines	58
2.1.1.2.1.14.1.2	2-Bromopyridines	60
2.1.1.2.1.14.1.3	2-Iodo- and 2-(Tosyloxy)pyridines	64
2.1.1.2.1.14.2	3-Halopyridines	65
2.1.1.2.1.14.2.1	3-Chloropyridines	65
2.1.1.2.1.14.2.2	3-Bromopyridines	66
2.1.1.2.1.14.2.3	3-Iodo- and 3-(Tosyloxy)pyridines	67
2.1.1.2.1.14.3	4-Halopyridines	68
2.1.1.2.1.15	Pyridinone Electrophiles	70

2.1.1.2.1.16	Pyrimidine Electrophiles	70
2.1.1.2.1.17	Pyrrole Electrophiles	75
2.1.1.2.1.18	Quinoline Electrophiles	76
2.1.1.2.1.19	Thiazole Electrophiles	83
2.1.1.2.1.20	Thiophene Electrophiles	84
2.1.1.2.1.21	Triazole Electrophiles	85
2.1.1.2.1.22	Quinolin-2-one Electrophiles	86
2.1.1.2.2	Copper-Catalyzed Hetaryl Amination	87
2.1.1.2.2.1	Benzimidazole Electrophiles	87
2.1.1.2.2.2	Benzothiophene Electrophiles	88
2.1.1.2.2.3	Pyrazole Electrophiles	89
2.1.1.2.2.4	Pyridine Electrophiles	89
2.1.1.2.2.5	Pyrimidine Electrophiles	91
2.1.1.2.2.6	Thiazole Electrophiles	93
2.1.1.2.2.7	Thiophene Electrophiles	94
2.1.1.2.2.8	Benzothiazole Electrophiles	95
2.1.1.2.2.9	Quinoline Electrophiles	96
2.1.1.2.3	Other-Metal-Catalyzed Hetaryl Amination	97
2.1.1.2.3.1	Benzoxazole Electrophiles	97
2.1.1.2.3.2	Pyridine Electrophiles	98
2.1.1.2.3.3	Other Hetaryl Electrophiles	102

2.1.2 C–N Bond-Forming Reactions of Aryl- and Hetarylamines

2.1.2.1 Aryl- and Hetarylamines with Aryl and Alkenyl Electrophiles

M. B. Hay and J. D. Hicks

2.1.2.1	Aryl- and Hetarylamines with Aryl and Alkenyl Electrophiles	107
2.1.2.1	Aryl- and Hetarylamines with Aryl and Alkenyl Electrophiles	107
2.1.2.1.1	Primary Aromatic Amines	111
2.1.2.1.1.1	Aryl Iodides	111
2.1.2.1.1.1.1	Palladium-Catalyzed Coupling Reactions	111
2.1.2.1.1.1.2	Copper-Catalyzed Coupling Reactions	113
2.1.2.1.1.2	Aryl Bromides	114
2.1.2.1.1.2.1	Palladium-Catalyzed Coupling Reactions	114
2.1.2.1.1.2.2	Copper-Catalyzed Coupling Reactions	119
2.1.2.1.1.3	Aryl Chlorides	121

