

## Table of Contents

### 1.1 Metal-Catalyzed Intramolecular Coupling Reactions

S. Gao and D. Wang

<b>1.1</b>	<b>Metal-Catalyzed Intramolecular Coupling Reactions</b> .....	1
<b>1.1.1</b>	Palladium-Catalyzed Intramolecular Coupling Reactions .....	1
<b>1.1.1.1</b>	Palladium-Catalyzed Intramolecular Suzuki–Miyaura Coupling Reaction and Applications .....	1
<b>1.1.1.1.1</b>	Palladium-Catalyzed Intramolecular Suzuki–Miyaura Reaction with $sp^3$ Organoboron Reagents .....	2
<b>1.1.1.1.2</b>	Palladium-Catalyzed Intramolecular Suzuki–Miyaura Reaction with $sp^2$ Organoboron Reagents .....	7
<b>1.1.1.2</b>	Palladium-Catalyzed Intramolecular Stille Coupling and Applications .....	12
<b>1.1.1.3</b>	Palladium-Catalyzed Intramolecular Negishi Coupling and Applications .....	16
<b>1.1.1.4</b>	Palladium-Catalyzed Intramolecular Sonogashira Coupling and Applications ..	18
<b>1.1.1.5</b>	Palladium-Catalyzed Intramolecular Hiyama Reactions and Applications .....	22
<b>1.1.1.6</b>	Palladium-Catalyzed Intramolecular Arene–Alkene Coupling Through Dehydrogenative Cross Coupling .....	24
<b>1.1.2</b>	Intramolecular Nozaki–Hiyama–Kishi Coupling Reactions .....	31
<b>1.1.2.1</b>	Nickel-Catalyzed Intramolecular Alkenylchromium Cyclization and Applications	32
<b>1.1.2.2</b>	Nickel-Catalyzed Intramolecular Alkynylchromium Cyclization and Applications	35
<b>1.1.2.3</b>	Intramolecular Allylchromium Cyclization and Applications .....	36
<b>1.1.3</b>	Copper-Catalyzed Intramolecular Coupling Reactions .....	37
<b>1.1.3.1</b>	Copper-Catalyzed Intramolecular Ene–Yne Coupling Reactions and Applications	37
<b>1.1.3.2</b>	Copper-Catalyzed Stille-Type Cross Coupling and Applications .....	41
<b>1.1.4</b>	Nickel-Catalyzed Intramolecular Reductive Coupling between Organo Halides	44
<b>1.1.5</b>	Conclusions and Future Perspectives .....	50

### 1.2 Intramolecular Heck Reactions

S. Jammi, C. Nottingham, and P. J. Guiry

<b>1.2</b>	<b>Intramolecular Heck Reactions</b> .....	55
<b>1.2.1</b>	Non-Enantioselective Reactions .....	56
<b>1.2.1.1</b>	Formation of Small-Sized Rings (3 and 4) .....	57
<b>1.2.1.1.1</b>	3- and 4- <i>exo-trig</i> Processes .....	57
<b>1.2.1.1.1.1</b>	3- <i>exo-trig</i> Cyclization .....	57

1.2.1.1.1.2	4- <i>exo-trig</i> Cyclization	58
1.2.1.2	Formation of Common-Sized Rings (5 and 6)	59
1.2.1.2.1	5- and 6- <i>exo-trig</i> Processes	59
1.2.1.2.1.1	5- <i>exo-trig</i> Cyclization	59
1.2.1.2.1.2	6- <i>exo-trig</i> Cyclization	65
1.2.1.2.2	5- and 6- <i>endo-trig</i> Processes	69
1.2.1.2.2.1	5- <i>endo-trig</i> Cyclization	69
1.2.1.2.2.2	6- <i>endo-trig</i> Cyclization	72
1.2.1.3	Formation of Medium-Sized Rings (7 to 11)	73
1.2.1.3.1	7- and 8- <i>exo-trig</i> Processes	74
1.2.1.3.1.1	7- <i>exo-trig</i> Cyclization	74
1.2.1.3.1.2	8- <i>exo-trig</i> Cyclization	74
1.2.1.3.2	7- and 8- <i>endo-trig</i> Processes	75
1.2.1.3.2.1	7- <i>endo-trig</i> Cyclization	75
1.2.1.3.2.2	8- <i>endo-trig</i> Cyclization	76
1.2.1.4	Formation of Macrocycles (>11)	76
1.2.2	Enantioselective Reactions	77
1.2.2.1	Formation of Tertiary Carbon Centers	78
1.2.2.1.1	Tertiary Centers from Acyclic Alkenes	78
1.2.2.1.1.1	Reactions from Aryl Halides and Pseudohalides	78
1.2.2.1.1.2	Tertiary Centers from Cyclic Alkenes	81
1.2.2.1.1.2.1	Reactions from Aryl Halides and Pseudohalides	81
1.2.2.1.1.2.2	Reactions from Vinyl Halides and Pseudohalides	81
1.2.2.2	Formation of Quaternary Carbon Centers	85
1.2.2.2.1	Quaternary Centers from Acyclic Alkenes	85
1.2.2.2.1.1	Reactions from Aryl Halides and Pseudohalides	85
1.2.2.2.1.2	Reactions from Vinyl Halides and Pseudohalides	87
1.2.2.2.2	Quaternary Centers from Cyclic Alkenes	88
1.2.2.2.2.1	Reactions from Aryl Halides and Pseudohalides	88
1.2.3	Conclusions	91

