1.1	Introduction to N-Heterocyclic Carbenes	
1.1.1	Historic Perspectives on Carbenes F. Nahra and C. S. J. Cazin	
1.1.1	Historic Perspectives on Carbenes	1
1.1.2	Types of N-Heterocyclic Carbenes C. Segarra and M. Albrecht	
1.1.2	Types of N-Heterocyclic Carbenes	5
1.1.2.1	Introduction to N-Heterocyclic Carbenes	5
1.1.2.2	Classification: Normal versus Abnormal (Mesoionic) and Remote versus Nonremote N-Heterocyclic Carbenes	6
1.1.2.3	Four-Membered N-Heterocyclic Carbenes	8
1.1.2.4	Five-Membered N-Heterocyclic Carbenes	9
1.1.2.4.1	Abnormal Imidazolylidenes	9
1.1.2.4.2	Abnormal Triazolylidenes	11
1.1.2.4.3	Pyrazolylidenes	12
1.1.2.4.4	Cyclic Alkyl(amino)carbenes (CAACs)	12
1.1.2.5	Six-Membered N-Heterocyclic Carbenes	13
1.1.2.5.1	Ring-Expanded N-Heterocyclic Carbenes	13
1.1.2.5.2	Pyridylidenes	14
1.1.2.6	Seven-Membered N-Heterocyclic Carbenes	14
1.1.2.7	Conclusions and Outlook	15
1.1.3	Synthesis of N-Heterocyclic Carbenes and Their Precursors H. V. Huynh and D. Yuan	
1.1.3	Synthesis of N-Heterocyclic Carbenes and Their Precursors	19
1.1.3.1	Synthesis of N-Heterocyclic Carbene Precursors	19
1.1.3.1.1	Alkylation of Azoles	19
1.1.3.1.2	Cyclization of Diamines	25
1.1.3.1.3	Cyclization of Diimines	27
1.1.3.1.4	Cyclization of N,N'-Disubstituted Formamidines	29

1.1.3.2	Synthesis of Free N-Heterocyclic Carbenes	33
1.1.3.2.1	Deprotonation of Azolium Salts	34
1.1.3.2.2	Desulfurization of Thiones	39
1.1.3.2.3	Pyrolysis of N-Heterocyclic Carbene–HX Adducts (HX = Volatile Molecule)	42
1.1.3.2.4	Reduction of Chloroformamidinium Salts	43
1.1.4	Synthesis of N-Heterocyclic Carbene Complexes M. Ruamps, G. Lavigne, and V. César	
<hr/>		
1.1.4	Synthesis of N-Heterocyclic Carbene Complexes	47
1.1.4.1	Complexation of a Preformed Free N-Heterocyclic Carbene	47
1.1.4.2	Metal-Induced Decomposition of an N-Heterocyclic Carbene Adduct	48
1.1.4.3	In Situ Generation of N-Heterocyclic Carbenes with an External Base or a Metallic Precursor Bearing a Basic Ligand	49
1.1.4.3.1	N-Heterocyclic Carbene Complexes of Groups 1 and 2 and of Early Transition Metals	50
1.1.4.3.2	N-Heterocyclic Carbene Complexes of Late Transition Metal Complexes	50
1.1.4.4	Transmetalation Using a Silver- or Copper–N-Heterocyclic Carbene Complex	52
1.1.4.5	Template Synthesis by Addition of a Nucleophile onto a Coordinated Isocyanide	53
1.1.5	Quantifying Steric and Electronic Properties of N-Heterocyclic Carbenes S. V. C. Vummaleti, L. Falivene, and L. Cavallo	
<hr/>		
1.1.5	Quantifying Steric and Electronic Properties of N-Heterocyclic Carbenes	59
1.1.5.1	From Percentage of Buried Volume (%V _{Bur}) to Steric Maps	59
1.1.5.2	Case Study: NHCs in Asymmetric Reactions	63
1.1.5.3	Quantifying the Electronics of NHCs	65
1.1.5.3.1	The Tolman Electronic Parameter (TEP)	65
1.1.5.3.2	³¹ P and ⁷⁷ Se NMR Methods	66
1.1.5.4	Case Study: π -Accepting Abilities of NHCs in Selenoureas and Phosphinidenes	67
1.1.5.5	Conclusions	76