2.1.2.1.1.4	Aryl Sulfonates	126
2.1.2.1.1.4.1	Aryl Trifluoromethanesulfonates and Nonafluorobutanesulfonates	126
2.1.2.1.1.4.2	Aryl Benzenesulfonates and 4-Toluenesulfonates	127
2.1.2.1.1.4.3	Aryl Methanesulfonates	128
2.1.2.1.1.5	Arylboronic Acids/Esters (Chan–Lam–Evans Coupling)	129
2.1.2.1.1.6	Alkenyl Halides	130
2.1.2.1.2	Secondary Aromatic Amines	132
2.1.2.1.2.1	Aryl Iodides	132
2.1.2.1.2.1.1	Palladium-Catalyzed Coupling Reactions	132
2.1.2.1.2.1.2	Copper-Catalyzed Coupling Reactions	133
2.1.2.1.2.2	Aryl Bromides	135
2.1.2.1.2.2.1	Palladium-Catalyzed Coupling Reactions	135
2.1.2.1.2.2.2	Copper-Catalyzed Coupling Reactions	140
2.1.2.1.2.3	Aryl Chlorides	141
2.1.2.1.2.4	Aryl Sulfonates	146
2.1.2.1.2.4.1	Aryl Trifluoromethanesulfonates	146
2.1.2.1.2.4.2	Aryl Benzenesulfonates	147
2.1.2.1.2.4.3	Aryl Methanesulfonates	148
2.1.2.1.2.5	Arylboronic Acids/Esters (Chan–Lam–Evans Coupling)	149
2.1.2.1.2.6	Alkenyl Halides	149
2.1.2.1.2.6.1	Palladium-Catalyzed Coupling Reactions	149
2.1.2.1.2.6.2	Copper-Catalyzed Coupling Reactions	151
2.1.2.1.2.7	Alkenyl Sulfonates	151
2.1.2.1.3	Primary Heteroaromatic Amines	152
2.1.2.1.3.1	Aryl Iodides	152
2.1.2.1.3.1.1	Palladium-Catalyzed Coupling Reactions	152
2.1.2.1.3.1.2	Copper-Catalyzed Coupling Reactions	154
2.1.2.1.3.2	Aryl Bromides	156
2.1.2.1.3.2.1	Palladium-Catalyzed Coupling Reactions	156
2.1.2.1.3.2.2	Copper-Catalyzed Coupling Reactions	160
2.1.2.1.3.3	Aryl Chlorides	161
2.1.2.1.3.4	Aryl Sulfonates	163
2.1.2.1.3.5	Arylboronic Acids/Esters (Chan–Lam–Evans Coupling)	164
2.1.2.1.4	Secondary Heteroaromatic Amines	165
2.1.2.1.4.1	Aryl Iodides	165
2.1.2.1.4.2	Aryl Bromides	167
2.1.2.1.4.2.1	Palladium-Catalyzed Coupling Reactions	167

2.1.2.1.4.2.2	Copper-Catalyzed Coupling Reactions	168
2.1.2.1.4.3	Aryl Chlorides	168
2.1.2.2	Aryl- and Hetarylaminines with Hetaryl Electrophiles Q. Shen, F. Guo, and J. F. Hartwig	
2.1.2.2	Aryl- and Hetarylaminines with Hetaryl Electrophiles	173
2.1.2.2.1	Palladium-Catalyzed Methods	173
2.1.2.2.1.1	Reactions of Primary Arylamines with Hetaryl Electrophiles	173
2.1.2.2.1.2	Reactions of Secondary Arylamines with Hetaryl Electrophiles	184
2.1.2.2.1.3	Reactions of Hetarylaminines with Hetaryl Electrophiles	188
2.1.2.2.2	Copper-Catalyzed Methods	190
2.1.2.2.3	Conclusions and Perspectives	192
2.1.3	C–N Bond-Forming Reactions of Hetarenes O. K. Ahmad and M. Movassaghi	
2.1.3	C–N Bond-Forming Reactions of Hetarenes	195
2.1.3.1	Copper-Catalyzed Reactions	195
2.1.3.1.1	N-Arylation of Hetarenes	195
2.1.3.1.1.1	With Aryl Halides	195
2.1.3.1.1.2	With Arylboronic Acid Derivatives	202
2.1.3.1.1.3	With Other Arylmetal Complexes	204
2.1.3.1.2	N-Vinylation of Hetarenes	206
2.1.3.2	Palladium-Catalyzed Reactions	207
2.1.3.2.1	N-Arylation of Hetarenes	207
2.1.3.2.2	N-Vinylation of Hetarenes	208
2.1.3.3	Reactions Catalyzed by Other Transition Metals	210
2.1.3.3.1	Cadmium-Catalyzed Reactions	210
2.1.3.3.2	Iron-Catalyzed Reactions	211
2.1.3.3.3	Iron/Copper Cocatalyzed Reactions	212
2.1.4	C–N Bond-Forming Reactions of Amides and Carbamates A. Klapars	
2.1.4	C–N Bond-Forming Reactions of Amides and Carbamates	215
2.1.4.1	Aryl and Hetaryl Electrophiles	216
2.1.4.1.1	Copper-Catalyzed Intermolecular Coupling with Aryl and Hetaryl Halides	217
2.1.4.1.2	Copper-Catalyzed Intramolecular Coupling of Aryl and Hetaryl Halides	224