**1.3 Metal-Catalyzed Intramolecular Allylic Substitution Reactions**

X. Zhang and S.-L. You

---

<b>1.3</b>	<b>Metal-Catalyzed Intramolecular Allylic Substitution Reactions</b> .....	95
<b>1.3.1</b>	Reactions with Carbon Nucleophiles .....	96
<b>1.3.1.1</b>	Resonance-Stabilized Enolates .....	96
<b>1.3.1.1.1</b>	Malonic Esters .....	96
<b>1.3.1.1.2</b>	$\beta$ -Keto Esters .....	99
<b>1.3.1.1.3</b>	Acetamides .....	101
<b>1.3.1.2</b>	Aliphatic Aldehydes .....	102
<b>1.3.1.3</b>	Ketones .....	104
<b>1.3.1.4</b>	Aliphatic Nitro Compounds .....	105
<b>1.3.1.5</b>	Indoles and Pyrroles .....	106
<b>1.3.1.5.1</b>	Friedel–Crafts-Type Reactions .....	106
<b>1.3.1.5.1.1</b>	Indoles with an Allylic Linkage at the C2-Position .....	106
<b>1.3.1.5.1.2</b>	Indoles with an Allylic Linkage at the C4-Position .....	110
<b>1.3.1.5.2</b>	Dearomatization Reactions .....	112
<b>1.3.1.5.2.1</b>	Allylic Dearomatization Reactions .....	112
<b>1.3.1.5.2.2</b>	Allylic Dearomatization/Migration Reactions .....	115
<b>1.3.1.6</b>	Phenols .....	118
<b>1.3.1.6.1</b>	Friedel–Crafts-Type Reactions .....	118
<b>1.3.1.6.2</b>	Dearomatization Reactions .....	119
<b>1.3.1.7</b>	Simple Arenes .....	121
<b>1.3.2</b>	Reactions with Nitrogen Nucleophiles .....	126
<b>1.3.2.1</b>	Protected Amines .....	126
<b>1.3.2.1.1</b>	Palladium Catalysis .....	126
<b>1.3.2.1.2</b>	Iridium Catalysis .....	128
<b>1.3.2.1.3</b>	Ruthenium Catalysis .....	131
<b>1.3.2.1.4</b>	Gold Catalysis .....	132
<b>1.3.2.1.5</b>	Catalysis by Other Metals .....	134
<b>1.3.2.2</b>	Pyridines and Pyrazines .....	136
<b>1.3.3</b>	Reactions with Oxygen Nucleophiles .....	137
<b>1.3.3.1</b>	Phenols .....	137
<b>1.3.3.2</b>	Aliphatic Alcohols .....	139
<b>1.3.3.3</b>	Esters .....	141
<b>1.3.3.4</b>	Acetimidates .....	143

