

## Table of Contents

### Introduction

G. A. Molander

<b>Introduction</b> .....	1
---------------------------	---

## 1.1 Metal/Metal Dual Catalysis

### 1.1.1 General Principles of Metal/Metal Dual Catalysis

Y. Nakao

<b>1.1.1 General Principles of Metal/Metal Dual Catalysis</b> .....	3
---	---

### 1.1.2 Palladium/Copper and Palladium/Nickel Dual Catalysis

O. Riant and S. K. Rout

<b>1.1.2 Palladium/Copper and Palladium/Nickel Dual Catalysis</b> .....	9
<b>1.1.2.1 Palladium/Copper Dual Catalysis</b> .....	9
<b>1.1.2.1.1 Sonogashira–Hagihara Coupling</b> .....	9
<b>1.1.2.1.1.1 Synthesis of Indoles</b> .....	12
<b>1.1.2.1.1.2 Synthesis of Substituted Fused-Pyridine Heterocycles</b> .....	12
<b>1.1.2.1.2 Stille Coupling</b> .....	14
<b>1.1.2.1.3 Hiyama-Type Coupling</b> .....	18
<b>1.1.2.1.3.1 Coupling of Aryl Sulfonates and Aryl- or Alkyltriorganosilanes</b> .....	18
<b>1.1.2.1.3.2 Coupling of Cyclic Silyl Ethers with Aryl Iodides</b> .....	20
<b>1.1.2.1.4 Palladium/Copper-Catalyzed Cyanation Reactions</b> .....	20
<b>1.1.2.1.5 C–H Activation via Palladium/Copper Catalysis</b> .....	22
<b>1.1.2.1.5.1 Direct Functionalization of Heteroarenes with Aryl Halides</b> .....	22
<b>1.1.2.1.5.2 Direct Functionalization of Arenes with Alkenes</b> .....	24
<b>1.1.2.1.6 Non-traditional Cross-Coupling Reactions</b> .....	25
<b>1.1.2.1.7 Palladium/Copper-Catalyzed Dimerization/Cycloisomerization of Ethynylcarbamates</b> .....	27
<b>1.1.2.1.8 Three-Component Reaction via Palladium/Copper Catalysis</b> .....	29
<b>1.1.2.1.9 Palladium/Copper Catalysis for Asymmetric Allylation</b> .....	32
<b>1.1.2.1.10 Palladium/Copper Catalysis for Hydroarylation</b> .....	35
<b>1.1.2.1.11 Carbosilylation of Unsaturated C–C Bonds</b> .....	38