1.2	Cross Coupling	
1.2.1	Suzuki–Miyaura Coupling M. J. Chetcuti	
1.2.1	Suzuki–Miyaura Coupling	79
1.2.1.1	Suzuki–Miyaura Reactions Catalyzed by Palladium–N-Heterocyclic Carbene Species	81
1.2.1.1.1	Catalysis by Palladium–N-Heterocyclic Carbene Species	82
1.2.1.1.2	Asymmetric Catalysis by Chiral Palladium–N-Heterocyclic Carbene Species ..	109
1.2.1.1.3	Suzuki–Miyaura Reactions in Water Catalyzed by Palladium–N-Heterocyclic Carbene Complexes	113
1.2.1.2	Suzuki–Miyaura Reactions Catalyzed by Nickel–N-Heterocyclic Carbene Species	116
1.2.2	Cross-Coupling Reactions Other Than Suzuki–Miyaura Coupling M. Ogasawara	
1.2.2	Cross-Coupling Reactions Other Than Suzuki–Miyaura Coupling	141
1.2.2.1	Kumada–Tamao–Corriu Coupling	142
1.2.2.1.1	Kumada–Tamao–Corriu Coupling Catalyzed by Palladium–N-Heterocyclic Carbene Species Generated In Situ	142
1.2.2.1.2	Kumada–Tamao–Corriu Coupling Catalyzed by Well-Defined Palladium–N-Heterocyclic Carbene Species	143
1.2.2.2	Negishi Coupling	147
1.2.2.2.1	Negishi Coupling Catalyzed by Palladium–N-Heterocyclic Carbene Species Generated In Situ	147
1.2.2.2.2	Negishi Coupling Catalyzed by Well-Defined Palladium–N-Heterocyclic Carbene Species	148
1.2.2.3	Stille Coupling	151
1.2.2.4	Hiyama Coupling	152
1.2.2.4.1	Hiyama Coupling Catalyzed by Palladium–N-Heterocyclic Carbene Species Generated In Situ	152
1.2.2.4.2	Hiyama Coupling Catalyzed by Well-Defined Palladium–N-Heterocyclic Carbene Species	153
1.2.2.5	Sonogashira Coupling	154
1.2.2.5.1	Sonogashira Coupling Catalyzed by Palladium–N-Heterocyclic Carbene Species Generated In Situ	154
1.2.2.5.2	Sonogashira Coupling Catalyzed by Well-Defined Palladium–N-Heterocyclic Carbene Species	155
1.2.2.6	Cross-Coupling Reactions of Organolithium Reagents	157

1.2.3	The Buchwald–Hartwig Reaction A. R. Martin	
<hr/>		
1.2.3	The Buchwald–Hartwig Reaction	161
1.2.3.1	Coupling Reactions Involving (Het)Aryl Chlorides	162
1.2.3.1.1	Palladium Catalysis	162
1.2.3.1.1.1	Seminal Work	162
1.2.3.1.1.2	Classical Methodologies	163
1.2.3.1.1.3	Protocols Using Mild Bases	167
1.2.3.1.1.4	Air-Tolerant Processes	168
1.2.3.1.1.5	Room-Temperature Reactions	169
1.2.3.1.2	Nickel Catalysis	170
1.2.3.2	Coupling Reactions Involving (Het)Aryl Bromides and Iodides	172
1.2.3.2.1	Palladium Catalysis	172
1.2.3.2.1.1	Carbonylative Coupling	172
1.2.3.2.2	Nickel Catalysis	174
1.2.3.3	Coupling Reactions Involving Pseudohalides	175
1.2.3.3.1	Trifluoromethanesulfonates	175
1.2.3.3.2	4-Toluenesulfonates	176
1.2.3.3.3	Phosphates	177
1.2.3.3.4	Methyl Ethers	177
1.2.3.3.5	Pivalates	178
1.2.3.3.6	Carbamates and Sulfamates	179
1.2.4	C–O, C–S, and C–B Bond Formation T. O. Ronson and I. J. S. Fairlamb	
<hr/>		
1.2.4	C–O, C–S, and C–B Bond Formation	183
1.2.4.1	C–O Bond Formation	183
1.2.4.1.1	Using Palladium Catalysts	183
1.2.4.1.2	Using Copper Catalysts	184
1.2.4.2	C–S Bond Formation	186
1.2.4.2.1	Using Palladium Catalysts	187
1.2.4.2.2	Using Nickel Catalysts	191
1.2.4.3	C–B Bond Formation	193
1.2.4.3.1	Using Palladium Catalysts	193
1.2.4.3.2	Using Zinc Catalysts	195
1.2.4.4	Conclusions	196