1.3.4	Applications in the Syntheses of Natural Products and Drug Molecules	144
1.3.4.1	Allylic Alkylation	144
1.3.4.2	Allylic Amination	146
1.3.4.3	Allylic Etherification	147
1.3.5	Conclusions and Future Perspectives	148
1.4	<b>Metal-Catalyzed Intramolecular Cyclizations Involving Cyclopropane and Cyclopropene Ring Opening</b> X. Tang and M. Shi	
1.4	<b>Metal-Catalyzed Intramolecular Cyclizations Involving Cyclopropane and Cyclopropene Ring Opening</b>	151
1.4.1	Intramolecular Cyclizations of Cyclopropanes	151
1.4.1.1	Methylenecyclopropanes	151
1.4.1.1.1	Palladium-Catalyzed Cycloisomerization of Methylenecyclopropanes	151
1.4.1.1.2	Platinum-Catalyzed Cycloisomerization of Methylenecyclopropanes	159
1.4.1.1.3	Rhodium-Catalyzed Cycloisomerization of Methylenecyclopropanes	160
1.4.1.1.4	Nickel-Catalyzed Cycloisomerization of Methylenecyclopropanes	165
1.4.1.1.5	Copper-Catalyzed Cycloisomerization of Methylenecyclopropanes	166
1.4.1.1.6	Magnesium Chloride Catalyzed Cycloisomerization of Methylenecyclopropanes	167
1.4.1.1.7	Gold- or Silver-Catalyzed Cycloisomerization of Methylenecyclopropanes	168
1.4.1.2	Donor–Acceptor Cyclopropanes	176
1.4.1.2.1	Metal Trifluoromethanesulfonate Catalyzed Cycloisomerization of Donor–Acceptor Cyclopropanes	176
1.4.1.2.2	Gold- or Nickel-Catalyzed Cycloisomerization of Alkynylcyclopropyl Ketones	194
1.4.1.2.3	Copper-Catalyzed Cycloisomerization of Donor–Acceptor Cyclopropanes	196
1.4.1.2.4	Pentacarbonyltungsten-Catalyzed Cycloisomerization of Alkynylcyclopropyl Ketones or Oximes	197
1.4.1.3	Vinylidenecyclopropanes	199
1.4.1.3.1	Tin-Catalyzed Cycloisomerization of Vinylidenecyclopropanes	199
1.4.1.3.2	Gold-Catalyzed Cycloisomerization of Vinylidenecyclopropanes	200
1.4.1.3.3	Titanium-Catalyzed Cycloisomerization of Vinylidenecyclopropanes	206
1.4.1.3.4	Rhodium-Catalyzed Cycloisomerization of Vinylidenecyclopropanes	208
1.4.1.3.5	Copper-Catalyzed Cycloisomerization of Vinylidenecyclopropanes	209
1.4.1.4	Other Cyclopropanes	210
1.4.1.4.1	Gold-Catalyzed Cycloisomerization of Functionalized Cyclopropanes	210
1.4.1.4.2	Ruthenium-Catalyzed Cycloisomerization of Functionalized Cyclopropanes	217
1.4.1.4.3	Palladium-Catalyzed Cycloisomerization of Cyclopropane Aminals	221

1.4.1.4.4	Iron-Catalyzed Cycloisomerization of 1-(Alkynylcyclopropyl)alkanols	222
1.4.1.4.5	Silver-Catalyzed Cycloisomerization of Cyclopropanes	223
1.4.2	Intramolecular Cyclizations of Cyclopropenes	227
1.4.2.1	Rhodium-Catalyzed Cycloisomerization of Cyclopropenes	227
1.4.2.2	Ruthenium-Catalyzed Cycloisomerization of Cyclopropenes	234
1.4.2.3	Zinc-Catalyzed Cycloisomerization of Cyclopropanol-Substituted Cyclopropenes	235
1.4.2.4	Copper-Catalyzed Cycloisomerization of Cyclopropenes	237
1.4.2.5	Gold-Catalyzed Cycloisomerization of Cyclopropenes	241
1.4.3	Applications in the Syntheses of Natural Products and Drug Molecules	250
<b>1.5</b>	<b>Cyclization Reactions of Alkenes and Alkynes</b>	
	L. Zhang	
<b>1.5</b>	<b>Cyclization Reactions of Alkenes and Alkynes</b>	259
1.5.1	Unactivated Alkenes and Alkynes as Nucleophiles	259
1.5.1.1	Oxocarbenium-Based Electrophiles	259
1.5.1.1.1	Prins Cyclization between Homoallylic Alcohols and Aldehydes	260
1.5.1.1.1.1	Highly Stereoselective Iron(III)-Catalyzed Synthesis of <i>cis</i> -2-Alkyl-4-halotetrahydropyrans	261
1.5.1.1.1.2	Highly Stereoselective Rhenium(VII)-Catalyzed Synthesis of Tetrasubstituted Tetrahydro-2 <i>H</i> -pyran-4-ols	261
1.5.1.1.1.3	Indium(III) Chloride Catalyzed Synthesis of Spirotetrahydropyrans	263
1.5.1.1.1.4	Indium(III) Bromide Catalyzed Synthesis of 3-Oxaterpenoids	264
1.5.1.1.1.5	Highly Stereoselective Iron(III) Chloride Catalyzed Synthesis of Tetrahydro-2 <i>H</i> -pyran-4-ols with Complete OH Selectivity	266
1.5.1.1.2	Prins Cyclization Involving Nucleophilic Alkynes	268
1.5.1.1.2.1	Iron(III)-Catalyzed Cyclization of Alkynyl Aldehyde Acetals	268
1.5.1.1.3	Carbonyl-Ene Reactions	270
1.5.1.1.3.1	Chiral Copper(II)-Catalyzed Enantioselective Intramolecular Carbonyl-Ene Reactions of Unsaturated $\alpha$ -Oxo Esters	270
1.5.1.1.3.2	Chromium(III)-Catalyzed Enantioselective Catalytic Carbonyl-Ene Cyclization Reactions	271
1.5.1.1.3.3	Chromium(III)-Catalyzed Enantioselective Transannular Ketone-Ene Reactions	273
1.5.1.2	Iminium-Based Electrophiles in Aza-Prins Reactions	274
1.5.1.2.1	Iron(III)-Catalyzed Aza-Prins Cyclizations	274
1.5.1.2.2	Scandium(III) Trifluoromethanesulfonate Catalyzed Aza-Prins Cyclizations for the Synthesis of Heterobicycles	276