1.1.2.1.12	Palladium/Copper Catalysis for Carboboration .....	42
1.1.2.1.12.1	Diastereoselective Carboboration .....	46
1.1.2.1.12.2	Enantioselective Carboboration .....	48
1.1.2.1.12.3	Synthesis of Borylated 1,4-Dienes by Allylboration of Alkynes .....	49
1.1.2.2	Palladium/Nickel Dual Catalysis .....	52
1.1.2.3	Conclusions .....	54
1.1.3	<b>Rhodium/Palladium Dual Catalysis</b> U B. Kim and S.-g. Lee	
1.1.3	<b>Rhodium/Palladium Dual Catalysis</b> .....	57
1.1.3.1	Synergistic Rhodium/Palladium Dual Catalysis .....	58
1.1.3.1.1	Synergistic Rhodium(I)/Palladium(0) Dual Catalysis .....	58
1.1.3.1.1.1	Enantioselective Allylation of $\alpha$ -Cyano Esters .....	58
1.1.3.1.1.2	Reductive Carbonylation of Aryl Iodides .....	61
1.1.3.1.2	Synergistic Rhodium(II)/Palladium(0) Dual Catalysis .....	64
1.1.3.1.2.1	Interceptive Coupling of $\pi$ -Allylpalladium(II) Intermediates with Rhodium(II) Carbenoids .....	64
1.1.3.2	Orthogonal Tandem Rhodium/Palladium Dual Catalysis .....	68
1.1.3.2.1	Tandem Rhodium(I)/Palladium(0) Dual Catalysis .....	68
1.1.3.2.2	Tandem Rhodium(II)/Palladium(0) Dual Catalysis .....	75
1.1.3.2.3	Tandem Rhodium(III)/Palladium(II) Dual Catalysis .....	78
1.1.3.2.4	Sequential Palladium(0)/Rhodium(I) Dual Catalysis .....	80
1.1.4	<b>Iridium/Zinc and Iridium/Copper Dual Catalysis</b> X. Huo, R. He, and W. Zhang	
1.1.4	<b>Iridium/Zinc and Iridium/Copper Dual Catalysis</b> .....	83
1.1.4.1	Iridium/Zinc Dual Catalysis .....	84
1.1.4.1.1	Iridium/Zinc-Catalyzed Alkene Hydroamination .....	84
1.1.4.1.2	Iridium/Zinc-Catalyzed Allylation of Oxazol-4(5H)-ones and Thiazol-4(5H)-ones	85
1.1.4.1.3	Iridium/Zinc-Catalyzed Enantioselective Polyene Cyclization .....	90
1.1.4.1.4	Iridium/Zinc-Catalyzed Diastereo- and Enantioselective Spiroketalization .....	91
1.1.4.1.5	Iridium/Zinc-Catalyzed Diastereo- and Enantioselective Allylation of Trimethyl Orthoacetate and Ethylene Glycol Monovinyl Ether .....	92
1.1.4.2	Iridium/Zinc Dual Catalysis for Stereodivergent Synthesis .....	93
1.1.4.2.1	Stereodivergent Allylation of $\alpha$ -Hydroxy Ketones .....	94
1.1.4.2.2	Stereodivergent Allylation of $\alpha$ -Hydroxyindanones .....	95

1.1.4.3	Iridium/Copper Dual Catalysis .....	97
1.1.4.3.1	Stereodivergent Synthesis of $\alpha$ -Amino Acids .....	98
1.1.4.3.2	Stereodivergent Allylation of Azaaryl Compounds .....	103
1.1.5	<b>Gold/Iron Dual Catalysis</b> X. Shi and J. Wang	
1.1.5	<b>Gold/Iron Dual Catalysis</b> .....	107
1.1.5.1	Gold/Iron Relay Catalysis .....	107
1.1.5.1.1	Reactions between Propargyl Alcohols and N-Protected Hydroxylamines ....	107
1.1.5.1.2	Rearrangement of Propargylisoxazoles .....	110
1.1.5.1.3	Intermolecular Reductive Hydroamination .....	111
1.1.5.2	Gold/Iron Synergistic Catalysis .....	112
1.1.5.2.1	Synthesis of Heterocyclic Aldehydes .....	112
1.1.6	<b>Gold Dual Catalysis with Palladium, Nickel, or Rhodium</b> N. T. Patil, A. G. Tathe, and V. W. Bhojare	
1.1.6	<b>Gold Dual Catalysis with Palladium, Nickel, or Rhodium</b> .....	117
1.1.6.1	Gold/Palladium Dual Catalysis .....	117
1.1.6.1.1	Palladium-Catalyzed Cross-Coupling Reactions of Organogold(I) Reagents ...	118
1.1.6.1.2	Cross-Coupling Reactions Enabled by Dual Gold/Palladium Catalysis .....	127
1.1.6.2	Gold/Nickel Dual Catalysis .....	143
1.1.6.3	Gold/Rhodium Dual Catalysis .....	147
1.1.7	<b>Gold/Gold Dual Catalysis</b> A. S. K. Hashmi	
1.1.7	<b>Gold/Gold Dual Catalysis</b> .....	163
1.1.7.1	Homodimerization of Alkynes .....	165
1.1.7.1.1	2,4-Disubstituted 1,3-Enynes by the Homodimerization of Terminal Alkynes .	165
1.1.7.1.2	1,1-Dihalo-1,3-enynes by Homodimerization of 1-Haloalkynes .....	166
1.1.7.2	Intramolecular Cyclization of 1,10-Diynes .....	167
1.1.7.3	Dual Gold Catalysis with 1,5- or 1,6-Diynes .....	172
1.1.7.3.1	Benzofulvenes by Dual Gold Catalysis .....	175
1.1.7.3.2	Oxidative Esterification in Dual Gold Catalysis .....	179
1.1.7.3.3	Other Benzannulations Using Dual Gold Catalysis .....	182
1.1.7.3.4	Annulated Pyrroles .....	185
1.1.7.3.5	Methoxy Transfer in Dual Gold Catalysis .....	188