1.3	C—H Bond Functionalization M. Elie, J.-L. Renaud, and S. Gaillard	
1.3	C—H Bond Functionalization	199
1.3.1	C(sp ³)—H Bond Functionalizations	199
1.3.1.1	Carbene Insertion	199
1.3.1.2	Michael Reactions	204
1.3.1.3	α -Arylation of Carbonyl Derivatives	205
1.3.1.4	α -Arylation of Benzylic Derivatives	214
1.3.1.5	α -Arylation of Unactivated Methylenes	216
1.3.1.6	Tandem Aminoalkylation/C—H Bond Functionalization	217
1.3.1.7	Oxidative Cross Coupling	219
1.3.1.8	Coupling between Alcohols and Alkynes	219
1.3.1.9	Photocatalyzed Cyanation of Tetrahydroisoquinolines	220
1.3.1.10	β -Alkynylation of Amides	221
1.3.2	C(sp ²)—H Bond Functionalizations	222
1.3.2.1	Carbene Insertion	223
1.3.2.2	Hydrocarbonylation of Alkenes	224
1.3.2.3	Hydroalkenylation of Alkenes	226
1.3.2.4	Coupling Reaction between Alkenes and Aldehydes	229
1.3.2.5	Decarboxylative Arylation of Heteroaromatic Derivatives	230
1.3.2.6	Cross-Coupling Reactions	231
1.3.2.7	Oxidative Coupling	238
1.3.2.8	Hydrovinylation of Alkynes	239
1.3.2.9	Coupling between Alkenes and Isocyanates	242
1.3.2.10	Halogenation	243
1.3.2.11	Deuteration	244
1.3.2.12	Borylation	247
1.3.2.13	Silylation	248
1.3.2.14	Formal Oxidation of Aldehydes to Amides	249
1.3.2.15	Tishchenko Reaction	250
1.3.2.16	Esterification of Aldehydes with Boronic Acids	251
1.3.2.17	Sulfanylation of Heteroaromatic Derivatives	252
1.3.3	C(sp)—H Bond Functionalizations	253
1.3.3.1	Alkenylation of Nitrones	254
1.3.3.2	Allylic Substitution	254
1.3.3.3	Dimerization of Alkynes	256
1.3.4	Conclusions	257

1.4 Addition Reactions

1.4.1 HydrogenationY. Makida and R. Kuwano

1.4.1	Hydrogenation	261
1.4.1.1	Hydrogenation of Alkenes	262
1.4.1.1.1	Hydrogenation Catalyzed by Iron	262
1.4.1.1.2	Hydrogenation Catalyzed by Ruthenium	263
1.4.1.1.3	Hydrogenation Catalyzed by Cobalt	265
1.4.1.1.4	Hydrogenation Catalyzed by Rhodium	266
1.4.1.1.5	Hydrogenation Catalyzed by Iridium	267
1.4.1.1.6	Hydrogenation Catalyzed by Nickel	268
1.4.1.1.7	Hydrogenation Catalyzed by Palladium	269
1.4.1.2	Hydrogenation of Alkynes to Alkenes	270
1.4.1.2.1	Hydrogenation Catalyzed by Palladium	270
1.4.1.2.2	Hydrogenation Catalyzed by Copper	272
1.4.1.2.3	Hydrogenation Catalyzed by a Silver/Ruthenium Bimetallic Complex	272
1.4.1.3	Hydrogenation of Carbonyl and Related Compounds	273
1.4.1.3.1	Hydrogenation Catalyzed by Ruthenium	273
1.4.1.3.2	Hydrogenation Catalyzed by Zinc	275
1.4.1.4	Hydrogenation of (Het)Arenes	276
1.4.1.4.1	Hydrogenation Catalyzed by Ruthenium	276
1.4.1.4.2	Hydrogenation Catalyzed by Iridium	281