2.1.4.1.3	Palladium-Catalyzed Coupling with Aryl and Hetaryl Halides	228
2.1.4.1.4	Palladium-Catalyzed Coupling with Aryl and Hetaryl Sulfonates	235
2.1.4.2	Alkenyl and Allenyl Electrophiles	238
2.1.4.2.1	Copper-Catalyzed Coupling with Alkenyl and Allenyl Electrophiles	239
2.1.4.2.2	Palladium-Catalyzed Coupling with Alkenyl Electrophiles	243
2.1.4.3	Alkynyl Electrophiles	246
2.1.4.4	Oxidative Coupling with Boronic Acids and Related Reagents	247
2.1.5	C–N Bond-Forming Reactions of Sulfonamides, Sulfoximides, and Other Nitrogen Nucleophiles J. Duan, H. Chen, X. Hong, and M. Harmata	
2.1.5	C–N Bond-Forming Reactions of Sulfonamides, Sulfoximides, and Other Nitrogen Nucleophiles	255
2.1.5.1	C–N Bond-Forming Reactions of Sulfonamides	255
2.1.5.1.1	Metal-Catalyzed N-Alkylation of Sulfonamides with Alcohols	255
2.1.5.1.2	N-Vinylation of Sulfonamides	257
2.1.5.1.3	N-Alkynylation of Sulfonamides and Intramolecular Cyclizations of Alkynyl Sulfonamides	259
2.1.5.1.4	N-Allenylation of Allylic Sulfonamides and Cyclization of Allenic Sulfonamides	261
2.1.5.1.5	N-Arylation of Sulfonamides	264
2.1.5.1.5.1	Intermolecular N-Arylation	264
2.1.5.1.5.2	Intramolecular N-Arylation	266
2.1.5.2	C–N Bond-Forming Reactions of Sulfoximides	267
2.1.5.2.1	Transition-Metal-Catalyzed Arylation of Sulfoximides	267
2.1.5.2.1.1	Palladium-Catalyzed Reactions	267
2.1.5.2.1.2	Nickel-Catalyzed Reactions	269
2.1.5.2.1.3	Copper-Catalyzed Reactions	269
2.1.5.2.1.4	Iron-Catalyzed Reactions	270
2.1.5.2.2	N-Vinylation of Sulfoximides	271
2.1.5.2.3	2,1-Benzothiazine Synthesis	271
2.1.5.3	C–N Bond Formation Using Other Nitrogen Nucleophiles	272
2.1.5.3.1	Metal-Promoted Synthesis of N-Substituted Sulfamides	272
2.1.5.3.2	Copper-Mediated Arylation of Sulfonimidamides	274
2.1.5.3.3	Metal-Catalyzed Guanidinylation	275
2.1.5.3.4	Metal-Catalyzed Arylation of Ureas	278