1.1.7.3.6	Dibenzopentalenes by Dual Gold Catalysis .....	190
1.1.7.3.7	Thiophene-Annulated Pentalenes by Dual Gold Catalysis .....	191
1.1.7.3.8	Iodobenzopentalenes from Iodoalkynes by Dual Gold Catalysis .....	193
1.1.7.3.9	Six-Membered Unsaturated Lactam Rings by Dual Gold Catalysis .....	193
1.1.7.3.10	Benzothiophenes by Dual Gold Catalysis .....	195
1.1.7.3.11	Benzocyclobutenes by Dual Gold Catalysis .....	202
1.1.7.4	Dual Gold Catalysis Involving Allenes .....	203
1.1.7.4.1	Benzocyclobutenes by Dual Gold Catalysis .....	203
<b>1.2</b>	<b>Transition-Metal/Photocatalyst Dual Catalysis</b>	
<b>1.2.1</b>	<b>General Principles of Transition-Metal/Photocatalyst Dual Catalysis</b> J. C. Tellis	
<b>1.2.1</b>	<b>General Principles of Transition-Metal/Photocatalyst Dual Catalysis</b> .....	209
1.2.1.1	Transition-Metal Catalysis .....	210
1.2.1.2	Visible-Light Photocatalysis .....	212
1.2.1.2.1	Photoredox Catalysis .....	212
1.2.1.2.2	Energy-Transfer Photocatalysis .....	220
1.2.1.3	Type I Catalysis: Substrate Activation .....	221
1.2.1.3.1	Single-Electron Oxidative Addition .....	223
1.2.1.3.2	Single-Electron Transmetalation .....	226
1.2.1.3.3	Energy-Transfer Activation .....	232
1.2.1.4	Type II Catalysis: Cocatalyst Activation .....	233
1.2.1.4.1	Activation by Single-Electron Transfer .....	233
1.2.1.4.2	Activation by Energy Transfer .....	235
1.2.1.5	Conclusions .....	237
<b>1.2.2</b>	<b>Nickel/Photocatalyst Dual Catalysis</b> D. N. Primer and G. A. Molander	
<b>1.2.2</b>	<b>Nickel/Photocatalyst Dual Catalysis</b> .....	241
1.2.2.1	Photoredox Cross Coupling and the Four Modules .....	242
1.2.2.1.1	Control Module One: Photocatalyst .....	243
1.2.2.1.2	Control Module Two: Nickel/Ligand Combination .....	246
1.2.2.1.3	Control Module Three: Radical Precursor .....	247
1.2.2.1.4	Control Module Four: Electrophile .....	247