1.5.2	Metal-Activated Alkenes and Alkynes as Electrophiles	277
1.5.2.1	1,3-Dicarbonyl-Based Carbon Nucleophiles	278
1.5.2.1.1	Cyclizations onto Alkenes	278
1.5.2.1.1.1	Palladium-Catalyzed 6- <i>endo-trig</i> Cyclization of Alkenyl 1,3-Dicarbonyls	279
1.5.2.1.1.2	Gold-Catalyzed 5- <i>exo-trig</i> Cyclization of Alkenyl $\beta$ -Oxo Amides	280
1.5.2.1.1.3	Gold-Catalyzed <i>exo-trig</i> Cyclization of Alkenyl Ketones	281
1.5.2.1.2	Cyclizations onto Alkynes	283
1.5.2.1.2.1	Cationic Gold(I) Catalyzed Conia-Ene Reactions	283
1.5.2.1.2.2	Zinc-Catalyzed Conia-Ene Reactions	286
1.5.2.1.2.3	Iron(III)-Catalyzed Stannyl Conia-Ene Cyclization	287
1.5.2.2	Arene-Based Carbon Nucleophiles (Friedel–Crafts-Type)	288
1.5.2.2.1	Cyclizations onto Alkenes	288
1.5.2.2.1.1	Ruthenium(III)-Catalyzed Intramolecular Hydroarylation of Unactivated Alkenes	288
1.5.2.2.1.2	Metal-Catalyzed Cyclization of Aryl Allylic Alcohols	290
1.5.2.2.2	Cyclizations onto Alkynes	292
1.5.2.2.2.1	Formation of Dihydronaphthalenes	293
1.5.2.2.2.2	Formation of Phenanthrenes and Other Related Arenes	294
1.5.2.2.2.3	Dehydrative Formation of Carbazoles	299
1.5.2.2.2.4	Formation of 2 <i>H</i> -1-Benzopyran-2-ones and Quinolin-2(1 <i>H</i> )-ones	300
1.5.2.2.2.5	Formation of 2 <i>H</i> -1-Benzopyrans and Dihydroquinolines	302
1.5.2.2.2.6	Formation of Seven-Membered-Ring Annulated Indoles	305
1.5.2.2.2.6.1	Annulation with Nitroenynes	305
1.5.2.2.2.6.2	Annulation with Enynones	307
1.5.3	Applications in the Synthesis of Natural Products and Relevant Structures	309
1.5.3.1	Based on the Prins Cyclization	309
1.5.3.2	Based on Nucleophilic Addition to Metal-Activated Alkenes and Alkynes	311
1.5.4	Conclusions and Future Perspectives	313

## 1.6 Metal-Catalyzed Cyclization Reactions of Allenes

A. M. Phelps, J. M. Alderson, and J. M. Schomaker

---

1.6	<b>Metal-Catalyzed Cyclization Reactions of Allenes</b>	317
1.6.1	Intramolecular C–O Bond Formation	321
1.6.1.1	Palladium-Catalyzed Synthesis of 2,3-Dihydrofurans from Allenic $\beta$ -Oxo Esters	321
1.6.1.2	Palladium-Catalyzed Synthesis of 2,5-Dihydrofurans from $\alpha$ -Hydroxyallenes	321
1.6.1.3	Gold-Catalyzed Cyclization of Allenates To Form Functionalized Butenolides	322
1.6.1.4	Gold-Catalyzed Cyclization of $\alpha$ -Hydroxyallenes to 2,5-Dihydrofurans	323