2.1.6	C–N Bond-Forming Reactions of C–H Electrophiles T. G. Driver	
<hr/>		
2.1.6	C–N Bond-Forming Reactions of C–H Electrophiles	283
2.1.6.1	sp^2 -C–N Bond Formation	283
2.1.6.1.1	Azides as the Nitrogen-Atom Source	283
2.1.6.1.2	Nitro Reagents as the Nitrogen-Atom Source	291
2.1.6.1.3	Acidic Amines as the Nitrogen-Atom Source	293
2.1.6.1.4	Neutral Amines as the Nitrogen-Atom Source	300
2.1.6.1.5	Amidines, Imines, and Oximes as the Nitrogen-Atom Source	301
2.1.6.2	sp^3 -C–N Bond Formation	307
2.1.6.2.1	Sulfamate Esters or Sulfamides as the Nitrogen-Atom Source	307
2.1.6.2.2	Sulfonimidamides as the Nitrogen-Atom Source	314
2.1.6.2.3	Chloramine-T or Bromamine-T as the Nitrogen-Atom Source	317
2.1.6.2.4	<i>N</i> -(Tosyloxy)carbamates as the Nitrogen-Atom Source	319
2.1.6.2.5	Azides as the Nitrogen-Atom Source	322
2.2	C–P Bond-Forming Reactions C. Petit and J.-L. Montchamp	
<hr/>		
2.2	C–P Bond-Forming Reactions	331
2.2.1	Cross Coupling of Phosphine Derivatives	332
2.2.1.1	Cross Coupling of Phosphine Oxides	332
2.2.1.1.1	Palladium-Catalyzed Cross Coupling	332
2.2.1.1.1.1	Cross Coupling with a Palladium(II) Catalyst	332
2.2.1.1.1.2	Cross Coupling with a Palladium(0) Catalyst	334
2.2.1.1.2	Nickel- and Copper-Catalyzed Cross Coupling	335
2.2.1.1.2.1	Cross Coupling Using Nickel(II) Chloride	335
2.2.1.1.2.2	Cross Coupling Using Copper(I) Iodide	336
2.2.1.2	Cross Coupling of Phosphines	337
2.2.1.2.1	Cross Coupling of Secondary Phosphines	337
2.2.1.2.1.1	Palladium-Catalyzed Cross Coupling	337
2.2.1.2.1.2	Nickel-Catalyzed Cross Coupling	338
2.2.1.2.1.3	Copper-Catalyzed Cross Coupling	340
2.2.1.2.2	Cross Coupling of Secondary Phosphine–Borane Complexes	342
2.2.1.2.2.1	Palladium-Catalyzed Cross Coupling	342
2.2.1.2.2.1.1	Palladium(0)-Catalyzed Cross Coupling	342
2.2.1.2.2.1.2	Palladium(0)–Copper(I) Catalyzed Aromatic Phosphination	343

2.2.1.2.2.2	Nickel-Catalyzed Cross Coupling	343
2.2.1.2.3	Cross Coupling of Chlorophosphines	344
2.2.1.2.4	Cross Coupling of Silyl- and Stannylphosphines	346
2.2.1.2.4.1	Cross Coupling of Silylphosphines	346
2.2.1.2.4.2	Cross Coupling of Stannylphosphines	346
2.2.1.2.5	Cross Coupling of Primary Phosphines	347
2.2.1.2.6	Cross Coupling of Tertiary Phosphines	348
2.2.1.2.6.1	Nickel-Catalyzed Cross Coupling	348
2.2.1.2.6.2	Palladium-Catalyzed Cross Coupling	349
2.2.1.2.6.2.1	Aryl Exchange	349
2.2.1.2.6.2.2	Synthesis of Phosphonium Salts	350
2.2.2	Cross Coupling of Phosphinate Derivatives	351
2.2.2.1	Cross Coupling of Hypophosphorous Derivatives	351
2.2.2.2	Cross Coupling of <i>H</i> -Phosphinate Esters	354
2.2.3	Cross Coupling of Phosphonate Derivatives	355
2.2.3.1	Palladium-Catalyzed Cross Coupling	355
2.2.3.2	Cross Coupling Using Other Catalysts	356
2.2.4	Cross Coupling of Phosphites, Phosphonites, and Phosphinites	356
2.2.4.1	Cross Coupling of Phosphites	356
2.2.4.1.1	Palladium-Catalyzed Cross Coupling	356
2.2.4.1.2	Nickel-Catalyzed Cross Coupling	357
2.2.4.2	Cross Coupling of Phosphonites and Phosphinites	358

2.3 C–O and C–S Bond-Forming Reactions

2.3.1 C–O and C–S Bond-Forming Reactions of C–X Electrophiles

C. C. Eichman and J. P. Stambuli

2.3.1	C–O and C–S Bond-Forming Reactions of C–X Electrophiles	363
2.3.1.1	Palladium-Catalyzed C–O Bond Formation	364
2.3.1.1.1	Synthesis of Diaryl Ethers	364
2.3.1.1.1.1	Coupling of Aryl Halides with Phenols	364
2.3.1.1.2	Synthesis of Alkyl Aryl Ethers	366
2.3.1.1.2.1	Coupling of Primary Alcohols with Aryl Halides	366
2.3.1.1.2.2	Coupling of Secondary Alcohols with Aryl Halides	367
2.3.1.1.2.3	Coupling of Tertiary Alcohols with Aryl Halides	369
2.3.1.1.2.4	Intramolecular Coupling of Alcohols with Aryl Halides	370