1.4.2 Transfer HydrogenationM. K. Whittlesey

1.4.2	Transfer Hydrogenation	285
1.4.2.1	Initial Reports of Transition-Metal–NHC-Catalyzed Transfer Hydrogenation ..	285
1.4.2.2	Transfer Hydrogenation of Ketones	286
1.4.2.3	Transfer Hydrogenation of Aldehydes	288
1.4.2.4	Transfer Hydrogenation of Carbon Dioxide	290
1.4.2.5	Transfer Hydrogenation of C=C and C≡C Bonds	291
1.4.2.6	Transfer Hydrogenation of C=N Bonds and Nitro Groups	294
1.4.2.7	Asymmetric Transfer Hydrogenation Involving N-Heterocyclic Carbene Complexes	297

1.4.3	Hydrosilylation L. Baudrenghien and I. E. Markó	
<hr/>		
1.4.3	Hydrosilylation	301
1.4.3.1	Synthesis of Platinum–N-Heterocyclic Carbene Catalysts	302
1.4.3.1.1	First-Generation Platinum–Carbene Catalysts	302
1.4.3.1.2	Second-Generation Platinum–Carbene Catalysts	306
1.4.3.1.3	Third-Generation Platinum–Carbene Catalysts	308
1.4.3.2	Hydrosilylation of Alkenes	309
1.4.3.2.1	Using First-Generation Catalysts	309
1.4.3.2.2	Using Third-Generation Catalysts	311
1.4.3.3	Hydrosilylation of Alkynes	312
1.4.3.3.1	Using First-Generation Catalysts	313
1.4.3.3.2	Using Second-Generation Catalysts	315
1.4.3.3.3	Using Third-Generation Catalysts	317
1.4.3.4	Conclusions	320
1.4.4	Catalytic Boron Addition Reactions A. B. Cuenca and E. Fernández	
<hr/>		
1.4.4	Catalytic Boron Addition Reactions	323
1.4.4.1	C–B Bond Formation: Synthetic Applications	323
1.4.4.2	Hydroboration of Unsaturated Substrates	324
1.4.4.3	β -Boration of α,β -Unsaturated Substrates	335
1.4.4.4	Diboration of Carbon–Carbon and Carbon–Heteroatom Multiple Bonds	343
1.4.4.5	Carboboration	348
1.4.5	Hydroamination P. R. Payne and M. R. Gagné	
<hr/>		
1.4.5	Hydroamination	361
1.4.5.1	N-Heterocycles by Intramolecular Hydroamination	364
1.4.5.1.1	From Aminoalkynes	364
1.4.5.1.2	From Aminoallenes	367
1.4.5.1.2.1	Synthesis of 2-Vinylpyrrolidines	367
1.4.5.1.2.2	Synthesis of Bicyclic Imidazolidin-2-ones	367
1.4.5.1.3	From Aminoalkenes	368
1.4.5.1.3.1	Secondary N-Heterocycles from Primary Aminoalkenes	368
1.4.5.1.3.2	N-Alkyl, N-Sulfonyl, and N-Acyl Heterocycles from Secondary Aminoalkenes	369

1.4.5.2	Imines, Enamines, Hydrazones, and Amines by Intermolecular Hydroamination	371
1.4.5.2.1	From Alkynes	371
1.4.5.2.1.1	Synthesis of Imines and Enamines	371
1.4.5.2.1.2	Synthesis of Hydrazones	374
1.4.5.2.1.3	Synthesis of Amines	375
1.4.5.2.1.4	Synthesis of 1-Substituted Benzo[<i>b</i>][1,4]diazepines	377
1.4.5.2.1.5	Synthesis of Substituted Quinolines and 1,2-Dihydroquinolines	377
1.4.5.2.2	From Allenes	379
1.4.5.2.2.1	Synthesis of Allylamines	379
1.4.5.2.3	From Activated Alkenes	382
1.4.5.2.3.1	Synthesis of Substituted Amines	382
1.4.6	Hydrothiolation, Hydroalkoxylation, and Hydroaryloxylation P. de Frémont	
1.4.6	Hydrothiolation, Hydroalkoxylation, and Hydroaryloxylation	387
1.4.6.1	Hydrothiolation	387
1.4.6.1.1	Hydrothiolation of Alkynes under Homogeneous Conditions Using Nickel(II)–N-Heterocyclic Carbene Complexes	389
1.4.6.1.2	Hydrothiolation of Alkynes under Homogeneous Conditions Using Rhodium(I)–N-Heterocyclic Carbene Complexes	391
1.4.6.1.3	Hydrothiolation of Alkynes under Heterogeneous Conditions Using Copper(I)–N-Heterocyclic Carbene Complexes	392
1.4.6.1.4	Hydrothiolation of Electron-Deficient Alkenes under Homogeneous Conditions Using Copper(I)–N-Heterocyclic Carbene Complexes	394
1.4.6.1.5	Hydrothiolation of Electron-Deficient Alkenes under Heterogeneous Conditions Using Copper(I)–N-Heterocyclic Carbene Complexes	395
1.4.6.2	Hydroalkoxylation	396
1.4.6.2.1	Intermolecular Hydroalkoxylation of Alkynes Using Gold(I)–N-Heterocyclic Carbene Complexes	396
1.4.6.2.2	Tandem Intermolecular Hydroalkoxylation/Claisen Rearrangement of Alkynes Using Gold(I)–N-Heterocyclic Carbene Complexes	398
1.4.6.2.3	Intermolecular Hydroalkoxylation of Allenes Using Gold(I)–N-Heterocyclic Carbene Complexes	399
1.4.6.2.4	Intermolecular Dehydrative Hydroalkoxylation of Allylic Alcohols Using Gold(I)–N-Heterocyclic Carbene Complexes	401
1.4.6.2.5	Intramolecular Hydroalkoxylation of Alkynes Using Copper(I)–N-Heterocyclic Carbene Complexes	401