1.2.2.2	Primary Alkyl C(sp <sup>3</sup> )–C(sp <sup>2</sup> ) Cross Coupling	247
1.2.2.2.1	Stabilized Primary C(sp <sup>3</sup> ) Radical Precursors	247
1.2.2.2.1.1	Primary Benzylic Coupling Fragments: Coupling of Benzyltrifluoroborates with Aryl Halides	248
1.2.2.2.1.2	Primary Benzylic Coupling Fragments: Coupling of Benzyl Boronates with Aryl Halides	249
1.2.2.2.1.3	Primary Benzyl Coupling Fragments: Coupling of Benzyl Xanthates with Aryl Halides	251
1.2.2.2.1.4	Primary $\alpha$ -Amino Fragments: Coupling of <i>N,N</i> -Dimethylaniline with Aryl Halides	252
1.2.2.2.1.5	Primary $\alpha$ -Amino Fragments: Coupling of (Aminomethyl)trifluoroborates with Aryl Bromides	253
1.2.2.2.1.6	Primary $\alpha$ -Amino Fragments: Coupling of (Silylmethyl)amines with Aryl Halides	254
1.2.2.2.1.7	Primary $\alpha$ -Oxy Fragments: Coupling of (Alkoxymethyl)trifluoroborates with Aryl Halides	255
1.2.2.2.1.8	Primary $\alpha$ -Oxy Fragments: Coupling of (Alkoxymethyl)trifluoroborates with Acyl Chlorides	257
1.2.2.2.2	Unstabilized Primary C(sp <sup>3</sup> ) Radical Precursors	258
1.2.2.2.2.1	Primary Radical Fragments: Coupling of Potassium Alkylbis(catecholato)silicates with Aryl Halides	258
1.2.2.2.2.2	Primary Radical Fragments: Coupling of Ammonium Alkylbis(catecholato)silicates with Aryl Halides	259
1.2.2.2.2.3	Primary Radical Fragments: Coupling of Primary Ammonium Alkylbis(catecholato)silicates with Alternative Electrophiles	261
1.2.2.2.2.4	Primary Radical Fragments: Coupling of Primary Alkyl Oxalates with Aryl Bromides	263
1.2.2.2.2.5	Primary Radical Fragments: Coupling of Alkyl Halides with Aryl Halides via Silyl Radical Transposition	264
1.2.2.3	Secondary Alkyl C(sp <sup>3</sup> )–C(sp <sup>2</sup> ) Cross Coupling	266
1.2.2.3.1	Activated Secondary Alkyl C(sp <sup>3</sup> )–C(sp <sup>2</sup> ) Cross Coupling	267
1.2.2.3.1.1	Secondary $\alpha$ -Amino Radical Fragments: Coupling of $\alpha$ -Amino Acids with Aryl Halides	267
1.2.2.3.1.2	Secondary $\alpha$ -Amino Radical Fragments: Coupling of <i>N,N</i> -Dialkylanilines with Aryl Iodides	269
1.2.2.3.1.3	Secondary $\alpha$ -Amino Radical Fragments: Coupling of <i>N,N</i> -Dialkylanilines with Acyl Electrophiles	271
1.2.2.3.1.4	Secondary $\alpha$ -Amino Radical Fragments: Hydrogen-Atom-Transfer-Mediated C–H Activation of Activated Secondary Alkyl Groups and Coupling with Aryl Halides	272
1.2.2.3.1.5	Secondary $\alpha$ -Oxy Radical Fragments: Coupling of $\alpha$ -Oxy Acids with Alkenyl Halides	275