2.3.1.2	Copper-Catalyzed C—O Bond Formation	371
2.3.1.2.1	Synthesis of Diaryl Ethers	372
2.3.1.2.1.1	Coupling of Aryl Halides with Phenols	372
2.3.1.2.2	Synthesis of Alkyl Aryl Ethers	372
2.3.1.2.2.1	Coupling of Primary Alcohols with Aryl Halides	372
2.3.1.2.2.2	Coupling of Secondary Alcohols with Aryl Halides	373
2.3.1.2.2.3	Intramolecular Coupling of Alcohols with Aryl Halides	374
2.3.1.2.3	Synthesis of Vinyl Ethers	375
2.3.1.2.3.1	Coupling of Vinyl Halides with Phenols	375
2.3.1.2.4	Synthesis of Other Ethers	376
2.3.1.2.4.1	Coupling of Alcohols with Organoboron Reagents	376
2.3.1.3	Palladium-Catalyzed C—S Bond Formation	378
2.3.1.3.1	Synthesis of Diaryl and Alkyl Aryl Sulfides	378
2.3.1.3.1.1	Coupling of Thiols with Organo Halides or 4-Toluenesulfonates	378
2.3.1.3.2	Synthesis of Aryl Vinyl Sulfides	379
2.3.1.3.2.1	Coupling of Thiols with Vinyl Halides	379
2.3.1.3.3	Synthesis of Benzothiophenes	380
2.3.1.3.3.1	Intramolecular Coupling of Thiols with (<i>gem</i> -Dihalovinyl)arenes	380
2.3.1.3.3.2	Intramolecular Coupling of Thioketones with Aryl Halides	381
2.3.1.3.4	Synthesis of Benzothiazoles	381
2.3.1.3.4.1	Intramolecular Coupling of Thioamides or Thioureas with Aryl Halides	381
2.3.1.3.5	Synthesis of Chiral Diaryl Sulfoxides	382
2.3.1.3.5.1	Coupling of β -Sulfinyl Esters with Aryl Iodides	382
2.3.1.4	Copper-Catalyzed C—S Bond Formation	383
2.3.1.4.1	Synthesis of Diaryl and Alkyl Aryl Sulfides	383
2.3.1.4.1.1	Coupling of Thiols with Organo Halides	383
2.3.1.4.1.2	Coupling of <i>N</i> -Sulfanylimides with Arylboronic Acids	384
2.3.1.4.1.3	Coupling of Disulfides with Arylboronic Acids	385
2.3.1.4.2	Synthesis of Vinyl Sulfides	387
2.3.1.4.2.1	Intramolecular Coupling of Vinyl Halides with Thiols	387
2.3.1.4.2.2	Coupling of Thiols with Vinyl Halides	388
2.3.1.4.3	Synthesis of Benzothiazoles	389
2.3.1.4.3.1	Intramolecular Coupling of Thiocarbonyls with Aryl Halides	389
2.3.1.5	Other Metal-Catalyzed C—S Bond Formations	389
2.3.1.5.1	Nickel-Catalyzed Synthesis of Diaryl and Alkyl Aryl Sulfides	389
2.3.1.5.1.1	Coupling of Thiols with Organo Halides	389
2.3.1.5.1.2	Coupling of Disulfides with Organo Halides	390