1.4.6.2.6	Intramolecular Hydroalkoxylation of Alkynes Using Palladium(II)–N-Heterocyclic Carbene Complexes	402
1.4.6.2.7	Intermolecular Hydroalkoxylation of Electron-Deficient Alkenes Using Copper(I)–N-Heterocyclic Carbene Complexes	403
1.4.6.2.8	Intermolecular Hydroalkoxylation of Electron-Deficient Alkenes Using Gold(I)–N-Heterocyclic Carbene Complexes	404
1.4.6.2.9	Intermolecular Hydroalkoxylation of Conjugated Enones Using Free N-Heterocyclic Carbenes	404
1.4.6.3	Hydroaryloxylation	405
1.4.6.3.1	Hydroaryloxylation of Internal Alkynes under Homogeneous Conditions Using Gold(I)–N-Heterocyclic Carbene Complexes	406
1.4.6.3.2	Hydroaryloxylation of Electron-Deficient Alkenes under Homogeneous Conditions Using a Copper(I)–N-Heterocyclic Carbene Complex	408
1.4.6.4	Conclusions	408
1.4.7	Hydration A. Biffis and C. Tubaro	
<hr/>		
1.4.7	Hydration	411
1.4.7.1	Hydration of Alkynes	411
1.4.7.1.1	Gold-Based Catalysts	411
1.4.7.1.2	Catalysts Based on Other Metals	417
1.4.7.2	Hydration of Nitriles	418
1.4.7.2.1	Gold-Based Catalysts	419
1.4.7.2.2	Catalysts Based on Other Metals	420
1.4.7.3	Hydration of Other Substrates	422
1.4.7.4	Conclusions	423
1.4.8	Hydroarylation Y. Nakao	
<hr/>		
1.4.8	Hydroarylation	425
1.4.8.1	Hydroarylation of Alkenes	425
1.4.8.2	Hydroarylation of Alkenes	428
1.4.8.3	Hydroarylation and Hydroarylation of Alkynes	436

1.4.9	Chloroacylation and Chloroalkoxycarbonylation of Alkynes D. N. Lastovickova, A. J. Teator, and C. W. Bielawski	
1.4.9	Chloroacylation and Chloroalkoxycarbonylation of Alkynes	439
1.4.9.1	Chloroalkoxycarbonylation of Alkynes Catalyzed by Rhodium–N-Heterocyclic Carbene Complexes	440
1.4.9.1.1	Synthesis of (Z)-3-Chloroacrylates	440
1.4.9.2	Chloroacylation of Alkynes Catalyzed by Iridium–N-Heterocyclic Carbene Complexes	442
1.4.9.2.1	Synthesis of (Z)- β -Chloro- α,β -unsaturated Ketones	442
1.4.9.2.2	Synthesis of 2,5-Disubstituted Furans	444
1.4.10	Hydroformylation A. M. Trzeciak	
1.4.10	Hydroformylation	447
1.4.10.1	Reaction of Rhodium–Phosphine Complexes with N-Heterocyclic Carbene Ligands	447