1.2.2.3.1.6	Secondary $\alpha$ -Oxy Radical Fragments: Coupling of Secondary ( $\alpha$ -Oxyalkyl)trifluoroborates with Aryl Halides .....	276
1.2.2.3.1.7	Secondary $\alpha$ -Oxy Radical Fragments: Coupling of Aldehyde-Derived 1,4-Dihydropyridines with Aryl Bromides and Acyl Electrophiles .....	278
1.2.2.3.1.8	Secondary $\alpha$ -Oxy Radical Fragments: Hydrogen-Atom-Transfer-Mediated C–H Activation of Primary Alcohols and Coupling with Aryl Halides .....	281
1.2.2.3.2	Unactivated Secondary C(sp <sup>3</sup> )–C(sp <sup>2</sup> ) Cross Coupling .....	283
1.2.2.3.2.1	Unstabilized Secondary Radical Fragments: Coupling of Secondary Alkyltrifluoroborates with Aryl Bromides .....	284
1.2.2.3.2.2	Unstabilized Secondary Radical Fragments: Coupling of Secondary Alkyltrifluoroborates with Acyl Electrophiles .....	285
1.2.2.3.2.3	Unstabilized Secondary Radical Fragments: Coupling of Secondary Ammonium Alkylbis(catecholato)silicates with Aryl Halides .....	287
1.2.2.3.2.4	Secondary Radical Fragments: Coupling of Alkyl Halides with Aryl Halides via Silyl Radical Transposition .....	288
1.2.2.3.2.5	Secondary Alkyl Radical Fragments: Coupling of Secondary Alkyl Oxalates with Aryl Halides .....	290
1.2.2.3.2.6	Secondary Alkyl Radical Fragments: Coupling of Secondary 1,4-Dihydropyridines with Aryl Halides .....	292
1.2.2.3.2.7	Secondary Alkyl Radical Fragments: Coupling of Secondary Sulfinate Salts with Aryl Halides .....	293
1.2.2.3.3	Enantioselective Secondary C(sp <sup>3</sup> )–C(sp <sup>2</sup> ) Cross Coupling .....	295
1.2.2.3.3.1	Secondary Alkyl Radical Fragments: Enantioselective Coupling of Secondary Benzyl Groups with Aryl Halides .....	296
1.2.2.3.3.2	Secondary Alkyl Radical Fragments: Enantioselective Coupling of Secondary $\alpha$ -Amino Carboxylic Acids with Aryl Halides .....	296
1.2.2.3.3.3	Isolated Examples: Enantioselective Coupling Conditions .....	298
1.2.2.4	Tertiary Alkyl C(sp <sup>3</sup> )–C(sp <sup>2</sup> ) Cross Coupling .....	299
1.2.2.4.1	Tertiary Alkyl Radical Fragments: Coupling of Alkyl Halides with Aryl Halides via Silyl Radical Transposition .....	299
1.2.2.4.2	Tertiary Alkyl Radical Fragments: Coupling of Tertiary Alkyltrifluoroborates with Aryl Halides .....	299
1.2.2.5	Photoredox/Nickel C(sp <sup>3</sup> )–C(sp <sup>3</sup> ) Cross Coupling .....	301
1.2.2.5.1	Secondary Stabilized Radical Fragments: Coupling of Primary and Secondary Alkyl Carboxylic Acids with Alkyl Halides .....	302
1.2.2.5.2	Unstabilized Radical Fragments: Coupling of Potassium Alkylbis(catecholato)silicates with Alkyl Halides .....	304
1.2.2.5.3	Benzylic Radical Fragments: Coupling of Potassium Benzyltrifluoroborates with Activated Aziridines .....	304

1.2.2.6	Photoredox/Nickel C(sp <sup>2</sup> )–X Cross Coupling	305
1.2.2.6.1	Photoredox/Nickel C–P Bond Formation	306
1.2.2.6.1.1	Phosphorus-Centered Radicals: Coupling of Diarylphosphine Oxides with Aryl Iodides	306
1.2.2.6.1.2	Phosphorus-Centered Radicals: Coupling of Disubstituted Phosphine Oxides with Alkenyl Electrophiles	307
1.2.2.6.2	Photoredox/Nickel C–S Bond Formation	309
1.2.2.6.2.1	Sulfur-Centered Radicals: Coupling of Alkanethiols with Aryl Iodides	309
1.2.2.6.2.2	Sulfur-Centered Radicals: Radical Transposition for the Generation of Thiyl Radicals and Coupling with Aryl Bromides	311
1.2.2.6.2.3	Sulfur-Centered Radicals: Coupling of Arenesulfinate Salts with Aryl Electrophiles	312
1.2.2.6.3	C–O Bond Formation: Coupling of Primary and Secondary Alcohols with Aryl Bromides	313
1.2.2.6.4	C–N Bond Formation: Coupling of Primary and Secondary Amines with Aryl Bromides	315
1.2.2.7	Photoredox/Nickel Energy Transfer Mediated Couplings	316
1.2.2.7.1	C–C Bond Formation: Coupling of Hydrogen-Atom-Transfer-Generated $\alpha$ -Oxy, $\alpha$ -Amino, and Benzyl Radicals with Aryl Bromides	317
1.2.2.7.2	C–C Bond Formation: Coupling of Hydrogen-Atom-Transfer-Generated Radicals with Chloroformate Derivatives	320
1.2.2.7.3	C–C Bond Formation: Coupling of Hydrogen-Atom-Transfer-Generated $\alpha$ -Oxy Radicals with Enone Derivatives	322
1.2.2.7.4	Photocatalyst Energy-Transfer-Mediated C–O Bond Formation: Coupling of Carboxylic Acids with Aryl Bromides	324
1.2.2.7.5	C–N Bond Formation: Energy-Transfer-Mediated Coupling of Sulfonamides with Aryl Bromides	326
1.2.2.8	Conclusions	328
1.2.3	<b>Palladium/Photocatalyst Dual Catalysis</b> K. Muralirajan and M. Rueping	
1.2.3	<b>Palladium/Photocatalyst Dual Catalysis</b>	333
1.2.3.1	Palladium/Photoredox Catalysis for C–H Arylation	334
1.2.3.1.1	Palladium/Metal Photoredox Catalysis for C(sp <sup>2</sup> )–H Arylation	334
1.2.3.1.2	Palladium/Organic Photoredox Catalysis for C(sp <sup>2</sup> )–H Arylation	341
1.2.3.1.3	Palladium/Photoredox Catalysis for C(sp <sup>3</sup> )–H Arylation	343
1.2.3.2	Palladium/Photoredox Catalysis for Heck Reactions	344
1.2.3.2.1	Dual Catalysis for Dehydrogenative Heck Reactions	345
1.2.3.2.2	Dual Catalysis for Ligand-Free Heck Reactions	346