2.3.1.5.2	Cobalt-Catalyzed Synthesis of Diaryl Sulfides	390
2.3.1.5.2.1	Coupling of Thiols with Aryl Halides	390
2.3.1.5.3	Iron-Catalyzed Synthesis of Diaryl Sulfides	391
2.3.1.5.3.1	Coupling of Thiols with Aryl Halides	391
2.3.2	C—O and C—S Bond-Forming Reactions of C—H Electrophiles K. Inamoto	
<hr/>		
2.3.2	C—O and C—S Bond-Forming Reactions of C—H Electrophiles	395
2.3.2.1	C—O Bond Formation	395
2.3.2.1.1	Palladium(II)-Catalyzed Acyloxylation of C(sp ²)—H or C(sp ³)—H Bonds with Iodine(III) Reagents	395
2.3.2.1.1.1	Palladium(II)-Catalyzed Acetoxylation of C(sp ²)—H Bonds Directed by a Pyridyl Group	395
2.3.2.1.1.2	Palladium(II)-Catalyzed Acetoxylation of C(sp ²)—H Bonds Directed by Other Nitrogen-Based Functional Groups	397
2.3.2.1.1.3	Palladium(II)-Catalyzed Acetoxylation of Indole C—H Bonds	399
2.3.2.1.1.4	Palladium(II)-Catalyzed Acetoxylation of C(sp ³)—H Bonds	400
2.3.2.1.1.5	Palladium(II)-Catalyzed Acyloxylation of Benzylic C(sp ³)—H Bonds	402
2.3.2.1.1.6	Palladium(II)-Catalyzed Acyloxylation Reactions Directed by Diisopropyl(2-pyridyl)silyl Groups	403
2.3.2.1.1.7	Palladium(II)-Catalyzed Acetoxylation in the Absence of a Directing Group ...	405
2.3.2.1.2	Palladium(II)-Catalyzed Acetoxylation of C(sp ³)—H Bonds with Iodine(I) Reagents	406
2.3.2.1.3	Palladium(II)-Catalyzed Oxygenation of C(sp ²)—H and C(sp ³)—H Bonds with Peroxide Reagents	407
2.3.2.1.3.1	Palladium(II)-Catalyzed Acetoxylation of C(sp ²)—H Bonds	407
2.3.2.1.3.2	Palladium(II)-Catalyzed Direct Hydroxylation of C(sp ²)—H Bonds	409
2.3.2.1.3.3	Palladium(II)-Catalyzed Acetoxylation of C(sp ³)—H Bonds	410
2.3.2.1.4	Palladium(II)-Catalyzed Acetoxylation Using Molecular Oxygen	412
2.3.2.1.5	Palladium(II)-Catalyzed Alkoxylation or Aryloxylation of Arenes	413
2.3.2.1.5.1	Palladium(II)-Catalyzed Intermolecular Alkoxylation of Arene C(sp ²)—H Bonds	414
2.3.2.1.5.2	Synthesis of Dihydrobenzofurans by Palladium(II)-Catalyzed Intramolecular C—H Bond Oxygenation	414
2.3.2.1.5.3	Synthesis of Dibenzofurans by Palladium(II)-Catalyzed Intramolecular C—H Bond Oxygenation	415
2.3.2.1.6	Synthesis of Catechols by Palladium(II)-Catalyzed Oxygenation of C—H Bonds	417
2.3.2.1.7	Oxygenation Catalyzed by Transition Metals Other than Palladium	419
2.3.2.1.7.1	Copper(II)-Catalyzed Oxygenation of Arene C(sp ²)—H Bonds	419

2.3.2.1.7.2	Synthesis of Benzoxazoles by Intramolecular Copper-Catalyzed Oxygenation of Arene C(sp ²)—H Bonds	421
2.3.2.1.7.3	Rhodium-Catalyzed Oxygenation of Arene C(sp ²)—H Bonds	423
2.3.2.1.7.4	Gold-Catalyzed Oxygenation of Arene C(sp ²)—H Bonds	424
2.3.2.2	C—S Bond Formation	425
2.3.2.2.1	Intramolecular C—S Bond Formation	426
2.3.2.2.1.1	Synthesis of Benzo[<i>b</i>]thiophenes	426
2.3.2.2.1.2	Synthesis of Dibenzothiophenes	428
2.3.2.2.1.3	Synthesis of 2-Arylbenzothiazoles	429
2.3.2.2.1.4	Synthesis of 2-Aminobenzothiazoles	430
2.3.2.2.2	Intermolecular C—S Bond Formation	432
2.3.2.2.2.1	C—S Bond Formation with Arenesulfonyl Chlorides	432
2.3.2.2.2.2	C—S Bond Formation with Dimethyl Sulfoxide	434
2.3.2.2.2.3	C—S Bond Formation with Diaryl or Dialkyl Disulfides	434
2.4	C—B and C—Si Bond-Forming Reactions	