1.6.2	Intramolecular C—N Bond Formation	324
1.6.2.1	Rhodium-Catalyzed Synthesis of Nitrogen-Containing Stereotriads from Allenes	324
1.6.2.2	Gold-Catalyzed Enantioselective Intramolecular Hydroamination of Allenes with Ureas	326
1.6.2.3	Gold-Catalyzed Enantioselective Intramolecular Hydroamination of Allenes with Sulfonamides	327
1.6.2.4	Silver-Catalyzed Synthesis of 4-Vinyloxazolidin-2-ones from Allenyl Carbamates	328
1.6.2.5	Silver-Catalyzed Dynamic Kinetic Enantioselective Intramolecular Hydroamination of Allenes	329
1.6.2.6	Gold-Catalyzed Cycloisomerization of $\alpha$ -Aminoallenes to 2,5-Dihydropyrroles	330
1.6.3	C—C Bond Formation	331
1.6.3.1	Palladium-Catalyzed Carbocyclization of Allenes	331
1.6.3.2	Rhodium- or Copper-Catalyzed Divergent Carbene Reactivity with Allenic Diazo Esters	333
1.6.3.3	Gold-Catalyzed Intramolecular Hydroarylation of 2-Allenic Indoles	334
1.6.3.4	Gold-Catalyzed Hydroarylation of Allenic Anilines and Phenols	336
1.6.3.5	Gold-Catalyzed Intramolecular Hydroarylation of Allenes	337
1.6.3.6	Palladium-Catalyzed Synthesis of Cyclopropanes via Coupling/Cyclization of Allenic Malonates with Organic Halides	338
1.6.3.7	Palladium-Catalyzed Synthesis of Eight- to Ten-Membered Lactones from Allenic 3-Oxoalkanoates and Organic Halides	340
1.6.3.8	Palladium-Catalyzed Synthesis of Nine- to Twelve-Membered Cyclic Compounds from Allenes Containing a Nucleophilic Functionality and Organic Halides	341
1.6.4	C—S Bond Formation	342
1.6.4.1	Cycloisomerization of Sulfanylallenes to 2,5-Dihydrothiophenes	342
1.6.5	Total Synthesis Using Allene Cyclization	343
1.6.5.1	Gold-Catalyzed Cycloisomerization of Dihydroxyallenes to 2,5-Dihydrofurans	343
1.6.5.2	Silver-Catalyzed Cyclization of Allenic Hydroxylamines	344
1.6.5.3	Synthesis of Flinderoles B and C through Gold-Catalyzed Allene Hydroarylation	344
1.6.5.4	Palladium-Catalyzed Domino Cyclization of Allenes Bearing Amino and Bromoindolyl Groups	345
1.6.6	Conclusions	346

1.8.3.2	Hydroacyloxylation of Alkynes	474
1.8.3.2.1	Gold Catalysis	475
1.8.3.3	Hydroalkoxylation of Alkenes	475
1.8.3.3.1	Iron Catalysis	476
1.8.3.3.2	Platinum Catalysis	476
1.8.3.3.3	Ruthenium Catalysis	478
1.8.3.3.4	Silver Catalysis	478
1.8.3.4	Hydroacyloxylation of Alkenes	480
1.8.3.4.1	Silver Catalysis	480
1.8.3.5	Oxidative Alkoxylation of Alkenes	481
1.8.3.5.1	Palladium Catalysis	481
1.8.3.6	Oxidative Alkoxylation of Arenes	484
1.8.3.6.1	Copper Catalysis	484
1.8.3.7	Alkoxylation of Aryl or Vinyl Halides	485
1.8.3.7.1	Copper Catalysis	486
1.8.3.7.2	Palladium Catalysis (Buchwald-Type Reaction)	489
1.8.3.8	Alkoxylation of Alkynes	490
1.8.3.8.1	Palladium Catalysis	490
1.8.3.9	Carboalkoxylation of Alkynes	491
1.8.3.9.1	Palladium Catalysis	491
1.8.3.10	Carboalkoxylation of Alkenes	494
1.8.3.10.1	Palladium Catalysis	494
1.8.3.11	Applications in the Syntheses of Natural Products and Drug Molecules	495
1.8.4	Conclusions	498