1.2.3.2.3	Dual Catalysis for Decarboxylative Heck Reactions	347
1.2.3.3	Palladium/Photoredox Catalysis for the Acylation of Arenes	348
1.2.3.3.1	Dual Catalysis for the Decarboxylative Acylation of Arenes	349
1.2.3.3.2	Dual Catalysis for the C2-Acylation of Indoles	354
1.2.3.4	Palladium/Photoredox Catalysis for Allylation	357
1.2.3.4.1	Dual Catalysis for Decarboxylative Allylation	357
1.2.3.4.2	Dual Catalysis for the $\alpha$ -Allylation of Benzylic Amines	359
1.2.3.4.3	Dual Catalysis for Enantioselective Allylation	361
1.2.3.5	Palladium/Photoredox Catalysis for Acceptorless Dehydrogenation	363
1.2.3.6	Palladium/Photoredox Catalysis for Oxidative Carbonylation	365
1.2.3.7	Palladium/Photoredox Catalysis for Carboxylation	366
1.2.3.8	Palladium/Photoredox Catalysis for Amination	368
1.2.3.9	Palladium/Photoredox Catalysis for Oxidation	371
1.2.4	<b>Gold/Photocatalyst Dual Catalysis</b> L. Barriault, M. Zidan, and S. Rohe	
1.2.4	<b>Gold/Photocatalyst Dual Catalysis</b>	377
1.2.4.1	Gold as a Lewis Acid	378
1.2.4.1.1	Alkynes as Electrophiles	378
1.2.4.1.1.1	Intramolecular Cyclizations with Oxygen-Based Nucleophiles	378
1.2.4.1.1.2	Intramolecular Cyclizations with Nitrogen-Based Nucleophiles	382
1.2.4.1.1.3	Intramolecular Cyclizations with Other Nucleophiles	387
1.2.4.1.1.4	Meyer–Schuster Cross-Coupling Reactions	391
1.2.4.1.1.5	Sonogashira-Type Cross-Coupling Reactions	395
1.2.4.1.2	Alkenes as Electrophiles	398
1.2.4.1.2.1	Ring Expansion	398
1.2.4.1.2.2	Cyclization Reactions	400
1.2.4.1.2.3	Cross-Coupling Reactions	401
1.2.4.1.3	Allenes as Electrophiles	404
1.2.4.2	Gold as a Photocatalyst with an Organocatalyst	407
1.2.4.3	Gold/Photocatalyst Cross Coupling Reactions	409