2.4.1	C—B and C—Si Bond-Forming Reactions of C—X Electrophiles M. Murata	
2.4.1	C—B and C—Si Bond-Forming Reactions of C—X Electrophiles	439
2.4.1.1	C—B Bond-Forming Reactions	440
2.4.1.1.1	Of Aryl—X and Hetaryl—X Electrophiles	440
2.4.1.1.1.1	Using Tetraalkoxydiborons	440
2.4.1.1.1.2	Using Dialkoxyboranes	449
2.4.1.1.1.3	Using In Situ Prepared Dialkoxyboranes	458
2.4.1.1.2	Of Alkenyl—X Electrophiles	460
2.4.1.1.2.1	Using Tetraalkoxydiborons	460
2.4.1.1.2.2	Using Dialkoxyboranes	462
2.4.1.1.3	Of Allyl—X and Benzyl—X Electrophiles	464
2.4.1.1.3.1	Preparation of Allylboronates	464
2.4.1.1.3.2	Preparation of Benzylboronates	466
2.4.1.2	C—Si Bond-Forming Reactions	467
2.4.1.2.1	Of Aryl—X and Hetaryl—X Electrophiles	467
2.4.1.2.1.1	Using Hexaalkyldisilanes	467
2.4.1.2.1.2	Using Trialkoxysilanes	470
2.4.1.2.1.3	Using Trialkylsilanes	475

2.4.1.2.1.4	Using Dialkylsilanes	477
2.4.1.2.2	Of Alkenyl—X and Other Nonaromatic Electrophiles	478
2.4.2	C—B and C—Si Bond-Forming Reactions by C—H Functionalization K. J. Szabó	
<hr/>		
2.4.2	C—B and C—Si Bond-Forming Reactions by C—H Functionalization	485
2.4.2.1	Mechanistic Aspects	486
2.4.2.1.1	C—H Functionalization of Arenes	486
2.4.2.1.2	C—H Functionalization of Alkenes	488
2.4.2.2	C—B Bond-Forming Reactions by C—H Functionalization	490
2.4.2.2.1	C(sp ²)—H Functionalization Reactions	490
2.4.2.2.1.1	Synthesis of Aryl- and Hetarylboronates	491
2.4.2.2.1.2	Synthesis of Vinylboronates	494
2.4.2.2.2	C(sp ³)—H Functionalization Reactions	501
2.4.2.2.2.1	Synthesis of Allylboronates	502
2.4.2.2.2.2	Synthesis of Benzylboronates	502
2.4.2.2.2.3	Synthesis of Alkylboronates	504
2.4.2.2.3	Sequential and One-Pot Reactions with Catalytically Generated Boronates ..	505
2.4.2.2.3.1	Synthesis of Phenols, Anilines, and Aryl Halides	505
2.4.2.2.3.2	One-Pot Suzuki—Miyaura Coupling Reactions	509
2.4.2.2.3.3	Allylation of Aldehydes	511
2.4.2.3	C—Si Bond-Forming Reactions by C—H Functionalization	512
2.4.2.3.1	Synthesis of Aryl- and Hetarylsilanes	513
2.4.2.3.2	Synthesis of Vinylsilanes	516
2.4.2.3.3	Synthesis of Allyl-, Benzyl-, and Alkylsilanes	517
2.4.2.4	Summary and Outlook	520
2.5	C—CN Bond-Forming Reactions G. Yan, Y. Zhang, and Jianbo Wang	
<hr/>		
2.5	C—CN Bond-Forming Reactions	523
2.5.1	Cyanation of Aryl Halides and Pseudohalides	524
2.5.2	Cyanation of Arylboronic Acids	535
2.5.3	Cyanation of Vinyl Halides	537
2.5.4	Cyanation of Alkenes and Alkynes	538
2.5.5	Cyanation of α -Aryl Alcohols and Thiols	540
2.5.6	Cyanation through Direct C—H Bond Activation	542

2.6	C—F Bond-Forming Reactions K. B. McMurtrey and M. S. Sanford	
<hr/>		
2.6	C—F Bond-Forming Reactions	551
2.6.1	C—F Coupling Reactions with Electrophilic Fluorinating Reagents	551
2.6.1.1	Palladium-Mediated Fluorination of Arylboronic Acids	551
2.6.1.2	Silver-Mediated Fluorination of Arylboronic Acids	553
2.6.1.3	Silver-Mediated Fluorination of Arylsilanes	555
2.6.1.4	Silver-Catalyzed Fluorination of Arylstannanes	556
2.6.1.5	Palladium-Catalyzed Ligand-Directed C—H Fluorination of Arylpyridines	558
2.6.1.6	Palladium-Catalyzed Ligand-Directed C—H Fluorination of Benzylamine Derivatives	559
2.6.1.7	Palladium-Catalyzed Ligand-Directed C—H Fluorination of Benzamide Derivatives	560
2.6.2	C—F Coupling Reactions with Nucleophilic Fluorinating Reagents	562
2.6.2.1	Palladium-Catalyzed Fluorination of Aryl Trifluoromethanesulfonates	562
2.7	C—C Cross-Coupling Reactions of Acidic C—H Nucleophiles	
<hr/>		
2.7.1	C—C Cross-Coupling Reactions of Acidic C—H Nucleophiles with One Activating Group S. P. Marsden	
<hr/>		
2.7.1	C—C Cross-Coupling Reactions of Acidic C—H Nucleophiles with One Activating Group	565
2.7.1.1	Arylation of Ketones	567
2.7.1.1.1	Intermolecular Reactions	567
2.7.1.1.2	Intramolecular Reactions	575
2.7.1.1.3	Stereoselective Reactions	577
2.7.1.1.4	Heteroaromatic Synthesis by Tandem Ketone Arylation/Cyclization	580
2.7.1.2	Arylation of Enones	581
2.7.1.3	Arylation of Aldehydes	582
2.7.1.3.1	Intermolecular Reactions	582
2.7.1.3.2	Intramolecular Reactions	584
2.7.1.4	Arylation of Carboxylic Esters	586
2.7.1.4.1	Intermolecular Reactions	586
2.7.1.4.2	Intramolecular Reactions	593
2.7.1.4.3	Stereoselective Reactions	594

2.7.1.5	Arylation of Carboxylic Amides	597
2.7.1.5.1	Intermolecular Reactions	597
2.7.1.5.2	Intramolecular Reactions	600
2.7.1.5.3	Stereoselective Reactions	604
2.7.1.6	Arylation of Alkanenitriles	607
2.7.1.7	Arylation of Ketimines	611
2.7.1.8	Arylation of Nitroalkanes	612
2.7.1.9	Arylation of Alkyl Sulfones	613
2.7.1.10	Arylation of Alkanesulfonamides	615
2.7.1.11	Arylation of S-Alkylsulfoximides	616
2.7.1.12	Arylation of 1-Alkyl-4-nitrobenzenes	617
2.7.2	C—C Cross-Coupling Reactions of Acidic C—H Nucleophiles with Two Activating Groups Y. Wu, Jun Wang, and F. Y. Kwong	
2.7.2	C—C Cross-Coupling Reactions of Acidic C—H Nucleophiles with Two Activating Groups	621
2.7.2.1	C—H Nucleophiles with Two Carbonyl Activating Groups	622
2.7.2.1.1	Palladium-Catalyzed Cross Coupling of Aryl Halides or Sulfonates	622
2.7.2.1.2	Copper-Catalyzed Cross Coupling of Aryl Halides	627
2.7.2.2	C—H Nucleophiles with One Carbonyl and One Other Activating Group	636
2.7.2.2.1	Palladium-Catalyzed Cross Coupling of Aryl Halides	636
2.7.2.2.1.1	Coupling with Cyanoacetates	636
2.7.2.2.1.2	Coupling with Sulfones	639
2.7.2.2.1.3	Decarboxylative Coupling with Cyanoacetate Metal Salts	640
2.7.2.2.2	Copper-Catalyzed Cross Coupling of Aryl Halides	642
2.7.2.3	Scope and Limitations of Inter- and Intramolecular C—C Cross-Coupling Reactions	644
